Gee, thanks for that tidbit of information, Walter. I'll have to
fix that in my ITU prefix list, it's so hard to keep up with all
these new prefixes.

>Admit it, Jim, you're full of shit.

Or else I have better sense of humor than you do. Anyway, I'm
surprised at you, Walter. I thought you British boys were more
reserved than that. Bad nite at the pub ? You keep posting things
like that and the RSGB might assign you a new callsign, like M0RON.
If you'd like to try your hand at Usenet potty mouth, sneak over to
that other newsgroup, REC.RADIO.AMATEUR.POLICY, they like that
stuff over there.

>I'm not surprised to learn that, Jim. We all know you can't hear
>anything further away than W7.

You might want to explain how 'we' figured that out, just for grins.
Don't tell me, you have a propagation program for your Macintosh.
Wow, where did you get that ? Does it have a function key that
lets you display all the things I can't hear ? Could you print me out
a list and email it to me so I don't have to bother working stuff I
can't hear ?

But don't take it so personal, might have just been propagation
wasn't right that nite. As I said, I heard the other guy talking to you
and saw your call on the screen so I know you were really there.

I would have even called you if I had heard you, I've never talked
to a newsgroup personality on my radio, but like they say, you can't
work 'em if you can't hear 'em........

Maybe it wasn't even you. Maybe there was a QRP station someplace
bootlegging your call, but I can't imagine why any self respecting
QRP'er would do that.

>ROTFL ;-)

Why, is there a mirror in your shack ?

Whaddaya mean? I thought our QSO on 15m CW was gooooooooood contact with report and all that stuff. Do I need a new pair of ears? Did I work that super-duper station CH2D from Montreal or what? In case I didn't make it into your log, please suggest a CW DX-net where some KH2 guys can be found.

end of quote

For U.S. Hams operators, you will also capture a lot of QSOs from Canadians (some are real "bootleggers" whit no licence at all, or phony call sign from other country, or call using VE0 and the first tree letters of there sail boat, below 14.150MHz). Many are using Pactor Server ETC...

I notice from the hunderd or so responses, it boils down to 2 types of reply:

1. "You can't use them like this, that's not what they are for, it says in blah-blah that...."

and 2. "I've been using one to power trolling boat motor/ radio transmitter equipment/ lawn mower/ elctric lighting for years with same battery."

Debate continues...

Now you've forced me to send my "Benefits of contesting file:"

You say that because you don't understand the benefits of contests. Only the most efficient and robust equipment installations, from radios, operating position, lead-in, to antenna, can be a serious contender. Here, you'll find only the very best operators, knowledgeable of propagation conditions, international procedures, and operating techniques who, when hearing something as simple as a single "dit", know how to interpret such a cue.

These exceptional operators and the powerhouse stations they operate are whom your community turns to when disaster strikes, for these communicators voluntarily "train" themselves weekend after weekend, in the most grueling mental and physical activity known to the amateur radio service. No other operators are better prepared for the rigors of providing emergency communications for the duration of the emergency than contesters.

One problem, Mark, is that the battery supplies only 12 volts. Most mobile equipment is designed for 13.6 VDC operation from a vehicle battery being charged. The last few volts is really important. My TS140-S puts out 77 watts CW at 12 volts and 120 watts at 13.6 volts. This seems more pronounced than most, but is not unexpected. For emergency or casual use... sure, it will work fine, but I'd want a better source for a permanent installation.

Yes!!!

Nuclear X-rays and Prompt Gamma pulses create a very broadband Electromagnetic Pulse (EMP) that easily exceeds 50,000 volts per meter (50,000 times 80meters/2 (half wave) equals 4,000,000 million volts across your 80 meter dipole). By the way, that is 42 billion watts in 377 ohm atmosphere across your antenna!!!!

During the 50's when Above Ground Nuclear testing was being performed, the STARFISH event, 700 miles from Hawaii, turned off the power grid in Hawaii. That was in the days of Vacuum Tubes...what happens today in the solid state world?

Extensive studies and tests have been performed in this area...nuclear weapons x-ray and gamma radiation will kill your radio and most everything else.

You have life confused with ham radio, David. Life is important. Ham radio is merely a hobby, a way to pass the time by shooting electromagnetic magic off into the ionosphere and then listening to see what magic returns.......

I can't equate a bogus QSL card with somebody raping your sister or robbing a bank, I'm sorry. If you can, I think you are taking this DXCC stuff a bit too seriously. I don't remember saying that I support dishonesty, I think you are assuming I do.

>> Never forget, ham radio is NOT a job. It's an adventure......

>Correct, if you can't do it with truth, then why do it?

I do it with truth, as I do life with truth. I never say or do anything I feel is dishonest. I have never cheated for any awards. I can prove that statement because I don't have any awards. I have never been on the giving or receiving end of a bogus QSL card.

But I can't verify that 800,000 hams all over the world have done the same. It's not my job to make sure everybody is honest. It's only my job to make sure that I am honest...... Once presented with the rules for playing the game, everyone has to make their own decisions on how they will play.

>See first answer! If it didn't matter to you, why did you address this
>issue in the first place!

Walter already answered that question. He says that anything I post here is just to disagree with him. I'll give you the real answer to that question at the end of this message..... If you have time, keep reading. If you are too busy trying to work SC8N in the pileup, I'll understand.

>Anyone can get any award they want by cheating! But of what value is
>it? If it was not done with honor and truth, it is not worth the paper
>it is written on!

Exactly my point. To start off with, we don't even know that the original poster wanted a card for a precious DXCC credit, so we can't condemn him for 'cheating', because we don't know that he is.

Maybe he wanted it for his private shoebox, and who are we to set standards for the filling of shoeboxes with postcards ? We can't dictate our morals to him just because he is a ham. It was his Mom and Dads job to teach him morals, not ours.

I agree when you say an award obtained by 'cheating' is of no value. Since so many DXCC awards have been obtained by 'cheating', I question the validity of the entire program. It's a well documented fact that many people have been caught cheating on DXCC. If some have been caught, it verifies the fact that there are most likely others who have not.

But there is something else you don't seem to realize, David. Your DXCC (if you have one), which you have obtained it through the strictest of moral standards, may hold the highest of value for you, but it holds no value for me whatsoever. My DXCC (if I had one) holds zero value for you. I'm positive that when your DXCC yearbook came in the mail, you didn't rip it out of the envelope and immediately look up KH2D to see how I was doing. You looked up you. And everybody else did the same. If you think hams all over the world are concerned with your DXCC accomplishments, I think you are only fooling yourself.

In 25 years of hamming I have had many hams visit my shack. I have never had one ask to see my DXCC certificate, nor have I had one ask to see my shoebox full of QSL cards. Nobody really cares what I worked or didn't work but me. So if nobody really cares about my DX activities except me, why should anybody but me set the standards for me ?

I promise I won't participate in any of the awards programs that you participate in like DXCC, so I won't stain your paperwork by obtaining a DXCC certificate with my standards. To me, a DXCC certificate isn't worth the price of admission. I don't need to pay the ARRL to verify what I have worked, I already know what I have worked. It's all in the log. I don't condemn you for having a DXCC certificate, and hopefully you won't condemn me for not wanting one. If I had one, I would feel it's value was diminished because other people have cheated on theirs.

I don't measure the worth of other hams I meet by the number of stickers on their DXCC certificates, I measure their worth based on the same criteria I measure any other people I meet in life, and most people I meet in life don't come with DXCC stickers attached to them.

Previously you asked me why I responded to this subject in the first place. Here's why. A guy came along and asked for QSL info. He asked the fraternal brotherhood of hams for a tiny bit of help. I don't know who this guy was, maybe he's a 'new' guy in ham radio, maybe he's only been a ham for six months. I know who HC8N is, I've worked that call in a few of contests, the last time in a CW contest. I imagine it's safe to assume that

in a CW contest HC8N is zipping along with CT at 35 wpm like
the rest of us are, and I also imagine it's safe to assume that
a lot of hams can be expected to miss ONE DIT at 35 wpm,
especially the 'new' guys.

Then a member of the fraternal brotherhood of hams came
along and gently pointed out that maybe ONE DIT had been
missed, and offered QSL info for the other call. Which caused
somebody else to start dictating 'DXCC morals'. Never mind
that this guy might have morals already. Since we are hams,
we have to automatically assume that he is involved in
the race for the coveted DXCC award because all RealHams
are working on DXCC. And since we RealHams measure our
worth based on our DXCC totals, we must insure that he does
not obtain one more click unless we are totally sure it is a
valid click, because one of the goals of DXCC is to prove that
we are more of a RealHam than he is. We must, at all costs,
one way or another, maintain the gap between his number of
clicks and ours. Detracting from his widens the gap as does
adding to ours.....

I responded because I was defending his right to make his
own moral decisions regarding DXCC, since his DXCC is only
important to him, and because I had seen no indication
that he even wanted the card for DXCC in the first place.
I don't feel the fact that he missed one dit in a CW contest
indicates he has no morals. Other people obviously do.

So what have we accomplished ? Not much.

You and Walter still think DXCC is important.

I still think that my DXCC is only important to me, and that in
relation to the rest of life, DXCC is trivial.

Walter still thinks the SC prefix is not assigned to Poland. I
still think it is.....

Walter has tarnished his image as a British gentlemen and
destroyed his position as the DX newsgroup's resident authority,
something he has worked very hard for over the years,
by posting a potty mouth message saying he thinks I am
"full of shit". Simply because he doesn't understand my very
dry sense of humor and his ITU prefix list is not up to date.

You and Walter still think the guy who worked HC8N and
copied it as SC8N is a DXCC criminal.

I still thinks he's just another ham and he's entitled to make
a very trivial mistake.

And the earth is still rotating.

But we did accomplish one thing, I'm sure. I'm sure the guy who posted the original message will never make the mistake of asking the fraternal brotherhood of ham radio for any more help. At least not in this newsgroup, anyway.

I think we need to put some fraternity back into the brotherhood of ham radio, and I don't think crucifying a fellow ham over missing one dit accomplishes that goal. I probably have missed a few dits over the years too, and Walter is obviously missing a few himself.....

Hi David,

Well, if you read all that longwinded stuff I wrote last time,
and you still think we are talking about DXCC, then I'm not doing
a very good job of making my point, so maybe we'll continue the
discussion some other time....

```
/*

Maidenhead Grid System

Here is a paper and pencil method taken from Amateur Radio Operating
Manual 3rd Edition RSGB edited by R.J. Eckersley, G4FTJ. It takes
a bit of work, but it gets the results!

Table 1.

0 A 4 E 8 I
1 B 5 F 9 J
2 C 6 G 10 K
3 D 7 H 11 L

12 M 16 Q 20 U
13 N 17 R 21 V
14 O 18 S 22 W
15 P 19 T 23 X

1. First deal with longitude. Convert the longitude to decimal degrees.

This is done by dividing the minutes part by 60 and adding the
results
to the degrees part.

2. If you are east of Greenwich add 180.

3. If you are west of Greenwich subtract the value from 180.

4. Divide the result by two.

5. Now divide the value obtained by 10 and note the figures to the
left of the decimal point. These give the FIRST letter of the
locator on the basis of 0=A, 1=B as shown in Table 1.

6. Multiply by 10, and note the single digit immediately before the
decimal point. This is the THIRD character of the locator.

7. Take just the fractional part of the value ( the part to the right
of the decimal point) and multiply by 24. The figures to the left
of the decimal point give the FIFTH character of the locator again
using Table 1.

8. Now follow a similar process for the latitude. Convert the latitude
to decimal degrees.

9. If you are north of the equator add 90.
```

```
10. If you are south of the equator subtract the value from 90.

11. Divide by 10, and take the SECOND letter of the locator from the
digits to the left of the decimal point using Table 1.

12. Multiply by 10 and note the digit to the left of the decimal point.

This is the FOURTH character of the locator.

13. Take the fractional part and multiply by 24. The figures to the
left of the decimal point give the SIXTH character of the locator
again using Table 1.
*/

Maidenhead Grid System

Here is a paper and pencil method taken from Amateur Radio Operating
Manual 3rd Edition RSGB edited by R.J. Eckersley, G4FTJ. It takes
a bit of work, but it gets the results!

Table 1.

0 A 4 E 8 I
1 B 5 F 9 J
2 C 6 G 10 K
3 D 7 H 11 L

12 M 16 Q 20 U
13 N 17 R 21 V
14 O 18 S 22 W
15 P 19 T 23 X

1. First deal with longitude. Convert the longitude to decimal degrees.

This is done by dividing the minutes part by 60 and adding the
results
to the degrees part.

2. If you are east of Greenwich add 180.

3. If you are west of Greenwich subtract the value from 180.

4. Divide the result by two.

5. Now divide the value obtained by 10 and note the figures to the
left of the decimal point. These give the FIRST letter of the
locator on the basis of 0=A, 1=B as shown in Table 1.

6. Multiply by 10, and note the single digit immediately before the
decimal point. This is the THIRD character of the locator.

7. Take just the fractional part of the value (the part to the right
of the decimal point) and multiply by 24. The figures to the left
of the decimal point give the FIFTH character of the locator again
using Table 1.

8. Now follow a similar process for the latitude. Convert the latitude
to decimal degrees.

```
9. If you are north of the equator add 90.

10. If you are south of the equator subtract the value from 90.

11. Divide by 10, and take the SECOND letter of the locator from the
digits to the left of the decimal point using Table 1.

12. Multiply by 10 and note the digit to the left of the decimal point.

This is the FOURTH character of the locator.

13. Take the fractional part and multiply by 24. The figures to the
left of the decimal point give the SIXTH character of the locator
again using Table 1.

Thanks! I had no idea that I was going to begin a flame war. For whatever it's worth, here's how I see it. I worked hc8n several times on different bands and different contests. Twice I copied sc8n, and if I had just thought about it a little harder, I should have realized that they were in fact the same station.

So, it seems a couple of times I missed a dit copying high speed cw by ear. I am not losing sleep over this. I don't use a keyboard. I can copy 20 wpm, which is all my license requires. I use a straight key, and my fist is highly variable, depending on how much coffee I've had. :) I mess with CW for fun, not as a religion.

What I don't understand is why contest stations insist on sending at 40 wpm or higher, limiting themselves to exchanges with cw enthusiasts only. That might be great at the beginning of the contest, if a high rate of qsos can be sustained. But even toward the end, you will hear stations calling cq test repeatedly at high speeds, even though no one is coming back to them. Is this some sort of macho thing?

Dear Jim:

Thanks for trying to bring a little bit of sanity here.

It's unfortunate that some people take this hobby so seriously that they alienate and/or insult others. I suspect that they just don't have much else of a life, and that leads to a lack of perspective.

I've addressed similar "newcomer inquiries" before about completed QSO's and been met with flames from the old grouches. My pleas to "chill out and have fun... it's just a hobby" only served to inflame things. I don't bother to try anymore.

Hope to work you sometime.

Whew! Yup, one can do any calculation with paper and pencil. Might take a few hours, months, or years!

:)

For those who wish to create some maps with grid squares included, you can make downloadable/viewable maps at http://hfradio.org - these are Azimuth, Equidistant maps. Might not take as long as paper and pencil and raw brain power, but they do look nice. :)

1860. Pacific Propagation (MUF) for July 1937 (Amelia Earhart Archaeology)

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-12 00:00:00 UTC
From: acampane@postbox.acs.ohio-state.edu
Message-ID: <acampane.1273.3762BEFE@postbox.acs.ohio-state.edu>
Source record: 24462

Dear folks:

I have been researching for several years the communications problems encountered by Amelia Earhart in her July 1-2 1937 flight in the Pacific. Onequestion cropping up often concerns the day and night near and far propagation on her two frequencies (80m,40m) 3105 and 6210 kHz. I would appreciate it if someone could delve into their 1937 QST archives and find the chart for the month of July 1937 for pacific propagation (US-Fiji-Lae/Sydney path).

If that was not published then, then use a 22 year cognate (1959 July, 1981 July, 2003 July).

Answer to my E-mail if your can sinceI do not often look here.

Tnx, W8EDR

Hi all,

For who interested on Meteor Scatter I'm
transmiting HSCW (Hight speed CW)-1500LPM
CONTINUOSLY since Saturday 12/Jun anf will
stay on the air until Sunday 13/Jun at
21:00UTC on 144.020Mhz - CW with a 12el K1FO
horizontally polarized and 150 Watts pointing to
LU, CX, ZP and South of PY. I'll repeat this
test next weekend 19-20/Jun.
Please send any comments/results to:

Horta, PY2NI - GG66rk
py2ni@qsl.net

Thanks.

>
>Do you know any studies that point to radiation hindering radio communications?
>
It's not the radiation directly, it's the effect of the radiation on the
ionosphere that disrupts communications. As I recall, HF "skip" propagation
is gonzo for many hours after a nuclear blast, but the effect should clear
up in 24 hours or so and you can go back to DXing... if you still have
a power source.

I don't recall any references offhand but if you really wanted references
instead of just confirmation that the effect exists, e-mail me and I will
see if I can find some.

For sale:
Kantronics KAMPlus packet modem
Dual port, so that it can do HF and VHF packet simultaneously
Built-in personal BBS and many automated functions
Built-in help system
Also, receives WEFAX and all the other digital protocols

In perfect condition.
Original box, manuals, cables, etc..
$275

Call (864) 292-3532 in Greenville, South Carolina
Or email: jpurtle@home.com

For Sale:
Yeasu FT-51R
5 watt dual band handheld transceiver
receives 110-180 Mhz and 420-470 Mhz
transmits 140-174 Mhz and 420-470 Mhz
alpha numeric labels for each memory channel
sub audible tone encode and decode stored in each memory
can be set-up to act as a mini repeater
computer programmable

original box, manual, antenna, adapter, etc.
works fine, in good condition

additional items include: a MFJ 2m/440 quarter wave telescoping antenna,

an MFJ 2m/440 magmount, and a Yeasu mobile drop charger/power supply.

Asking $300

SB DX @ WW $OPDX.413
Ohio/Penn DX Bulletin No. 413

The Ohio/Penn DX PacketCluster
DX Bulletin No. 413
BID: $OPDX.413
June 14, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, NC1L, WB2RAJ/ WB2YQH & The 59(9) DXReport, K3UOC, N6HR, W6RGG, K8YSE, 4L5O, 9A6PKT, DJ5AV & DX News Letter, DL2RUM, EI4GK, F5NZO, G4BUE & DX News Sheet, HL0Y, I2WIJ, I5JHW, MI0BME, OH2BR, OK1JR, ON6TT/5X1T, ON9CGB, VK4AAR, YC0LOW and YU7CB for the following DX information.

3V, JERBA ISLAND (Tunisia, New IOTA!). Giovanni, I5JHW, informs OPDX that he together with Sergio/I5NSR, Danio/I5OYY, Sauro/IK5EKB, Roberto/ IK5FTQ, Marcello/IK5JAN, Gabriele/IK5OSA, Gabriele/IK5ZTW; and 3 OM operators of the 3V8BB club station (Lotfi, Ramzi, Fouzi) and 3 YLs (Zaida, Sarra, Ines) will activate Jerba Island (a new IOTA) between June 18-21st. Their callsign will be 3V8J. Activity will be on 160/80/ 40/20/15/10/2 meters and 17 meters (the only WARC band authorized in Tunisia). Operations will be on CW, SSB and RTTY. QSL via I5JHW direct or bureau.

4L, GEORGIA (6 meters operation). Omari, 4L5O, reports that he is active on 6 meters (50 MHz) and will be there all summer. His antenna is a 5 element yagi w/50 watts. He can be found daily between 50.110 and 50.130 MHz CW/SSB (no time given).

5N99MSV AND 5N0MSV WRAP-UP. Stan, OK1JR, reports to OPDX that he is back in OK-land (Czech Republic). He wants to thank all the hams who worked him as 5N0/OK1JR, 5N99MSV and 5N0MSV. QSL direct, and he states that he will send them out at the end of the month. If you are not sure about your QSO, check his log search (about 200 DX logs including 5N0/OK1JR, 5N99MSV and 5N0MSV) on the Web page: http://www.qsl.net/ok1rr

BY, CHINA. The "DX News Sheet" reports that Jack, WB8SMV, will be active until the end of July from several club stations including BY1DX in the AA CW Contest, and June 21st through July 14th from BY4LB in Qingdao. Activity will mainly be CW.

CU8, AZORES ISLAND (IOTA operation). Look for Moreira/CT1AHU and Lionel/ CU3EJ to be active July 21-31st from Flores Island (EU-089) as CU8/CT1AHU and CU8/CU3EJ. They will be entring the IOTA Contest in the Island DXpedition class with the callsign CU8I. QSL to CU3EJ. During their journey to Flores, they will also be active as CU3/CT1AHU from Terceira Island (EU-003).

E4, PALESTINE. Look for Radek, OK1FHI, to be active until June 23rd. His activity will include the AA CW Contest. Radek will sign as E41/OK1FHI from the QTH of David, OK1DTP, at Beit Jala, West Bank. QSL via his home callsign.

EL, LIBERIA. Start looking for Eric, EA5GIY, to be active as EL2VO during June or July. He is currently on a professional business trip through the country. QSL via EA5GIY.

FS, SAINT MARTIN. Operators Rob/PA5ET, Ronald/PA3EWP, Peter/PA4EA, Martin/PA4WM, Dennis/PA7FM, and Henk/PA3GCV will be active August 5-11th. They will sign FS/homecall. Activity will be on 160-6 meters CW/SSB/ RTTY/SSTV. Special effort will be on the LF and WARC bands for Europe. They will have three HF stations along with one 6m station. QSL via PA5ET. Check out the Web site: http://www.muurkrant.com/pi4com/tour99/index.html

IOTA NEWS.......
AS-093. The Yonsei Amateur Radio Research Asociation (YARRA), HL0Y, club station of Yonsei University, has planned their 18th DXpedition to Huksan Island. They will sign HL0Y/4 from July 23-30th. Activity will be on 40-10 meters (including the WARC bands) CW/SSB/RTTY. QSL via YARRA (HL0Y), Yonsei University, 134 Shinchon-dong, Seodaemoon-gu Seoul, South Korea.

EU-065. The UBA Section Gulden Spoor Kortrijk KTK, IOTA DX-pedition team referred to locally as the Minquiers Boys, have announced that preparation is now well in hand for their 1999 activity to Isle d'Ouessant before, during and after the 1999 IOTA Contest. They are awaiting the official confirmation of the callsigns TM5K and TM5ON. They plan to use TM5K during the 1999 IOTA contest and TM5ON outside the contest. Arrangements have been made with the necessary local official authorities for their operation and accommodation sites. Plans are well in hand concerning the team of 12 including cook, lead by Harvey (ON5SY), equipment, antennas, transport, catering etc.. QSL is via ON4ON Danny Commeyne either via the ON bureau or direct to Danny Commeyne, Rozenlaan 38, 8890 Dadizele, Belgium. There is a website which will be regularly updated at: http://users.skynet.be/sky83847/iota

NA-038. Two members of the LOOS DX Gang will be going to Quebec this summer and plan to activate Madeleine Island from August 11-14th. Another CISA is possible, also some activity may be from Prince Edward Island. More information can be found on the home page:

http://www.geocities.com/CapeCanaveral/Station/9368/

J49, CRETE (Special Prefix/Update). Bob, I2WIJ, informs OPDX that he has received the special callsign J49WI from the Greece Telecommunication Ministry. He will operate from July 12-26th and also be an entry in the IOTA Contest with that callsign. QSL via his home call I2WIJ. Please refer to OPDX.406 and the Web page: http://www.qsl.net/i2wij/

JT, MONGOLIA (Update). Laurence "Flo", GM4DMA, reports that his operations from Central Mongolia will use the callsign JT1FCR. Equipment will be an IC706, R7000 and a 3 element 50 MHz beam. Operation will take place June 19-29th. Please refer to OPDX.411 for more details.

ON THE ROAD AGAIN! Peter, ON6TT/5X1T, is on route to Kosovo to be joined by Mats, SM7PKK, later in the week. Their callsigns are to be decided later. Peter states, "We might be sporadically active, but work has priority."

QSL INFO AND NEWS......
VY1DX was activated in the CQ WPX CW contest by Hillar, N6HR, as a guest operator. Hillar has the log and a box of YARA Club QSLs on hand and would be glad to reply to any QSL requests immediatly!

Pete, MI0BME, was active as GD6IA from the Isle of Man during this past weekend's ANARTS WW RTTY Contest. QSL via GD3UMW.

QSL TA4/DL5MAE/P via DL5MAE, Wolfgang Schlaffer, Am Rosengarten 3, W-8059 Luess, Germany.
QSL TA4/TA3YJ/P (XYL) via TA3YJ, Nilay Mine Aydogmus, P.O. Box 876, 35214 Izmir, Turkey.
QSL TA4/TA3J/P via TA3J, Berkin Aydogmud, P.O. Box 987, 35214 Izmir, Turkey.

QSL changes for V63KU!. Sam, V63KU, will be closing down by the end of June as well as the P.O. Box in V6-land. All QSL request after the closing go via JA6NL through the JA Bureau.

New QSL route for 7Z5OO and PJ5AA. Mike, K3UOC, informs OPDX that he is changing his QSL route for all his past operations from N2AU back to W1AF. Since he expects to be in the USA for several years, Mike is taking over his own QSL responsibilities once again. Mike is the trustee of the club station at Harvard University (W1AF) and is now catching up on a very large backlog of 7Z5OO bureau cards. Those who have not received 7Z5OO or PJ5AA cards in reply to direct requests should QSL again via W1AF. So, W1AF is now the QSL route for Mike's recent operations from 7Z5OO (1994-1998) and PJ5AA (1996-1998) as well as for these older DX operations: PJ8H (1994), PJ5/K3UOC (1994), 4M5V (1992-1993), YV5/K3UOC (1991-1993), PJ1A (1991), US1A (1990), 4M4A (1985-1987), P46S (1985), PJ2/PJ3/PJ4/PJ5/PJ6/PJ7/K3UOC (1982-1985) and YV4/YV6/YV9/K3UOC (1979-1987). He has cards for all past operations. The W1AF address is: Harvard Wireless Club, 6 Linden Street, Cambridge, MA 02138 USA. Mike also has a log search page for 7Z5OO and PJ5AA at: http://www.qsl.net/n6ed/7z5oo.html

Alan, VK4AAR, reports individuals are still using his old address to QSL. Many announcements have been made from OPDX and other sources since Alan has changed his address in late 1998. Alan states mail is being forwarded....for now at least! Please send direct ONLY to VK4AAR via "ALAN ROOCROFT, POB 421, GATTON 4343, AUSTRALIA" for the following stations: V63PD, VI0ANARE (but *NOT* VK0ANARE), VK8AN, VK8AN/6, VK8AV/3 (Phillip Is OC-136 only), VK8MI, VU3RSB, YJ8AA, ZK2JJ and ZK2PJ.

R1, MALYJ VYSOTSKIJ. A press release from Jukka, OH2BR, announced that: "A joint Finnish-Russian team of 25 operators will show serious activity from Malyj Vysotskij Island in July on all bands HF to UHF. The team has been issued the callsign R1MVA. In the IARU Contest a special short callsign R1MV will be used." Activity will be from July 4-15th. The joint Finnish-Russian team includes: 8 operators from Finland (OH2BR, OH5BM, OH5LZY, OH5NE, OH5PT, OH5SC, OH5UX and OH5YB) and 17 operators from the well-known Russian contest team RU1A (RU1AA, RW1AC, RV1AW, RX1AA, RN1AM, UA1BX, RA1ACJ, UA1ANA, RV1AC, RU1AS, UA1AAF, RA1ARZ, UA1ACC, RA1ARJ, RA1AIP, Alex and Vadim). The modes of operation will be: CW, SSB, RTTY, MS, EME, tropo (Aurora not wanted, hi!) Their HF equipment includes: FT-1000MP+DVS-2 (7), FT-1000D (1), TS-940 (1) plus some spares. Signals will be boosted by six linear amplifiers. Additional accessories include Dunestar filters and Heil Sound Pro headsets. HF antennas include: Inverted L's for 160 and 80 meters, 3 element beams for 40, 30 and 12 meters, 4 element beams for 20 and 17 meters, 5 element beam for 15 meters, 7 element beam for 10 meters and also an A3S, A3WS, R-7000 and wires antennas. They will have seven towers (10...20 m high) with Yaesu rotators. They will have 6 generators (2...7 kW). Their goal is to simultaneous operate CW/SSB/RTTY on all bands with propagation. Plans call for 9 to 12 operating positions. Suggested frequencies are:
CW - 1831, 3510, 7010, 10111, 14025, 18071, 21025, 24891 and 28025
SSB - 1845, 3795, 7045, 14195, 14295, 18145, 21295 and 28495
RTTY - 14084

QSL Manager is Jukka Heikinheimo, OH2BR, Rikunkuja 4, FI-01420 VANTAA, FINLAND (CBA not valid). VUHF frequencies and details will be issued by OH5LZY in VUHF bulletins. Home page and log check are under construction. More news later. Expedition preparation was started in late 1998, now all licenses are granted, callsigns assigned and equipment ready to be transported to the island. THIS TEAM IS DETERMINED TO ESTABLISH MASSIVE PRESENCE ON THE BANDS! BE PREPARED!

T30 & T33, WEST KIRIBATI AND BANABA ISLAND (Update). Tom, DL2RUM, reports that the team has received the following licences concerning their trip to Kiribati this year. The following callsigns were assigned: T30Y, T30CW, T33Y and T33CW. Activity will take place in October and November (refer to OPDX.406). For further details, please visit the Web site at: http://www.qsl.net/dl2rum/
Concerning the trip to Banaba, the Berlin DX Group, lead by Sigi, DL7DF, reports, "Unfortunately and in an unexpected way, it seems so, that we can`t find an agreement with the airlines to carry our oversized baggage with us. The transportation is not the problem, but the extra costs. So

we are still looking for support and donations. Who can help us? If you have the possibility to support us, please feel free to contact us and/or visit our web-site.

TI, COSTA RICA. The "DX News Letter" reports that Kees, PA5CW/TI8, is now active through June 22nd. Activity will be CW on 10/15/20/40 meters (possibly on other bands. No QSNs have been reported yet. QSL via PA5CW, Kees Wiegers, De Schans 96, NL-9351 AZ Leek, The Netherlands.

V6, MICRONESIA. "The 59(9) DXReport" reports that Mike/G0VJK and Mike/ G4VGO are planning an operation from Truk next year (February 14th-March 6th). They will concentrate their operation on 160-40 meters CW. More information will be forthcoming.

XW, LAOS. By the time you read this, operators 7L1MFS, JA2MNB and JR2KDN may have ended their operation as XW8KPL/CSN. As this bulletin was being prepared, they were very active on 15 meters SSB (around 21280 kHz). Their announcement states that they will be active on CW/SSB/RTTY on 80-6 meters. QSNs reports show activity on 20/18/15/12 meters. QSL via JR2KDN.

YB, INDONESIA. Sanji, HA6VK, a diplomat in the Hungarian Embassy in Jakarta, has finally received an official notice from the Indonesian authorities which approves him to get an Indonesian amateur license. This approval is a part of the agreement between Hungary and Indonesia allowing their hams to operate in a reciprocal basis. Expect to hear Sanji on the air using the callsign YB0AVK this month. Sanji has been involved in this effort since October, 1998. More details will follow soon.

YW7, VENEZUELA (Special Event/IOTA operation). To celebrate the 1999 "Venezuelan Navy Day", the Association of Radioamateurs of Venezuela (ARV) and the Grupo DX Caracas have organized their annual DXpedition. This year they will go to Coche Island (SA-012) and will be active as YW7C, from July 29th through August 1st, 1999. Activity will be on SSB and CW. QSL via W4SO.

YZ75, YUGOSLAVIA. Laci, YU7CB, reports that YU club stations are allowed to use the special prefix YZ75 during the month of June to celebrate 75 years of amateur radio in their country. He also mentions to look for his club station, YU7AEW, to be active as YZ75AEW (QSL via YU7CB).

ZA, ALBANIA. Croatian operator Pero, 9A4SP, is active every evening on the frequencies 7080-7085 kHz at 2100z. Pero is working in Tirana, capital of Albania, and is using the callsign ZA/9A4SP. He will be in Albania until June 28th.

Hello Dx gang,

I need your help to build the database in the Search Engine at
http://www.hamfind.com

This is dedicated to Amateur Radio Operators. When you check it out,
add your personal, club, or amateur related business pages. Also, help
spread the ord about the engine. Perhaps you will place a banner link
on the pages you are responsible for..

Thanks

Wayne Harrell

Hi Ken,

Since the database is public information, you can download the
club call database from the FCC website at:

ftp://ftp.fcc.gov/pub/XFS_AlphaTest/amateur/

The name of the Club/Races/Military database file is CRM.ZIP.

The FCC has taken action against multiple club callsign holders,
and has revoked a number of calls held by one individual, W9BO.

A few other people are voluntarily turning in club calls, probably
with the hopes of keeping their ham tickets.

The FCC is also threatening to revoke licenses (primary) of people
scamming multiple club calls, and have sent notices to a number
of people. Information is in the FCC press releases on the ARRL
web page.

So if you are going to pass out awards, you better hurry as it looks
like the Vanity Club Call Scam Program has officially ended =8-O

Anyway, the last time I downloaded it, the winner was W6DOE, with 32
club calls:

AI4CA CPRA AMATEUR RADIO CLUB W6DOE
AI4HQ APCO INTERNATIONAL AMATEUR RAD W6DOE
AI4PS APCO INTERNATIONAL AMATEUR RAD W6DOE
AI6CA CPRA AMATEUR RADIO CLUB W6DOE
K1JON SIERRA AMATEUR RADIO CLUB W6DOE
K3JON SIERRA AMATEUR RADIO CLUB W6DOE
K4AI APCO INTERNATIONAL AMATEUR RAD W6DOE
K6ES ORANGE COUNTY COMMUNICATORS CL W6DOE
K6KBF KNOTTS BERRY FARM AMATEUR RADI W6DOE
KA6PCO CPRA AMATEUR RADIO CLUB W6DOE
KC6PRA CPRA AMATEUR RADIO CLUB W6DOE

KF6JOI SIERRA AMATEUR RADIO CLUB W6DOE
KF6JOJ SIERRA AMATEUR RADIO CLUB W6DOE
KF6JOK SIERRA AMATEUR RADIO CLUB W6DOE
KF6LLO KNOTTS BERRY FARM AMATEUR RADI W6DOE
KF6VCN CPRA AMATEUR RADIO CLUB W6DOE
KF6WBB WILLIAM V STANCIL MEMORIAL RAD W6DOE
KG4CEP APCO INTERNATIONAL AMATEUR RAD W6DOE
N6KBF KNOTTS BERRY FARM AMATEUR RADI W6DOE
W6ID CPRA AMATEUR RADIO CLUB W6DOE
W6IEE IEEE AMATEUR RADIO CLUB OF SO W6DOE
W6IRE IEEE AMATEUR RADIO CLUB OF SO W6DOE
W6PF WILLIAM V STANCIL MEMORIAL RAD W6DOE
W6VT ORANGE COUNTY COMM EMPLOYEES A W6DOE
WA4PCO APCO INTERNATIONAL AMATEUR RAD W6DOE
WA6IEE IEEE AMATEUR RADIO CLUB OF SO W6DOE

Hi All,

There is a new version of my free grayline program (version 1.2).
You can visit my website at
http://irian1.iri.tudelft.nl/users/pa3cqr/grayline.htm and try it.

New features compared to version 1.1 :

Calculation of the grayline width instead of a fixed assumed width.
Optional correction for local time for easier reading.
Display of CQ zone
Updated DXCC datafile.

Special thanks to Cesar PY2YP for testing the program and debugging the
dxcc datafile.

Hi.

How much cost a club callsign for a person who apply this one? Just
interested for the fun :o)

In the United States Of America, club callsigns are free. No charge.
Get as many as you like. Take two or three, they're little. Now if you
want to chose your own very special vanity call, I think those are
about $14 U.S. for ten years.

Additional interesting info on scamming club calls.

73 - Leo - W3LEO

The ARRL Letter, Vol 18, No 21 - Fri, 21 May 1999

FCC SETS ASIDE MULTIPLE CLUB STATION GRANTS

The FCC has set aside 14 recently granted club station call signs and 12
recently granted club vanity call signs held by an individual trustee.
The FCC's Riley Hollingsworth, K4ZDH, took the action May 11 in a letter
to Motoaki Uotome, W9BO, of Honolulu, Hawaii. Uotome is the trustee for
35 club station call signs in various cities in the continental US as
well as in Hawaii, the Marianas, Guam, and Alaska.

This call was run by Braintree & District A R C,

The address is:
Braintree Community Centre
Victoria Street
Braintree
Essex.

The call is assigned to MG Kendall, G0EMK. If you want his address e-
mail me direct.
Cheers

1891. Cambodian Expedition

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-16 00:00:00 UTC
From: Alberto <figarema@my-deja.com>
Message-ID: <7k9bsh$344$1@nnrp1.deja.com>
Source record: 24493

Hi!

I'm loking into organising an expedition to Cambodia for the summer of 2000. I would appreciate if anyone out there can tell me of the procedure
to follow to obtain a license or permit over there. I'm also planning to have the full EA license by then.

The idea is to transmit from a vocational training center for landmine amputees, called 'Bantey Prieb' (http://acadica.home.pages.de/) The aims of the expedition would be to get some of the amputees started in the radioamateur world, make the world aware of the landmine problem and to enjoy the experience.

I have no experience on the field of expeditions so I would wellcome comments. I have some experince inrganising espical stations, I took part in the organisation of ED1GSS for the Air Jamboree a few years back.

Thanks to all

This fellow UOTOME, MOTOAKI has been busy collecting calls in other countries as well, including Mexico, Portugal, Uruguay, Chile, Argentina, Canada, and several others. I think I read something on Jim Kehler KH2D's web site about how rampant this practice is and how big a prestige thing copping a bunch of call signs is in Japan, and how JAs routinely travel to Guam to scarf them up. Yeah, it's wrong, it's unfair, and it's annoying, but you got to wonder what drives these guys to go through all the trouble for some alphabet soup they don't ever sign with, and which everyone who sees the long train after their name and legitimate call knows is bogus. What a nuisance, what a bore.

I have been buying car batterys for some time now, and have found that

if for some reason they get 'run down', like some one leaving the
lights on all nite , or if the car fails to start , and you run down
the batt. in the process, it has been my experienc that in a short
time you start having 'problems' with the batt. the seem like they
are never the same... just my 2 cents. CL.

You folks are talking about the interesting article from ARRL, I gather.

From the article:

WASHINGTON, DC, Jun 17, 1999--The FCC's Riley Hollingsworth, K4ZDH, says the Commission may have to resort to fines to curb the practice of hoarding multiple club station call signs. "The reason we're concerned about this is that we consider it an abuse of our licensing processes," said Hollingsworth, a legal adviser for enforcement in the FCC's Compliance and Information Bureau. "If somebody
applies for 30 or 40 licenses over time, it really overloads the staff." Hollingsworth pointed out that the call signs often must be typed in manually.

Earlier this month, a ham listed as the trustee for more than three dozen club station call signs agreed to give up all but one of them.

<clip>

Hollingsworth concedes that the FCC rules do not specify an upper limit to the number of call signs an individual may hold, but says "the underpinning of the rules is common sense." He recommended that multiple call sign holders should seriously consider turning in their excess grants before they hear from the FCC, "because we will be pursuing them."

<clip>

The FCC says the two-year rule applies for those seeking to obtain one of the desirable call signs being yielded or called back by the FCC, and Hollingsworth plans to specify a date of cancellation on each letter to a holder so that it will be clear when the two years are up.

"We're also going let them know they can't reclaim any of these call signs under former call sign holder exceptions to the two-year period," he said. Close relatives also would be unable to claim any of the call signs in the future.

<end>

I do see collecting callsigns from other countries, if indeed you operate them from time-to-time. I, for instance, do plan on doing a dx-pedition sometime in the next five years... I certainly would feel that I earned those calls I hope to obtain. Having those next to my name will be a badge of pride... working from some remote location... (ah, the dream of an adventurer!).

Anyhow, I found this topic to be rather interesting. I'd love to hear a comment or two from some of these "warehousers."

1902. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-18 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7kcbtd$2g2@news.Hawaii.Edu>
Source record: 24554
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Dr OM/YL

This mail to inform You that I resently have uploaded an updated
beacon list at my website covering a 50 MHz world wide in six
continantal splitted listings covering, Africa,Asia, Europe,
North America, Ocean/Pacific and South America.
An worldwide 70 MHz list and European 144 MHz and 432 MHz lists
are added too.

These lists can either be viewed in html or downloaded as a ZIP
file in band pacages, the ZIPed version contains a bandplan aswell.
As something new its now posible to view the files in plain text,
as too.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

SB QST @ ARL $ARLB039
ARLB039 Multiple call sign holders could face fines

ZCZC AG39
QST de W1AW
ARRL Bulletin 39 ARLB039
>From ARRL Headquarters
Newington CT June 18, 1999
To all radio amateurs

SB QST ARL ARLB039
ARLB039 Multiple call sign holders could face fines

The FCC's Riley Hollingsworth, K4ZDH, says the Commission may have to resort to fines to curb the practice of hoarding multiple club station call signs. ''The reason we're concerned about this is that we consider it an abuse of our licensing processes,'' said Hollingsworth, an FCC legal adviser for enforcement. ''If somebody applies for 30 or 40 licenses over time, it really overloads the staff.'' Hollingsworth pointed out that the call signs often must be typed in manually.

''If we have continued abuse, we're going to have to levy some forfeitures, which we have done in the past for abuse of Commission processes,'' he said. ''With short staff and budget considerations, we just can't let things like this go on.''

Earlier this month, a ham listed as the trustee for more than three dozen club station call signs agreed to give up all but one of them. Motoaki Uotome, JA1GZV, who also holds a US Extra ticket as W9BO, apparently was the trustee of 41 club station call signs. Last month, the FCC set aside 14 recently granted club station call signs and 12 recently granted club vanity call signs Uotome held and asked him to justify the grants.

Hollingsworth concedes that the FCC rules do not specify an upper limit to the number of call signs an individual may hold, but says ''the underpinning of the rules is common sense.'' He recommended that multiple call sign holders seriously consider turning in their excess grants before they hear from the FCC, ''because we will be pursuing them.''

In addition to the Uotome case, the FCC has contacted amateurs in California and Arizona who hold several club station call signs and has asked them to justify having them. News of the cases already has had an impact. ''We're had several others come in on a voluntary basis and turn their excess number in,'' Hollingsworth said.

The FCC says the two-year rule applies for those seeking to obtain one of the desirable call signs being yielded or called back by the FCC, and Hollingsworth plans to specify a date of cancellation on each letter to a holder so that it will be clear when the two years are up.

''We're also going let them know they can't reclaim any of these call signs under former call sign holder exceptions to the two-year period,'' he said. Close relatives also would be unable to claim any of the call signs in the future.

I lost my bookmarks file in a system glitch and now cant find that
URL I had before that put out a 27 day forecast each month with
the flux nrs k a etc for each day of the forthcoming month.
Can anyone out there email me if you have that URL. I think it
was in an Air Force MARS web page that I found the link to it
but not sure. Appreciate. Tnx
73's and Aloha

SB DX @ WW $OPDX.414
Ohio/Penn DX Bulletin No. 414

The Ohio/Penn DX PacketCluster
DX Bulletin No. 414
BID: $OPDX.414
June 21, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/ WB2YQH & The 59(9) DXReport, K4AVQ, KQ6XA, N6HR, N6RT, W6KK, N0ED, DJ5AV & DX News Letter, DL3KUD, DL6MHW, F6AJA & Les Nouvelles DX, G3NYY, G4BUE & DX News Sheet, GM4FDM, HA0HW, JA1ELY, OH2BR, ON6QR, PA5ET, PY1KS, and ZD8V/KF4OOX for the following DX information.

5U, NIGER. "The 59(9) DXReport" reports that Dan, AE4RP, who is active as 5U7DG until the summer of 2000 or maybe summer 2001, hopes to be active on 160, 80 and 40 meters soon. The "DX News Letter" states that Dan received his license in July 1998 and is now the only radio amateur in the country. Dan is running 100 watts into a beam for 20/15/10m and a longwire for 12 and 17 meters. QSL via K4SE.

6O, SOMALILAND (also 5X and 5H). It has been reported by Toshi, JA1ELY, that Tomo, JE9IKG, has been staying in Nairobi, Kenya, on official business but will travel to Somaliland on June 19th, and stay there until June 29th. He will try to operate during his free time as 6O/JE9IKG. However, there is no powerline available there, so he will operating with a solar panel and with only 50 watts on SSB using a long wire. QSL via his home callsign. ADDED NOTES. Currently Somaliland does not count for DXCC. Also, Tomo has plans to make another trip to either Uganda (5X) and Tanzania (5H) in July. He expects these operations will be short and they will take place on weekends.

A9, BAHRAIN. The "DX News Sheet" reports that Regi, ON4CFI, is active until July 7th as A9/ON4CFI. Activity will be SSB on 40-10 meters. Checking QSNs, look for him after 0000z on 15 meters SSB. QSL via home call.

CARIBBEAN TOUR. Ronald/PA3EWP, Henk/PA3GCV, Peter/PA4EA, Martin/PA4WM, Dennis/PA7FM and Rob/PA5ET are proud to announce their "Caribbean Tour for 1999". They will go to the following islands of St.Maarten (PJ5), St.Martin (FS), Nevis (V4) and Anguilla (VP2E). The callsigns will be the home callsigns followed by the prefix with the exception of Nevis

which will be a V47 callsign that will be assigned at their arrival. Their schedule will be as follows: August 5-11th for St.Maarten and St. Martin (mobile); August 11-18th for Nevis; and August 18-25th for Anguilla. The team plans to have 3 HF stations and a combined HF/6 meter station on the air on the modes CW, SSB and RTTY. They plan to focus on the Low Bands and the WARC bands for Europe. SSTV and satellite operations will only happen when the occasions allow it. All QSLs for this tour will be handled again by PA5ET (ex PA3ERC): Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. The team has also set up a Web site to keep the DX community up-to-date on their operation before/during/after at: http://www.muurkrant.com/pi4com/tour99/index.html

CAVE EXPLORATION EXPEDITION PERU '99. Bonnie, KQ6XA, will operate as OA/KQ6XA and particapate in an exploration and mapping expedition to previously unknown deep caves in the remote area of the Andes Mountains. Using only solar powered gear, Bonnie will be active on 160-10 meters CW/SSB. Her activity will be between July 20th and August 20th. Bonnie invites amateurs to make a sked with USA and Peru operators. For more details, please visit her very interesting Web site at: http://www.qsl.net/kq6xa

C6, BAHAMAS. Maurice, ON4BAM, has plans this summer to be active from July 24-30th as M0CIL/C6A from Abaco Island. QSL via ON4BAM.

FK, NEW CALEDONIA (IOTA Activity). The "Les Nouvelles DX" reports that Jacques, F6BUM, will be active as FK/F6BUM from the main island (OC-032), August 9-21st. Activity will be CW/SSB. He plans to activate a few other IOTAs around the main island. Look for him on the following island:
Ouvea Island (OC-033) from August 22-24th
Lifou Island (OC-033) from August 25-30th
Mare Island (OC-033) from August 31st to September 2nd
Pins Island (OC-032) from September 3-5th

HB0, LIECHTENSTEIN. Andrea/DL3ABL and Michael/DL6MHW are going here for a one week holiday/activity from June 26th to July 3rd. They will be focusing their efforts on WARC bands to this semi-rare counter using high power. QSL via DL3ABL, Andrea Diekmann, Ginsterweg 51, 39326 Wolmirstedt, Germany.

HB0, LIECHTENSTEIN. By the time you read this, the first German-Hungarian HB0 DXpedition should be active until June 26th. Operators will be DL4OCM/ Tom, DF6VI/Jo, DL1FDH/Thomas, HA4DX (ex HA4GDO)/Tamas, HA0ET/Feri and HA0HW/Laci. They will be active from a guest house on Mtn. Malbun at 2200m above the sea level. They plan to have three stations active at the same time with amplifiers and Dunestar filters on CW, SSB and RTTY on 160-6 meters. Each operator will use his own callsign after the HB0/ prefix. The team hopes to provide a new QSO to you on any band or mode. All QSL requests are via the operators home callsign (either via DL and HA bureaus or direct to operators CBA), except QSL HB0/HA0ET/p via HA0HW. A full color QSL card with picture on front side will be available.

IOTA NEWS.......
EU-008. Operators GM4FDM, GM0UKZ, GM0NAI, GM4YMA, GM3NIG, 2M1EDM
and GM3COB will activate 2S5VG/P once again from the Island
of Gigha off the west coast of Scotland during the IOTA
Contest. Look for activity the Monday prior to the Contest.
QSLs go to GM3UTQ direct or via the bureau.

EU-094. Operators F5LMJ, G0LMX/F5MBO and F6GIN will use the callsign
TM5G from Glenan Island, July 23rd (may be 22nd) to 26th.
They will be active mostly on CW.

EU-129. The DL0HRO Team will take part in the 1999 IOTA Contest from
Usedom Island. They will be active before the contest and
will work mainly CW on the WARC bands. QSL via DL3KUD.

NA-169. The Western Washington DX Club and the Island County (WA)
ARC will activate Waadah Island over the IOTA Contest weekend.
They will land and set up two stations commencing July 22nd,
operate during the contest and then stay until the 27th when
their landing permit expires. For more information, E-mail
N6HR at: hraamat@whidbey.net

J8, ST. VINCENT. The "DX News Sheet" reports that Mike, G0GPX, will be
activve until the year 2001 as J87AB. Activity will be SSB on all bands,
especially at 1100z on 18147 kHz and 12 and 10 meters. He is there working
as a missionary at Canouan. QSL direct (BTW, Mike collects post cards for
his xyl and daughter).

JT, MONGOLIA. A JA DX team will visit here during July 2-6th. Look for
JT1FAJ (op JA0HC), JT1FAK (op JR0CGJ), JT1FAL (op JA0IXW), JT1??? (op
JR0BQT) and JT1??? (op JA0EJ). Activity will be CW/SSB on 160-6 meter.
QSL via home callsigns.

KH0, MARIANA ISLANDS. Look for JI2IXA, JN3AHZ and JM3FUY to be active
from Saipan Island as KH0/homecall, June 24-28th. Activity will be on
40-6 meters. QSL via home callsign.

KP2, U.S. VIRGIN ISLANDS. From July 8-12th, look for Dave/AG8L, Larry/
K6RO and Charlie/W6KK to be active as WP2Z during the IARU HF Championship,
July 10-11th. Activity before and after the contest will be on all bands
including 6 meters CW/SSB as KP2/(homecall). QSL WP2Z via KU9C. QSL KP2/AG8L
via NN6C. QSL K6RO and W6KK via their home callsigns.

OOOPPPSSS!!! In OPDX.413, under "YB, INDONESIA", the correct name and
callsign should have been "Sanyi" and "HA7VK", not Sanji and HA6VK.

OX, GREENLAND (The Biggest Island Expedition). A member of the Belgian
DXpedition Committee will head north to be active during the next IOTA
Contest (July 24-25th). Fred, ON6QR, will operate from IOTA NA-018 in
the capital city, Nuuk, hosted by the local amateurs. The callsign to
be used will be OX3NUK, although a special callsign has been requested.
Activity will be on CW/SSB on the 5 bands during the contest. Listen
also near the IOTA frequencies to catch Fred from Friday 23rd until the
contest. The QSL Manager is Mike, ON4GO. For more information, look at

the Web Page of the Belgian DXPedition Committee at:
http://www.ping.be/on6qr
Or contact Fred, ON6QR, at: on6qr@ping.be

QSL INFO AND NEWS.....
Toshi, JA1ELY, regrets to inform everyone that he is not the QSL Manager of XU1SS. He states that he doesn't know who this is, and it seems to be a pirate. Please, do not send him a QSL.

QSL UPDATE/CORRECTION. Last week we mentioned to QSL TA4/DL5MAE via DL5MAE, Wolfgang Schlaffer, Am Rosengarten 3, W-8059 Luess, Germany. This address is WRONG, however it may reach him, but will take a much longer time because it is the old zip-code which was used years ago. Helmut, DL7MAE, the brother of DL5MAE, states the best address is: Wolfgang Schlaffer, Luess, Am Rosengarten 3, 85467 Neuching, Germany (BTW, the address is the same QTH for Helmut and they both QSL 100% via the bureau).

Alan, K4AVQ, will be closing the books on his P40AV operation in Aruba 1997-98. If anyone needs a card let him know soon.

The following new logs are now online at: http://dx.qsl.net/logs
3B8/K5KG (April thru May, 1998) J41TEN (March 1998)
DS5DNO (thru June 14, 1999) SV1DNW (thru June 12, 1999)
DX1DX (thru June 3, 1999) SV9/G3AKF (May thru October, 1998)
DX100DX (October 1998) VQ9CV (thru June 7, 1999)

All direct QSLs for YK/DL6MHW during the April/May 1999 operation are sent out by DL3ABL. TNX for GDXF in sponsoring the color QSL card!

QSL PT2HO via PY1CAS to the Bureau or direct to: Guto, P.O. Box 07903, Brasilia - DF, 70649-970, Brazil.

R1MVA WEB SITE UP. Jukka, OH2BR, reports that you can find up-to-date information about the R1MVA-expedition at the OH5AB home page:
http://www.etela-karjala.fi/yhdistykset/viitoset/MVI_1999.htm
Jukka states that he will try to keep this information as fresh as possible. Log checking will be announced on the above www-address as soon as he has more information from the computer boys.

SV9, CRETE. Walt/G3NYY, Tim/G4VXE, Dave/G4FRE and Meg/G7FRE (YL operator) will be active as SV9/homecall from here (EU-015) between June 29th and July 6th. They plan to be active on the following modes: PSK31, Hellschreiber, Baudot RTTY and CW. Activity will be on all bands, 160-6 meters, the WARC bands included, with some SSB on 50 MHz only. QSL SV9/G3NYY via G3NYY, SV9/G4VXE via G3SWH, SV9/G4FRE via WW2R and SV9/G7FRE via WW2R.

VP9, BERMUDA. Ed, N0ED, will be operating as VP9/N0ED from July 15-25th, including the IOTA contest (24 hour CW section). Activity will be CW only on the WARC bands and 160 meters (QRN permitting) before the contest. He will use only a "100 watts and a dipole" during this operation, but he hopes to give everyone who needs it as a multiplier. QSL via N0ED. His

E-mail address is: n0ed@qsl.net
Ed will put more information (possibly logs) on: http://www.qsl.net/n0ed

ZD8, ASCENSION ISLAND. Paul Hutley, KF4OOX, is now active as ZD8V as of June 15th at 0030z from Ascension Island in the middle of the South Atlantic Ocean. Paul wrote to OPDX stating that he is currently active from 1800-2400z on 10-20 meters. He mentioned that he can also be found sometimes on the 14.247 DX Net for a couple of hours. He likes doing the DX nets and thinks they are fun. However, Paul spends most of his time on 10 meters around 28495 kHz. Paul reports that he needs 8 more states for his WAS and will be looking for them on the air (OPDX will try to find out what states he needs). Over the past weekend Paul indicated that he would like to be active on "Kids Day" (June 19th). He also plans to be active during "Field Day" and will be looking for Mercer Co. (PA club station) and for the Brevard Co. (FL) stations. In the coming future Paul mentions that he will have scouts over (on the island) for JOTA. However, Paul does state that he will call or take calls from anyone. Please note, that in the past when a ZD8 station has tried to support "Kid's Day or JOTA" the adult hams have tried to contact the ZD8 station. Paul requests and states, "Please if we are trying to support the kids, then let us do that and wait for another day for the ZD8 contact. As the children do not find this very enjoyable and this sets them against Ham Radio."

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to: kb8nw@barf80.nshore.org
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

/EXIT

Subject: awards from Greece

Radio Amateur Association of Greece Award
The award is available for working and confirming contacts with at least
7 different Greek stations from the nine SV call areas (SV1-SV90. QSLs are
not necessary. Applications must be accompanied by a certified list of QSLs
(checked and signed by two ama teurs), together with 10IRCs or $5U.S.D and
should be send to: RAAG,Award manager,POBox 3564, Athens GR 10210, GREECE

*Greek Island Award
The award is available for working and confirming 10 contacts with at
least 3 different groups of Greek islands as follows:
1.CRITI
2.DODEKANISOS
3.IONIAN
4.EVVOIA
5.KYKLADES
6.SPORADES
7.LESVOS
8.CHIOS
9.THASOS-SAMOTHRAKI
10.IKARIA-LIMNOS

Awards are issued for 2 way CW ,2 way SSB, Mixed mode or Single mode,
Mixed band or Single band. Endorsement and stikers for each 10 different
islands. QSLs are not necessary.Applications must be accompanied by a
certified list of QSLs (checked and signed by two amateurs), together with
10 IRCs (4 IRCs for each endorsement sticker) or $5USD and should be send
to: RAAG, Award Manager, POBox 3564, Athens GR 10210, GREECE

*The Athenian Award
The award is issued for contacts with 25 amateur radio stations in the
Athens area.
The diploma is issued in any modes and in three classes.
1st class diploma is awarded for QSOs on 160 and 80 meters.
2nd class diploma is awarded for QSOs on 40 and 30 meters.

3rd class diploma is awarded for QSOs on the other bands.
Endorsement stickers are available for each 25 new contacts.
QSLs are not necessary. Applications must be accompanied by a certified list
of QSLs (checked and signed by two amateurs), together with 10 IRCs (4 IRCs
for each endorsement sticker) or $5USD and should be send to:
RAAG,Award Manager, POBox 3564, Athens GR 10210, GREECE

Best Regards
Antonis Parashis, SV1ENG

Subject: Callbook & ARRL items - Summer specials
Date: Fri, 18 Jun 1999 16:23:37 -0700

Ted:
This is my 12th year as distributor of Callbook & ARRL items,
and I would like to offer you & members of OH/PA special prices
on these items:
==========
Callbook CD-ROM 1999 Summer Edition (new EDIT feature): $38.95
QRZ! Ham Radio CD-ROM (v.13): $16.95
ON4UN's Low Band DXing: $26.95
ARRL's Wire Antenna Classics: $13.95
ARRL's Low Power Communication: $13.95
ARRL Antenna Book (18th ed.): $26.95
'99 ARRL Handbook (retail $32): $28.95
RF Exposure and You (retail $15): $11.95 (LTO)
ARRL Repeater Directory 1999-2000: $7.95 ($5.95 w/any other item)
ARRL General Class License Manual: $11.95 (3 @ $9.95)
ARRL Periodicals CD-ROM 1998 (or 1997): $18.95 (both for $33.95)
QST Views: $32.95 (2+ @ $29.95 ea.(LTO))

73, Duane Heise, AA6EE (CA residents: add tax)

1914. GRAYLAND '99 DXPEDITION JUNE 26! ANNOUNCES WEB PAGE

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-20 00:00:00 UTC
From: Guy Atkins <dxing@hotmail.com>
Message-ID: <7kkdvm$n80$1@nntp8.atl.mindspring.net>
Source record: 24566

GRAYLAND '99 DXPEDITION TO BEGIN JUNE 26! ANNOUNCES WEB PAGE

There will be another in the now more than decade-long intermittant series of trans-Pacific and tropical band shortwave DXpeditions to Grayland, Washington, USA
at the end of this month.The affair will start out on Sunday morning June 27(UTC) at about 0400 UTC and will Friday afternoon (UTC) at about 1600 UTC. Local PDT in the Pacific Northwest, that is Saturday June 26 at sunset until the
following Friday at sunrise.

Upwards of a dozen DXers will be in attendance at various times throughout the week, with around seven being the "steady-state" population. Those attending all week include Guy Atkins (Bonney Lake, WA), David Clark (Toronto, ON), Greg Bailey (San Diego, CA) and John Bryant (Stillwater, OK). Those attending for half-week stints at the dials include Nick Hall-Patch (Victoria, BC), Walt Salmaniw (Victoria, BC), John Fisher(Calgary, AB), Chuck Rippel (Virginia Beach, VA) and Bruce Portzer (Seattle, WA). We also expect that Phil Bytheway (Seattle, WA), Chuck Hutton (Seattle, WA), Craig Siegenthaler (Yakima, WA) and Patrick Martin (Seaside, OR) will join the group for somewhat shorter stints.

Receivers of note will include the very sophisticated Cubic 3250, the Rockwell-Collins HF-2050, both professional/military receivers and the new JRC NRD-545. We will also be running a very interesting set-up, the McKay-Dymek DR-333 driven by a laptop computer, which will be running software that John Bryant dubbed "DX Radar." This "Radar" software was developed by Nick Hall-Patch. The combination continually monitors signal strength on each of the 9 kHz. MW frequencies and reports the results of the entire band, with individual frequencies identified, graphically, on the laptop screen. VERY handy when a major opening is in progress. This software may be given a try on 60 and 90 meters, as well.

We will be using two or three 300 meter Beverages which will each terminate more or less in the Pacific surf. One will bore-sight New Zealand, the second will point across the central Pacific to central Australia and a third, if possible, will aim at Japan and Korea.

Although most of us will focus our efforts on Medium Wave, Tropical Band shortwave will most certainly receive a fair share of attention.

Unfortunately, our rather rustic motel-DX headquarters does not provide telephones and the area is notoriously poorly served with cellular service. However, we hope to report our efforts via internet several times during the week, either via modem+satellite phone or some other means. We are establishing a Grayland '99 DXpedition website (Guy Atkins as Webmaster)

and will announce the URL very shortly. We hope to have Real Audio examples of some of the better catches, digital photos of the Catchees in politically correct attire, loggings in near real time, etc.

We would really appreciate it if you each would pass the word amongst other DXers about "Grayland 99." It would be very interesting to compare our individual perceptions of listening conditions in near real-time. In addition to the Grayland '99 webpage, We will be reporting our MW results to "Greyline" and Phil Bytheway's IRCA AMDX News Flash, as well as to both American medium wave clubs International DX columns.

The URL for the 1999 Grayland DXpedition is: http://surf.to/grayland99

Thank you,
John Bryant & Guy Atkins for the Grayland 1999 group

There was a TV news program this weekend regarding a HAM that provides weather forecasts to private boaters in the Caribbean area. But they never said what frequencies he used.

Does anyone know anything about this service? Has anyone listen or talked to this individual?

Thanks for any replies!

Dan

That's true. NUDETS (Washington-speak for Nuclear Detonations) inside the atmosphere mainly produce the kinds of ionospheric effects I mentioned. (From a radio communication point of view, that is.) They alter the ionosphere in much the same way that a Solar flare does, though more locally. But it can still play havoc with normal skip propagation for awhile.

OTOH "exoatmospheric" bursts (ones outside the atmosphere) are the ones that produce primarily the EMP effect (unless, of course, an important satellite happens to be nearby). What happens here is very interesting. The so-called "prompt radiation" from the burst arrives at the upper layers of the atmosphere at essentially the speed of light. As it encounters substantial density of air, it knocks loose electrons in what as I recall is called the Compton Effect, the electrons sometimes being called Compton electrons. Being in a magnetic field, they don't follow straight lines away from the point of impact but rather fly around and around in a helical path, as a result of the odd fact that the force on a moving charge due to a magnetic field is always at right angles both to the velocity and to the magnetic field lines. This high-speed motion in a helix of course generates radio waves, which travel at the speed of light. But what makes the EMP so nasty is that the incoming Compton electrons are also ARRIVING at the speed of light. So the point at which the waves start getting generated moves downward at the same speed as the waves are propagating. The practical effect is that the energy buildup in the wave continues to be RIGHT AT THE WAVEFRONT! Which means that the wave takes the form of a very sharp pulse wavefront that has a bandwidth of perhaps hundreds of megahertz, and LOTS and LOTS of energy in it.

It is this very sharp pulse wavefront that causes all the trouble. First of all, it can generate many kiloamperes of RF current in a conductor, for a brief moment, and kilovolts or even megavolts of peak voltage, depending on the circuit impedance of course.

Also, the fact that the bandwidth goes out to the VHF/UHF region means that equipment designed for lower frequencies may not have

adequate "bypassing" to deal with the sharp peak. Even HF (3 -30 MHz) radios need to have bypass capacitors with very short leads, as if they were VHF / UHF radios, in order to tame the kind of pulses in an EMP. Not to mention unusually good shielding, parasitic chokes on leads entering the shielding, and a lot of techniques that just aren't normally used in equipment not specifically designed to be EMP-resistant.

For hams, keeping a spare radio in the trunk of your car, or in an underground shelter, or in a metal storage cabinet, might be one of the better ways to have equipment survive.

According to the FEMA consultant whose lecture on EMP I heard some years ago, the peak of the EMP spectrum is estimated to fall at AM Broadcast type frequencies, despite the very sharp risetime. I think this relates to the dynamics of the electrons' helical motion in the Earth's magnetic field that I mentioned earlier. But anyway, any piece of conductor that resonates in the low MHz region, say 0.5 to 3 or so MHz, will pick up the biggest spikes. Short conductors, like the one on your 2-meter HT, may only see a few hundred volts peak. However, even that much could well wipe out the front end of your radio.

>But technology has changed a lot since the 60's. Back then, tube
>technology (which was pretty much 'voltage' amps and high
>impedance) wasn't as protected as a lot of todays technology. Would
>most devices bite the big one? Probably, but they would also be a lot
>of survivabilty that you wouldn't expect.

Most analyses I saw seemed to conclude that tube equipment was MORE likely to survive, simply because tubes are inherently less prone to failure from high-voltage pulses than solid state devices are.

Failures of solid-state devices would probably be quite widespread, but erratic. Indeed some radios would get lucky and survive, perhaps just because the standing wave pattern didn't hit them with as high a signal level as some other radio received, maybe even in the same room.

My impression is that the phone company would come out fairly well because they have historically put so much emphasis on protection against lightning. However, the lead lengths they use from the line to the varistor devices they use for protection would probably be so inductive at VHF / UHF that sizeable spikes would remain. Old-fashioned phones should be fine, but solid-state phones and modems might well get zapped. There would doubtless probably be quite a few "ESS" failures (telco switch computers).

Today the power grid is probably LESS sensitive to a massive overload. The technology for handling 'events' such as lightning strikes is much improved. In that regard alone it might be a neat idea to just contact a power company and ask them how they have changed since the 60's.

Indeed, that would make a fascinating topic for a radio club meeting.
I bet they'd be surprised, though, that you were asking about EMP
rather than Y2K !!!

Incidentally, you might be surprised to find that FEMA themselves would
be happy to send someone out to talk to a ham radio club on both of these
subjects, particularly one located in a large metropolitan area that
would publicize the talk widely.

>I was told a ground busrt doesn't yield near the EMP of an air burst.
>But that's not to say it still won't knock out tons of equipment. Mike

The "exoatmospheric" burst generates the EMP as its main effect.
The less atmosphere between you and the burst, the less of an EMP effect
it would generate because the pileup of the wavefront described above
would have less time to develop. However, rumor has it that there
are now also weapons designed to produce EMP-like effects at ground
level, without using nukes.

If so, I think that's a step forward, sort of the opposite of the
neutron bomb, which kills all the people without hurting the equipment!
Wouldn't it be nice if the human race could learn how to do warfare in
the future by killing all the computers and weapons systems without
harming the people!

Or even better, if we could somehow learn to do WITHOUT warfare at all!

To put it into perspective, how close should a lightning hit in order to produce a similar EMP as an ionospheric nuclear blast ?

In the days when the NEMP was a hot topic of discussion, you could easily get the feeling that nothing would survive, but from the equipment that I have seen that have been designed to be NEMP resistant, the protection is not that exotic.

This past April-May, I was in southwest Scotland and had my MM/W3LEO reciprocal callsign. This was a regular vacation and not a DXpedition. I was able to get on 17 meters one evening from a local ham's QTH and made about 20 QSOs including several with friends in the Washington, DC area.

The problem: I needed a few QSLs to send out and didn't have any program. I looked around the WWW and found WB8RCR's QSL Maker. This is a nice, easily used program for making simple QSL cards. In addition to the callsign and QSO block, there is a 4-line block for name and address and a 2-line freeform section [under the callsign]. This gives you plenty of space to add various types of information: lat-long, grid, etc.

You can use a variety of type styles, sizes, colors and background colors.

So, need a short run [or even a long run] of QSLs? Check out the site below.

Cheers

Leo - W3LEO

P.S. Hoping to head back to Scotland this fall and may be there for CQWW. Glad the FCC finally signed off on CEPT agreement. Now, if I can just get them to allow the use of "GM" instead of "MM".....
==========
WB8RCR's QSL Maker: http://users.tm.net/jjmcd/qslmake.htm

It can be downloaded as a zip file or as a self-extracting executable file.

"This program is provided free of charge to radio amateurs and those aspiring to become radio amateurs."

"This is a Windows 95 program, It will not work under Win 3.1. The program has also been used on Windows 98 and Windows NT Workstation 4.0."

>of energy in it.

This isn't quite correct. When the nuclear device detonates, it generates large amounts of prompt gamma radiation. Gamma is electromagnetic radiation of an extremely high frequency (higher than X-rays), so it travels at the speed of light the same as any other EM. If the detonation occurs in atmosphere, the gammas are rapidly absorbed over a short distance by the atmosphere, generating an incredible heat pulse. The rapid expansion of this superheated air is the primary blast effect of a nuclear device. Relatively little NEMP is produced.

But when the device is detonated at high altitude, there is little sensible atmosphere to absorb the gammas. Instead they encounter the free electrons in the ionosphere. These are accelerated by the gammas, just as they are accelerated by any radio wave encountering the ionosphere (or as the free electrons in your antenna are accelerated by a passing radio wave). But since the gammas are so energetic, and are available in copious amounts, the acceleration produced is *much* stronger, and the reradiated energy as the free electrons decelerate is also much greater.

The free electrons do *not* travel down to the surface, nor do they travel at the speed of light (though they book right along after the initial

acceleration). As they approach the sensible atmosphere, they encounter sufficient air density to be stopped while still many miles above the surface.

Because of inverse square spreading, the gamma wave front will impinge on a large segment of the ionosphere, so the effect is spread over a large area. The reradiation as the free electrons are decelerated is also over a wide area, but bunched vertically in the upper stratosphere as air density becomes greater. This produces a sharp wavefront extended in area. We can treat this the same way as we would a uniform current in an infinitely long wire, so this reradiated field falls off only with the inverse of distance rather than as the inverse square of distance as would be the case if it were a point source. That's what makes NEMP potentially dangerous to our equipment on the ground.

A 20 MT device exploded at an altitude of 100 miles will produce a field strength on the ground roughly equal to that produced by a lightning bolt 8 miles away. But because the NEMP effect occurs over an extended area, the effect is as if there were a lightning bolt 8 miles away in every direction at the same time. The induction will strongly energize extended conductors along their entire length. That's why NEMP is such a threat to the power grid and the phone system.

For the comparatively short conductors we use for antennas and other wiring in our stations, the effect isn't much different from a lightning near miss except that the wave front is steeper, ie the risetime of the induced pulse is faster. So we have to use suppression devices which clamp the pulse much quicker than what we'd need for induced lightning surge. Fortunately, there are gas tubes available which fire in under 2 nS, and that's adequate.

I am sorry, but THIS subject I simply can't ignore.....

There is something about all this EXPENSIVE nonsense
about "STAR WARS" and similar methods of Anti-Ballistic Missile
defenses that grates on me.

WHY are we spending who know how many BILLIONS of
dollars on this ???

There are so many ways the money can be used for helping
people......

OK, here is my reasoning:

1.0 The MISSILE'S function is to deliver the bomb to it's
destination and detonate it when the aggressor nation
want's to kill somebody.

2.0 The purpose of these defense systems is to stop the
missiles BEFORE they can get to their destinations and
detonate their warheads.

OK, fine.

BUT, if I were in charge of being the aggressor, I'd spend a tiny
fraction of the cost of the Ballistic Missile and smuggle the bombs
to it's destination some years prior to the war.

This way, I wouldn't have to develop expensive and delicate
missile systems, just use the same methods drug smugglers have
used for many years.

All that fancy "STAR WARS" garbage means absolutely nothing,
since the bombs are already at their destinations.

SO, why are we wasting our money trying to develop a useless
system ?

I suspect it's due, in part, to the reluctance of the politicians
in charge of military projects to admit to the public that there
IS no defense against this tactic. Well, that, and a tenancy
to want to keep money flowing into programs that help
keep them employed.

Things would be simpler if all the major nations admit that they
have done this smuggling in of weaponry and that there is no
practical defense against it other than the knowledge that the entire
world would go up in smoke if ANY of them started a major offense.

Yep, "MUTUALLY ASSURED DESTRUCTION"

If they all admit to this obvious tactic, then we can stop wasting
money on useless "defensive" programs and use the money
for something constructive.

Like, for example, helping the large starving parts of the world...

Yeah, true, it WOULD require politicians and military types to admit
to reality.... That seems to be a problem with some people.

Simple. Whether the "Star Wars" defense system was
ever technically achievable or not did one thing. It
bankrupted the former USSR.

I am thinking about buying an ICOM 746, but I have seen the review in QST where they mention the poor noise blanker; and I have seen several negative comments in forums regarding poor selectivity. Can any DXers or serious contesters out there who are owners give their opinion? Most people seem to love the radio, but perhaps they are not very demanding like I am.

Thanks

Howdy!

Just a friendly invitation to http://hfradio.org - where you will find propagational resources, forcasts (K7VVV's forcast for Field Day, just in!), and more. Create special fieldday maps!

Hope your weekend is successful!

We'll work you Walter. We have to work DX on field day. Nobody in the U.S. can hear us with all the local QRM over there. But this year we have a 5 ele 20 meter quad pointing at the U.S., so I'm not sure we can work Europe unless we figure out how to move coconut trees... But we'll try anyway (working you, not moving the trees).

1947. Azimuth control for HF antennas?

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-25 00:00:00 UTC
From: Patrick Stickler <patrick.stickler@nokia.com>
Message-ID: <37733070.9277CB62@nokia.com>
Source record: 24595
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.homebrew

Hey folks,

I've been reading "The Joy of QRP" (*great* book) and after reading about strategies
for ideal MUF, radiation angle, skip distance, etc. I began wondering why no'one
(in the HF world, sattelite operation being the exception) seems to be experimenting
with HF antennas where the azimuth is adjustible along with the direction (or maybe
I've just not looked in the right place...).

I.e., what kinds of antennas could be tilted at varying degrees with a rotator to
adjust the skip of HF signals? E.g., if a ground plane for 40M has too low a
radiation angle for the target area one is trying to contact, tilt it back to raise
the radiation angle and get a shorter skip zone???

I've played around a bit with some simulation software, and apparently, the
angle of the vertical radiator of a GP doesn't have much effect in the overall
radiation angle, so the above example wouldn't work too well -- but there
surely must be a number of antenna designs where azimuth control would
effect the radiation angle. A 40m Helical?

Being the neophyte that I am, I'd very much like to hear any comments and
ideas that others would care to offer.

Cheers,

Patrick

I have had an Icom 746 for about six months, therefore I feel I have pretty good insight as to these problems. Selectivity; As the radio comes out of the box in absolute stock condition, the selectivity has something to be desired. Icom is competing in a very tough mid-priced HF radio market with the 746. They have to cut corners where they can. Those corners are filters. After installing just the 270 Hz CW filter in one stage of the receiver a dramatic increase in selectivity was noted and there is still another filter that can be installed for CW that will make it even tighter. As for the noise blanker, it seems adequate to me. I have little need for a blanker but when I have it's had an effect on the noise.

I had a Kenwood TS-570D radio before the 746, my personal opinion is that the 746 blows the 570 away in many ways.

Amateurs have been known to build antennas with the elevation pattern fixed to meet their specific operating preferences -- one friend built a fixed two-element quad pointed straight up for 160m.. (he enjoys ragchewing with people within about 250km of his location, and it worked very well for that. Never worked any DX with it though!) I don't know of any amateurs who've tried to build adjustable-elevation HF antennas though. It's hard enough to accomplish at VHF (where it's commonly done for satellite and EME work), it would be *very* difficult for HF! I suppose phasing techniques would make it a lot easier.

That said, I have heard reports to the effect that Radio Moscow did just that. It was said they would establish a monitoring post far enough from the transmitter to be outside its groundwave range, and adjust the elevation of the transmitted signal to achieve the strongest backscattered signal at the monitoring post. Interesting stuff.

Patrick- I think there is a definition problem- Azimuth is the equivalent to compass direction- you really mean elevation, I think. Try looking for references to elevation control.

Bill

There are two things influencing the radiation angle of HF antenna. One is the elevation, the other (in case of vertical) is the conductivity of the ground (number or radials or the structure of radioa system. Adjustable hight might be difficult to achieve, but some sort of adjustable radial system might work.

Haven't tried that, it's just an idea.

1954. Re: EMP phenomena (was: Morse code)

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-26 00:00:00 UTC
From: Dave Shrader <dshrader@earthlink.net>
Message-ID: <3774AA6E.33853DAB@earthlink.net>
Source record: 24406
Cross-posted to: rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc

EMP will generate a very broad area of coverage. A high altitude explosion will produce 50,000 volts per meter over a 1000 mile radius.

The energy spectral range is different between lightning and EMP. Lightning does not have the fast rise time of EMP and therefore lightning EM energy peaks in the range of LF to MF . EMP, as mentioned earlier, has measurable components out to 800 MHz, but peaks in the MF to HF range depending on weapon design and altitude of burst.

Ground burst EMP exhibits a different characteristic. The nuclear x-rays are absorbed within about 10 feet of the blast center and they produce tremendous heat and EMP. The electrons, due to the earths magnetic field, rotate and curl into the earth as opposed to transiting in a longer space path. They produce a radial field. The nuclear prompt gamma rays, much higher energy photons, require about 1 mile of atmosphere, at sea level, to complete their absorption in the atmosphere. It takes a longer time for photons to travel a mile, so you get a broad pulse width.

All together, nuclear EMP produces about 50,000 volts every ~40 inches with energy peak spectral density in the 1-10 mhZ range. Lightning produces about 20,000 volts every ~40 inches with a peak spectral density in the 0.1 to 3 mhZ range.

Both are very nasty. We have all read about lightning damage to antennas and equipment in these groups. It will happen if ever there is a Nuclear induced EMP event.

==========
Could this be clarified please ?

Is the field strength 50 KV per meter at a distance of
1000 miles from the explosion?

If not, where *does* the 50 KV per meter occur ?

Reg.

Looks like a decent explanation. However I have one question. Shouldn't the signal generated fall off at something between 1/d (close to source) or 1/d^2 (further away)?

You are talking about the elevation or zenith angle.
The azimuth angle is that around the clock in a
horizontal plane.
Usually the problem is the opposite: how to get a lower
angle to have
a bigger jump.
The idea, maybe, would work with a good beam antenna,
but it shoud be very hard
to control it also in the vertical plane.

Howdy Marv
Try the JAMES E. MACKEY, K3FN site at URL:
He has numerous envelopes systems for QSLing:

European System: Air Mail commonly used in the European community.

Normal System: Air Mail more common in North America, South America and
Asia.

Plain System: Non-Air Mail. Plain white with security tint on the
inside.

3V, TUNISIA. Fabio, I4UFH, will be active from the 3V8BB club station July 8-11th, and will also be in the IARU Contest as a Single Op/Phone entry. Emphasis will be on the low band and 10 meters for the USA and Asian stations. Outside the contest the activity will be mainly on the WARC band and 2 meters (depending upon antenna availability). QSL to I4UFH via the bureau/direct. He will ONLY confirm these QSOs and the Jan 7th, 1999 operation.

3Y, BOUVET. The "DX News Sheet" reports that 3Y5NT was active on June 14th, at 0250z on 14003 kHz CW giving the QSL info via W3HNK. However, Joe, W3HNK, does not know anything about the station!

4M1, VENEZUELA. Look for 4M1X to be active in the upcoming IARU Contest (July 10-11th). Operators Kenny/K2KW, Bob/N6TV and Will/K6KM will be entering the contest as a Multi-Single class and will be active on 80-10 meters CW/SSB. Beginning July 6th, look for activity by the operator signing YV1/homecall. QSL 4M1X via W4SO (mail drop). QSL YV1/K2KW via WA4WTG. QSL YV1/N6TV and YV1/K6KM via homecall.

8S1, SWEDEN. "The 59(9) DXReport" states that special event station 8S1IG will be active from Gotland Island (EU-020) now through July 2nd during the "Island Games". QSL to SM1TDE via the bureau or direct to: Eric Wennstroem, Vasagatan 9-324, SE-17267 Sandbyberg, Sweden.

AMATEUR GROUPS ATTEMPTING TRANS-ATLANTIC 2M CONTACT. The following are excerpts from a press release by Paul, VO1HE (All OPDX InterNet Subscribers will receive the complete release as an additional). Beginning on June 26th

and continuing until July 4th, 1999, a group in Scotland led by Bill, GM0ICF, will be operating from Ardnamurchan Light House on Ardnamurchan Point, the most westerly point in the mainland British Isles, in an attempt to make the first transatlantic 2-way contact on 144 MHz. Operating from the North American side will be a group led by Paul, VO1HE, operating from Cabot Tower, the site where Marconi received the first transatlantic signal in 1901. The operating frequency on 2 meters will be 144.075 MHz plus/minus interference and at 15-18 wpm CW. Operating times will be between 1200-2000z daily for the entire period but most likely not the entire 8 hours per day. The callsign of the Scottish station will be 2S0ICF/P and the call of the Canadian station will be VO1AA. The groups are trying to win the Irish Radio Transmitters Society's "Brendan Trophies", which will be awarded to the first two stations to make a verified contact across the Atlantic Ocean using 144-146 MHz without aid of man-made reflectors, repeaters or moon bounce. For more information on the Brendan Trophies and the rules, check out the URL address: http://www.irts.ie/brendan.htm

A9, BAHRAIN (Update). "The Daily DX" reports that David, A92GE, is saying Regi, ON4CFI, who is active until July 7th as A9/ON4CFI, is not authorized to operate. The reason given is there is not a reciprocal licensing arrangement in Bahrain and A9/homecall callsigns are not permitted.

HC, ECUADOR. Reports indicate that Ted, HC5K, is now active on 6 meters using an IC-706 and two 6 element yagis. No QSNs have been reported. QSL direct.

IOTA NEWS.....
EU-052. Spiros, SV8CS, will be active until July 10th from Corfu Island in northwestern Greece, 2 miles from Albania. Activity will be on all bands using an IC-756 Linear amp, Collins 30l-1 (except 160m), TH3MK III and dipoles. Also, he will be active on RTTY and PSK31. Check out the Web Page: http://www.geocities.com/Athens/Forum/2310/index.htm

EU-124. The Barry Amateur Radio Society (BARS) will be going to the Welsh island called Flat Holm Island from Friday, August 27th to Wednesday, September 1st. They will be active on all bands 160m to 70 cms CW, SSB, RTTY, Amtor, and SSTV. QSL via bureau or CBA of GW0ANA (QSL Manager).

OA178, PERU (Attention Prefix Hunters!). Cesar, OA4QV, informs OPDX that during the entire month of July, he will be using the special prefix/ callsign OA178QV to commemorate 178 years of independence of his country. Activity will be on 80/40/20/15/12/17/10 meters. QSL via OA4QV.

OPERATOR(S) NEEDED. Mats/5X1Z/SM7PKK and Nils/SM6CAS report (in a press release) that they still need one more (possibly two) operator(s) for their DXpedition. Their primary target is T31 Kanton, a place that is still very high on the most wanted lists around the world. Their secondary target is ZK3 Tokelau, a small but often bypassed island that has yet never seen a big multi-operator DXpedition. The initial itinerary is as follows:

T31 September 23rd - October 3rd (1999)
ZK3 October 7th - October 12th (1999)
They intend to have three stations with 1KW. These will be manned by 6 operators. There will be beams for the all the higher bands including the WARC bands and verticals for the low bands. The rough budget for this DXpedition is about 30,000 USD not counting the personal tickets and hotels to the takeoff site for the DXpedition. The DXpedition is looking for additional funds from Clubs and Foundations. If interested, please contact Nils via E-mail at: nils.sm6cas@swipnet.se
All OPDX InterNet Subscribers will receive the complete press release by Nils as an additional bulletin.

OZ, DENMARK (Attention VHF DXers!). A team from the EDR Vestfyn Branch (OZ5VF) will participate in the annual VHF Field Day (from 1400z July 3rd to 1400z July 4th) using the callsign OZ5VF/P from JO45XG near Ebberup on the Island of Fyn (IOTA EU-029). Their suggested frequencies will be around (+/-QRM) 50.173 MHz, 144.173 MHz or 144.273 MHz and 432.173 MHz. The team will consist of OZ2EW, OZ4CQ, OZ6CQ, OZ6OM/OZ7M, OZ9CQ and possibly others (All are qualifed VHF DXers).

OZ, DENMARK. Knud, OZ2ZB, reports that the Danish Island of Fur (DIA NJ003) will be activated by Jacob, OZ7AEI/P, on July 5th. Activity will be on 10/15/20/40 meters. To see more information about "The Danish Island Award", and for expected DXpedition for the award, check out the Web page: http://www.qsl.net/oz2zb

P29, PAPUA NEW GUINEA. The "DX News Letter" reports that Tom, P29TL, has returned to Ukarumpa for another 4 years (after being in the USA for 2 years). Look for him to be active on 10/15/20 meters SSB. He hopes to be on all bands and active on packet and SSTV soon. QSL direct to:
Tom, SIL, Box 115, Ukarumpa EHP 444, PAPUA NEW GUINEA

QSL INFO AND NEWS.......
All FO0PAP and FO0MAC direct cards have been answered. John, K8YSE, states, "If you don't receive your cards in the next week or so, please send an E-mail to k8yse@en.com or resend direct to: EIDX Network, 4910 Royalton Road, North Royalton, OH 44133, USA." Bureau cards will be processed in the next month or two.

The logs for the June CY9SS St. Paul Island DXpedition are now available at the Web Site: http://dx.qsl.net/logs

"NEVER GIVE UP!", states Marco, IK0DWN. Marco reports to OPDX, "Yesterday (June 23rd) I found in my letterbox the return QSL for a contact that I made with SV9AKI in 1990. My SAE was still in pretty good conditions, considering that it's been hanging around for 9 years!"

SECRETARY SELECTED FOR IREF. A press release by Mike, AD5A, dated June 21, 1999, reports: "Bob Nadolny, WB2YQH, has been selected as Secretary for the Island Radio Expedition Foundation, Inc. Bob is the editor of The 599 Report and is an avid DXer and Island Chaser. IREF should benefit from Bob's experience. The Island Radio Expedition Foundation, Inc., was founded

to raise funds in support of amateur radio expeditions to rare and new islands qualifying for the IOTA award. The Foundation has begun accepting donations and more information can be found at the Web site: http://www.sat.net/~iref

TF, ICELAND. Bob, W2SF, informs OPDX that he would like to announce his planned trip to Keflavik, Iceland, August 26th through September 6th. This will be a Single Op all band (80-10 meters plus the WARC bands) operation on CW/SSB/RTTY. He has the license W2SF/TF and the airline tickets. His equipment will be a TS-850s, lap top computer, R7 vertical and g5rv all band dipole. QSL to his home callsign.

WELL KNOWN DXER ARRESTED. Information from several sources being passed around indicate that a Japanese newspaper called "Asahi Shimbun" reported that Zorro Miyazawa, JH1AJT, and Hirohiko Daikoku, JG3QCW, were arrested on June 16th. The reason given was that in 1995 Zorro allegedly had let Hirohiko take the second class license test for him using false identification. At the 1999 New Orleans International DX Conventions, last month, Zorro was announced as "DXer of the Year" because of his activities as 7O1A, XW30/XW30A, A51/JH1AJT, XU1A, XW8KPL, E31A etc. During the 1998 Visalia International DX Convention Zorro announced that he had been invited back to the Kingdom of Bhutan for another DXpedition. This operation was originally scheduled for early 1999 and has yet to happen.

ZC4, U.K. SOV. BASE AREAS ON CYPRUS. If you missed last Saturday's activity by ZC4ATC (by Alf/5B4AFB, George/5B4AGC and Ian/5B4YX) you may have another chance this coming Wednesday, June 30th. Alf, 5B4AFB, will be there for his usual monthly club meeting. Begin looking for him starting around 1700z for about 3-4 hours.

ZD8, ASCENSION ISLAND. As reported in last week's bulletin, Paul Hutley, KF4OOX, is now active as ZD8V and is looking for a few states to finish his WAS. Paul planned to be active during last weekend's "Field Day" and is looking for the following states: Hawaii, Idaho, Oklahoma, South Dakota, Utah and Wyoming. However, Paul informed your editor this past week of some "Bad News". Paul has reported that his antenna is broke and "needs some TLC". He has lost the ability to tune the 15m band and the 12m band is not very far behind. Paul states that he will operate Field Day only 10/20 meters (both of which work just great). After "Field Day", he will take his antenna down. Paul hopes to have it back up in a week or two at the latest.

We were on 20 meters. We didn't hear any G's, and there were
four active stations here, so I hope you worked more G's than
you did KH2's... We called you for an hour, but you never heard
us.... noboby beaming the Pacific I guess.

Indeed. That was its real purpose. The West knew it could outspend the East, and that the East would bankrupt itself in an attempt to compete. This showed a nice grasp of human nature which overshadowed any technical merits or demerits of SDI.

There were some nice spinoffs of SDI in the areas of adaptive optics, supercomputing, and high power lasers, but it was never realistically assumed to be a real defense against nuclear weapons. The concepts of castles and moats are dead when faced with the power of the atom.

From: James Lee Tabor <ku5s@wtrt.net>
Message-ID: <3777B3BF.15CEEBB8@wtrt.net>
Source record: 24420

Greetings,

The NCDXF beacon system is an awesome resource. It's also lots of fun.
http://www.ncdxf.org/beacon.htm

We provide a download able software app called Active Beacon Wizard ++,
or ABW++ to help listeners make easier use of the beacon network.

ABW++ displays the currently active NCDXF beacon over a topographic map,
along with the solar terminator. Tools for setting the system clock, via
the net, are also provided.

ABW++ will download and display selected, totaling 14, Space Environment
Center (SEC) solar reports and forecasts. In addition, ABW++ provides
the comprehensive SEC glossary of solar terrestrial terms. This
glossary, along with report explanations, is provided in
windows-help-file format and may be of use when interpreting the
propagation reports and forecasts.

ABW++ requires win95 or later.

Look for the "Active Beacon Wizard ++" link at the URL below.

Indeed, it may have worked for you, a conspiring member of a very small world population minority, including North American citizens like yourself. But it does not work for by far the great majority of the world's population. It is they who have been robbed.

But, of course, the remainder of the world's very sensible, intelligent, better educated population do not expect you to admit it. It goes against normal human (aggressive) nature. So don't worry about it.

Reg, G4FGQ.

I was surprised at how few Europeans called in -- only three (and
G3NYY was one of them, tnx Walt). Usually we get more since our beam
heading to the NE USA population centers is the same as the beam
heading to Europe...

A Yagi with a reasonable number of elements for HF has a broad elevation pattern. The angle of maximum radiation is determined primarily by the height of the antenna (which determines the phase between the field direct from the antenna and the one reflected from the ground), not the tilt of the antenna. Tilting the antenna has almost no effect on the elevation angle of maximum radiation. This is true of any practical HF antenna.

If you mount an HF Yagi with the elements vertical, you'll take a bad beating at low angles due to ground absorption of vertically polarized fields unless reflection is off salt water. It would be interesting to see the effect of tilting a long vertically polarized Yagi over salt water, but my guess is that antenna height would still be the chief determining factor of the angle of vertical radiation.

You could improve radiation straight up, or at very high radiation angles, by tilting a beam to a vertical, or near-vertical position. But the only way to make an appreciable impact on radiation at low angles is to change its height.

Roy Lewallen, W7EL

I wish I could've worked a few DX stations! I have done that in past years.

The conditions were lousy here. I camped out on 40 CW all night
Saturday. I couldn't get a decent run going so I was mainly search &
pounce. Never heard any EU, no Pacific stations at all, no KL7's. The
W6's kept fading in and out all night.

We'll see what next year brings!

Solar flux was about 200, with sunspot numbers of 300. X-ray flares were as bad as they were two weeks ago, though. EU and SA were coming in strong but variable around midnight local on 20m PSK31. I worked quite a few of them.

Michael.

Hi Dave,
Do not worry, there is some defanse.
You must made rotating high-frequfency shield.
You can made it with tree of Tesla's coils.
Every secundary put on next primary, and made one circle.
Everything must be in resonantion state (all of coils).
All the best,
Proka

Reg, you're not stupid so why insist on being ignorant???
Have you NO knowledge of history? Even that of this century?

How many despots did dear old England have to endure for centuries before the populace rose up and demanded some resemblence of humane treatment? How long did we "North Americans" try to ignore the Nazi threat, stay out of it and let your "nature" take it's course before we came to realize that the threat was not just to those on the other side of the pond? How many repeats -of history- does it take to drum some sort of knowledge into any human? Fortunately not an infinite number for some of us. Not so sure about you.

We have learned that the undesirable traits in human nature tend to try to dominate the desirable-so we must remain eternally vigilant so that the Hitlers, Stalins, Pol Pots et al are nipped in the bud, and not at the cost of millions of innocent lives.

Yes--Milosevich, too, is an "educated man". So what does that help?
Did he "rob" anyone???

Evidently you don't know anything of economics or the workings of a capitalistic economy... Money MUST be spent for the economy to survive, and LOTS of money must be spent for it to grow.

From college economics of the 60's, I recall that "a dollar spent generates seven dollars" by the time it has circulates through the economy. Who knows what that figure is now? We MUST have huge spending projects such as the B2 bomber at a $billion per copy and other huge spending projects which integrate "high tech" into--and keep it in-- our everyday economy in order for the economic expansion required --no, DEMANDED-- today to endure. Examples are HDTV, the personal communications explosion and Star Wars, to name a few. Forget giveaways to foreign countries, tho it's sure they will continue unabated, but those dollars do nothing for OUR economy. The dollars spent HERE are what counts.

Speaking as a total idiot when it comes to economics: What kind of BULL is that? Inflation aside, as far as I know, wealth is not created or destroyed, just redistributed. With a trade deficit, the only meaning I can infer from your statement is that each dollar inflates 700% by the time someone gives it back in taxes.

This doesn't feel right, so please explain.

Michael.

Question: from whom was Bill Gates' wealth redistributed?

Wealth is most certainly created... ever hear the term "economic growth"?

So why do US citizens refer to themselves as 'americans' ?

They do not yet own the whole continent.

After all, Cubans are americans.

U.S. citizens? The proper name of the country is the United States of
America. How they refer to themselves is irrelevant. Your implication that
all use this moniker and that by this use there are no other Americans
outside of the USA is silly

You forgot Canada (which by the way has far more land mass than the USA),
all the various sovereign Indian nations, Haiti, and Costa Rica to name a
few.

Keep trying, you'll eventually get it.

Dick's right, and it has nothing to do with inflation, but it requires some background in economics to understand why this is so. Money is fungible, and elastic, each time it changes hands it has an economic effect. I can't give you an economics course in a post, but let me try to give an example which might make things a bit clearer. Lets suppose the government spends 1 million dollars a year in each of two different communities. In one community, it spends the money by giving 500,000 people each $2. In another community it buys 1,000 high tech widgets that cost $1,000 each from a local company. Which will have a bigger impact on the local economy?

You seem to be saying that the two expenditures will have the same effect, but they won't. In the first case, people will buy a hamburger, a pack of smokes, or a bottle of Ripple with their $2 windfall, and that's basically the end of the story. The money is dilute, and goes for basic items with little or no multiplier.

But in the second community the company hires engineers and production staff to make the widgets for the government. Each of those people make good money and buy a house, a car, furniture, a new TV, etc. The contractors building the houses, the car dealers, the furniture makers, etc all hire people to produce and sell these items to them. Those people in turn are able to buy relatively big ticket items too. So the dollars turn over in the economy several times over the course of a year instead of once or twice because the wealth is distributed in larger chunks and can have secondary and tertiary effects in the local economy as it cascades through it during the year.

In high tech high wage areas, the multiplier in the local economy is often seven times or more. You get a "boom town" built up around the high tech industry and the businesses which cater to the workers of that high tech industry. In low tech

low wage areas (ie mill towns, farming areas, etc), or with poverty program giveaways, the multiplier is low, generally less than two, so those areas remain depressed compared to the other town, though the same amount of money has been injected into their economies by the government. The difference is that in the former case the money is in large enough lumps to generate job producing secondary and tertiary economic activity while in the latter case it is so dilute that it has little secondary and tertiary impact (or quickly becomes so concentrated in a few hands, ie the mill owner, the company store, etc, that it can't be spent again fast enough in the local economy to have a major impact).

Economists say that money has "velocity", meaning that it moves through the economy at a certain rate. Money in larger chunks retains its velocity better than money that's finely dispersed. It can be said to have an "inertia" proportional to the size of the chunks. This lets it have a bigger impact at each level as it cascades through the economy. There is a size that is so large that it can't easily make it through the porosity of the local economy, however. In other words, a rich man can only watch so many TVs, drive so many cars, or get so many haircuts. So the multiplier again falls when the chunk size passes a certain limit.

There's a size range where the money will retain maximum velocity in the local economy, and have the largest multiplier effect. This can be calculated fairly closely by econometric models. The peak is roughly when the primary wage generated by the injected capital is in the range of $50,000 to $150,000 a year. That's large enough to spur big ticket purchasing activity, but small enough that the money can easily be spent locally. It also happens to be in the range paid by makers of military hardware, which means that the government's buying of big ticket military goods is a spur to the economy.

It then doesn't matter if the hardware gets parked in a desert, or is sent to the scrapyard, or is shot to the Moon. It has already had its economic impact. What we don't want it to do is to have a civilian use. That puts the government in the market in competition with its own people, and acts as a drag on the economy.

(For example, the government could just buy John Deere tractors, that would spur the economy where they are made just the same as if they were buying M1A tanks, but buying tractors would bid up the market price of tractors for farmers and construction companies, ie supply and demand, so it would have a net negative effect on the overall economy. For maximum stimulus effect without undesired side effects, we want the government to buy things that have no civilian use so that they aren't competitors in the marketplace with civilians for those goods.)

That's also why the government destroyed its old ICBM launchers instead of selling them as cut rate satellite launchers. If they had done that, they'd have depressed the market for new launchers and hurt the economies of the areas where they are produced.

I would like to invite you to http://hfradio.org - my hobby website, where I am gathering radio resources together for the general public. My Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

(We just did field day as NW7US -- we had a LOT of fun up on a mountain at 3250 feet. Did all HF voice this particular time. And we're still camping out until after the 4th of July. Now, we're a mini-dxpedition! Hear us on the HF bands. We'll be working some 40 meters, but mostly, we'll be on 20, 15, 10 and 6. Hope to hear you!!)

73 de NW7US, Tomas.

as far as I know, wealth is not created or
destroyed, just redistributed. This doesn't feel right, so please
explain.
>
> Question: from whom was Bill Gates' wealth redistributed?
>
> Wealth is most certainly created... ever hear the term "economic growth"?
>

Wealth is most certainly created, and is the driver of economic
growth. One learns this in Economics 101. But wealth is generally not
created, only redistributed, by the Government. What you learn in
Economics 101 is that the accumulation of wealth is not a "zero sum
game", as was (is?) believed by folks of the Socialist and Communist
persuasion. Someone getting rich is not necessarily rich because he has
taken it from someone else. He may have created the wealth, as has
Billy Gates.
Gates has already created as much or more wealth than many of the
previous tycoons, such as Vanderbilt, Carnegie, Rockefeller, etc. And,
this wealth is far more widely dispributed: Microsoft has created over
1000 millionaires. None of this came from taxes, or as redistributions
from Government, but instead it was created in spite of Government
redistribution policies.
It amazes me that this elementary economic concept is not understood
by even many 'educated' people today.

73,
Don, W6JL

Not being a student of economics, I cannot offer a logical argument, but to
me it would appear to me that the wealth that Bill Gates has accumulated and
redistributed was not actually created.

His money came from selling products that *he* was responsible for, as opposed
to other products, such as food, clothing, cars, televisions etc.

A person has an amount of 'disposable' income and many see fit to spend it
in a way that benefits Mr Gates.

Ok, the stated premise is that the wealth was redistributed. Bill Gates now has assets of somewhere around $100,000,000,000 - who is now doing without that hundred billion?

> His money came from selling products that *he* was responsible for, as opposed
> to other products, such as food, clothing, cars, televisions etc.

Actually, most of his money didn't come =from= anywhere. In fact, most of his wealth isn't money at all, but calculated by his stock holdings.

Consider Marc Andersson (or whichever variant of the name he uses) of Netscape fame:
He goes to bed the night before Netscape's IPO and really doesn't have a lot of money. The next day, trading opens, and his holdings are suddenly worth tens of millions - nobody gave him any money, but his wealth was suddenly created.

The other thing to consider is that every minute of every day our various mints and the treasury are creating more money - wealth created. (Which creates inflation, btw...)

But we digress. This topic should be moved to one of the economic discussion groups.

It should be pretty obvious. People spend their lives (hopefully)
producing something - making products. Goods and services are valuable
products. They become products by having something added to them or done
to them that they didn't have before, by the energy expended by the producer.
Hence, there is more of value existing each day, and hence more wealth.

When you see figures of GNP, that is NEW product and NEW wealth that
didn't exist last year.

Money is simply something that people will exchange for the products.

Certainly, wealth is created daily... If it were not then the increased billions of population alive today who were not alive four thousand years ago would never see a single dollar in their entire lifetimes, nor would they have even a scrap of cloth to cover their nakedness... Yet, we have the most wealth in circulation today that we have had in 4000 years of recorded history...

Guess it depends on how ya look at it! THERE is NO real backing for the earthly things we so covet including "money". The ONLY backing for the paper money we circulate today is our belief that it WILL buy something tommorrow! Period.... How long in our present state of affairs will it last? Sparks my two cents worth...

Can anyone put me in touch with some NJ hams?

2013. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7lh8al$pi8@news.Hawaii.Edu>
Source record: 24365
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

This is the part that troubles me. I've always suspected that my future retirement hinges on everyone buying in (yuck yuck) on this shared fantasy of wealth. So, is it real, or just a figment?

Certainly there's real value in Microsoft's intellectual property, and in the ore mined from the hills. Where and how are these accounted for in whatever counts these things? Is more currency printed to reflect the value of the software I write, or the book I authored? Or does that wait until the mining company uses it in connection with digging up some more dirt?

Michael.

2015. DX-question

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-02 00:00:00 UTC
From: Peter Lemken <plemken@gmx.de>
Message-ID: <7lia1t$bi8$1@fu-berlin.de>
Source record: 24367

Hi folks,

I had a long discussion with one of my pals the other night and we couldn't agree on a DX-related question:

Assuming you hear a DX-staton with a rare/semi-rare call in CW working 5nn style on simplex. You can hear other stations, too, giving their own callsigns repeatedly, even though they have already been correctly identified and logged by the DX-station. Is it appropriate to call over these stations? I suppose it is, since the other station is merely keying out redundant information that is already logged by the DX-station and I assumed that the DX-station is already waiting for new callers at that point.

Or do you think it's just plainly rude and one should wait until the DX-station says "73 QRZ de..."?

Thanks for answering.

Peter Lemken

In a previous article, plemken@gmx.de (Peter Lemken) says:

>Hi folks,
>
>I had a long discussion with one of my pals the other night and
>we couldn't agree on a DX-related question:
>
>Assuming you hear a DX-staton with a rare/semi-rare call in CW
>working 5nn style on simplex. You can hear other stations, too,
>giving their own callsigns repeatedly, even though they have
>already been correctly identified and logged by the DX-station.
>Is it appropriate to call over these stations? I suppose it is,
>since the other station is merely keying out redundant
>information that is already logged by the DX-station and I
>assumed that the DX-station is already waiting for new callers
>at that point.
>
>Or do you think it's just plainly rude and one should wait
>until the DX-station says "73 QRZ de..."?
>

I always wait until the DX station has sent "QRZ?" or "TU" or somehow signifies he thinks the QSO is over. If he has done that and the other stations keep sending their callsigns, then they evidently don't have a receiver/antenna sufficient to hear the DX well and they don't know or don't believe they actually had a full QSO.

If the DX station has logged them and sent "TU QRZ" then it's everyone else's turn to call. The station that keeps calling after "working" the DX will have to wait for better conditions when he can hear well enough to know he has a QSO.

It took me many evenings here to finally work Omar YK1AO. The conditions were finally just right one time and we had a QSO. I had a couple "possible" QSO's during those many evenings, but couldn't hear him well enough to be sure so I bowed out.

> Is it appropriate to call over these stations?

I wouldn't.

First, these people may legitimately not know they're in the log. (QRM at their end, whatever) As far as they're concerned, they have NOT worked the DX yet, and have just as legitimate reason for calling as anyone else. As long as the DX is still trying to confirm that they're in the log, the QSO is not yet over.

Second, while you may know these people have already been worked, other participants in the pileup (especially those who've just tuned to the frequency) may not. As far as they're concerned, it sounds like it's OK to call the DX while he's in QSO with someone else. This leads to extra QRM once the DX does finish the QSO and start QRZ-ing again. (not to mention that it might cause some of these late tuners to believe you're a lid!<G>)

Finally, if the DX station himself doesn't believe the previous QSO is complete, he may not be willing to take any more calls yet. Your calls may be just that much more QRM.

Dear Fellow HAMS,

We have received the DX- Bulletin regarding the SCARBOROOGH
REEF DX-PEDITION last June 22, 1999, and we have check if the person
mentioned, Mr. Luis Terrones is a licence ham operator in the Philippines and
if He is authorize to use the callsign DU5LT and DX0SR. After checking
with the Regional Director, Director Tacay, of the National Telecommunication
Commission office in Region V, He assured us that there is no record of
Mr. Luis Terrones in his office, in fact the callsign DU5LT was assigned
to Mrs.Lolita Tabong-Tabong and not to Mr. Luis Terrones. For further
information the prefix DX is only authorize to a club station and
special event station and assigned to an individual. We regret to inform you
that Mr. Luis Terrones is not a member of the Philippine Amateur Radio
Asso. Inc. and is not authorize to represent the Philippines in this
DX-PEDITION.

The SCARBOROOGH REEF DX-PEDITION is not sanction by the
Philippine Amateur Radio Asso.Inc. and does not have the Permission of our
Philippine Government. If you have any question on this information please
be free to contact us at du6bg@iloilo.net or du9rg@mnl.sequel.net or
du1san@pworld.net.ph

Our best of 73s DU6BG Bobby

(Note: Bobby is (or was, I'm not sure) the President of PARA)

Yes, it is more than rude, and I tend to wait until I hear the DX station clearly call "TNX QRZ" or whatever his pattern is. My pet peeve is the ham who has to work the same rare DX every night on the same band, and then engages in pleasantries such as "enjoyed working you on this band last (Monday, Tuesday and Wednesday) or whatever, when the DX station was in a pattern of contest-style rapid QSOs. Most times I just go away and work something interesting on RTTY. Now THERE is a gentlemanly band segment for the most part!

Friend, if you wait for "qrz" from a DX station, you might have a long wait. It is not something done by a good operator unless traffick gets real slow.

Currency is just one counter used as an exchange medium for trading wealth.
The "money supply" at any given time is the sum of the current deposits in banks
(just numbers in a computer), available lines of credit (again just numbers in a
computer), other liquid assets (ie readily convertible T-bills etc), and currency.
The latter is the smallest, representing less than 10% of the current money
supply at any given moment.

Money, at least US paper currency, is just a form of promissory note. Its
real value is less than 1 cent per bill. But as a counter, it serves in place
of barter to let us trade among ourselves items of value, as do checks,
credit cards, etc. The items of value are the goods and services which
we wish to obtain or have performed, or which we produce or are willing
to perform.

Is wealth real? Well yes, it is as real as anything can be in human terms. It is as real as love, hate, want, envy, and desire. But every price is flexible. The free market sets what we agree to be the value of a good or service at any given moment. Nothing has an absolute value for all time. Goods and services don't, and the counter we use in their stead (money) doesn't either.

Fashions in what is desirable change, circumstances change, the value we assign to things goes up and down. When I'm hungry, a hamburger has more value than when I'm sated. I may value an hour of my time more or less than you do today. Etc. The market averages these things out, but even the average value doesn't stay the same over time. 40 years ago, hoola hoops, coonskin caps, and tailfins had a lot of value. Today they are a drag on the market.

Some things retain a constant value better than others, of course. But even gold and silver swing wildly in value. For many years, I had Coffman's rule of meat. That said that a US made car cost the same, pound for pound, as hamburger. It did from the 1920s through the 1960s, but then government interference in the market drove the price of autos up (CAFE, emissions standards, 5 MPH bumpers, airbags, ie things the average consumer wouldn't choose in a free market), so now autos cost the same as filet mignon, pound for pound. Does that represent a real increase in wealth? I don't think so. Only the free unfettered and uncoerced market can determine true wealth.

Well, sometimes I am the one who is on the other (this) end of pile-up. To be honest I HATE to hear stations calling before I key "TU" In most cases a DL, OK or LY stn can not hear the SP station that still talks to me on 15 or 10m but a short QRX until "TU" is heard wouldn't be bad at all.

Press Release: Logger Ver. 6.07 Now Available
==========

Looking for a great Windows logging program ?

It's here! LOGGER is a program written by Bob Furzer,
K4CY (ex N6BFM, 9K2ZZ) and has more features than
the average ham will ever use, including:

Easy to use logging
Radio control
DX cluster access (Telnet or TNC)
One click grabbing of cluster spots
Easy Awards tracking (DXCC, WAS, WAZ, IOTA)
Graphical display of Grayline
Database for managing Skeds
Handy conversion calculator (F to C, etc)
GOLIST QSL database interface
Support for current ham CD ROMS
Graphical Satellite tracking display
PSK-31 interface for your sound card
Data Window to drive a TNC in RTTY or data mode
Easy backup and log printing
Completely ADIF compatible (import & export)
Keyer interface for TNC CW keying
Quick STATS display of DXCC and WAZ stats
Easy User maintenance of DXCC and Prefix data

Plus a bunch more....

LOGGER is designed so that the user can easily update
DXCC lists, PREFIX lists, and set up their own band plan
and modes. No waiting for someone to customize this
program for you, you can do it yourself. No worrying
about a new DXCC database being available if a new
country comes along, with a few clicks you add it to
your database. And no worrying about being 'stuck' with
one logging program - LOGGER supports full ADIF
imports AND exports, so you can easily transport your
log data to and from any other program that is ADIF
compliant.

The great news is that Logger is absolutely FREE !!

If you'd like to try Logger, you can download a copy
today. Visit the following website:

http://www.guam.net/pub/midxa/

and click the big red LOGGER on the main page,
which will take you to a page with information about
LOGGER, screen shots, and information on how to
download the program.

LOGGER is unique in the fact that not only is the author
supporting the program, but other users are supporting
it too. There is an email list for LOGGER users, and
you'll find a subscription box on the LOGGER web page.

Help is available should you wish to convert your current
logs to ADIF format and import them to LOGGER.

LOGGER is a program that will satify the needs of
casual operators or serious DX'ers. Plus the author is very
willing to work with users making changes, modifications,
and new features available.

And the price just has to make you smile.......

Enjoy.

Hi there, does anyone know of any windows based games that can be played with another player via packet radio?

If so, I would be very gratefull if you can email me at the following address:

ALLAN@MM1BJP.FREESERVE.CO.UK

I hope someone can be of some assistance to me!

73's for now!

Allan - MM1BJP

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1RV, K1XN & The Golist, K2HJB, KF2TI, WB2RAJ/ WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, KO4PY, W4EB, W4WX, N6HR, KL7JR/VE8JR, NH7A, KE8M, WB8YJF, C6AFV, DJ5AV & DX News Letter, ES2NA, F6AJA & LNDX, G4BUE & DX News Sheet, OK1MD, SP8QED, VE3CUI, ZL2HU, ZD8V/KF4OOX and ZS5BBO for the following DX information.

7Q, MALAWI. Just a reminder that Alan, N5PA, will be in Malawi by the time you read this and will be active as 7Q7PA until July 13th. He will operate during the IARU DX Contest. QSL via N5PA.

8Q, MALDIVES. Jacques, F6BEE, will enter the IARU Contest (July 10/11th) as a Single/All CW category as 8Q7TV from North Male Atoll in the Republic of Maldives. Activity will be on 40-10 meters using an ICOM 706 Mk2 (100 W out) and a multi band vertical (R-7000) on the beach. Outside the contest operations will be on all bands 40-10 meters on CW/SSB between July 10-16th. QSL to home call F6BEE.
Meanwhile, the "DX News Sheet" reports that Steve, G3VMW, will be active September/October as 8Q7SW. QSL via home call.

C2, NAURU. The "DX News Letter" reports that Jack, VK2GJH, is active as C21JH on 80-6 meters until July 8th. From QSN reports, look for him on 20 meters SSB between 1130 and 1200z. Also, check 17 meters around 1300z. Jack will return to the island again July 20-27th, after his T30 operation (See T30 below). QSL direct only to VK2GJH, Jack Haden, Box 299, Ryde, NSW 2112, Australia.

C6, BAHAMAS. Steve, N4JQQ, is active again as C6AFP from Treasure Cay until July 17th. His beacon can be heard on 6 meters (50062.5 kHz). QSL via N4JQQ.

C6, GREAT INAGUA ISLAND (First time aired!). Delano, C6AFV, will be going to the island of South Bahamas July 8-12th. This is the first time this

island will be activated. His callsign will be C6GI. QSL via C6AFV DIRECT ONLY. Activity will be on CW/SSB.

CE0, EASTER ISLANDS. Look for Hal, JL6MSN, to be active as CE0Y/JL6MSN July 7-8th, before he heads to French Polynesia (See FO below). Activity will be mainly on SSB on 15/20 meters. QSL via JL6MSN, Haruo Araki, 4-4-14-402 Nishihonmachi, Yahatahigashi Kitakyushu, 805-0061 Japan.

ES0, KIHNU ISLAND (KO18XC). The Viimsi RC (ES2WX) plans a massive operation to this Estonian island (IOTA EU-034) July 19-27th. Their main interest is the Estonian VUSHF Open Field Day July 24-25th. During the contest they will use the new contest callsign ES0X. Before and after the contest they will be using the callsign ES2WX/0 and their own personal callsign/0. The team members are: ES2RJ/0, ES2NA/0, ES2QH/0, ES1MW/0 and possibly others. Activity will be on HF (including 20m VHF-net), 50 MHz, 144 MHz, 432 MHz and 1296 MHz. One of the working position is located at the top of the southern lighthouse of Kihnu about 30m ASL. The other two working positions will be located inside of the tent on the ground. After the DXpedition (about the end of August) look for the ES2WX Web page for info and pictures. URL address is: http://www.automaatika.ee/es2wx
Many other details/information and the rules for 1999 Estonion Open Field Day can be found on this Web site.

FO, FRENCH POLYNESIA. Hal, JL6MSN, will be active as FO0MSN after his Easter Island operation between July 9-18th. Activity should be the same as his CE0 operation QSL via JL6MSN.

HH2, HAITI. Bill, W4WX, will be operating from Haiti as HH2/W4WX July 13-19th. He will be on 10-20 Meters concentrating on RTTY. QSL to home callsign.

IOTA NEWS.....
EU-064. Operators F6FHO, F6OYU, F8CIO and some others will be signing TM5J from Noirmoutier Island July 22 or 23 through 25th. They will operate mostly on SSB. QSL via F8CIO.

NA-067. Special event station N4H (QSL via KO4PY bureau or CBA) will operate from Hatteras Island from Friday, July 23rd through Sunday, July 25th to commorate the Hatteras Lighthouse Relocation. CW activity will take place during the IOTA contest and SSB before and after the contest.

NA-067. Eddy, VE3CUI, advises everyone that he shall (again!) attempt to activate Ocracoke Island, N.C., U.S.A., from Sunday, July 4th through to Sunday, July 11th (inclusive...). You may recall that Eddy's last effort was August 1998, which resulted in being blown off the island by Hurricane Bonnie! The callsign used will be VE3XZ/ W4. Please QSL via the bureau to VE3CUI. Look for him on the usual IOTA frequencies using only a 100 watts output...

NA-067. Jon, WB8YJF, will be active from here (USI NC-001S) from July 24-31st, including the RSGB IOTA contest as WB8YJF/NA67. His

activity will be on 40-10 meters CW/RTTY/SSB. QSL to home address: Jon Severt/WB8YJF, 5586 Babbitt Rd., New Albany, OH. 43054

NA-169. Members of WWDXC, ICARC and NCCC will activate Waadah Island from July 22-27th including the IOTA Contest. The special event callsign "W7W" will be used. QSL via W5DX. For more information contact Hillar, N6HR, via E-mail: hraamat@whidbey.net

SA-081. Pedro/HK3JJH and Gerard/F2JD/HK3JBR will be active as 5K8T from El Moro Island July 23-25th. They will be active during the IOTA contest. QSL via F6AJA.

OH0, ALAND ISLANDS. Ari, OH1EH, reports to OPDX that Juha, OH1JT, will be active as OH0Z July 10-11th in the IARU Championship, CW only. QSL via OH1EH, Ari Korhonen, Kreetalank. 9 as 1, FIN-29200 Harjavalta, Finland.

OL9, CZECH REPUBLIC. Look for OL9HQ (HQ station of Czech Radio Club/CRC) in the IARU HF World Championship (July 10-11th) with 12 stations on all HF bands CW/SSB. QSL via OK1MD, Mlados Doucha, Kodanska 87, CZ-10100 Praha 10, Czech Republic.

QSL INFO AND NEWS.....
SV9AKI QSL (More on "Never Give Up!"). Last week we mentioned that Marco, IK0DWN, reported receiving this QSL card after 9 years. Well, another report came in from Elwood, W4EB, stating the following: "I was on vacation for the past 10 days and when I came back I found a QSL card from SV9AKI for a contact on 10/10/1990 using the return envelope I sent him almost 9 years ago. The amazing thing is I still need SV9 for an all time new one and this card was number 299. I was further amazed to see this reported in your latest bulletin by an Italian ham. Anyone have an explanation?"

Ari, OH1EH, wants to remind everyone that OH0Z QSLs are via OH1EH (NOT via KU9C!). Address is above under OH0.

ZL9CI Campbell Island DXpedition QSL Card Update. From a press release: "The Kermadec DX Association are pleased to announce that after some 4 months of total commitment towards QSL'ing for our recent most successful DXpedition MOST of the reply cards are on their way to you all." The complete press release by Ken Holdom, ZL2HU, will be sent out as an additional bulletin to all OPDX InterNet Subscribers.

Bernie, W3UR, reports that the E44DX QSL cards are going out ASAP. 200 US envelopes went out on Wednesday (June 30th) and 700 US went out July 3rd. There are about another 800 US envelopes to go out which should be in the mail be the end of the month. "Remember all DX with prefixes from A-O are done", states Bernie.

R1MVA, MALYJ VYSOTSKIJ (DXPEDITION). By the time you read this the joint Finnish/Russian team of 25 operators will be active as R1MVA from here until July 15th. Operations will be on all bands from HF to UHF. The group will be active in the IARU Contest, but will be using a special shortened

callsign R1MV. They will operate on all modes (CW/SSB/RTTY, MS, EME, Tropo) with nine radios with amplifiers and an assortment of yagis, verticals and wires. For more details, please refer to OPDX.413 and OPDX.414. QSL via OH2BR (CBA is NOT correct): Jukka Heikinheimo, Rikunkuja 4, FI-01420 Vantaa, Finland.

SPECIAL EVENT. Activity still continues by SN0APT to commemorate 750 years of Polish pharmacies on 160-10m SSB/CW/RTTY. Please refer to OPDX.407. This station has been active since the 1st of May. Next week (July 5-12th) a special field day activation will be set up in Klementowice (KO01BJ), southeast Poland. The station will end its special activity later this month from Lublin (KO11GG) with the operation ending on July 31st. QSLs available via bureau via special callsign or SP8YCB club. Direct to: SP8YCB Club, PO BOX 403, 20-950 Lublin-1, Poland.

SPECIAL EVENT. The "1999 Museum Ship Special Event" will take place from 1330z, July 17th through 2000z, July 18th. They currently have 37 museum ships which will be activated for the weekend. The USS Salem Radio Club (K1USN) is sponsoring this event. Certificates are available for working five different vessels during the weekend. W1QWT is the QSL Manager for K1USN. He is also the Certificate Manager. Send a business size SASE for the QSL; 9 X 12 SASE for the Certificate. The following are suggested operating frequencies for ships operating during the event:
AM - 3895 kHz
SSB - 3930, 7230, 14230, 18130, 21330, 24930 and 28430
CW - UP 30 kHz.
Activity will be available on 6 and 2 meters also. For further info, check the K1USN Web Page: http://www.ziplink.net/~rcal/salem
OR E-MAIL TO W1QWT - rcal@ziplink.net

SV5, DODECANESE. Look for Dieter/DL9UDS and Andreas/DL9USA to be active from Kos Island as J45K July 28th-August 11th. There is some 6 meter activity planned.

T30. WESTERN KIRIBATI. Jack, VK2GJH, will be active here after his C21 operation (See above, C2) signing T30JH from Tarawa (OC-017) from July 8-20th. Activity will be on 80-6 meters. QSL direct only via VK2GJH.

USI ALERT AND NEWS.....
In celebration of the 5th anniversary of the US Islands (USI) awards program, VE8JR will be active exclusively around 28495 kHz from Vale Island, Northwest Territories. Operation will take place during the ARRL November Sweepstakes Contest Novembers 20-22nd. 17m activity will also take place from Northwest Territories and Alaska after the contest. QSL Manager KL7JR (CBA). Check out URL address: http://www.eng.mu.edu/~usi

Dave, KE8M, will be active from Florida Keys (Key West, USI FL040S) July 20-30th. He will be active on 40-10 meters CW as KE8M/4. Dave will also participate in the IOTA Contest as a 24 hour CW entry. He will be using a TS-450, AL811 and R-7000.

VP8, BERMUDA. Hank, K2HJB, will be active from here (IOTA NA-005) as K2HJB/VP9 from July 26-30th. Operations are planned for 20 meters SSB and possibly 6 meters FM only. QSL to home call or KB2PFP.

ZD8, ASCENSION ISLAND (Update). Paul Hutley, KF4OOX, active as ZD8V informs OPDX that he could not operate during "Field Day" due to being sick from having a tooth pulled the day before. OPDX wishes him a speedy recovery. Paul states his antenna (A GAP Titan DX) is still sick and he hoped to have it down during the past week for repair. He mentions that he uses the following setup: Icom 756 Transceiver into a AL-80B Amertron 1K amp into a MFJ versa tuner V and into a GAP Titan DX multi-band vertical antenna. Paul also uses the LOG-EQF program on a notebook computer with QRZ CDRom in it.

ZS, SOUTH AFRICA. NODXA member Edwin, ZS5BBO, will be operating in IARU HF World Championships contest as ZS5T from the beautiful port city of Durban on the east coast of South Africa. He will be using his Kenwood TS450SAT, Linear amp TL922 from Kenwood and 5 element TET HB35T for 10m, 15m and 20m at 130 foot in the sky. He will only have a Cushcraft R7 for 40m. Edwin requests to, "Please join the fun and give some points in this great contest. Last year (1998) I was 10th in Africa operating as ZS5BBO, hopefully I can improve this year. I hope to operate the full period of the contest." QSL is direct only to: ZS5BBO, P.O. BOX 211032, BLUFF, 4036, SOUTH AFRICA.

The manual that I have shows listings for several modules for this
tranceiver. However, I am wondering if anyone has or has convertd a
module for the 726 for 1296 Gig. I would like to know of availability
if such a module is available...

Tnx in advance

I'm entering my old log into an electronic logbook, and found that (as an example) the Baltic countries are handled wrong.
According to the author (and various others), the mentioned prefixes are now kazakhstan.
However, when I had the QSOs in the 80's, the prefixes belonged to Estland, Letland and Lithuania.
Can anyone explain/clarify
1) when the change of prefix occurred
2) if more of the same type of changes has happened?

73, Nico, OZ1BMC

> Can anyone explain/clarify
> 1) when the change of prefix occurred

The changes happened when the old USSR broke up into separate
independent countries. Actually, these prefixes belonged to these
countries throughout the USSR's control, but they weren't used. Other
CIS countries received prefixes that used to belong to the USSR.

> 2) if more of the same type of changes has happened?

Yes. Using the English names of the countries:

Country: Was: Now:
Azerbaijan UD6/UK6C,D,K 4J,4K
Georgia UF6/UK6F,O,Q,V 4L
Armenia UG6/UK6G EK
Moldova UO5/UK5O ER
Estonia UR2/UK2R,T ES
Belarus UC2/UK2A,C,I,L, EU,EV,EW
UK2O,S,W
Kyrgyzstan UM8/UK8M,N EX
Tajikistan UJ8/UK8J,R EY
Turkmenistan UH8/UK8H EZ
Franz Josef L. UA1/UK1 4K2,R1FJ
Uzbekistan UI8/UK8I UJ,UK,UL,UM
Kazakhstan UL7/UK7 UN,UO,UP,UQ
Ukraine UB5/UK5/UT5/UY5 EM,EN,EO,U5,
UR,US,UT,UU,
UV,UW,UX,UY,
UZ
European Russia UA/UK/UV/UW U1,3,4,6;
1,3,4,6; UN1 R1,3,4,6;
RA/RE/RJ/RK/
RM/RN/RP/RQ/
RS/RU/RV/RW/
RX/RZ/UA/UE
1,3,4,6
Kaliningradsk UA2/UK2F same prefixes
as above but
with number 2
Asiatic Russia UA/UK/UV/UW9,0 same prefixes
as above but

with numbers
8,9,0

Hopefully that's accurate...
Don't forget to check for changes in some other countries -- for example, Czechoslovakia split into OK/OL and OM (Czech Rep. and Slovakia) and the changes in Yugoslavia. East Germany may also give you some problems...

Hello,

Anyone try using QRZ.COM lately? I've been having 30 second delays just getting to their home page because of the ad space they are now selling. E.g., recently it was trying to connect to jeeves.flycast.com. What a bummer, another perfectly good site down the toilet of Internet commercialism. I hope Buckmaster doesn't succumb to this nonsense.

But the KEY POINT (according to FEMA's consultant) is that the re-radiated
energy builds up IN PHASE because the point at which new radiation is
being generated is advancing just as fast as the newly-generated wavefront
is propagating, i.e. at the speed of light. This is what gives the EMP
its very sharp wavefront and wide bandwidth, which in turn is what makes
bypassing and shielding tricky.

Body handling: Binary attachment payload not displayed: orlando.guerra.vcf

I am looking to purchase my first HF Rig. I have very limited funds. I have been looking at the MFJ-94XX (XX = 20m, 40m, 75m). The catalog has them listed at $239.95. Are their any other SSB Single band HF radios at this price or lower available?

Any personal experience with the above models? Comments and suggestions will be appreciated.

Thanking You in Advance
Orlando Guerra Jr.

I utilized QRZ.COM just last night when I saw the posting for it. Great sight and I had no delays on it loading. Could have been the phone connection at the time or it could have been getting hit pretty hard. (just did another quick check and still a fast/normal load time). Better luck with it in the future. It really is an informative site.

Hi,

Welcome to the HF bands. If yu are willing to pay $239.95 for a single band, I would recommend you go for a simple TS120S Used, you can find many on the swap nets for about $275, for an extra 30-40 bucks you get a 80-10m SSB/CW/AM rig !!

Good luck ! & 73's

VU2ATO, KB1DWN

Hi there

I am looking for the Icom CI-V interface programming manual. I have a Icom IC746 and IC820. I wanted to buy the RS746 software from Icom but it will apparently only work with my IC746. I need to control 2 rigs from my CI-V controller which is actually capable of controling 4 but I cannot find a good program on the net that can give me full remote functionaly for both rigs.

I now want to write my own interface but am battling a bit. I have the necessary codes but cannot get the interface to recognize or reply to anything I send to it.

Can someone help or send me a copy of the manual. I believe Icom does not sell it anymore! If you have an Icom dealer near you that sells it I will pay all costs.

I would like to write the program as Freeware and would appreciate any help I can get.

One suggestion for software to control both rigs is found at
http://ourworld.compuserve.com/homepages/f6dex/.
There is also YP-Log which controls Icom rigs, I couldn't quickly come
up with the site though.

I have now done a block sender on the domains AOL.com and MY-DEJA.com
just to stop these guys that change names every 20 minutes. I may lose a
few valid posts from decent people but it sure cuts out the jerks. Outlook
Express allows you to do a 'block sender' on a complete email address or on
a domain such as AOL.com. Slowly I am transforming these ham news groups
(at least on my end) to something worth reading. FYI

Yo Benny -- go to URL:
http://www.ac6v.com/pageai.html
There you will find SW Georgia Repeaters.
Also click on "USA REPEATERS-- By ARTSCI Covers All USA States"
Covers Georgia

Thats all the ones I know of.

Good Repeating

Source record: 24283

Hi Walt!
Remember me? You knew me when you were at EMI (1968/9?).

I agree with you ABSOLUTELY! I was licensed in 1960, and used to stay up way into Saturday and Sunday mornings, waiting for the Americans to come through on 160m CW. The minute that they did - BANG! - the same old UK stations would suddenly appear (usually some 20dB higher than they had been an hour or so before), with EXACTLY these pleasantries.

I had an end-fed fullwave antenna, 80 feet high max, and ran the (then) legal maximum 10W dc input. I could work 300 miles+ in daylight, but I couldn't work the USA at night! The only American station I eventually managed to work was W1BB. Having done this, I didn't bother any more.

I realise that my antenna would not produce the low-angle radiation which was desirable for night-time DX, but my chances of making any DX contact were absolutely minimised by those selfish individuals who leapt in as soon as the band was open. Surely, if you want to CHAT to somebody 3000 miles away, you use 20 or 15 metres, and not 160 or 80 metres!

On the bright side, this has not left me a bitter and twisted person...!

73,
Ian, G3OHX

Callsign: VY0QL
Name: RICHARD BROCK BRADLEY
Address: P.O. BOX 75
IQALUIT, NT X0A 0H0

That information was obtained from the Canadian Amateur Radio Callsign Database at
http://www.rac.ca/callbook/

VY0 is a new prefix assigned to the new Canadian territory of Nunavut. Prior to April 1 of this year, Nunavut was part of the Northwest Territories, and therefore, VY0's used to be VE8's.

YEAH YEAH YEAH!!!!!

Only thing is, it ain't the "soviet union" we have to worry about now,
its the Communist Government of China and their multi-hundred
million man army.

Of course, they are nice to talk to on the radio when big brother
isn't looking over their shoulder.

Hawke

SB DX @ WW $OPDX.417
Ohio/Penn DX Bulletin No. 417

The Ohio/Penn DX PacketCluster
DX Bulletin No. 417
BID: $OPDX.417
July 12, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2VW, WB2RAJ/ WB2YQH & The 59(9) DXReport, W4WX, N5VL, N6RT, AF8C, K8YSE, CT1END, CX1ABD, DL7VSN, DS1BHE, EA5BY, F1UVN, F6IRA, G4FRE, HA0HW, JH1ROJ, LU7EC, OH1MDR,OK1FLM, PS7KM, PT2NP, SM3CVM, SP6TPM, UA6AF and VK4BLE for the following DX information.

3C0, ANNOBON. A press release by Tony, EA5BY, reports the finalizing plans for a DXpedition to the island of Annobon scheduled for September 14 through 24th, 1999. Their goals are the following: first of all to provide as many stations with a new country, and second is to leave open doors for other possible DXpeditions. Annobon island is very much needed as evidenced as being identified in the top 10 (7th place) on the most wanted list. The callsign to be used will be 3C0R. With four stations operational, this should allow easy access for those in need. One station has been identified specifically for RTTY. The other three will pay attention to SSB as well as CW. The list of operators are: Ramon/3C1GS, Roberto/3C1RV, Elmo/EA5BYP and Vic/EA5YN. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

AMATEUR RADIO NEXT ???? "PLEASE!" On nationally televised news this week, reports showed that the Bhutanese government has allowed broadcast television available in their country for the first time. However, the TV station is government run. Could "Amateur Radio" be next?

ATTENTION ISLAND/LIGHTHOUSE ENTHUSIAST. Look for UE6AAF to be active from Utrish Island in The Black Sea from July 14-20th. This operation will count for the "Russian Robinson Award (RRA)" as RR 24 01 and for the "World Lighthouse Award (WLH)" as LH 1236. QSL via UA6AF, Victor Kravchenko, PO Box 33, Novorossiysk-22 353922, RUSSIA.

CANCELLATION. Bill, W4WX, from the "Space A Group", announced that his Haiti operation/trip (see OPDX.41.6) was cancelled due to very negative

travel advisories put out by the State Department. Bill states, "Will try something else."

CT7, PORTUGAL. On July 31st, August 1st and 2nd, look for activity by CT7P from Fort Peniche by operators CT1CBI/Ant, CT1FIJ/Vitor and CT2FUP/Fernando. Contacts will count for F-031, which is valid towards the DCFP Diploma Castle and Forts Portuguese Award. It is also valid towards the DMP Award Country Portuguese NBA 1014. QSL via CT1CBI bureau or direct.

H44, SOLOMON ISLANDS. "The 59(9) DXReport" reports that Peter, G8BCG, will be in the Solomons in late 1999/early 2000 as H44PT. No other details were given.

IOTA NEWS (Stations continue to prepare for the upcoming IOTA Contest, July 24-25th).....
AS-080. A group which includes HL1OYF, HL1OJQ, HL1TXQ, DS1BHE, DS1CNO, DS1EON, DS1CJE and HL3ENE will be active from Anmyeon Island (located in the Chungchongnam-do Islands Group) on July 23-25th. They will be active during the IOTA Contest CW/SSB 40/20/15/10 meters. Operators will sign homecall/3. The group plans to bring 3 transceivers w/2 amps (500W) and 3 beam antennas. QSL via HL1OYF (Duk-Nam Kim, P.O. Box 54, Dong-Jack, Seoul, 156-600, Korea) or via homecall's CBA.

EU-003. Moreira, CT1AHU, member of the LNDX, will operate between July 21 and 31st, as CU3/CT1AHU. QSL via home callsign. (Also good for DIP AZ-003).

EU-016. The contest team OL5T (OK1MD, OK1TC, OK1DJG, OK1FLM, OK1HSK, OK1ILP) and 9A3EO will be active from Kornati Island during the IOTA Contest as 9A0A. QSL via OK1FLM, Martin Korda, Simackova 17, 170 00, Praha 7, Czech Republic.

EU-052. This year Laci, HA0HW, will spend his holiday with his family on Korfu (Kerkira) Island again. Look for him between July 19th and August 2nd. He will be on all bands, including the WARC bands, on CW/SSB/RTTY. The low band activity will depend on the availability of free space to hang up some long wires. On the other bands he will use mono verticals on fishing rods. He will also be in the IOTA Contest. Laci states, "It is a vacation but last summer I managed more than 8500 QSOs from Thassos Island (EU-049) in a two week period.....hi".

EU-067. Harald, DL7VSN, will be active from the Greek island Mykonos, July 12-26th. Operations will be on CW and RTTY with 100 watts into a groundplane. Harald will part take in the IOTA Contest.

EU-081. Look for operators F6DQM, F5JSK, F5LJA, F5OGG, F5TBA, F1DPP, F1ORL and F1UVN to be active in the IOTA Contest as TM2F from St. Marcouf Island (MA-001). Contacts are also good for the LH-0060 (World Lighthouse Award). QSL via F5LJA.

EU-089. CT1AHU, CU3EJ and CU3AD will participate in the IOTA Contest as CU8I from Flores Island. QSL via CU3EJ. Meanwhile, Moreira, CT1AHU, member of the LNDX, will be active sometime between July 21 and 31st as as CU8/CT1AHU. QSL via home callsign. (Also good for DIP AZ-008).

EU-096. Operators OH1MDR/OH0MDR, OH1NOA/OH0NOA and OH1MM/OH0NSJ will be OH0MDR/1 from Sandstrom Reef as a multi-operator island DXpedition class entry in the upcoming IOTA Contest. QSL via OH1MDR. For more information, send E-mail to:
oh1mdr@saunalahti.fi
or check the Web site:
http://www.saunalahti.fi/oh1mdr/iota.html

EU-132. Operators SP6AZT, SP6CZ, SP6ECA, SP6TPM and DJ0AF will be active from Wolin Island (SPIA SZ-02) during the IOTA Contest as SN6F/1. QSL via bureau.

SA-028. The ABRA-DX Brazilian Association has announced that they will be active from Sao Sebastiao Island (St. Sebastian Island.), July 21 or 22 through 25th The callsigns ZW2SS (phone) and ZY2SS (CW) will be used. Besides SSB and CW, they will try to work also in SSTV. Activity will be on the traditional bands, the WARC bands and maybe 160 meters. Operators (confirmed): PP5LL, PT2HF, PT2NP, PY2HN and PY2PA.

SA-057. The Uruguayan radio group called "Radio Club Oriental" will be active July 17-18th, from "Timoteo Dominguez Island" with the support of the Uruguayan navy. This activity is in cele-bration of Uruguay's anniversary of their first Uruguayan constitution. Activity will be on 80/40/20/10/2 meters on SSB and CW using the callsign CX4CA. A special QSL card will be available.

OH0, ALAND ISLAND. Another operation is planned from here by Hartmut, DJ7ST. Look for him to be active as OH0/DJ7ST August 2-20th. Activity will be QRP 5 watts on all bands mainly CW. QSL via homecall.

QSL INFO AND NEWS.....
The ARRL W9 Incoming QSL Bureau's address has changed "Effective Immediately". The new address for the W9 Incoming QSL Bureau is: Northern Illinois DX Assn, W9 Incoming QSL Bureau, PO Box 273, Glenview, IL 60025-0237. For more information, contact Bill Russin, N9BR, via his E-mail address: n9br@arrl.net

Laurie Pritchard, VK4BLE, the WIAQ QSL Bureau Manager, reports that all QSL cards for VK8AV are to be sent via the VK4 QSL BUREAU or direct via PO BOX 3718, ALICE SPRINGS, 0871, NOTHERN TERRITORY, AUSTRALIA. Anyone who requires any information about VK can contact Laurie via the E-mail address: wiaqqsl@powerup.com.au

TM0HQ was active during the IARU Contest last weekend from the H.Q. of REF as a Multi-Multi. QSL via F6KNB. All contacts will be auto-matically confirmed via bureau. No card needed.

Doug, N6RT, reports that the following new/updated logs are now at:
http://dx.qsl.net/logs
4K9W (thru June 23, 1999)
3A2LZ (Dec.1990 thru May 1996) F/G0GRC (IOTA EU-107, June 1999)
C56T (1998 CQWW SSB Contest) JW9PJA (thru March 1, 1999)
C56A (October 1998) VQ9CV (thru July 2, 1999)
CQ2S (April 1999) VQ9GB (thru June 29, 1999)
DS5DNO (thru June 29, 1999) XE1JEO (thru July 4, 1999)
DU1ODX (thru June 29, 1999) YC0LOW (thru July 3, 1999)

Jun, JH4RHF (KH2S, OE/ZL1RH), who was operating as 4U1VIC for the IARU Contest this past weekend, states to QSL via OE bureau unless other routes were mentioned. Also, if you are using CT during the contest, note that CT misunderstands 4U1VIC as YK, Zone 39. 4U1VIC is in Zone 28, OE.

QSL LU7EC via "Luc" Mariano Elichagaray, Sarmiento S/N C.P.2703, Carabelas Bs, As ARGENTINA or via the bureau.

Dave, G4FRE, has now returned from his SV9/G4FRE operation netting 1300 QSOs. He states that "condx not brilliant, didn't really get into U.S.A. on digital modes until the last night when I worked 100+ on PSK31 and RTTY." He reports that some cards have already been received at G4FRE despite the announced QSL route (on air and via bulletins) being via WW2R. Cards sent to his UK callsign will have to be personally dealt with by Dave on his next trip to the UK on SEPTEMBER 28th. So, if you don't want to wait 3 months, use WW2R!

QSL cards for 5H1/DL7VSN, Harald, DL7VSN, reports that if anybody did not receive a QSL card for his operation in September 1997, to please send him an E-mail to: h.schlesinger-dl7vsn@t-online.de
He will send it once more via the bureau.

SI, SWEDEN (Attention Prefix Hunters). The callsign SI9AM and prefix will be aired for the first time ever July 17-18th, during the opening of the Thai Pavilion, "King Chulalongkorn Memorial Building", in Ragunda, Sweden. The Pavilion is of course in Thai style and the only one outside Thailand. For more information about the King Chulalongkorn Memorial Building, see the Web page: http://www.ragunda.se/
SI9AM will later be established as a visiting Amateur Radio Station near "The King Chulalongkorn Memorial Building". Look for activity, especially on the weekends after July 17-19th until September, on all band CW/SSB. QSL to SM3CVM via bureau or direct CBA. QSLs are to be printed in late August. A homepage is under construciton at:
http://home.swipnet.se/lararo

SPECIAL EVENT. The Florida DXpedition Group (W4DXP) will be operational for the International Lighthouse Day, August 21-22nd, from the Amelia Island Lighthouse which is located on IOTA NA-138. The special callsign will be W4A and QSLs will go to N5VL. This is the first and possibly the only operation to take place from this location as the lighthouse and its property are for sale by the U.S. Government.

TM5, FRANCE. Look for the special callsign TM5FDH to be used during August 15-29th. QSL via F5LGF.

VP5, PROVIDENCIALES ISLAND. The team of Frank/WA2VYA, Ken/K2WB and Jack/N2VW will be operating as VP5T from IOTA NA-002, part of the Turks and Caicos Islands, from October 26th to November 2nd for the 1999 CQ WW DX SSB Contest (October 30-31st) as a Multi/Multi entry. Emphasis will be on CW and the WARC bands before and after contest. QSL to N2VW with a SASE/SAE+return postage, or bureau via N2VW. QSL VP5/homecalls via homecalls via the bureau or direct to their CBA. All the QSLing info applies to SWL cards, too.

VP9, BERMUDA. Isao, JH1ROJ, informs the OPDX group that he is planning a trip here at the end of this month and has already received his license as KG8XV/VP9. Look for him to be active July 24-31st. Activity will be 80-10 meters (including the WARC bands) CW and SSB. QSL via JH1ROJ.

ZX0, ST. PETER AND ST PAUL ROCKS. A press release by Karl, PS7KM, from the Natal DX Group, has announced this week that a DXpedition will begin between the end of September and the beginning of October. Further information will be available sometime in the middle of September. Contacts with the Brazilian Navy through the Sea Resources Secretariat Comission were made and two radio operators will be allowed to remain on the rocks for the duration of the ship's stay. The Brazilian Navy visits the rocks for maintenance on their equipment once every six months. The NATAL DX GROUP has designated two operators for the DXpedition: Karl Leite, PS7KM, and Pergentino Andrade, PT7AA. Operations will be on the air for 10 consecutive days, 24 hours a day, on 6/12/15/17/20/40 and 80 meters on CW and SSB. Special emphasis will be given to the 40 and 80 meters bands. The callsign for SSB will be ZX0SK (QSL via PS7KM). The callsign for CW will be ZW0SP (QSL via PT7AA). The complete press release by Karl, PS7KM, will be sent to OPDX InterNet Subscribers as an additional bulletin.

2090. QSL info needed - WP2AHW

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-12 00:00:00 UTC
From: Todd Ellis <tellis6@bellsouth.net>
Message-ID: <o_9i3.5666$Xh6.12919@news4.mco>
Source record: 24292

I'm looking for QSL manager information for WP2AHW. I worked him on 75m 3/96. Bill, W4WX says he is not the right guy, and I have e-mailed KU9C (my next suspect) with no response. It's been a long time trying to get this one...can anyone help?? Please e-mail me with your input - yes, I know where to locate QSL managers, but this one is a bit elusive for me. Many thanks in advance!

Jiangsu DX Club of China announces the IOTA DXpedition to
Ping Island (AS-135) here. BA4RX, BA4TA and BD5RV will activate this
island as BI4Q on some regular IOTA frequencies July 22 to 27. This
will be the second time for amateur radio waves to be sent out from
this small island. Surely, the main purpose of this operation is to
take part in the IOTA contest on 24 to 25. Your QSL via BA4TA (P.O.Box
219, Wuxi, Jiangsu, China) and any comment direct to Michael Chen,
BD5RV by5qn@qsl.net Thank you.

Message-ID: <3789DB7F.5B1998B7@earthlink.net>
Source record: 24296

I want to buy a 10 meter base radio that has packet. Where could I find one and how much will it cost?

2095. Re: 10 meter Radio

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-12 00:00:00 UTC
From: "Christopher W. Buckley" <cwbuckle@mtu.edu>
Message-ID: <7mcqui$9bp$1@campus1.mtu.edu>
Source record: 24297

There are none. You can buy a packet add on for your current
radio, but not a radio on 10 with packet already. Check out
some amateur web pages on packet, or an ARRL or other book on
the subject. The no-code tech manual also has a few good pieces
of information in it. Maybe you should start by getting a license,
and then go from there....

On Mon, 12 Jul 1999 08:11:43 -0400 , Saturn1000 spewed forth to rec.radio.amateur.dx:
:S>I want to buy a 10 meter base radio that has packet. Where could I find

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only.

And, of course, you can create maps, check dx, propagation, and more, at the http://hfradio.org site.

I first learned the code, nearly 20 years ago, by copying beacon
transmissions from WNU and WLO. Living only 50 miles from WNU's
transmitters, their 4 and 6 mHz signals were rock solid even during
the daytime. It saddens me to hear they're gone.

Ah well, such is the way of the world. DXing the maritime CW bands
used to be such fun.

I have a mobile cb that I use indoors. I have serveral things that needs to be all connected.

This is the way I have it set up:

CB Radio + SWR Meter + Pre Amp + Antenna.

I do not understand, if the cb radio has a swr meter, does it matter if I have another swr meter?

Soon I will buy an antenna matcher, where do I place this in the set up?

Also, I use a 3amp power supply, what will happen if I use a 10 amp power supply?

For more information please email me. Thank you.

Saturn1000 <Saturn1000@earthlink.net> wrote:

>I have a mobile cb that I use indoors. I have serveral things that
>needs to be all connected.

That's good. You should only use the waterproof ones outdoors.
And the 'base station' CB radios don't usually do much except take
up more space on the desk.....

>This is the way I have it set up:

>CB Radio + SWR Meter + Pre Amp + Antenna.

Sounds good to me. As long as the PRE AMP has automatic T/R
switching. If it doesn't, it's probably too late to worry about it
anyway..... A 'pre amp' amplifies the RECEIVED signal. It needs
to be switched out of the line when you TRANSMIT or you may
damage it's internal components. Some switch automatically,
some don't.

>I do not understand, if the cb radio has a swr meter, does it matter if
>I have another swr meter?

It doesn't really matter, but now that you have two meters, sounds like
you are on the way to becoming a ham. Most all hams have two meters.
Some even have three or four.....

You really don't even need ONE meter. But having a meter in line is a
good idea as it lets you monitor the SWR of your antenna and the
power output of the transmitter, so you become quickly aware of any
problems and prevent damage to your equipment. Transmitting into
a disfunctional antenna can sometimes damage the transmitter.

>Soon I will buy an antenna matcher, where do I place this in the set up?

RADIO -> SWR METER -> PRE AMP -> TUNER -> ANTENNA

Just think of the tuner as part of the antenna, nothing goes between the
tuner and the antenna. You didn't say what the antenna you are using is.
If it's a commercial antenna, or one that you built and you adjusted it to
the frequency you are using it on, you might not even need the tuner.
A tuner is used, basically, to keep the transmitter fooled into thinking the
antenna has a good standing wave ratio, and doesn't necessarily increase
the efficientcy of the transmitter. If you have a low SWR without the
tuner, save your money for something else.

>Also, I use a 3amp power supply, what will happen if I use a 10 amp
>power supply?

You'll have 7 amps left over. Depending on how much current the radio draws, you might not dim the lites on the radio when you talk anymore.....

Look in the manual for the radio, and see how much current (amps) it requires when it's transmitting. You might not need a 10 amp power supply. Power output requires power input. So if the radio needs 4 amps, you won't get full output power with a 3 amp power supply. Better to have one too big than too little, current wise. But if the radio only needs 2 amps on transmit, a 10 amp power supply isn't neccessary, the 3 amp one you have now will work fine.

>For more information please email me. Thank you.

You're welcome.

SQ4GXW is one of the new licensed probably and that is why you did not find
his call on wide known callbooks. He is not on the newest list of PZK
(http://www.pzk.org.pl) members too, so you can not send him QSL via bureau
at the moment.
There is also SP stations callbook available at http://www.sp-callbook.net/
but it is incomplete still.

Walt,

yes, 4U1UN is considered a seperate DXCC-entity by the ARRL. 4U1WB (world bank in DC) counts as US, VIC counts as OE. For the Worked All Europe program, however, 4U1VIC counts as a seperate entity.

BTW, people seem to have misunderstood my original posting: I know what 4U1UN is. I just wanted to know whether that activity the other night was an officially respected one, or the works of a pirate. Also, the QSL-info seemed to be a new one; last time I heard them, it was supposed to be via W6TER.

Hi Peter,

I have long been under the impression that at 4U1UN, each individual operator is responsible for their own QSOs. My half dozen cards from 4U1UN are all from different operators and each op used their own QSL address. BTW the cards are all of the same style but the pre-printed operator/QSL info was obviously operator specific.

2131. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-17 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7moqkm$a3i@news.Hawaii.Edu>
Source record: 24333
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Hello,

I heard EP2MKO on 15M CW last night. Does anyone know if Iran allows
Hams on the air? I saw comments on one of the DX clusters that this was
a pirate.

Just curious.

73,

Marv

There are a few active, licensed hams operating from Iran legally. Good luck getting a QSL card from EP2MKO, however. I've worked him six times, have sent over 10 cards to his manager and also direct with plenty of IRCs and greenstamps, and still no response for almost two years! K7JY, Seattle.

2135. Re: Qsl Info needed for 6m Contacts

For what it's worth, Spanish stations use the EH prefix on 6 meters, and
EA on other bands. (why I don't know!) So the last three stations you
worked are also EA1TA, EA7AH, and EA7GTF and can be QSLed that way.

From: Charles T Johnston <ctj92@primenet.com>
Message-ID: <7mqle2$d2c$1@nnrp02.primenet.com>
Source record: 24339

Is anyone successfully connecting to N6VR cluster these days? I have not
been able to connect to it for a few days now no matter what telnet software
program I try. Sent email to N6VR a week ago but no joy there either.
Anyone?

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1WY DX Association, NB1B, AB2E, K2JXW, KE2LJ, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, WB3JFS, K4VUD, N6FF, N6HR, N6RT, K8EP, K8YSE, AH0W/OH2LVG, BD5RV, CT1CSN, CT1END, DJ7IK, DL2FAG, DL3APO, DL4TT, EA4ST, EI8IR, F6AJA & Les Nouvelles DX, FM5GU, HL3QAR, HS0/G3NOM, IK0YVV, JA3ART, JA1MXY, JI3DST, LA7QIA, OK1YM, ON4ALW, PY1SL, RZ1OA, SP6ECA, SV2CWY, TA3J, VE2YAK, VE6JY, VK4BLE and VK8AV for the following DX information.

3V, TUNISIA (A new station). Andy, DJ7IK, reports that a second official station license has been now issued to the Tunisian scouts. The station's callsign is 3V8ST (Scout Tunisienne). They will build up a new station within the next few weeks, and they hope to be on the air in September after the summer holidays.

9H, MALTA. Look for Akis, SV7CLI, to operate from the club station of 9H-land probably as 9H/SV7CLI beginning July 20th. Activity will be on all bands. QSL via CBA.

9L, SIERRA LEONE. The "Les Nouvelles DX" reports that Jacky, F2CW/ZL3CW, will be here for 3 months and hopes to get a licence.

CY9CWI, ST. PAUL ISLAND. This island will be activated by the West Island ARC of Montreal from July 21-28, 1999. Operation from this DXCC country will be on 160-6m as conditions permit. Operation will be on or near: 1830, 3505, 3780, 3860, 7005, 7065, 7230, 10105, 14010, 14265, 18080, 18125, 21010, 21305, 24935, 28010, 28395 and 50130 MHz. The team will enter the 1999 IOTA Contest and will make special efforts to work Asians on 10-15m, Europeans on 80-160m, and Canadians everywhere! Operators will be Helen/VE2YAK (YL Op), Fred/VE2SEI, Al/VO1NO/VE1, Reg/VE2AYU, Bill/VE1MR, Dragan/VE2ZIV, Lowell/VY2OX, and J-F(Jeff)/VE2TBH. Direct comments, questions go to: Fred Archibald VE2SEI, 130 Embleton Crescent, Pointe Claire, QC, H9R 3N2 Canada (archibal@pubnix.net). QSL via VE2CWI West Island ARC, Box 884, Dorval, Quebec, H9R 4Z6 CANADA

(http://www.PubNIX.Net/wiarc/dx.htm)
The following reference numbers were provided: CQ zone 05, ITU Zone 09, IOTA NA-94, Can. Is. NS-002, N. Lat. 47.33 degs., W. Long. 60.16 degs., Grid Square: FN 97.

FM5GU OFF THE AIR! Denis, FM5GU, reports to OPDX that he thinks his station will be off the air for one to two years. This is due to a storm that hit Martinique on Thursday, July 8th, at about 6:00 AM (his local time) and broke his mast and all antennas. His also mentions "the tide is low for the money" to set things back up.

HL0, SOUTH KOREA (IOTA DXpediton). Hyun, HL3QAR, the operator of HL0C (HanYang University Wave Research Club), informs OPDX that an operation by HL0C/4 to Mara Island (AS-026) will take place August 3-9th. Mara Island is in the Cheju Province Group in the southern extremity of KOREA. Activity will be on 40/20/15 meters CW/SSB. QSL via: CPO 4397, 100-643, Seoul KOREA. Visit the HL0C Web site: http://campus.hanyang.ac.kr/~HL0C

HS, THAILAND (IOTA and DXpedition). A large group of Thai/foreign amateurs will be active from SiChang Island (Koh SiChang, IOTA AS107) during the IOTA Contest. There will be a two Multi-Mixed mode stations active: HS2AC (led by HS1CHB with JA operators) and HS0AC/2 (led by HS1CKC with Thai/UK operators). After the contest the groups will combine for a DXpedition operation under the callsign HS2AC until July 28th. QSL Manager for both callsigns will be HS0/G3NOM (Via Thailand Bureau or PO Box 1300, Bangkok, 10112, Thailand).

IOTA NEWS (Stations continue to prepare for the upcoming IOTA Contest, July 24-25th).....
AS-008. Look for JA1MXY/1 JA1SGU/1 and JI1SQK/1 to be active from Osims Island (Izu Archipelago), July 24-25th, during the IOTA Contest CW.

AS-099. Berkin, TA3J, will participate in the IOTA Contest as TA3J/0 from Alibey Island. QSL home call TA3J, Berkin AYDOGMUS, P.O. Box 987, 35214 Izmir - Turkey.

AS-117. Takeshi "Take", JI3DST, will be active as JI3DST/3 from the Honshu's Coastal Isllands (Awaji-Shima Hyigo) during the IOTA Contest and until July 26th. Activity will be 40/15/10 meters (also 17/12 meters). Take also plans to be active from here during the upcoming dates/contest: September 4-6th (Asian Contest), October 2-4th, October 30th-November 1st (CQWW Contest and December 4-6th (ARRL 10M Contest). Callsigns to be used are JI3DST/3 or 7N3UXO/3. QSL via JI3DST: TAKESHI FUNAKI, 2-18-26 HANNAN-CHO ABENO-KU, OSAKA-CITY OSAKA 545-0021 JAPAN

AS-135. Members of the Jiangsu DX Club of China will be active from Ping Island July 22-27th. Operators BA4RX, BA4TA and BD5RV will activate this island as BI4Q on some regular IOTA frequencies. This will be the second time for amateur radio

waves to be sent out from this small island. The main purpose of this operation is to take part in the IOTA Contest. QSL via BA4TA (P.O.Box 219, Wuxi, Jiangsu, China) and any comment can be directed to Michael Chen, BD5RV, at: by5qn@qsl.net

EU-028. Marco, IK0YVV, will be active from July 21-31st, from Elba Island (IIA LI-001) mainly on CW. He will enter the IOTA Contest maybe as a mixed mode. The call will be IA5/IK0YVV. QSL via the Bureau or direct to: Marco Pimpolari, Via Piemonte, 58 ; 05100 Terni -ITALY

EU-038. Members of club station ON4NOK will be active before and during IOTA Contest with the call PA6TEX on Texel Island. QSL via ON4ALW: Ronald "Ron" Van Aken, Kapelstraat 5, 2330 Merksplas, Belgium. Also, QSL via UBA Bureau.

EU-048. Thierry/F5SNY will be F5SNY/P from Belle Ile from July 21-29th where he will participate at the IOTA contest.

EU-065. Thierry/F5SNY will be F5SNY/P from Molene Island until July 21st.

EU-077. Operators EA1DAV, EA1CA, EA4ATI and EA4ST will be active from Sisargas Islands July 24-25th. The callsign will be ED1PDG for the IOTA contest. They will work SSB and CW. QSL via EA4ATI.

EU-121. The East Cork Radio Group will be active during next weekend's IOTA contest from Bere Island using the callsign EJ7M. QSLs go via EI6HB or via the Bureau.

EU-145. The RCL Algarve DX Group team (CT1ASU, CT1ERY, CT1GFK, CT1GPQ, CT2GFJ and CT2GZL) will be signing CQ1C during IOTA Contest from Culatra Island. QSL via CT1GFK direct via P.O.Box 468, P-8700-914 Olhao, Portugal or via bureau.

EU-153, Vlad/RZ1OA and Dima/UA1OLM will be active from Lyasomin Island between July 21 and 29th. QSL via RZ1OA (Vlad Sadakov, P.O. Box 48, Arkhangelsk, 163040, Russia).

NA-139. Brian/N3OC and Darrell/AB2E will activate Assateague Island (USIA MD001S) for the upcoming IOTA contest. They will be a multi-single high power entry with an A4 on the beach for 10-40 meters, and either dipole or vertical for 80. They will be on both SSB and CW, so look frequently on the different bands and modes. This field-day style operation will be on the full 24 hours of the contest. Worked all mosquitoes and sand flies will not be a challenge from this site. QSL via N3OC.

NA-148. AA1IZ will be heading a team from the Framingham ARA to Georges Island in Boston Harbor for the IOTA contest. Operation will be Multi-Single, all bands 80-10m, with SB-220s on both the run

and multi stations. QSL to AA1IZ.

NA-169. (Update!) Plans have been finalized for activation of Waadah Island NA-169. Look for special event callsign "W7W" from July 23rd for 5 days including the IOTA Contest. QSLs via W5DX. Pilot Station is w7tsq@aol.com

SA-040. Gerard, F2JD/HK3JBR, will be active as HK3JBR/1 from Rosario Island until July 20th.

JW, SVALBARD. Thanks to the support from some very enthusiastic 6 meters operators and the UK Six Meter Group, Peter, LA7QIA, should be active from here. By the time you read this he should be on 6 meters as JW7QIA from JQ68TB for two to four days. Details are published on his Web site at: http://www.qsl.net/la7qia (and mirrored http://home.c2i.net/dx).

KH3, JOHNSTON ISLAND. It has been reported by Dick, N6FF, that Bill, NH6D, will be making numerous trips here for the next year or so. He will be there on July 20th for a few days, and will try to operate as work committments permit. He expects to make several more trips in August. The club station equipment and antenna status is currently unknown, but the FT-1000D and tri-band yagi are supposedly operational. The amplifier is said to be 'fried'. Bill will check the station status this trip, and if necessary, return with whatever is needed to operate the lowbands. It is believed that Bill will have NH6D/KH3 up and running on 160/80/40 meters before the September/October lowband season begins. Dick states that he will try to keep everyone informed of station status and progress. By the way, Bill prefers CW, but does operate some SSB. QSL to N6FF.

LIGHTHOUSE ACTIVITIES. There will be two upcoming events in August which involve lighthouse operations: The National Lighthouse Weekend (August 7-8th) and The International Lighthouse Weekend (August 21-22nd). Both are described on the "Ham Radio Lighthouse" Web page at:
http://www.waterw.com/~weidner/ld.htm
Also, check the listings on pages 71 and 93 of the August QST. If you are planning a lighthouse activity and wish to be listed on the Lighthouse Page, send details to Jim Weidner, K2JXW, USA Coordinator for National/ International Lighthouse Weekends, at : K2JXW@amsat.org
Please give location of lighthouse, frequencies, call, dates, and QSL info.

OTHER POSSIBLE NEW? Reports during the week indicate that Montenegro has been conducting talks with Serbia and they want independence from Yugoslavia. Check out the Web site:
http://www.cnn.com/WORLD/europe/9907/14/yugoslavia.02/

QSL INFO AND NEWS.....
3B9R QSLS. The QSL cards for the recent 3B9R Rodrigues Island DXpedition are expected from the printers in Japan next week. Cards will begin to be processed at that time. QSL via Joyce Johnson N7LVD, 5627 West Hearn Road, Glendale, Arizona 85306.

Station 4U1UN which was activated on July 14th by Fritz, DL4TT, MUST (REPEAT MUST) be QSLed to the United Nations Headquarter: P.O. Box

3873, NY 10017, USA.

Sam, V63KU, will close his operation at the end of June, 1999, and the P.O. Box in V63 will also be closed. Please send any QSL claims after closing to JA6NL through JARL (JA's QSL Bureau).

Andy, SP6ECA, reports SN6F/1 (1998) QSL status is that all cards have been mailed, directs and via the DARC bureau. In case of problems, please E-mail Andy at: asadow@ita.pwr.wroc.pl
QSLs for SN6F/1 (1999 operation) are via SP6ECA, bureau or direct and will be 100% confirmed.

Peter, DL3APO, informs OPDX the QSL cards for FO0AWI and FO0XUU are ready and Gerd, DL5AWI, has started to answer the 5000 request. Also, Peter has sent OPDX a picture of the QSL and it can be seen on the Web at: http://www.en.com/users/k8yse/rurutu1.jpg

Olda, OK1YM, reports that he is not the QSL Manager for John, SV1DKR. Olda has operated from John's station from time to time and usually announces his activities via InterNet. However, he has been receiving some QSL cards addressed to his home address but has never been active as a QSL Manager for SV1DKR. Plese send all QSL via SV bureau or direct to SV1DKR: John Kyriakos, 4, El. Venizelou str., C.P. 173 43, ATHENS, GREECE.

Alan, VK8AV, reports that rumors that he will never answer QSL via the Bureau is not altogether true. Alan informs OPDX that he presently has 7 kilos of QSLs which have been built up over the past year while he has been away. Alan states, "I may get around to answering them - sometime.....eventually. However, a direct QSL with the appropriate SASE will get a response within 48 hours. Together with the special Alice Springs Telegraph Station postmark where possible. By the way, 'green stamps' are more negotiable than IRCs." Again, VK8AV's direct address is: Alan R. Viegas, P. O. Box 3718, Alice Springs NT, Australia 0871.

Karl, DL2FAG, reports the QSL cards for the S79YL, S79ZG and S79FAG activity have arrived from the printer, and the QSL Manager, DL7AFS, has started to answer all direct QSL requests. Please be patient and do not send a second QSL. Bureau cards will be answered later this year.

Charles, K4VUD, reports that the 9N7UD QSL cards for direct requests have been filled out and mailed. Charles states, "However, a few of the 15 meters CW QSL cards I sent have a minor error -- the freq. is mistakenly listed as 21.224 instead of 21.024 and the date and time is about six hours off. All these "errors" do not matter to the DXCC desk, as far as I can see, because the band is correct, the mode is correct, and the year is correct. So, I would advise, relax and enjoy the card."

Laurie, VK4BLE, WIAQ QSL Bureau Manager, reports QSL cards for VK4CEJ and VK4DZ are to be sent direct to John and Graeme only. They both do

not wish to accept any QSL cards via the bureau.
VK4CEJ - John Caine, PO BOX 80, LAIDLEY, 4341, QLD, AUSTRALIA.
VK4DZ - Graeme Bracht, PO BOX 24, LAIDLEY, 4131, QLD, AUSTRALIA.

Doug, N6RT, reports that the 1997 and 1998 logs for VK9LX are now online at: http://dx.qsl.net/logs

Soni, PY1SL, states that he is not the QSL Manager for S0WW. This station is pirate.

SPECIAL EVENT. The Grumman Amateur Radio Club will operate WA2LQO on July 20th to commemorate the 30th anniversary of the Landing on the Moon. The station will operate from the Bethpage, NY building where all the Lunar Modules were built by Grumman. Operation will be on 10/15/20 meters, propagation permitting. For a special QSL card, send a SASE to the CBA of WA2LQO which is: GRUMMAN AMATEUR RADIO CLUB, 70 DEWEY ST., HUNTINGTON, NY 11743 USA. SWL cards will gladly be honored. (No Buro cards can be accepted).

SPECIAL EVENT. Special event station VC6MP will operate July 24-25th, to commemorate the 125th anniversary of the Royal Canadian Mounted Police March West (details at http://www.lis.ab.ca/march125/links.htm). There are no specific frequencies and times of operation at this time, but activity will be on HF bands as time and operators permit. QSLs for VC6MP can go direct to the VE6 QSL Bureau: VE6NRJ Neil Jensen, EPO Box 57205, Sherwood Park, Alberta T8A 5L7 (please note - this callsign has nothing to do with VE6MP, it is a special callsign just for this event. VE6NRJ who is also the VE6 incoming bureau manager will forward the cards to the FSARC. The usual assistance with postage would be appreciated). VC6MP is sponsored by the Fort Saskatchewan Amateur Radio Club (http://www.tgx.com/ftsask.arc/index.htm)
and will operate from the contest station of VE6JY (some pictures are available at: http://139.142.37.100/~ve6jy
http://www.av.bc.ca/ve6jy.html

T88, PALAU. Jim/JA3AJ/N7EIU and Kazu/JA3ART/N3JJ will be active from here September 15-19th. Callsigns to be used are T88MM (Jim) and T88JJ (Kazu). They will be active on HF (w/500 watts) all bands and 6 meters (Mainly on 10/6m). QSL to each home call address or via JARL QSL bureau.

V26, ANTIGUA. Darrell, AB2E, will again be active as V26E from the V26B supersite from August 11-17th. He will enter the WAE CW Contest August 14-15th, and would request that stateside not try to work him during that time. He will be on plenty before and after the contest, mostly on the WARC bands, and will try 160 since there are a pair of new fullwave beverages at the site. QSL this and all V26E operations to the home call, AB2E.

V7, MARSHALL ISLANDS. Dave, V73UX, has been active on 20 meters SSB between 1100 and 1400z. He has also been heard on RTTY around the same time. Also, there have been reports that he recently put up a 3 element Yagi for 40 meters. NO QSNs reported for this band. QSL via V73AX.

XW, LAOS. XW8INH was active over the past weekend on 17 meters (18135 kHz) between 1245 and 1330z. Reports indicate that Motoaki, JH1EDB, who is currently living in Vientiance, is the operator of this station. However, the callsign belongs to Mr. Inh, the Manager of the KPL (Khaosane Pathet Lao) the official news agency in Loas. Motoaki may be using this station because foreigners are not permit to receive their own licenses. QSL via JM1GYQ.

XX9, MACAO. Ed, K8EP, will be travelling to Macau over the period of August 18th through the 23rd. He will be operating as XX9TEP. His operation will be CW and SSB on 80-10 meters. There is some activity planned for the SEANET SSB Contest. QSL is via K8EP.

ZB2, GILBRALTAR. The "Les Nouvelles DX" reports that Martin, G3RFX, will be active as ZB2FX or ZG2FX from September 1 to 16th.

ZC4, UK SOV. BASE AREAS ON CYPRUS. Ian, ZC4OS, wants to remind everyone that on each second and fourth Wednesday of the month the radio club meets and plans to operate between 1930 and 2300 Cyprus local time. The next opetration should be July 28th. The callsigns to be used will be either ZC4ATC or ZC4RAF, and the operation will be either CW or SSB. The club also hopes to be operational for the CQWW SSB Contest. There will be more detailed news on this later. Additionally, there are or will be ZC4ATC operations (all night) on or around the last of Friday each month. More info will be sent out later.

ZM, NEW ZEALAND. "The 59(9) DXReport" states it has been reported that ZL stations may use the ZM prefix from October, 1999, through March, 2000, for the Millennium.

2141. Search for ham radio outlet in San Francisco

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-18 00:00:00 UTC
From: pharmtd@club-internet.fr
Message-ID: <3792435e.2247268@news.club-internet.fr>
Source record: 24201

Where in San Francisco could I find a Ham Radio outlet ?
I will spend some days in that city next week and will take this
opportunity to purchase some equipment.

2142. Re: Search for ham radio outlet in San Francisco

I was just there last week.

HRO (Ham Radio Outlet) in Sunnyvale and Oakland.

Also check out Frye Electronics for computer and parts.

Any CQ/QST or Internet.

Have fun.

Gerry VE6LB

Where do you put the call if he hasn't got a manager? On the backside?
In that case you can change the call on the back into the call of the
manager. On the frontside where you put the qso-info there you put the
call of the station you made the qso with.
This is how I do this.

I fill out the card to the station worked as usual. Then I write VIA (QSL MANAGER"S CALL) in big letters somewhere easily seen by the buro folks. Sometimes I'll even highlight it with a yellow highliner. Works like a charm.
GL, K7JY.

2164. BURO cards and QSL managers

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-20 00:00:00 UTC
From: "R.L. Bo Thompson, KB5CNG" <thompson@ionet.net>
Message-ID: <3794C41B.3358@ionet.net>
Source record: 24216

One ham on this NG suggested I ask the ARRL BURO folks about this. I did so and here is the reply [redacted for brevity].

If your card is blank on the back, Write "Via XXX (Managers Call) in the top left corner of the card, then place the card with the backside facing
"Up" in alphabetical order of the Managers Callsign. If your card is not blank on the back write "via XXX (Managers Call) somewhere near to the callsign of the station contacted & again put it in order of the Managers
Callsign.

Thanks to the folks at ARRL and to all who answered my question!
73 de Bo

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

Came to think of it:
Normally, you can see more or less how "old" a license is.
The licenses with 3 letters behind the number started to be given out back
in the early 80's (mine is from 1982)
I dont really know how far they have come today.
This is not the total truth, as most club stations have 1 digit and 3
letters. A call like OZ7FRS could mean Club station in Frederikssund (I've
no idea if this is their real call)

Thanks to all who responded to my message, looking for a TimeWave DSP 59+. I have found and purchased a unit, it is soon to be on its way.

One suggestion for all those who have a non-DSP HF rig like I do, you probably should buy an external DSP while you can. It's looking more and more like this category of product is going the way of the carburetor and the slide rule. This is due to the *fact* that pretty soon all HF rigs are going to have DSP built-in, effectively killing off the add-on market.

Regards;

Neil

Hello Neil,

Don't count the DSP processors out quite yet. There is NO digital support in any of today's current radios and a great many of our customers are running DSP boxes in addition to their FT-920s, 870s, etc.

DSP design has not "run out of gas" and will remain ahead of the internal DSP design for awhile. We update our products on a regular basis. When was the last time you received an upgrade notice from a radio manufacturer that upgraded the DSP performance (or much else for that matter :>))?

I agree with the suggestion that finding used DSP-59+ or even DSP-9+ units to use with current used radios is a good idea. I run an FT-1000 with a DSP unit. There is not much that outperforms that combination. Likewise I operate in stations with 850's, 990's, and the IC-765 (one of the best CW rigs ever built) Its a great way to get a top DX or contest station without taking out a mortgage on the house.

Let me know what you think

I have tried the more expensive brands but the best I have used so far (atleast for my hearing) are the KOSS TD/60 headphones I bought at Walmart for about $15.....they are great for CW and the lighter weight makes them easier to wear for extended periods like contesting, etc.....My two cents worth...

There are several instances of separate DXCC entities within a city in another country. 4U1UN in New York counts as a separate entity. 4U1ITU in Geneva counts as a separate entity. 1A0KM in Rome counts as a separate entity.

Maybe New York and Los Angeles should also count as separate DXCC entities? :-)

I guess they shouldn't - but how about "outer space"? After all,
it does not belong to any country, although the spacecraft do.
But that's basically the same as Antarctica where you find research
stations of different countries, but the whole continent is considered
as one and the same "radio country" ...

Of course, only QSO with a station aboard a spacecraft can "count" -
a QSO "via satellite" should not (terrestrial equivalent: I might
operate from Germany, use a transponder in Denmark and talk to a
station in Sweden - then it was a QSO between Germany and Sweden).

John, you are correct, there will probably be a market for add-ons for "a while", I didn't mean to imply there was some kind of dark curtain about to fall in 2 days.

Funny you should mention it, but I've had the frustrating experience recently of trying to find a new slide rule (no kidding). My son is a budding math lover, and I wanted to show him how elegant this tool is, not that I ever expected him to ditch his programmable calculator.

All I could find, after an extensive search, was a dusty, old, really cheap knock-off, with horrendous accuracy, and badly printed numbers. Forget about finding a good new circular one like a K&E, which is what I really wanted...

And no, folks, please don't inundate me with offerst to sell me your slide-rules. The fever has passed.

But the point is there. Just like audio "pre-amplifiers" had their day, I believe so, too, have the external DSP units. Yes, they probably have some bells and whistles that the internal ones don't, but the clock is ticking. Ya don't see too many UHF to VHF convertors for TV's any more, do you? (boy am I dating myself).

Hi DXers !

Hereby I announce our annual DXpedition to a Venezuelan Island.

This year we will operate from the Island of Coche, which is located in front of
the East-Coast of Venezuela.

The trip takes place from July 29 to aprox. August 3 1999.
The callsign will be YW7C
The IOTA-Info for Coche is SA-12
QSL via W4SO

YW7C will be operating on all bands (incl. 6m) on CW and SSB.

Our DX-Crews will be pleased to QSO you from there.

73 + CUL

Ray

dl2gg/yv5

http://www.qsl.net/dl2gg

After our return I will add a YW7C-section at the above URL.
Right now you already have the existent sections from previous expeditions.
(Aves, Blanquilla & Tortuga)

Dear Ham colleagues,

We have just placed on our family Web site a memorable story from the last part of the Cold War. It is:

The Saving of Oleg
http://www.igc.org/traubman/oleg.htm

It is a portrayal of international ham, citizen, and medical cooperation. It illustrates how citizens -- even "enemies" -- working together can make a difference.

I hope you enjoy "The Saving of Oleg" and share it with others.

2196. Volunteer Position on South Pacific Atoll

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-23 00:00:00 UTC
From: meuzelaar@my-deja.com
Message-ID: <7n8e60$a10$1@nnrp1.deja.com>

If you have good electronic, electrical and general mechanical repair skills and are interested in spending 6-12 months as a volunteer on a remote SouthPacific atoll, working in a small meteorology department (with very friendly people) responsible for 9 small islands in the Tuvaluan archipelago , please send us your resume.

The Tuvalu Meteorological Service urgently needs to fill the open position of Station Technical Officer responsible for maintenance and repair of all computer, radio communication (satellite and SSB), electrical and mechanical equipment of the main station on Funafuti, as well as that of the out-stations on Nanumea, Nui and Nukulaelae.

Tuvalu, situated approx. 700 NM north of Fiji, is the world's 3rd or 4th smallest country (in terms of land mass) and became independent from the UK almost 20 years ago. The outer islands of Tuvalu count among the last unspoiled South Pacific paradises.

The Government of Tuvalu will provide a cost-of-living allowance which covers food, accomodations and medical care. Travel costs to and from Tuvalu are normally not covered but exceptions may be made for highly qualified candidates. The official languages are Tuvaluan (no knowledge required) and English. There are no known, major endemic infectious or parasitic disease risks.

Henk Meuzelaar
TIMES* Project Coordinator

Well, folks, now I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps, check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

73 from NW7US

P.S. R1AND - Antarctica, has been heard on the East Coast today. On 1833 KHz. WOW. And I see 50 is open (6 meters). Is this a sign of a hot season!?

Hope I meet you on the air. I hang out on 20, 15, and 10.

2201. Re: EP2MKO

Source record: 24153

The scoop on EP2MKO seems to be as follows:

1) He is accepted by the DXCC desk as valid for Iran.

2)He is notoriously difficult to get a QSL card from.

3)I believe that EP2FM, who is legally licensed in Iran, has said that EP2MKO is not a legally licensed operator.

So I guess that EP2MKO is in Iran but not sanctioned by the government.

I worked him anyway on 15 meters. I will worry about his legality later.

I also worked EP2FM. That's probably where I will get my EP card.

Now, what about YI7KRN, hi hi?

-Dan,
N3UMH

> DXCC, 73, K5ESW
>
A couple of the local DXers here claim that and SAE + $5 dollar bill
sent REGISTERED MAIL (value listed as $100) has resulted in replies
within one month. From the USA, that would be $5 for the QSL/SAE
and $6.60 (I believe) for the registered mail cost. We'll see.
I have previously sent SAE + $2 + 2 IRCs with an envelope and QSL
written in Russian script ... with no response ... so.....

Wouldn't hurt to be rich either! "Volunteer" doesn't buy much radio or computer equipment to say nothing of a good steak dinner once in a while. Besides, the wife wouldn't appreciate me cavorting with all those South Sea beauties while she suffered with the ice and snow of an Ohio winter.

SB DX @ WW $OPDX.419
Ohio/Penn DX Bulletin No. 419

The Ohio/Penn DX PacketCluster
DX Bulletin No. 419
BID: $OPDX.419
July 26, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL DXCC Desk, KF2TI, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, AC4G, N4AA & QRZ DX, DJ5AV & DX News Letter, DL2GG/YV5, F6AJA & Les Nouvelles DX, GM0CLN, IK2QEI, JA1ELY, JF1OCQ, OK1DWJ, ON4CEL, PA3AXU, PA3GIO, PY1KS, SM0MPV, SP2BIK, SV2CWY, VK5FV, YO3FWC, ZD8V and ZS6EZ for the following DX information.

3B8, MAURITIUS. PA3EPD, PB0AIT, PE1ALV and PA0VHA will be here from September 23th until October 10th. They will operate all HF bands on CW, SSB and RTTY. Also, maybe they will operate 2 meters EME. QSL to bureau or direct to their home callsigns.

3W, PHU QUOC ISLAND (Vietnam/IOTA DXpedition). Kunio/JA8VE and Hiro/JF1OCQ are planning a IOTA DXpedition next week to Island of Phu Quoc between July 31st and August 7th. Phu Quoc Island (GL OK10XD, IOTA AS-128) lies about 300km west of Ho Chi Minh City (HCMC). JA8VE and JF1OCQ obtained the permission to operated in Vietnam as 3W6KS and 3W6HM, respectivedly. They arrive in HCMC July 31st and depart for Phu Quoc Island August 1st to operate for four nights before returning back to HCMC for two nights. Their suggested operating frequencies:
CW - 14007, 18077, 21007, 24897, 28007, and 50120 kHz
SSB - 14197, 18147, 21270, 24937, 28470, and 50120
(No other frequencies are not permitted.)
They will operate from Kim Linh Hotelon Phu Quoc Island and Kim Do International Hotel from HCMC. QSL 3W6KS via JA8VE, Kunio Saito, 2-26-5-554 Nishitsuruma, Yamato-shi, 242-0005 Japan. QSL 3W6HM via JF1OCQ, Hiroyuki Miyake, 1-3-6 Asakura-cho, Maebashi-shi, 371-0811 Japan.

3Z, POLAND (Attention Prefix Hunters). To commemorate the 60th anniversary of WWII, a number of stations from Gdansk Coast will use special callsigns from September 1st through October 2nd. Activity will be on all HF and VHF bands. Look for the following special event stations:

Special call QSL Manager Special call QSL Manager
3Z60H SP2FJN 3Z60W SP2BNJ
3Z60O SP2HJN 3Z0MDL SP2UUU
3Z60P SP2AYC

5W, WESTERN SAMOA. Gerard, PA3AXU, will once again return here. This time he will be escorted by his XYL Ria. He states he will be able to take more luggage this time. Look for 5W0GD to be re-activiated from September 28th through October 14th. His operations will be on SSB/CW/ RTTY and hopefully PSK31 (Thanks to PA0HVF, his teacher). QSL via PA3AXU, G.A.M.C. Dijkers, Dokter P.A. Cornethof 3, 6669AZ Dodewaard (The Netherlands).

5X, UGANDA. The "DX News Letter" reports that Tomo, JE9IKG, already known as JE9IKG/6O and 6O0A from Somaliland, is now to be active on SSB signing 5X1JA from Uganda. No QSNs have been reported. QSL via JE9IKG. Meanwhile, Joe, 5X1P (G3MRC), was spotted this past weekend on 18070 kHz around 0430z. QSL via G3MRC.

FW, WALLIS ISLAND (Special Operation). An excerpt from an announcement by the DXCC Desk reports the upcoming FW8ZZ DXpedition is dedicated to, and in memory of, Chuck Swain, K7LMU, and Ted Thorpe, ZL2AWJ, who were lost at sea in January, 1966, aboard the ketch Marinero while returning from their DXpedition to Wallis Island as FW8ZZ. Operators FK8GM, JA1BK, OH2BE and OH2BH will activate FW8ZZ on July 30 and close down August 3rd. A special effort will be made on WARC bands, but all regular DX bands will be offered. Normal DXpedition frequencies will be used. The equipment includes Yaesu FT-1000MP and FT-900 with FinnFet amps. The complete press release by the DXCC will be sent to all OPDX InterNet Subscribers as an additional bulletin.

HS, THAILAND. "The 59(9) DXReport" reports that Hide, JR5XPG, is in Thailand for 3 years as a teacher and will try to obtain a license. He will use club stations for now.

IOTA NEWS.....
AS-008. Correction! JA1MXY/1 JA1SGU/1 and JI1SQK/1 were active from Osima Island (not Osims Island as reported in last week's bulletin).

EU-052. Stefano, IK2QEI, will be active as J48QEI from Zante Island (KM07KS) from August 5-20th. He plans to be very active during the 1999 European HF Championship (August 7th, 1000-2200z). His activity will be on 160-6meters. QSL via IK2QEI home callsign or bureau.

EU-084. Mel, SM0MPV, who was to participate in the IOTA-contest, plans to be on Vassaro Island until August 1st and will try to be as active as time permits. Look for him to sign SK0HS/5. QSL via SM0MPV (bureau). This Island belongs to Scoutdistrict of Stockholm and pictures from various camps can be viewded on: http://www.stockholm.ssf.scout.se/eng/vo/index.htm

SA-012. Ray, DL2GG/YV5, and others will operate from the Island of Coche, which is located in front of the East-Coast of Venezuela. The operation will take place from July 29th to aprox. August 3rd. The callsign will be YW7C, and they will be operating on all bands (incl. 6m) on CW and SSB. QSL via W4SO. After Ray's return, he will add a YW7C-section at the following URL address: http://www.qsl.net/dl2gg

SA-029. Operators PY1KS/Alex, PY1KB/Marco, PY1MF/Mark and PU1MPR/Marcio will be active from Gipoia Island (team is waiting for a DIB number.... First activation!!!) July 29th through August 1st. Operators will sign homecall/P. Activity will be on 80-10 meters, possibly 160m. QSL via PY1KS to the Bureau or direct P.O.Box 18123, Rio de Janeiro-RJ, 20722-970, Brasil.

SA-056. After their SA-081 5K8T (QSL via F6AJA) operation this past weekend by Gerard, F2JD/HK3JBR, and Pedro, HK3JJH, look for Gerard to go back to Bogota. Pedro will continue to the south to operate as HK3JJH/HC4 from an Ecuadorean island Monday, Thuesday and maybe Wednesday (QSL home call).

LIGHTHOUSE/IOTA ACTIVITY. The Old Barney Amateur Radio Club will be activating N2OB celebrating "National Lighthouse Day" weekend from "OLD BARNEY", the Barnegat Lighthouse in Barnegat Light, NJ, which is on Long Beach Island (IOTA NA-111 and USI NJ001S). Operations will take place August 7-8th, from 1300-2300z each day. Suggested operating frequencies: listen in 1st 25 khz of General phone bands (40, 20 and 15 meters) and on 28480 kHz. Some limited CW operation is possible on 30 kHz of these bands. (Also, 146.835 rpt -600 and 146.52 simplex). QSL via N2OB with regular SASE/SAE+IRC for QSL, or 9"x12" SASE with 2 units postage/IRCs for a certificate and QSL. N2OB address: Old Barney ARC, PO Box 345, Tuckerton, NJ 08087, USA.

QSL INFO AND NEWS........
QSL 2A0CCC/P, active from Isle of Tiree during the 1999 IOTA Contest weekend, via GM0ALS. Activity was by members of the Cockenzie and Port Seton Amateur Radio Club (John/MM0CCC, CambellMM1AVA, John GM7OLQ, Iain/MM1CPP, Malcolm/F5VBU, Ron/GM0NTL, Mo/GM0HLK, Colin/GM0CLN and Tony/GM3PGU). Further info and updates will be available when time allows, from: http://www.btinternet.com/~john.innes/Tiree.html

Frank, ON4CEL (ex-C56EL, 5A21PA), reports to OPDX that all direct cards for the C56EL DXpedition (March 17-26th) have been sent out. If you don't receive your card within the next fews days, you can drop an E-mail message to: franky.beuselinck@advalvas.be
The C56EL log search is still available at:
http://user.online.be/~frankyb/log.htm

NO OUTGOING BUREAU. Fr. Steve Dives, 3D2SJ, reports that although P.O. Box 184 is listed as the Bureau address for Fiji in various publications, this is a receive only address. There is no outward bureau operating from Fiji. Fr. Steve has received approximately 100 cards via the Bureau and to answer these cards directly would incur an

unreasonable financial penalty. The QSL address for Fr Steve is: Fr. Steve Dives MSC, PO Box 1354, Suva, Fiji. This address is also the correct QSL address for his operation from Kiribati using the callsign T30ED.

QSL YB0US (Jani), who operated from from Seribu Islands (OC-177) this past weekend in the IOTA Contest, via N2OO.

Ales, OK1DWJ, informs OPDX to please not send any QSLs for OK1DWJ or OK4DWJ/mm via OK1DOT. The only valid QSL route is via OK-QSL bureau or via CBA, but never via OK1DOT. He was never Ales's QSL Manager and he never asked him to do this job.

QSL J28AG (with operator J28NH/Jean) direct to: S.P. 85012, 00806 Armees, France.

S7, SEYCHELLES (IOTA DXpedition). Bert, PA3GIO, hopes to be active from Desroches Island in the Amirante Group, IOTA AF-033, 250 Km south of Mahe, Seychelles, September 2-14th as S79GI. Also, there will be some activity from Mahe AF-024, August 26-31st. QSL preferably by the Bureau to PA3GIO. Visit Bert's Seychelles Webpage at: http://www.xs4all.nl/~pa3gio/S79/

TF, ICELAND. After being active in this past weekend's IOTA Contest, look for Norbert, LX1NO (KM6RY/LX4A/LX9EG), to be active from several areas in Iceland as TF4/5/0/1/6 /LX9EG. Look for him on the IOTA frequncies and the WARC bands. QSL via LX1NO.

V7, MARSHALL ISLANDS. Bruce, AC4G, reports to OPDX that he has begun his AC4G/V7 operation on Kwajalein Island for the next 2 years. His activity will be on 160-10 meters. Bruce has applied for the callsign V73CW which he expects to obtain soon. He has already made about 500 QSOs and plans to pay special attention to the WARC bands, 40, and 80 meters with emphasis on CW with lots of SSB. In mid-August he will receive his satellite gear and hopes to be active on OSCAR 10 Satellite. QSL to AC4G (home address w/ mail forward to Kwajalein Island or via direct (best route) to: Bruce Smith, P.O. Box 1436, APO, AP 96555. Bruce mentions that he will be ordering color QSL cards soon.

VU7, LAKSHADWEEP (LACCADIVES). "QRZ DX" and "The Daily DX" report an operation by a team of operators will be active from here in the fall. Full details have not been released, but forthcoming.

XU, CAMBODIA. Tom, SP5AUC (ex-YI9CW), also known as 3W7CW, has been temporarily reassigned to Cambodia. He has already obtained a license there, and his callsign is XU7AAS. He promises to be active soon, time permitting. He has acquired a new rig, a TS-570D, and hopes to put it to good use. Due to the nature of his stay, Tom has no chance to set up antennas, but he will be using a commercial log periodic, fixed to Europe. Tom is scheduled to return to Vietnam on August 15th. QSL cards for XU7AAS should be directed to: P.O.BOX 11, 02-800 Warsaw 93, Poland.

YODX CONTEST. Ciprian, YO3FWC, reports that the 1999 YODX HF Contest will take place on Sunday, August 1st. Any QSO is permitted, ITU zone/YO counties exchanged. There is a great chance to work as many as needed Romanian counties to get a special award issued for the "Total Solar Eclipse" (August 11th), best viewed from Romania. Don't miss YR99E on SSTV - Solar Eclipse live! For rules and more info, check out the Romanian Amateur Radio Federation web site: http://www.qsl.net/yo3kaa

ZD8, ASCENSION ISLAND (Update). Paul, ZD8V (aka KF4OOX), is still having antenna problems. He reported to OPDX this week that his antenna "finally let go" and he will now have to take it down and fix it. The major problem is finding time to do the work since he is working during the mid-shift. He mentions that he hoped to take it down during this past weekend with some help from friends. Paul hopes to have it back up in a few days. As this bulletin was being written, we do not know if these events took place.

ZS8, MARION ISLAND. Deryck, ZS8D, has been refused permission to erect his tribander (donated by NCDXF) on the island after negotiations with the Prince Edward Island Management Committee. This means he will still have to use the dipole. The committee's reason of refusal seems to be the concern for birds flying into the antenna.

Sorry, but it isn't US. It's the Republic of the Marshall Islands
with its own radio prefix: V7

Check with the ARRL for current conditions; we had a reciprocal
operating agreement with the government there in Majuro as late
as July 1998. Where are you going? Kwajalein? I worked KX6BU on
Kwaj as a kid, and then guest operated from there nearly a
decade later in 1981. Does anyone know if there is still a MARS or
club station at the Missile Range?

2233. Loosen those pesky Kenwood Microphone Nuts!!!

Newsgroup: rec.radio.amateur.dx
Date: 1999-07-29 00:00:00 UTC
From: DontDoIt@ImNotHere.com
Message-ID: <37a080f6.22404938@news.mv.com>
Source record: 24185
Cross-posted to:
rec.radio.swap,rec.radio.amateur.dx,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.misc

(This is provided as a public service, and NOT as a way to make money...)

I have in my posession a tool that is positively brilliant at loosening/removing/tightening those annoying circular "nuts" that you'll find on various Kenwood rigs. Yes, you know the ones I mean, the ones that no amount of coaxing with the tip of a screwdriver will budge.

Why on earth would you want to remove this nut, you ask? Well for most of the affected Kenwood rigs, it's the ONLY way to get to things like digital front panels, lithium batteries, and so on.

You can see a photo of the tool at:

http://www.mv.com/ipusers/innermedia/kenwood/spanner.jpg

So here's the deal:

1. Send me a postal money order (no cash or checks please) for the amount of $37.50. This covers the cost of my packaging and shipping the tool ($17.50), plus a refundable deposit of $20.

2. I then ship the tool to you via UPS ground. If you want it faster, email or call me and I'll tell you the cost.

3. You use the tool (totally at YOUR risk!!!) to open your radio, do your work, then use the tool to close it up. PLEASE DON'T BREAK OR ABUSE THE TOOL!

4. Using the same box I sent it to you in, you send the tool back to me, via whatever method you choose.

5. When I receive the tool back undamaged, I send you a check for $20, thereby refunding your deposit.

Your net cost is therefore just $17.50. That's about 1/4 of what any Kenwood service facility will charge you, and you get to control what happens.

PLEASE DON'T USE THIS AS AN OPPORTUNITY TO BUY THIS TOOL. I can tell you where to get your own, please return mine.

If you want further info about any of this, just contact me as shown below.

Thanks, and best regards all!

I think that Nathan busted call. What do you think about 3Z0ENI below:

G - The Polish Scouts Radio Club G0ZHP based in West London will
activate special event station GB60ENI at Bletchley Park on
23-25
July to celebrate the 60th anniversary of the handing over
the
secrets of the Enigma machine by the Polish cryptographers to
their
British and French allies. Milton Keynes ARS will participate in
the
celebration as well and will activate the Bletchley Park
radio
station GB2BP.

SP - Special event station 3Z0ENI will be active to celebrate the Enigma
anniversary (see G above) during the weekend. QSL via
SP2FAP
(Sylwester Jarkiewicz, ul. Wielmozy 5b, 82-337 Suchacz
Zamek,
Poland).
(info extracted from 425 DX Bull nr 429)

Sorry Walt, but it's a custom hand-machined part, welded and hardened. At $50 an hour, which is what a juniour machinist charges, you'll be lucky to make one for a couple of hundred dollars.

At that rate, you should just buy one from Kenwood (yes they sell them) for $80.

Honestly, this is not how I make a living. If that were the case, I'd have to live in a cardboard box.

Lighten up please. It's just a hobby.

Next August 13 to 15 the crew of the Radio Club Mallorca is going to put on
the air the island of "Na Galera" (DIE-Spanish Isl.award: E-126 / IOTA:
EU-004 / Loc: JM19IM) on 2, 10, 15, 20, 40 & 80 meters with two stations
running at the same time on HF plus another on VHF.

The activity will take place mainly on SSB, although ocasionally we'll be
also on CW.

Callsign used will be ED6EIG and the QSL-manager is EA6VC.

Please spread around this information.

Flame all you want, Walt. I suggest if you are that irritated, why don't you just do it yourself. If it's that great a money making opportunity, you ought to do very well, maybe even buy a vacation home after a few weeks.

Meanwhile, I get enough for my trouble (driving to the post office, packaging, making sure the tools are maintained, taking phone calls) to pay for about a lunch, once a month.

This is a public service I offer to other Kenwood (and ICOM/Yaesu/etc,) owners who don't want to pay the factory rep over $80 to loosen a nut. You do the math. It's a great deal, for which I have to put up with folks like you.

Get a life. And by the way, your acronyms are infantile.

Good Idea. I think the cost is a little high but its still a good idea!
You might want to redesign it for different size nut washers. It looks
like it would be handy for working on copy machines too.
I wouldn't pay any attention to some of these guys. I don't think that
they would even know what to do with your good idea. Most of these
clowns are appliance operators and theives.

I've got to agree with that. Guys and gals, make sure that you've copied the callsign right before you worry about finding the information. I've seen so many people post questions about busted calls in here, and then get responses like "oh that wasn't 7O/9A0AAA/A you worked, it was 7M/9A9AAA/A" and the like. You can do with such information what you like. I think, however, that if you didn't copy the callsign, you haven't made a contact. Even if a station works long strings of stations without giving his or her call, and you saw him or her on the packetcluster, so you THINK you know what the call is, stick around for a while and actually copy it yourself. What if someone got the callsign wrong on the cluster or the internet? Wouldn't it be nice to know that you had worked P51A instead of asking around on the DX newsgroups who the heck P41A was? Oh, and Ray, this mysterious station that starts with F and ends with Z will be around for a few more days at least. Good luck with getting a good contact!

But Nathan, you worked what you thought was KZ0ENI. DX newsgroups are not an acceptable substitute for copying a callsign! (Neither are packetclusters for that matter but that's going to get me flamed) Maybe I'm too much of a purist but I think that you should muddle through the callsign that the DX station is actually sending or just write it off as no contact.
73,
Dan

American "business" at its inventive best! However, for those unable/unwilling to afford the "tool", simply grind down a pair of good quality 6" long-nose pliers, just a bit. It works first time, every time and it won't ruin the pliers for normal work!. Especially, if you're in a hurry!

He *did* say, somewhere in there, that he can tell you where to find
one if you want to buy it. The implication is that he doesn't sell
the tool, and isn't interested in selling the one he has and having
to buy more.

If you *do* want to buy one, why not send him email asking who
sells them?

Dave

It sounds like you're taking the whole thing all too seriously.
It's only a hobby! If you didn't get the callsign 100%, that's a shame
but it was still fun wasn't it? If not, walk away.

He did say who sold one, Kenwood for around $60 or 80, it
was posted awhile back. If he had this custom machined it
isn't cheap, I just had some stuff welded the other day & 20
minutes cost me $45.

If you've got a PC that you use exclusively for home use (games, word
processing, spreadsheets, etc) you probably don't even need to check its Y2K
status. The rollover will either not affect it or not cause any serious
effects.

Well, if you've got demo software that has a time limit, this'll trigger it.
Also, if you're using something like, say, McAfee, with a timed paid-for
update period, this'll mess you up too. I had installed McAfee from Plus
98! when it came out, and somehow my clock got set wrong. When I fixed it,
McAfee told me I'd used up my whole year of free updates.

Ahh...but around here the McAfee software is FREE periodically if you take the time to mail in the 100% rebate. Might it be smarter/cheaper to just go ahead and get another FREE McAfee package when one of the computer stores is running a promotion?

In addition, you can STILL download the virus signature updates from McAfee/Network Associates EVEN IF THE "UPDATES" HAVE EXPIRED. That update is merely the update for the "engine" that runs the software and NOT the virus signatures which is really the critical part of the package.

Why make it nationalistic Walt? I responded the way I did because of the tone of your post not because of where you live.
If you look at the offer he proposed he clearly isn't going to retire soon on the hand full that may take him up on his offer. It's a very expensive tool if you buy it from Kenwood, and for those not willing or able to modify a set of needle nose pliers it seemed like quite a nice offer. The traditional Ham Spirit is very much alive and well here too.

> But then I guess that's the difference between the Yankee capitalist

> still (fortunately) have here in Europe .....

Heh heh, yea I know that's why there is more Dutch and English investment in the U.S than any other foreign country. I guess you know a good thing when you see it. Your right about being a capatalist country though, it's nice to live in a place where you can be middle class, rasied by a stepmother and go on to be the President of the country. Money isn't King here Walt, we just have so damn much of it, it makes it look that way.

73,

SB DX @ WW $OPDX.420
Ohio/Penn DX Bulletin No. 420

The Ohio/Penn DX PacketCluster
DX Bulletin No. 420
BID: $OPDX.420
August 2, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2WK, WB2YQH, W3HC, N6RT, DJ5AV & DX News Letter, EA5XX, EA6VQ, EI6FR, F6AJA & Les Nouvelles DX, JH4RHF, RZ1OA, SM7MPM, SM0DTK, SV2CWY, VE3ZZ, VK3EW, UA0MF and ZL2HU for the following DX information.

3A, MONACO. The "LNDX" reports that Patrice, F5RBB, will be 3A/F5RBB from August 23-28th. Look for activity on 40, 20, 15 and 10 meters. QSL via home callsign.
Meanwhile, remember to look for 3A/IK1SLP and 3A/IK1YLL who will be active on CW/SSB/RTTY until August 5th. QSL via homecalls.

3B9, RODRIGUEZ ISLAND. Robert, 3B9FR, can often be found on 20 or 15 meters on 25 KHz up from band edge. Check after 0300z on 20 meters and after 1300z on 15 meters. It has been mentioned that he can also be found on 40 meters (around 7015 kHz) between 2000-2100z. QSL to the following address: Robert Felicite, P.O.Box 31, Rodriguez Island, Via Mauritius Islands

4U1VIC, VIENNA INTERNATIONAL CENTRE. This station, which counts as Austria for DXCC, will be active in the coming months. Look for 4U1VIC in the following planned activities:
August - WAE CW Contest, Multi/Single by DL6RDR and JH4RHF
September - CQ WW RTTY Contest, Single Op by JH4RHF
WAE SSB Contest, Single Op by JH4RHF
October - CQ WW SSB Contest, Multi/Single by DL2OBF, JH4RHF and others
November - CQ WW CW Contest, Multi/Single by DL6RDR, JH4RHF and others
December - ARRL 10 Meter Contest, VE3IAY
Please note that 4U1VIC is a separated multiplier (county) for the WAE and WW contest. QSL via OE bureau unless otherwise mentioned.

9A2000, BRIONI ISLANDS (Brijunska Otocja, IOTA DXpedition/Special Event). Sado, 9A2OP, reports that a team of operators (Kreso/9A7K leader, Sado/9A2OP and 4 others) will activate these Croatian islands located in

the Adriatic Sea, September 1-6th (possibly 2 extra days). The IOTA reference number is EU-110. The callsign to be used will be 9A2000FT in celebration of the President's 77th birthday (FT stands for President Franjo Tudjamn, and the 2000 is to celebrate the upcoming new millenium). Also, these islands are the exclusive summer residence of the Croatian President Franjo Tudjman. Activity will be on all bands including the WARC bands and 2/6 meters. QSL via 9A7K, Kresimir Juratovic, POB 88, KR-48000, Koprivnica, Croatia.

HU4, EL SALVADOR (Special Prefix/Event). Operators from Spain and El Salvador will be active as HU4U, on August 16-23rd. This special operation is organized by URE, Spanish Radioamateurs Association, to rebuild all the digital net destroyed by hurricane Mitch. The Spanish radio amateurs will carry everything from Europe, incluiding PCs, transceivers, antennas, etc, to help establish a new network in El Salvador for packet radio users. This big and expensive operation is possible thanks to the sponsoring of La Rioja province goverment, and the help of the URLR (La Rioja Radiomateurs Association), Radioamateurs Without Frontiers (RSF) and the perfect organization of URE, the Spanish bureau, and Angel, EA1QF its General Secretary. The HU4U operators will be: EA1AU, EA1QF, EB1ADG, EA3CUU, EA4BT from Spain and YS1AG, YS1FAF, YS1FI, YS1GF, YS1MS, YS1RR and some more YSs from El Salvador. The suggested operating frecuencies will be:
SSB - 1845, 3795, 7065, 14195, 18145, 21295, 24945 and 28495
CW - 1833, 3503, 7003, 10103, 14023, 18073, 21023, 24893 and 28023
RTTY - 7034, 10114, 14084, 18094, 21084, 24924 and 28184 kHz
QSL cards via EA4URE.

IOTA NEWS.....
AS-066. This one was sent in late. Operators Mike/UA0MF. Alex/RU0LL and Vitaliy/UA0LCT will be active CW/SSB on 15/20 meters from Putyatina Island (RR-16-03) between July 30th and August 2nd. QSL for UA0MF/A to his Box 20, Vladivostok-21, Russia. QSL all others per operators instruction.

EU-???. Look for F6HQP, F5NGB and F6JSI to be active from some different islands from Britany (Finistere Nord) between Aug 1st to 15th. Those islands will count for IOTA and DIFM.

EU-004. Members of Radio Club Mallorca will be active August 13-15th from the island of "Na Galera". Other reference numbers: DIE-Spanish Island award E-126 and Grid Location JM19IM. Activity will be on 2, 10, 15, 20, 40 and 80 meters with two stations running at the same time on HF plus another on VHF. The activity will take place mainly on SSB, although an ocasional operation will also be on CW. The callsign used will be ED6EIG and the QSL Manager is EA6VC.

EU-067. Members of the Southwest Scania Radio Amateurs (SSRA) will activate Santorini Island, August 9-15th. Operators will be SM7BCX/Yngve, SM7DXQ/Mats, SM7EQL/Bengt, SM7GIB/Mats and SM7MPM/Tore. Look for the operators to sign SV8/homecall and be active on the usual IOTA frequencies SSB and CW. QSL to

the respective operator's homecall, direct or bureau.

EU-121. The WestNet DX Group will once again team up with the Saltee Dog DX Group from Switzerland from the island of Ireland's Eye on the east coast of Ireland. The group plans to be active from the evening of Thursday, August 5th, until the early afternoon of Monday, August 9th. The callsign used will be EJ7NET and QSLs will be handled by EI2GX. They will be active on all bands but hope to concentrate heavily on 6m.

LIGHTHOUSE SPECIAL EVENT. The Western New York DX Association will operate Special Event Callsign K2L during the period of August 8-22nd, in conjunction with the Buffalo (New York) Harborfest and culminating with an operation from the Buffalo Lighthouse during the Lighthouse/Lightship Activity Day August 22nd. The August 22nd operation will be on or near these frequencies:
CW - 3531, 7031, 14031, 2031 and 28031 kHz
SSB - 3821, 7261, 14231, 23331 and 28421 kHz
During the August 8-21st period, activity will be on CW, SSB and RTTY on all bands, including WARC. A special photo QSL will be available for QSOs of August 22nd, and a regular QSL will be used for all other dates. QSL via WB2YQH, P.O. Box 73, Spring Brook, NY 14140 with SAE/SASE.

OH0, ALAND ISLANDS. Just a reminder! Start looking for Hartmut, DJ7ST, as OH0/DJ7ST. He will be here until August 20th. Activity will be on all bands CW running 5 watts. QSL via DJ7ST.

P29, PAPUA NEW GUINEA (IOTA activity). Uwe, DJ9HX, will be active as P29VHX from August 7-31st. He will activate a few IOTAs while in the area. Uwe will first be active from Loloata Island (OC-153) from the August 7-9th. From August 10-12th, look for him to be on Rabaul (OC-008) and from Kavieng (OC-008) August 13-15th. Activity will continue on to Manus Island (OC-025) August 16-18th, and ending with activity from Madang (OC-034) August 19-22nd. Uwe still may plan to travel to other IOTAs between August 23-31st. Activity will be on 40-10 meters CW/SSB. QSL via DJ9HX (he prefers via bureau).

QSL INFO AND NEWS......
The logs for KH3/NH6D are now online and are updated frequently at:
http://dx.qsl.net/logs
By the way, Bill's older callsigns KH2/NH6D and KH4/NH6D logs are also online.

Wayne, N2WK, reports that he is NOT the QSL Manager for 5B4AGC. Please send direct to G3LNS. He also mentions that W2UTH is NOT the QSL Manager for any station.

QSL Manager Jean, F6AJA, reports that he has received the HK3JBR/1 (SA-040) QSL cards for the activity during July 17-20th. Also, he reports that he has the logs for Gerard's operation as 5K8T (SA-081) and is ready to QSL any request.

QSL SV2EWN to: Kouras Vagelis, Fraglinou Rousvelt 79, Neapoli, 56728 Thessaloniki, GREECE.

QSL RZ1OA/A for activity on EU-153 (July 24-30th) via RZ1OA, Vlad Sadakov, P.O. Box 48, Arkhangelsk, 163040, Russia.

QSL UA1OLM/A for activity on EU-153 (July 24-30th) via UA1OLM, Dima Kucherin 26-23 Pavla Usova str., Arkhangelsk, 163002, Russia.

VE3ZZ/VE2 was activated by Gregg, VE3ZZ, for a few hours on Sunday, August 1st (beginning approx 1500Z) from Ile Bizard. Ile Bizard is an island in the suburbs of Montreal and does not count for IOTA, but is PQ027 for the Canadian Islands Award. Coincidentally, July 31st-August 1st was also the weekend for the annual W/VE islands contest. QSL to VE3ZZ direct or via Bureau.

ZL9CI QSL cards are being received. Ken, ZL2HU, reports, "The Kermadec DX Association has received 11,700 envelopes containing approximately 45,000 QSOs, and all envelopes RECEIVED up to and including July 31, 1999, have now been processed. Please note that if we DID NOT receive them, it is impossible to process them." Ken's complete press release with more details will be sent out to all OPDX InterNet Subscribers as an additional bulletin.

SV5, DODECANESE. Dieter/DL9UDS and Andreas/DL9USA, will be active from Kos as J45K until August 11th. Activity was spotted on 30 (around 1330z) and 17 meters (around 2300z) so far.

WEB PARTY GOING ON! Yep! David, VK3EW, one of the lucky few to work P51BH, has added a new twist in celebrating on working a new one. Join in on the fun and see a rare QSL card from P5 at:
http://www.qsl.net/vk3ew/p51bh.htm

ZK1, SOUTH COOK ISLANDS. Watch for Yoshi, JJ8DEN, to be active as ZK1MSG until August 6th from Mangaia Island (OC-159). Activity will be on 80-10 meters, including the WARC bands, on RTTY and CW. Operations will be limited because he has only power between 0500 and 2400 local time. As this bulletin was being prepared, QSNs were reported that he was on 10106 kHz at 0904z and 18084 kHz at 0246z. QSL via JJ8DEN.

ZK3, TOKELAU ISLANDS (DXpedition JULY-AUGUST 2002). Following their very highly successful DXpeditions to Campbell Island in January 1999, Chatham Island in October 1997, and Raoul Island, Kermadec Island Group in May 1996, the Kermadec DX Association is planning a further Dxpedition to the Tokelau Islands in July/August 2002. They are planning a multi band all mode operation with approximately three weeks on the island. Because of the shipping situation and the logistical costs involved their target is substantial at around 515,000 USD. They report donations are vital at this early stage to ensure ZK3 is activated in July/August 2002. Donations for this operation can be sent to: Kermadec DX Association ZK3 DXpedition, C/O - Ken Holdom, ZL2HU, P.O. Box 56099, TAWA, Wellington, New Zealand. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

Well, the current MSC sale flyer does have an adjustable
pin spanner for $9.95. It would do this task. These nuts are
commonly used by the optical and electronic industries in
a variety of sizes, so it shouldn't be surprising that there
are ready made tools to fit them available from the larger
tool jobbers. IMHO Kenwood is just gouging at $60.

OOOPSS!! There is a small correction under "ZK3, TOKELAU ISLANDS"..

The line reading:
"Because of the shipping situation and the logistical costs involved our
target is substantial at around 515,000 USD."

Should read:
"Because of the shipping situation and the logistical costs involved our
target is substantial at around $45,000 USD."

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a free program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.

Every single Amateur Radio operator with a half decent computer should be participating in this project!
For more information: http://setiathome.ssl.berkeley.edu/

The data is currently being received by the giant Radio Telescope at Arecibo, Puerto Rico.
Harnessing the unused processor time of PC's all over the world is equivalent to the capacity of several CRAY supercomputers!
The program is a screensaver that works to analyse while your machine is on and your not using it.

Scott Leaf VE7VDX - VHF DX Grid Square CN89
Coquitlam, British Columbia, Canada.

2286. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7o36krgcg1@news.hawaii.edu>
Source record: 23988
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

From what I heard he _did_ offer it on load free of charge. There was a returnable deposit, which I believe is fair when lending over a medium as diverse as the Internet, and the non returnable part could be interpreted as paying for the weardown of the tool.

Speaking of Kenwood Mics, does ANYONE have any idea how to repair that stupid modular, punched on connector that Kenwood so brilliantly chose to use on the mic for the TM-261A and similar VHF rigs?

The silly punched on clear plastic connector looks like something on a throw-away telephone, but no, THEY used it on the $75.00 microphone!

Now of course after a few months of use, mine is falling apart.

Is there some tool to replace that punched on connector or does anyone have any tips on repairing it?

If I have to buy a $75-79 replacement mic for this $199 radio after 6 months I will say "NEVER AGAIN" to Kenmore!

Source record: 24013

I worked both Steve (ZD8LII) and Andy (ZD8VJ) in March of 1993. I was mobile running 5 watts on 10 meters. Have never been able to locate any valid QSL route for either. Any one have a good way to reach Steve or Andy? ....Robb WB8BHU

Take the mic cable and all to a computer cabling outfit, a 2 way radio shop, or anyone who installs telephone equipment and ask them to please crimp on a new connector.

Those pesky plugs are the industry standard in the commercial radio business and have rarely been a problem -
If it is an RJ11 - 6 pin conductor you can buy a 6 pin crimper for about 20 -30 bucks (buy a nice one) and you can get the plastic pieces fir about 2 cents each.
You make note of the wire sequence (1-6) and cut the old one off - insert the line into the stripper into the deisgnated stripper - measures length - and strip - insert the wires into the plastic plug - crimp it and you have a new plug-

I would never want to go back to the old mic plugs - they take way too long when broken - i can recrimp a new plug in under a minute -
if they are an 8 pin plug - get an 8 pin crimper - most mics are standard at 6 pins

2315. Kenwood Nuts Revisited

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-06 00:00:00 UTC
From: DontDoIt@ImNotHere.com
Message-ID: <37aad2b0.8467479@news.mv.com>
Source record: 24017
Cross-posted to: rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Well, it's very interesting...

No-one wants to rent the nut tool, but everyone wants to buy one, so here goes nothing:

(For those who've missed this "lively" thread, please see below for my description)

I know I offered to tell you where to buy the tool, but the guy I get them from doesn't really want to sell them onesy, so I'll act as middle man.

For $34 (money order or cashier's check, no cash please) I'll ship you your very own nut tool, to keep, to cherish, TO SHARE!!! If you don't like it, return it unharmed and I'll refund your money, less freight.

That's the best deal I got, and I ain't gonna get rich on this one, I do it simply to stick-it to the "establishment" that wants to charge upwards of $90 to loosen a nut.

If you're interested you can contact me via mail, email, or phone:

Neil Rosenberg, N1DMA
NeilR@innermedia.com
60 Plain Road
Hollis, NH 03049
(603) 465-2788

The supply is limited, so act soon. Be sure to check with me before sending any money, to make sure I haven't run out!
==========
The fine print:

I have in my posession a tool that is positively brilliant at loosening/removing/tightening those annoying circular "nuts" that you'll find on various Kenwood rigs. Yes, you know the ones I mean, the ones that no amount of coaxing with the tip of a screwdriver will budge. I've been told (but haven't confirmed) that the same nuts are found on many Icom, Yaesu and other rigs.

Why on earth would you want to remove this nut, you ask? Well for most of the affected Kenwood rigs, it's the ONLY way to get to things like digital front panels, lithium batteries, and so on.

You can see a photo of the tool at:

http://www.mv.com/ipusers/innermedia/kenwood/spanner.jpg

Disclaimer:

I make absolutely NO warranty as to the applicability, performance, or safety involved in using the tool I send to you. If you damage your rig, or yourself, that is totally your responsibility. If you void your warranty, that's also your problem. THINK BEFORE YOU ACT!

If the tool is not as I described it, if you chicken out, or if it doesn't fit your rig, contact me, and I'll refund your entire price (less my UPS cost) as soon as the tool is returned to me undamaged. In other words, treat me fairly, and I'll return the same.

Neil, N1DMA

2316. VK EMail database - Now FULLY searchable!

Newsgroup: rec.radio.amateur.dx

Hi All

Just to let you know that I have upgraded the VK's on the Internet Email & URL list to an online database. This means that it is fully searchable online with the capacity for much more data to be stored. Stop by and upgrade your info if you are already listed (VK's only), or if your not listed then add your details alongside the other 900+ VK's that have!

It's a great way to find that elusive VK friend :-)

http://www.vk2nnn.com

Cheers....Allan VK2NNN

>Andy? ....Robb WB8BHU
>

Steve ZD8LII is now G0LII and QTHR:

S.P. Hodgson, G0LII
Mill Lane Farmhouse
Irby in the Marsh
Skegness
PE24 5BB
England

Likewise, Andy ZD8VJ is now G4ZVJ and also QTHR:

A.T. Chadwick, G4ZVJ
5 Thorpe Chase
Ripon
HG4 1UA
England

I think both will still QSL their ZD8 QSOs on receipt of a self-
addressed envelope and return postage (1 IRC or 1 US dollar bill should
be OK).

Good luck!

You need one to remove the retaining nut from the large round 8 pin mic jacks. On the TS-850S the front cover will come off without the tool (if I remember correctly) but you have to remove the mic jack nut to get the front panel off most of the mobile rigs.

You can use a pair of the bent-type long nose pliers (mine are Xcellite) with fair results, but some are so tight that you have to have the tool.

C'mon, you're talking about the star shaped hex wrench, some Swedish and
German cars use them for plates and interior moldings; go to any car
parts store with a good tool selection and pay 8 bucks.

What a racket.

TYPICAL HAM.

Have a look at the picture at the web site I indicated in my message,
and you tell me how that looks like a hex wrench, star shaped or
otherwise. If there was an $8 tool to do the job, don't you think I'd
get one, and forget all this silliness?

You can see the tool at:

http://www.mv.com/ipusers/innermedia/kenwood/spanner.jpg

Yes, but can't you get the front panel off without it?

If so, you can use a regular pair of pliers to remove the retaining nut once the face is off.

An 850 needs it if you are going to replace the mike jack, otherwise no.

2329. FARFest Sept 26 (G'burg hamfest relocated to Bowie, MD)

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-08 00:00:00 UTC
From: "E. Allen Brown" <Al_Brown@ix.netcom.com>
Message-ID: <7oihs0$kgg@dfw-ixnews16.ix.netcom.com>
Source record: 24031

FOUNDATION FOR AMATEUR RADIO
c/o Al Brown
8645 TOWER DRIVE
LAUREL, MD 20723-1244

-- For immediate release --

F.A.R.FEST '99 AT NEW LOCATION

The Foundation for Amateur Radio (FAR) will sponsor the 42nd annual F.A.R.Fest amateur radio hamfest on Sunday, September 26, 1999, at Prince George's Stadium 1/4 mile south of the junction of US-50 on US-301 in Bowie, Maryland between Washington, DC and Annapolis, Maryland.

This is a new location for F.A.R.Fest, with a paved area that accommodates over 700 tailgaters. Vendors and other sellers will be able to set up under the canopy of the stadium concourse. General admission tickets into F.A.R.Fest '99 are $5.00 at the gate; $10.00 for tailgating, which requires the purchase of general admission. Vendors and other exhibitors should contact Marry Morris, N4TCI at amateur_radio@hotmail.com, or at 703-971-3905 for more information.

The Special Events station W3PRL-AM will be on display.

Talk-in frequencies are 146.520 MHz and 147.105(+) MHz.

To get to F.A.R.Fest '99:

From points North:
Take I-95 south to the Baltimore Beltway (I-695) to Exit 4 (I-97 South) toward Annapolis. On I-97 South, take Exit 7 (Route 3 South - Bowie/Odenton). Take Route 3 for approximately 11 miles. After passing under the Route 50 overpass, proceed to second traffic light and turn left into Stadium Drive. NOTE: Route 3 changes to Route 301 after you pass under Route 50.

From points South:
Take I-95 North to Exit 104 (Route 301 North). Take 301 North past Upper Marlboro. Go through the traffic light at the Route 197 intersection (Rip's Country Inn will be on the right). At the next traffic light, turn right into Stadium Drive.

From points East:
Take Route 50 West to Exit 13A (Route 301 South). At the second traffic light, turn left into Stadium Drive.

From points West:
From I-70 East, follow directions coming from points North.

From Washington, D.C. or the Capital Beltway:
From D.C., take New York Avenue to Route 50 East, or the Capital Beltway, Exit 19A (Route 50 East). Take Route 50 to Exit 11 (Route 197). Go South on Route 197 for approximately 1.5 miles to Route 301. Turn left onto Route 301 and remain in the right lane. Turn right at first traffic light into Stadium Drive.

For general information on F.A.R.Fest '99, see the webpage at URL:

http://www.amateurradio-far.org/

or contact Al Brown, KZ3AB, at &#65533;amateur_radio@hotmail.com,&#65533; or at 301-490-3188.

F.A.R.FEST '99

THE ONLY PLACE TO BE SEPTEMBER 26

August 11, 1999 is the day of the total eclipse -- a very important event this particular year, with the solar maximum so close. Radio Hobbiests are invited to observe the Audio Eclipse. Please visit http://hfradio.org for links and information about how you can participate.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

73 de NW7US, Tomas.

Get a crimp tool and put another on. A properly done connection
of this sort is one of the MOST reliable ones you can use.

Thats precisely why you DO see them on telephones.
John

2339. Re: Kenwood Nuts Revisited

Newsgroup: rec.radio.amateur.dx

WOW... I just cut the two middle tines of a four tine fork off and cut the
remaining two outside tines down to about half their original length.
adjusted the span to fit the nuts... all it cost me was an explanation to my
wife. If you hide it well enough you may not even need to do that!!! Why
make a mountain out of a mole hill????

SB DX @ WW $OPDX.421
Ohio/Penn DX Bulletin No. 421

The Ohio/Penn DX PacketCluster
DX Bulletin No. 421
BID: $OPDX.421
August 9, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, N6FF, N6HR, N6RT, K7BV, K9YO, AH0W/OH2LVG, G3NOM, HA0HW, JE1DXC, JM1LJS, ON4LDF, PA1AW, PY7ZZ, RW4HW, SM0CCM, SP2BIK, TA3YJ, UT5RP, V63PD, VK8NSB, VK9NS and 7N2UTO for the following DX information.

MYSTERY OPERATION FINALLY ANNOUNCED! During all last week there were reports that an operation was going to take place from one of the "Top 20 Countries Wanted" (P5 was mentioned not to be one of them). Finally, thanks to a press release from Ray Gerrard (G3NOM), he reported that the International Amateur Radio Volunteer (IARV), as per the annual aid program previously announced, has dispatched nine members (including the leader JA1UT) to the Republic of Yemen (7O) on August 5th, and they will stay until August 19th for voluntary work to establish a hospital communication network in remote areas. The opportunity will be taken to offer a donation of amateur radio equipment to the government of Yemen and to help them resume amateur radio activity in their country. IARV would sincerely appreciate cooperation from the DX community on this inititative of inviting a new comer to our Amateur Radio field. More news will be announced later.

5H8, TANZANIA. "The 59(9) DXReprt" reports that Terry, W7RNF, is stationed here for the next few years and is active as 5H8TL. He is the first station to use the 5H8 prefix. QSN reports seem to show Terry likes 15 meters SSB between 1800 and 1900z. Also, check 20 meters SSB after 0400z. QSL via W7RNF.

8P, BARBADOS. Early reports mention that operators K4BAI, K1TO and N4TO plan a serious Multi-Single effort in the CQ WW CW Contest in November. Their activity will between November 23-30th. The contest callsign is not set yet; it will be either 8P9Z or 8P0 something.

CLOSER TO A POSSIBLE NEW AND MAYBE A DELETION??? In international news, the Associated Press reports that Montenegro has said that it wants to abolish the Yugoslav federation (in its bid to win independence) in favor of a loose partnership with Serbia that would allow the two republics to go their own ways. Montenegro government has approved a plan that would give it the right to maintain its own army, foreign ministry and currency while remaining lossely linked to Serbia in a confederation called the Association of the States of Serbia and Montenegro. The report states that President Slobodan Milosevic is beleived to be almost certain to reject the proposal in which case Montenegro says it would call a referendum on full independence.

CORRECTION TO OPDX.420. The callsign ZK1MSG under the section "ZK1, SOUTH COOK ISLANDS", was wrong and should read ZK1MGS.

CT3, MADEIRA. Ben, DJ8FW, will be active as CT3/DJ8FW during his holiday from August 12-20th. He will concentrate his activity on the PSK31 Mode mainly in the mornings and evenings, but if bad WX, look for him also on CW on the WARC bands.

ES75, ESTONIA. The amateur radio operators of Estonia will be signing ES75 + their callsign's suffix throughout August to celebrate the 75th Anniversary of the first QSO ever made with an ES callsign. A special station will operate as ES75M from Muhu Island IOTA EU-034. QSL to home calls.

FS & PJ7, SAINT MARTIN AND ST. MAARTEN. The "Caribbean Tour 1999" has started as reported in OPDX.414. Now until August 11th, look for Ronald (PJ7/PA3EWP), Rob (PJ7/PA5ET), Peter (PJ7/PA4EA), Martin (PJ7/PA4WM), Henk (PJ7/PA3GCV), Dennis (PJ7/PA7FM) to be active on all bands 160-6 meters CW/SSB/RTTY and maybe Satellite/SSTV operations. During this time, the team will become active from Saint Martin (ed. which they have as this bulletin was being prepared) and sign FS/PA3EWP, FS/PA5ET, FS/PA4EA, FS/PA4WM, FS/PA3GCV and FS/PA7FM. Also see below, V47 and VP2E. The QSL manager for this tour is Rob, PA5ET. QSL can be sent via the bureau or direct to: Rob Snieder, van Leeuwenstraat 137, 2273VS Voorburg, The Netherlands. Detailed information about the tour can be found at the Web site: http://www.muurkrant.com/pi4com/tour99

IOTA NEWS.....
AS-117. Operators JH1HHC and 7N2UTO will be active as JH1HHC/0 and 7N2UTO/0 from Sado Island, August 28-29th. They will operate SSB/CW/RTTY on 80-6 metres (WARC bands included). QSL via home callsigns either direct or through the bureau. (Note: HL5CL is NOT the QSL manager of 7N2UTO.)
EU-102. Operators Nikolai/UA9KM, Serge/UA9KL, Valery/UA9KI, Mike/UA9KO, Mike/UA9KGH, Valery/RW4HW and Victor/UA4RC will be active from Zelenyy and Lovetskiy Islands (EU-102, RRA NEW ONE) between August 17-27th. The callsign will be RI1P. Activity will be on all bands, WARC included. QSL via UA9KM, Nikolai Kuprin, P.O.Box 158, Nadym, 626711, RUSSIA.

OC-199. Don, VK6DJP, is on a fishing trip on Rosemary Island, part of the Dampier Archipelago. He plans to be active on the bands (20/15 meters) during his stay. He will be there until around August 14th, weather permitting. He is aware of 14260 and 21260 as IOTA frequencies. This is not an IOTA Expedition, but with his ICOM 706 and wire antennas he will at least give some island chasers another chance for OC-199. Power is available, so this is a big plus. He has promised to be as active as possible, but he will put fishing first. QSL information is to his home call, and he says he is okay in the callbook. (TNX to VK9NS).

IOTA WRAPUP (NA-169). The W7W Team from Waadah Island NA-169 cleaned up the worldwide demand for the Western Washington Island Group. Over 3000 QSOs were logged before, during and after the IOTA Contest. QSL via W5DX.

JW, SVALBARD. The latest news about the 1999 Svalbard Arctic Polar DX-pedition by Jo/DF6VI and Tom/DL4OCM, is that they should be on the air during the afternoon of August 9th. Their planned end of this operation is August 16th. They want to work on all bands from 80-10 meters including the WARC bands on CW/SSB/RTTY. Their QTH will be Longyearbyen, Svalbard (EU-026). The QSL cards should go to JW/DF6VI's and JW/DL4OCM's home addresses or via the DARC bureau. More information is available and maybe a log search on Jo's home Web page at:
http://www.qsl.net/df6vi/jw.htm
DF6VI's address: Joerg Engelbrecht, Heeperholz 1, D-33719 Bielefeld, Germany
DL4OCM's address: Thomas Steinmann, P.O.Box 1117, D-37162 USLAR, Germany

KH3, JOHNSTON ISLAND. Information from Dick, N6FF, indicates that Bill, NH6D/KH3, should be active from August 9-13th. Bill should be active daily starting about 0330-0400z and again about 1500-1530z, depending on work committments. He prefers CW, and expect to find him on that mode, but he does operate SSB occassionally. His present antenna set up only allows operations on 10/15/20/30 meters, antennas for the lower bands is presently a problem, and they are working on it. They must convince the powers on Johnston Island that the antennas and birds can co-exist, a difficult job (as ZS8D on Marion Island well knows). QSL via N6FF. Watch for logs to be posted on the Web at: http://dx.qsl.net/logs
Meanwhile, reports from "The Daily DX" reports indicate that Bill, NH6D, will also be active (as time permits) from August 9-13th. His estimate operating time on the air will between 0330Z-0400z. Look for him on 10/15/20/30 meters CW. Emphasis will be on EU, AF, W1,2,3,4 and all points south of Florida. QSL to N6FF.

LIGHTHOUSE ACTIVITY. Celebrating the International Lighthouse/Lightship Weekend during August 21-22nd, the radio station using the callsign SN2KM will be active from the marine lighthouse in Krynica Morska. Krynica Morska is located on the coast of the Baltic Sea in Poland (19E2712 and 54N32112). The station will be operated by five operators: SP2BRN, SP2IZC, SP2TQW, SP2NBD, SQ2BXJ and SP2BIK. QSL via SP2BIK.

OH0/OJ0 DXPEDITION (Trip Two). Dennis, K7BV, Editor for the National Contest Journal, has been invited back to operate from Aland Islands (OH0)

and Market Reef (OJ0) in September, thanks to Seppo/OH1VR, Lars/OH0RJ, Ari/OH1EH, Jukka/OH2MAM and Juha OH1JT. The primary focus of this trip will be OJ0. Dennis anticipates arriving on Market Reef via helicopter during the afternoon of Tuesday, September 14th. He will stay until the early morning hours of Monday, September 20th. Special emphasis will be made to do an extensive amount of operating on 80 and 160 meters each night. The trip will include operations on all bands 160-10 meters (WARC bands included) on both SSB and CW. RS13 satellite appearances will be as frequent as possible. QSL OH0 - OJ0/K7BV via KU9C, Steve Wheatley, 12 Netherton Terrace, Morristown NJ 07960. The complete press release by Dennis, K7BV, will be sent to all OPDX InterNet Subscribers as an additional bulletin.

PALESTINE OPERATION WRAP UP. Hide, JM1LJS, reports having a very pleasant trip and operation from Gaza and the West Bank. He informs OPDX the following totals (NOTE the QSL Managers):
July 26-29th July 30-August 1st
Callsign: E4/JM1LJS Callsign: E4/JM1LJS
QTH: West Bank QTH: Gaza
QSL via JL2XUN QSL via VK4FW
Total QSO: 1713 (includes dupes) Total QSO: 1703 (includes dupes)
CW: 426 / SSB: 1287 CW: 1413 / SSB: 290
On August 1st, Hide was active as 4X/JM1LJS from Tel Aviv and made only three QSOs on SSB. He could not receiving permission from the hotel to operate. QSL via JL2XUN.

PY0F, FERNANDO DE NORONHA ISLAND. Fred, PY7ZZ, is now active as PY0FZ, possibly for only a few more days. He reports that this is not a DX-pedition, but he will be active during his free time from PY0FF's station. He was spotted on Sunday on 14195 kHz at 0645z. QSL to his home callsign.

QSL INFO AND NEWS......
The logs of ZF2NT and HB0/DF6VI operations can now be found on the Web site: http://dx.qsl.net/logs

Frank, AH0W/OH2lVG, reported on Monday last week that the 3B9R Rodrigues Island DXpedition QSL cards have been printed in Japan and are in transit. The cards will start to flow as soon as they arrive to the QSL manager in Arizona. QSL via N7LVD, John Johnson, 5627 West Hearn Road, Glendale, Arizona 85306-4213.

QSLs for Arne, XE1/SM0OUG, goes to Lars, SM0CCM, who prefers bureau cards. Lars mentions that Arne promised a lot of 50 MHz activity. NOTE! ONE (1) US DOLLAR DOES NOT COVER AIR MAIL POSTAGE FROM SWEDEN TO USA. ONE IRC DOES.

RARE/NEW IOTA'S TO BE ACTIVATED. Stuart, VK8NSB, reports in a press release that he has been granted permission to operate from 2 IOTAs in the Northern Territory. The first island, Melville Island (OC-173) will be activated from the November 4- 9th. The second island, Croker Island (NEW IOTA, never been activated before - located in the Central Island Group NT) will be activated November 11-16th. Stuarts states:

"This DXpedition will be for the children on both Islands, Amateur Radio Display for the kids, 2 out of 6 days is to show the children on both remote islands Amateur Radio (1 SSB station mainly for the children to listen and talk to other Hams from around the world)." Currently Stuart is looking for some assistance, either green stamps or EQUIPMENT and operators. He is putting together a 5 man team, and two of the operators are confirmed (Stuart/VK8NSB and Peter/VK8PDG). They plan to have three stations active (2 SSB and 1 CW). QSL Manager will be Jim Smith, VK9NS. OPDX InterNet Subscribers will receive Stuart's complete press release (with details) as an additional bulletin.

SPECIAL EVENT. Belarus Amateur Radio Union's President Alexander Pyatunin (callsign not given) reports that a group of Belarus Hams will provide communications for the Belarus team going to climb Mont Blanc, August 9-20th this year. Operators will be EU1AZ, EU1DX, EU1ABC, EU1UC, EU1ABC, EW1CM, EW1PA, EW2CR, EW2KW, EW8DX, EW8EW, EW8MW, EW8RR and DL7VFM. Callsigns to be used are F/EU5HQ (base) and TM0MB (Mont Blanc team). Activity will be on all HF bands and on 6m, 2m, 70cm CW, SSB, RTTY, SSTV and FM. Pictures would be transmitted by SSTV and Internet.

SV, GREECE (YL and IOTA operation). Nilay/TA3YJ (XYL) and Berkin/TA3J (OM) will be active from Athens (SV1) and Khios (SV8, EU-049) between August 12-17th as SV/TA3YJ and SV/TA3J. Activity will be SSB on 160/80/40/20/15 /10/2 meters and 70 cm. QSL via home callsigns, bureau or direct to:
TA3YJ - Nilay Mine Aydogmus, P.O. Box 876, 35214 Izmir - TURKEY
TA3J - Berkin Aydogmus, P.O. Box 987, 35214 Izmir - TURKEY

TOTAL SOLAR ECLIPSE STATION ACTIVE. Look for ON7SUN to be active from August 8-11th. This will be the only special event ON station under the total solar eclipse activity. Activity will be on all modes and bands. A special QSL and Award is available. QSL via the bureau or direct to ON4LCV.

V47, NEVIS. After their St. Maarten/Saint Martin operations, the "Caribbean Tour 1999" will be active from here August 11-18th as VP2E/PA3EWP, VP2E/PA5ET, VP2E/PA4EA, VP2E/PA4WM, VP2E/PA3GCV and VP2E/ PA7FM. Their three stations operation should be the same as on FS/PJ7. QSL via PA5ET direct or via the bureau.

V6, CHUUK ISLANDS (Micronesia). Peter, V63PD, informs OPDX that he is the only remaining resident station in the Chuuk Islands. He operates on the 40/30/20/17/15/12/10 meter bands on SSB and with some CW. Chuuk has an IOTA reference number of OC-011, and its location is 7.5 degrees North and 152 East. Peter mentions that it seems that most hams he talks to do not know where Chuuk Island is. The former name of these islands was Truk. Since the name was changed some ten years ago to Chuuk, he identifies his QTH consistently as Chuuk. It is pronounced "chuke"--- rhyming with Duke. Peter's QSL Manager is VK4AAR and has a website at:
http://www.qsl.net/v63pd

VP2E, ANGUILLA. After their St.Maarten and Nevis operation, the "Caribbean Tour 1999" will be active from here August 18-25th as VP2E/PA3EWP, VP2E/ PA5ET, VP2E/PA4EA, VP2E/PA4WM, VP2E/PA3GCV and VP2E/PA7FM. Their three

stations operation should be the same as on PJ7 and V47. QSL via PA5ET direct or via the bureau.

YJ, BANKS ISLAND (Vanuatu, IOTA DXpedition). Masayoshi, JE1DXC, will be active from Banks Islands between August 12th and 16th. The callsign was not given, but Masayoshi has operated as YJ0AXC. He will be active from Banks Islands between August 12th and 16th. Operation will be on CW/SSB, 14/18/21/24/28 MHz running 100 watts with a generator and dipoles. QSL requests should go to ONLY his CBA. Masayoshi reports, "The Banks Island group ranks 61st on the list of Most Wanted Island Groups. The Banks and Torres groups have 62 islands, 13 of which are inhabited. Most of the remainder are either sandy islets or jagged volcanic rocks poling out of the sea. This area is one of Vanuatu's most humid, and has an average rainfall of 3900mm per year. As elsewhere, the islands suffered heavily from black-birding and disease in the latter half of the 19th century. By the 1930s there were barely 2000 people left, but now the population is recovering and currently stands at about 6000. There are four airfields in the area, but little in the way of accommodation and motor transport. Despite its considerable beauty and fascinating culture, very few visitors make it to this part of Vanuatu."

ZL7, CHATHAM ISLAND. Lothar, DJ4ZB, plans on be active between February and March in the year 2000. Callsign may be ZL7ZB or ZM7ZB. Activity will be 80-6 meters, with an emphasis on 10 meters.

That's great Matthew, and people should definitely try the simple approaches first. One's that I've tried are:

1. Using a single pointed instrument, like a small screwdriver, see if you can gently tap the nut loose (by pushing in a counter-clockwise direction on the nut). By occasionally switching to different slots, you can possibly just work it out slowly.

2. If this is not successful, do as Matthew has suggested, simply take some flat stock (or a fork) and make a custom-shaped two-toothed thing that you can turn with your hand. This can most easily be done with a file or grinding wheel and some flat steel stock, approx .030 to .050 inches thick. In my case all this yielded was a bent tool, since Kenwood had really torqued the nut on.

3. If this is not strong enough, you can move to the next level, a needle nose plier. The best method I've found is to use a very small c-clamp on the sides of the pliers to help strengthen the plier's hinge point. First spread the pliers to fit two of the slots, and to clear the microphone connector housing, and tighten the clamp really tight. If you're very careful, you can apply quite a bit of torque this way, but if you slip (as I did) you'll probably gouge the front panel of your radio.

4. If, incredibly, this still is not strong enough, or you don't want to risk hurting the front panel, then you need to bring in a tool such as the one I've found.

Neil

2345. Re: Kenwood Nuts Revisited

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-09 00:00:00 UTC
From: Matthew Williamson <sales@texastowers.com>
Message-ID: <A_Er3.197$xx3.943@news.flash.net>
Source record: 24047
Cross-posted to: rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

One drawback to the cheap methods I've tried is that, especially with the mobile rigs, it's very easy to have the pliers or screwdriver slip and scratch the front panel.

Try the fork deal at your own risk, but remember, it's always easier to get forgiveness than it is to get permission.

I've done it both ways. The tool is awfully nice.

You'll need a crimp tool that will handle 8 conductor RJ-45 plugs. These are the same ones used on Ethernet patch cords and ISDN modems. The Radio Shack crimp tool will only do 4 conductor RJ-11 plugs (unless they've changed it recently).

We've had MUCH better luck with the modular plugs than we ever did with the round ones, though you'd never believe it by looking at one.

Good luck,

2347. Pulling hair out over Clipperton-L

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-10 00:00:00 UTC
From: Tim <tvendt@kear.tds.net>
Message-ID: <3vKr3.62$R_6.30930@ratbert.tds.net>
Source record: 24049
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew

Greetings.... I am wondering if there is anyone out there that is familiar (intimately??) with a Clipperton-L and problems with parasitics etc etc etc... I have tried to read some of the threads on the users groups that have to do with this problem and ones like it but they keep going off on so many tangents that it's hard to keep track of what is trying to be said. Everyone has their own opinions as to what causes parasitics and how to remedy them... My problem is that back several years ago my bandswitch zorched due to what I think was a parasitic. I rebuilt it, installed it after replacing all four suppressors on the tubes (two were cracked...another indicator). During the time it took me to remove the switch and then repair/replace it (two years) I lost the notes I had taken that showed where all the connecting wires went to on the switch from the various tap points on the tank coils . I was able to figure out where they went using the schematics (actually about 95% sure). Now I only get output on 160 mtrs. One thing that I think is telling me that I am still dealing with parasitics is that as I sweep the tuning and loading controls through their range without drive, I see the plate current meter peak. Also I'm not sure if I'm also dealing with bad output tubes. If I seem to be getting good power out on 160, wouldn't that tell me that my tubes are good??? or do they lose something even going up to the next band (75mtrs), Should I just junk this amp and spend my time and money on another amp. I guess I just feel like I'm spinning my wheels at this point. Can this amp be made to work reliably and well without spending hundreds of dollars. Heck for that kind of money I'm almost halfway to a used AL 80 or L4-b. At least they seem to have a decent track record... Or, I have 99% of the parts to build a 4-1000 rig... A project I've put off for years but maybe with winter coming, it's not starting to look that bad..... and I can heat my house with it!!!!
Any Help would be appreciated.....

You didn't say if you had the input tuning card with relays. I've had a clipperton L for years without parasitics. I have a brand new 4-1000a I'll trade you for it. I also have a 4-1000 on tghe air...the clipperton is my back-up amp. Good luck! Jack k8xx

I have mirrored the RA file from NASA - it is of the Black Sea Capture of the Total Eclipse. You can see it not only at NASA's site, but at http://hfradio.org.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

I was playing around with a new, but very poor mobile mount and antenna for about half an hour leading up to the event. My friends were just about audible as they chatted on 80 metres waiting for a signal from me from Cornwall to Hertfordshire. As the shadow of the moon came across, the signal went up from zero to S7 and we were able to hold a conversation... It doesn't say much for my mobile antenna system, but it showed the increase dramatically for the three of us who were on air at the time.

Hello All,

We are Macclesfield and District Radio Club and will be
operating the club station /P from the site of a vintage
Steam Traction Rally at Astle Park in Cheshire England.
Near to Joderell Bank Radio Telescope

Please look out for us and Give a call in. our Callsigns
will be :-

GX4MWS/p =
Golf X-Ray FOUR Macclesfield Wireless Society / Portable
we are planning operation on 80m, 40m, 20m,15m, 10m, 6m (if conditions good)

and
GX1MWS/p =
Golf X-Ray ONE Macclesfield Wireless Society / Portable
Operation will be 2m and or 70cm with packet radio on one band

please call in to the station if you hear us or visit us if you are at the
show

I bet the Astronomers will love that, all those hams in the area with their
experimental rigs :) popping off next to the telescope when it is watching a
Radio event that only occurs once in a thousand years.

Brilliant bit of co-operation you should get a medal.

Good day,

This is the second appeal to worldwide operators for cooperation is assembling a unified list of call book servers available via the WWW. If you have additions, deletions, or ideas for this list, please forward them to me directly.

Thanks to all those with corrections and deletions from the original post.

I see this as an evolving FAQ, and decided on these groups because of their international audience. I will repost as a FAQ if I get enough response to fill in the gaps.

If someone from Germany and the UK would send a note telling me why the old sites seem to be dead or now commercial, I will include an explanation in the FAQ.

Thanks for your help, and 73 from Mike in Fort Myers, FL

2371. ARRL site down?

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-14 00:00:00 UTC
From: mike.luther@ziplog.com
Message-ID: <rrb6p9n7krl38@corp.supernews.com>
Source record: 24073

Contemporaneously with my upload of the new Netscape 4.61b2 beta for OS/2 Warp, I tried to hit the ARRL website. No server there! So, thinking it might be a glitch in the new IBM beta, I tried my old Netscape 2.02 for OS/2 I keep for a spare..

Still no ARRL URL.

Not to worry, "Oh well, tomorrow is another day!"

Well, Scarlet, by morning there is still no response to the ARRL URL and website ..

Anyone know why or is it, some weird way, my DNS? Other stuff works just like always...

Did ARRL, for example, suddenly go on a Keebler Cookie binge and insist on a cookie diet that I don't use? Heck even with letting the lid off the cookie jar and even tracing that in NS 2.02, no access or even a response.

?

You mean there are people still using OS/2? :-)

I loved that OS, but haven't seen it used in a long time.

BTW, I'm sure the ARRL is just waiting for you to start using NT before
putting their server back on line :-)

I don't know how many of you know of this, but I think you should consider joining this project with SETI (the SETI@home project). Major COOL!

What is the SETI@home project?

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a free program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.

http://setiathome.ssl.berkeley.edu/ is the URL - check it out.

Also, if you are interested, once you install the software, you might wish to join our group, the NW7US Radio Group -- you'll find us under the groups section.

73 de NW7US, Tomas.

FWIW, your observations match very closely what I observed the last time I was anywhere near the path of totality, in southern Wisconsin in the late 1970s. Signals on the lower HF and higher MF bands (at the time, I didn't DX MW so didn't check there) were substantially enhanced; those on the higher HF bands saw little difference.

On a totally different subject, thanks a bunch for the EDXC QSO about an hour ago on 40m... good to know the high dipole survived the bad weather while I was gone on holiday in North Dakota...

Mike,

I guessed it right :-) but I just gave the shorcuts. Tips :

Go to : http://www.f8air.org
In the pop-up menu on the upper right of the screen "Cliquez ici pour la visite" = Clic here to visit
Select "Les annuaires" = The call books. Then you got "Menu annuaires" in the pop-up menu = Call book Menu
Select "Les radioamateurs" = Ham's or Radioamateurs
In this page you can enter any french callsign. You can search by callsign, first name, last name, address...with joker characters

I translate the following terms in order for people to use the full possibilites :

Indicatif = Callsign
Nom = Last Name
Pr�nom = First Name
Adresse = Address
Code Postal = Zip Code
Ville = City
Infos = Informations
Champ partiel = Partial field
Champ entier = Full or Entire Field
D�but de champ = Beginning or Start of field

(you can use jokers for the search : underscore is for one character; percentage for a group of characters)

Les �couteurs = SWL, listeners litteraly
Les radios clubs = Radio Clubs
Les Relais et Balises = Relays and Beacons
Les soci�taires IARU = IARU members
Liste des DXCC : DXCC list (you can search in the database or download the file. It is a formated text file to be opened in a worksheet separated by tabs or commas)
Buckmaster and QRZ are links to these databases
Retour Acceuil = Home

All the other items in the home pop-up menu are french related informatiosn regarding the association.

Note : The Ref-Union is the french amateur association and IARU member. AIR and other "sister" associations like CFRR, URC are frecnh amateurs

associations but not IARU members.

Hope this helps you all folks to visit pour french amateur sites (a lot
are in french but you will find some in english or both languages.

You will find many links on the http://www.ref.tm.fr site. You may have
a look also at http://www.radioamateur.net : no blabla only links to french
sites and associations.

This, perhaps, illustrates what is wrong with the RSCB, an
organisation only loosely coupled with Ham Radio.
u.r.a has long been the forum for matters of Ham Radio in
this cuntry, and the RSCB feel the need to go off and create
private fora which are under their control.

--
The Chronicles Of Hypocriganda

We remain part of an international force of
murderers that has recently (and currently
on-going) been engaged in the systematic
murders of innocent civilians. This whole
exercise has been undertaken with the
intention of getting the Serbs to withdraw
from their Kosovan province, which is not,
nor has ever been, an independent country.
When the boot is on the other foot, however,
the Brits are full of their own self pity
(currently seen in Omagh) when
the indigenous Irish bomb the Brits to
persuade them to desist from their
unjustifiable and ongoing invasion of
Ireland. The Brits have withdrawn their
invading farces from much of what was
erroneously known as the British Empire.
A partial withdrawal was made from Ireland
in the 1920's, a clear admission of guilt.

Not really. But the results using computers to recover signals from
below noise are fascinating. Very slow Morse techniques.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 422
BID: $OPDX.422
August 16, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA2D, K2JXW, N2WB, W0CG, W0YG, I1JQJ/IK1ADH & 425 DX News, CE6TBN, DJ5AV & DX News Letter, EC1BXI, EW2EO, G0PSE, HA0HKW, IK4MTF, JA1WSX, PA3BIZ, PS7AB, PS7KM, SP6ECA, TF3AO and 9M2TO for the following DX information.

9H0, MALTA. Wim (Bill) Visch, PA3BIZ, PR Manager V.R.Z.A. (Dutch Amateur Radio Society), informs OPDX that on September 17th a large group of Dutch amateurs will leave for a combination holiday/DXpedition to the island of Malta (EU-023). A total of 26 operators, all with their own 9H3 callsigns, will join the party of 45 participants. Four of the ops are female operators. The whole team has been granted the special 9H0VRZ callsign. They plan to be active between September 18th and October 10th. Operations will be on 80-6 meters both SSB and CW. They will be active daily on the international DX frequencies +/- QRM. They also plan to run a daily updated log on InterNet. QSL Manager for 9H0VRZ is PA0JR, Andre van den Bos, Olof Palmelaan 5, 9649 BH MUNTENDAM, The Netherlands. For more details on the participants and operation, please check out the Web site: http//www.vrza.org

BELARUS WEB SITE. Larry, EW2EO, reports that he has set up a Web site which contains: first callbook of Belarus (EU-EW) stations; amateur radio map of regions of Belarus; photos of the EW52BO and EW2EO QSL cards and other information. Check out the Web page at: http://www.qsl.net/ew2eo

CHARLIE, W0YG, IS HEADING TO AFRICA AGAIN! Charlie, W0YG, informs OPDX that he will be off again on September 1st for South Africa (ZS), Namibia (V5), Botswana (A2) and Zimbabwe (Z2). He will be active on CW only, mostly on the WARC bands. Charlie has asked us to remind everyone to "ONLY ONLY" QSL direct to W0YG. Even if he uses his ZS6YG callsign, cards must still be sent direct to W0YG. Cards sent to the ZS bureau cannot be answered. If a bureau card must be used, cards must go through the WF5E bureau system and not the ARRL Bureau.

DXCC FAQ #6 by Bill, Moore, NC1L, will be sent to all OPDX InterNet Subscribers as an additional bulletin.

E4, PALESTINE. The "425 DX News" reports that Alessio/IZ0CKJ, Simon/IZ7ATN and Max/IW0FQZ will be active from here August 19-26th. No callsigns were mentioned, but there will be some 6 meters activity.

IOTA NEWS AND INFO......
AS-073. Tex, 9M2TO, will be active from Redang Island August 28-31st. Activity will be mainly CW on all bands (no 6 meters) on the normal DX frequencies. He will use a IC-736 w/100w and a G5RV antenna. QSL to JA0DMV via the bureau or direct to 9M2TO on Penang Island. NOTE: All the QSLs will be sent out via the Bureau at the end of September AUTOMATICALLY.

EU-016. Pietro, IK4MTF, will be active from the Croatian Island Brac starting August 17th for about a week. The island is located in the Adriatic Sea Coast South Group. He will be on holiday but will be active on 40-10 meters (WARC included) with an Icom 706 and R-7000 antenna.

EU-052. Look for the Hungarian team Laci, Zsolt and Tibor on holiday to sign SV8/HA6NL/P, SV8/HA6PS/P and SV8/HA6ZV/P, respectively, from Island of Korfu between September 1-8th. They will be active on all the bands CW/SSB/RTTY. Suggested frequencies:
CW - 1831, 3511, 7006, 10104, 14026, 18071, 21026, 24891, 28026
SSB - 1841, 3621, 7051, 14151, 18151, 21251, 24941, 28451
RTTY - 3591, 7036, 14081, 21081, 28081.
Please QSL to home callsigns.

EU-080. Dr. Jorge Fernandez Devesa, EC1BXI, will be in Monteagudo Island (Cies Islands archipielago, Pontevedra Islands group, Spanish Island Award IDEA Reference number EA1-1-1) from August 15-30th. He will be going to the island as the M.D. for the natural park, taking care of guards and visitors. Some of the operators that will be going along with him will be: EA1APA, EA1APS, EA1BPS, EA1CSI, EA1FBU, and possibly some other. The callsigns to be used are ED1OTA and EF1OTA. Their activity will be CW/SSB and possibly some PSK31 and other digital modes. Dr. Jorge is currently looking for sponsors (any Spanish association or company) for this DXpedition so they can print a colored QSL with an aerial view of the islands. QSL via direct ONLY with a SASE to ED1OTA/EF1OTA, P.O. Box 54, 36980 O GROVE, (Pontevedra) SPAIN.

OC-135. Steve, VK4EMS, is now active from Bougainville Island (Papua New Guinea) as P29BI. He will be working on the island until late December, 1999. He will be active during his spare time on weekdays and will be active mostly on Sundays. QSNs show activity between 0645 and 0730z and between 1130 and 1200z on 20 meters (14260 kHz). Also, check 15 meters (21260 kHz) around 2330z. His operations will be on CW and SSB. QSL via VK4EJ.

SA-018. CE6TBN, Editor de TBNoticias, will be active from Quinchao Island between August 27-31st. Operations will be on 20/17/15/12/10 meters CW/SSB/RTTY. QSL via CE6TC or CE6TBN, Box 1234, Temuco, Chile. For more details, check the Web site: http://www.qsl.net/ce6tbn

J3, GRENADA. The "DX News Letter" reports that Bill, J3/G0STR, is active working QRP CW on 7030 and 14060 kHz from 0000-0500z until August 25th. QSL via G0STR.

LIGHTHOUSE/LIGHTSHIP ACTIVITY NEXT WEEKEND (August 21-22nd). Over 1200 stations and over 150 lighthouses/lightships will be active. QSL info is on page 93 of August's QST and details of the event are on page 91. Also, more information about the International Lighthouse Weekend can be found at: http://www.waterw.com/~weidner/ld.htm

Look for ZW7ZZ to be active on 80-10 meters, CW/SSB, from the Natal Lighthouse in Natal City, Brazil (Grid HI24jf - DFB RN 07). QSL via the bureau, or PS7ZZ, Francisco de Freitas, Av. Sao Miguel dos Caribes 31, Conj. Jiqu0, 59086-500, Natal/RN/Brasil.

The NATAL DX GROUP will be operating from the Farol do Calcanhar, in Touros, RN, Brazil, commemorating the International Lighthouse Weekend. The callsign for the weekend will be ZW7FC. You are invited to contact them on SSB and CW. Operators will be: Karl/PS7KM, Joao/PS7KT and Janduir/PS7BX. QSL info: PS7KM, via bureau or direct via CBA.

UPDATE! The Florida DXPedition Group will be operating from the Amelia Island Lighthouse as W4A. The operations will be conducted from 0001z, August 21st to 2359z August 22nd. Club members will be operating SSB, CW, and RTTY during the Amelia Island Lighthouse event. QSL via N5VL (bureau or direct) for this event. Please include a SASE or sufficient funds for postage if you QSL direct!

Look for Jim Weidner, K2JXW, to be active as W2L aboard the "Sandy Claws" at Thimble Shoals Light, Chesapeake Bay. He will be operating mostly on 14265 and 7265 kHz.

As part of Lighthouse/Lightship Activity Weekend, members of the Great South Bay ARC, Islip ARES Group and Suffolk County Radio Club will operate from Fire Island Lighthouse, Fire Island National Seashore in New York, ref #670, IOTA NA-026, USIA NY-013-S, signing W2GSB/Light-house. This operation is dedicated to the memory of Rich Tygar, AC2P <SK>. QSL direct to W2GSB, PO Box 1356, West Babylon, NY 11704. SASE Please. Additional information can be found on the Web Page: http://www.gsbarc.org/FI0899.htm

Look for the following Polish lighthouses stations (in order from Poland's west to east coast) during International Lighthouse Weekend.

Name of lighthouse	Callsign	QRA loc	QSL to
1 Swinoujscie	SP5PB/1	JO73DW	SP5PB
2 Kikut	SN6F/1	JO73GX	SP6ECA
3 Niechorze	SP1EUS/1	JO74MC	

4 Kolobrzeg SP1KYB/1 JO74SE
5 Gaski SQ1DNJ/1 JO84EK
6 Jaroslawiec SP1KIZ/p JO84GM
7 Ustka SP1JX/p JO84KO
8 Czolpino SP2POL/p JO84OR
9 Krynica Morska SN2KM JO94RJ SP2BIK
10 Stilo SP1ZZ/p JO84US
*** Actvities are expected from other Polish Lighthouses in Darlowo, Rozewie, Jastarnia, Hel and Gdansk Port Polnocny, but there is no detailed info at the moment. Look for SP stations with callsigns SP1.../p, SP2.../p, .../1 or .../2 working this weekend.

TF1IRA will be active during this special weekend August 21-23rd. The operators will operate from a lighthouse on the south coast of Iceland near Stokkseyri. The name of the Lighthouse is: Knarrarosviti (viti lighthouse). The location is: 63,49,25 N and 20,58,34 W. QSL is via TF bureau.

PJ9, CURACAO (Ops Needed). Geoff, W0CG, Coordinator, reports that operators are needed for a plan mid-profile, Field Day style operation from Curacao, operating as PJ9CW, for the CQ WW SSB Contest, October 29-31st. The planned category is Multi/Single, but this is negotiable depending on how many operators they can sign up. Operations will be from the Kadushi Cliffs Resort, a beautiful luxury vacation spot on the northwest tip of the island. Geoff states, "PLEASE SIGN ON VERY SOON, AS I NEED TO FINALIZE THE VILLA BOOKINGS WITH THE MANAGER." If interested, view/visit the following WEB site (All the information is there, including photos of the operating location): http://asgard.kent.edu/ccc/pj9cw

QSL INFO AND NEWS.....
TOM, G0PSE, reports that IOTA EU011 logs of GB0SM (July 22-29th, 1999) and G5M (July 24-25, 1999) are now available at: http://dx.qsl.net/logs

QSL EW52BO (1/05-12/05/97) via the bureau (before October, 1999). To receive a QSL from EW52BO after October 1999, please send QSL to EW2EO direct only + SASE.

RARE/NEW IOTA'S TO BE ACTIVATED (Update, Please Refer to OPDX.421). Stuie, VK8NSB, reports that this week things are on track for the November operations to Melville Island (OC-173) and Croker Island (New IOTA). Two new operators have been added (Zoli/HA1AG and Allan/VK2NNN) to the team of Stuie/VK8NSB and Peter/VK8PDG. The team will operate 6 days on each island. They plan to have 4 HF stations active, 2 on 24 hours, on CW/SSB/RTTY/SSTV. Plans are in the works (hopefully) to be online with a chat line open for amateurs around the world to speak to the children on both islands. OPDX InterNet Subscribers will receive Stuie's complete press release as an additional bulletin. Also, please visit the following Web page for more details: http://www.rustman.com/IOTA/

T31 & ZK3, CENTRAL KIRIBATI AND TOKELAU (Update). The planned operations by Mats/SM7PKK and Nils/SM6CAS is continuing to progress. The announcement of operators now include Erik/SM0AGD, Steve/G4EDG, Ulrika/SM6WYN (YL) and

Lech/LA7MFA. The scheduled DXpeditions are slated for Central Kiribati between September 23rd and October 3rd and for Tokelau from October 7-12th. The callsigns to be used will be T31T, T31K, T31YL, ZK3DX, ZK3CW and ZK3YL.

T8, PALAU. Hiroo, JA1WSX, will be traveling here for a summertime vacation, but indicates that he will have time to operate. He will be active here August 13-18th. His callsign will be T88WX. Operations will be mostly 17 and 12 meters using a beam antenna with 500 watt amp. There will also be some 6 meters operations. QSL to his home callsign JA1WSX (OK in American call book).

V2, ANTIGUA & BARBUDA (An excerpt from a press release, but all OPDX InterNet Subscribers will receive the complete release as an additional bulletin). Team Antigua will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the upcoming CQWW SSB Contest on October 30-31th. Their plans are to enter the contest as a Multioperator/ Multi-transmitter catagory. Members of Team Antigua will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility of some 6 meter and Satellite operations with conditions permitting. The following is a list of members of Team Antigua and their Callsigns:

V26A Dale, N3BNA QSL via WB3DNA Special certificates
V26AK Tony, N2TK QSL via N2TK and "Top Gun" plaque
V26B Sam, WT3Q QSL via WT3Q will be available for
V26DX Doug, W3CF QSL via KU9C working V26B during
V26E Darrell, AB2E QSL via AB2E the contest. For more
V26J Jay, WX0B QSL via WX0B details, visit Team
V26O Bob, N5NJ QSL via N5NJ Antigua V26B Web site at:
V26OC Brian, N3OC QSL via N3OC http://www.frc-contest.org
V26R Mike, KA2AEV QSL via KA2AEV
V26SZ Sharon, KM5SZ QSL via KM5SZ
V26TZ Tom, ZP5AZL QSL via W3HNK
V26U Bill, W2UDT QSL via W2UDT
V26YR John, W2YR QSL via W2YR

XX9, MACAU. Just a quick reminder. Look for Ed, K8EP, to be active later this week as XX9TEP from August 18-23rd. Operations will be on CW/SSB on 80-10 meters. QSL via K8EP.

Broadcast and your telegraphy are two completely separate licenses. You needed the telegraphy ticket to operate on a ship but the chief engineer for WABC in NYC never needed one for his broadcasting.

Well that is not going to get them to the experiment organisers. The RSGB
is not responsible for the analysis, as far as I am aware.

Which experiment organisers? These were done, ad hoc, by interested
enthusiasts, including me.

Perhaps you had better try and stay in touch then. There were several
organised experiments in the UK, many were noted on the eclipse web site and
in various journals, newspapers and via the media.

I am the manager for the standalone call 'VP2E' for QSOs in 1980-81-82 ONLY.

I don't believe that the standalone call 'VP2E' has been issued in at
least 10 years, although they are always free to do so. Visitors often use
calls of the form 'K8ND/VP2E' of 'VP2E/K8ND', and it seems many folks don't
log the complete call, reducing it to only 'VP2E'..

I still have cards for the 1980-81-82 operations of VP2E.

I know of the University one via the RA. Nothing in the Times,
Telegraph, Guardian, Observer or Independent. Nor in pubs from the IEE.

Every commercial radio-telegraph shore station did in fact conduct
broadcasts, including weather and traffic lists. (See the FCC's
definition of "broadcast" -- I believe Part 1 or Part 2 contains
all telecommunication definitions.)

Message-ID: <7pb5ivgtv1@news.hawaii.edu>
Source record: 24115
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Sorry, club stations in Germany are using prefix DB ... not DP
The prefix DP shows a so called "special call sign"

2420. what is RCD

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-17 00:00:00 UTC
From: Paul Denby <pdenby@npiec.on.ca>
Message-ID: <7pcn6dujr1@brain.npiec.on.ca>
Source record: 24122

Is RCD a British abbreviation for schematic diagram? It is used in the last line of this ham poem.....

This is the tale of one poor ham
His valves have long gone cold
Transistors in their place he put
So this tale comes to be told.

He found out which way round they went
And then gently soldered in
Coils and caps they followed next
Then power leads and a DIN.

Aerial, and homebrew PSU
Were duly put to work.
Eagerly he donned the "cans"
He really was a burke!

On went the switch with such aplomb
"What would he hear" I wonder
A bang ensued as sad to say
His brain it blew asunder.

His friends all mourned their old pals fate
When his demise they came to see
"So sad" said all when all is said
That he`d ne`er heard of an RCD!

The DT on Wed 28 July had a full-page (p20) article about the
experiment; most of the same material was included in the DT on
the day of the eclipse. It includes details of who to send your
observation results to at the RA; the closing date for
submissions is 18 August.

Cross-posted to: alt.dx.tropical,alt.ham-radio.dxing,rec.radio.amateur.dx,rec.radio.shortwave

I'm moving to a new apartment. I need these items, but I want to get one that also does AM Dxing. Is there such a thing? I've seen clock radios w/ AM? wire hanging out the back of it, can I strip the insulation of this and/or make it longer?

Also how does one make an antenna loop, i read one about a 20" square wood frame w/ so many turns of wire and a variable cap in the picofarad range but don't know how the exact value or how the cap connects to the wire or how far apart the winds of wire, or if I need to put a mini plug at the end of the wire, etc.

Thanks for your help!

Hello everybody,

It is real a club station in Germany, but a special one! It can be seen
as an exteritorial area...

DP0EPO is the club station of the E uropean P atent O ffice, which is
located in Munich. Due to the special status they are using the
DP-Prefix!

For some reason, in the U.S. we call them "Ground Fault Interrupters",
or GFIs.

Are you not having a good time? I'm hearing DL's on
15 and 20 just booming into the US; are you not getting
good conditions? I worked VK on 10 meters the other
day; I hear ZL regularly on 15 at night--seems great!

In fact, I've heard (from the eastern coast of the US)
more Indonesians in the last 2 weeks than in YEARS.
I just counted earlier today; I've worked 17 new countries
in the 6 weeks since I put up a new delta-loop at my new
house. Conditions seem good to me, OM. I'll keep my
fingers crossed for you! ;-) 73!

> and/or make it longer?

None that are particularly good. But you should be able to hear some interesting stations. Consider *ONLY* units with digital tuning. (the analog-tuned ones usually have such small dials that you'll have no idea what frequency you're tuned to!) Test them in the store -- see how much "splashover" you hear when tuned to the adjacent channels to strong local stations. (for example, if you're in Nashville, tune to 640 and 660 and see how much splash you hear from 50,000 watt WSM on 650)

The wire coming out of the back of a clock radio is usually for FM; extending it may well help FM reception but usually won't do anything for AM. The AM antenna is usually an internal "loopstick". (a dark grey thing wrapped with very fine wire) You could wrap a few turns (20-30?) of some other wire around the loopstick and connect the other end to a long wire antenna.

It would probably be more effective to try to find a unit that has a connection for an external AM antenna.

> Also how does one make an antenna loop, i read one about a 20" square
> wood frame w/ so many turns of wire and a variable cap in the picofarad
> range but don't know how the exact value or how the cap connects to the
> wire or how far apart the winds of wire, or if I need to put a mini plug
> at the end of the wire, etc.

The cap is probably 365pF maximum. Antique Electronic Supply in Tempe, Arizona carries them, they're also available used at many hamfests, or you can take one out of an old tube AM radio. The exact value isn't critical, anything from about 300-500pF should work fine. (even further off will work but you won't be able to tune the whole AM band)

Usually (I haven't seen the specific design you're referring to) the "biggest" winding (I mean, the one with the most turns) connects to the cap. There's a little "tab" coming out of the side of the cap; that's one terminal, and connects to one end of the winding. The frame of the cap is the other terminal, and connects to the other end of the winding. It can just be held down by a screw. Usually, there's then a second small winding with just a few turns. A short piece of shielded wire (like you might use to connect a cassette deck to a stereo amplifier) is connected to this winding, with one end of the winding to the outer shield and the other end of the winding to the center

conductor. The other end of the shielded wire goes to the AM antenna terminals of your radio -- if the radio only has one AM antenna terminal, the center conductor goes there and the shield to the radio's chassis.

2450. Maps, DX, Swap, and Free Pages. Ham Radio!

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-21 00:00:00 UTC
From: nw7us@hfradio.removethisherepart.org
Message-ID: <37bea1ec.33651999@news.olypen.com>
Source record: 23902
Cross-posted to: rec.radio,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.packet

I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

2459. FS:QST Back Issues $1.00ea.

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-22 00:00:00 UTC
From: Andrew <xandrew@tropicom.net>
Message-ID: <37C0340A.80BCADB3@tropicom.net>
Source record: 23911
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.space

I am clearing out the ham shack of all my QST magazines once again. If anyone is interested, I am selling 1992-1998 at $1.00 ea. (you pay shipping costs however you want them shipped) for 1 to 10 issues. If you are interested in over 10 issues or the entire collection, make me an offer. I am willing to ship anywhere on this planet so long as you are willing to pay the actual shipping costs.

Here are the issues that I have:

QST

1992 Jan - April $1.00 ea.
1993 Jan - Dec $1.00 ea.
1994 Jan - Dec $1.00 ea.
1995 Jan - Dec $1.00 ea.
1996 Jan - Dec $1.00 ea.
1997 Jan - Dec $1.00 ea.
1998 Jan - Dec $1.00 ea.
1999 Jan - Current $2.50 ea.

All the issues are in perfect condition with no ripped pages or covers. Sorry I don't have anymore, but the last time I did this in 1993, I sold all my 1989 through my 1992 issues less a few months still available.

SB DX @ WW $OPDX.423
Ohio/Penn DX Bulletin No. 423

The Ohio/Penn DX PacketCluster
DX Bulletin No. 423
BID: $OPDX.423
August 23, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, NG3K, N6FF, N6RT, WD8SDL, DJ5AV & DX News Letter, EA4DX, DL5NAM, HK6DOS, LA7MFA, OZ8AE, PT7WA, RA3SL, SV1IW, SV2CWY, VK4AAR, VK4NM, VK8NSB and ZD8V for the following DX information.

OHIO SPECIAL EVENT/ACTIVITES......
AMATEUR RADIO DAY AT THE ZOO. Look for special event stations to be activated from the "Cleveland Metroparks Zoo (K8ZOO) and the RainForest (K8CRF)" by several local clubs on August 28th (9 a.m. - 7 p.m.). This day is to promote amateur radio and give the families of amateur radio operators around the world a fun day at the Cleveland Metroparks Zoo and RainForest. Discounted vouchers will be available for all amateur radio operators and families. Check-in frequency will be the NODXA 147.36 repeater. For more information, contact Dwaine, K8ME, at 216-676-7996.

OHIO QSO PARTY. Many Ohio amateurs will participate in the Ohio QSO Party to be held August 28th. The Mad River Radio Club has assumed sponsorship of the OQP with the assistance and support of the Cuyahoga Falls Amateur Radio Club and the Buckeye Belles, who had sponsored the contests in previous years. The major change in the OQP rules is that the contest will now be a twelve hour event. The first OQP under MRRC sponsorship will be Saturday, August 28, 1999, from noon to midnight local (EDT) time. Complete details of the event will be sent to all OPDX InterNet Subscribers as an additional bulletin. The full rules for the OQP may be found at the MRRC Web Page at:
http://www.qsl.net/mrrc/oqp.html
Also, an abbreviated set is listed in August, 1999, QST, on page 92.

3X, GUINEA (Another interesting callsign!). Look for Karel, ON4QY, to sign 3XY2A from Conakry for the next few years. Karel was spotted this past week on 21275 kHz between 1630 and 1930z. QSL via ON4QY.

5H, TANZANIA. Wayne/K8LEE and Roger/WD8SDL will be active from Dar es Salaam, October 19th through November 2nd, as 5H3/homecall. They will also be active as a Multi/Single entry in the CQWW SSB Contest teaming up with Dave Heil and using the callsign 5H3US. QSL via home call and 5H3US via WA8JOC.

9L, SIERRA LEONE. The "DX News Letter" reports that Jacky, F2CW/ZL3CW, is here and hopes to receive a licence for the next three months.

FO, CLIPPERTON ISLAND (To be activated in the year 2000). John, N7CQQ, and The N7CQQ Amateur Radio Club report in a press release that they have finalized plans for their expedition to the Clipperton Island scheduled for February 26, 2000 through March 15, 2000. They will be aboard the motor vessel Shogun from San Diego, California. Their goal is to provide as many European and other stations with a new country on as many band modes as possible. The last operation to Clipperton Island was in 1992 (FO0CI). Transportation is limited and very expensive going to the island. Also, difficult but not impossible to obtain the license and landing permit, but the team has them in hand. They plan to operate from two locations each having 3 stations. Each operating location will have specialized mode/band capability to enhance the CW or SSB operation. Those specialties will cover RTTY, Satellite, 6 meters and 160 meters. Some of the operators who have expressed a desire to go are: Peter/ON6TT, Charlie/W6KK, Mike/N9NS, Al/K3VN, Vincent/G0LMX, James/ 9V1YC, Jacques/ZL3CW(F2CW), Arie/PA3DUU, Werner/HB9US, Ron/W6OM (N6VO), Ruech/HB9AHL, Stan/FO5IW, Bill/N2WB, Ralph/K0IR, Michael/N6MZ, Bob/K4UEE, Koji/JK7TKE and their host John/N7CQQ. This operation will need financial assistance due to the high costs. If you would like to help offset costs, donations can be sent to: N7CQQ Amateur Radio Club, Inc., P.O. Box 81, Searchlight, Nevada 89046 (ACCOUNT: 4961527327 Bank of America). They will have a CLIPPERTON ISLAND Web Site to provide updated information as the operation progresses. This site is made possible by the endless efforts of Doug, N6RT. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

FO0, AUSTRAL ISLANDS. "The 59(9) DXReport" reports that JK1TKE will be active October 14-24th from Tubuai Island. Activity will be on HF and 6 Meters. No callsign was given.

IOTA NEWS.....
NEW IOTA! Look for Dan/VK8AN and Peter/VK8PW (ex-VE8PW) to activate South Goulburn Island located in the Northern Territory, Arafura Sea Coast Central Group, August 27-29th. The Coordinates are: 11' 40'' S and 133' 25'' E. No IOTA reference number has been assigned yet. Dan will use an IC-706 and Peter an IC-735. Antennas will be a Cushcraft R-5 for 10/12/15/17/20 and a dipole for 20m as a back up. They will use their own calls/p, and each has their own QSL arrangements. VK8AN/p is as usual via VK4AAR (direct only) POB 421, Gatton 4343, Australia. VK8PW/p is to his home: Peter Wollenberg, Box 2142, Darwin 0801, Australia (or to VE8RZ via Canadian bureau. DO NOT QSL EITHER STATION

VIA THE VK BUREAU).

EU-133. Serge/UA1ANA/1 and Slawa/RA1ACJ will be active from Moshnyj Island (RR-01-03, new for the RRC Islands program) now until August 28th. They will use two IC-706MKII, R7000, and a 10 element beam on 2 meters.

NA-201. Look for T46AA and T46CW to be on the air August 26-30th, from Key Breton. Six Cuban operators will be active during 58 hours on SSB and CW simultaneously on the 10/15/20/40/80 meters. This DXpedition could be postponed until next month in case of bad climate conditions. QSL via C02FRC.

SA-046. A group of Brazilian hams will operate from the island of Santo Aleixo (DIB PE-03 for the Brazilian Islands Award). The operation will be on all HF bands (CW and SSB) from September 3-12th. The special callsign ZV7G will be used by the following operators: PT7AA (Tino CW op.), PY5APL (Paulo), PY7DDJ (Wallace), PY7HH (Hermes), PY7MEU (Eglaube), PY7RNE (Lineu) and PY7XC (Jim CW op.). QSL via PY7MEU (Eglaube Rocha, P.O. Box 322, 50001-970 RECIFE-PE). Via the Bureau is OK!

KH3, JOHNSTON ISLAND. Bill, NH6D, will be back on Johnston Island August 24-27th. Bill currently does not know what damage hurricane Dora did to the antenna or the ham shack. The shack is very old and has numerous entries for possible water damage. Bill will attempt to operate on all bands, and he is hoping to be able to load up on 12/17/40/80/160 meters this trip. Dick, N6FF, hopes to post the logs daily if there is reliable Internet access from KH3.

LX, LUXEMBOURG. Look for a group of DL operators and Luxemburg operators who will sign LX0RL from the LX IARU Society in Eisenborn between August 28th-September 3rd. QSL via DL4FCH (only for this operation). All QSOs will be answered automatically via bureau, but if you want to send direct, QSLs to: Peter Niksch, Saalburgstr. 4, D-60385 Frankfurt, Germany.

OX, GREENLAND. Joergen, OZ8AE, will sign OX/OZ8AE and be active from Groennedal near Ivigtut in the southern part of Greenland (NA-018) from September 4th - October 5th. Activity will be on all bands CW. He will take part in the SAC Contest (CW) on September 18th 1200z-September 19th 1200z (Please note NEW operating hours this year. For details, check the Web site http://www.sk3bg.se/contest/). Joergen might also be active on the SSB section of the SAC Contest on September 25th 1200-September 26th 1200z. QSL to OZ8AE direct or via the bureau.

PZ, SURINAME. Bob, K3BYV, now signing as PZ5DX until (at least) January, 2000, was very active this past week. His activity was mainly on 15 and 10 meters SSB 1430 and 1800z. Check 28420 (and up) and 21355 kHz. He has also been heard on 20 and 12 meters after 2100z. QSL via K3BYV.

QSL INFO AND NEWS.....
QSL J41LH via SV3AGQ. This station was on during last weekend's

Lighthouse/Lightship activity. This Lighthouse is situated at Cape Melagavi (38 01'49'' N 22 51'00'' E, KM18KA).

Mario, DJ2MX, is now QSL manager for following stations: T94DX, T94MZ, T94DO, T92T, T95LYS and VK4SK. QSLs are OK via DL bureau or direct to: Mario Lovric, Am Oelberg 11, Bad Nauhein 61231 - Germany. QSLs can be requested online at: http://www.qsl.net/dj2mx

Doug, N6RT, reports that the following new logs are now online at: http://dx.qsl.net/logs
JW/DF6VI (August 1999) TM0AIN (thru June 1999)
KH3/NH6D (thru August 13, 1999) KH2/N2NL (thru July 27, 1999)
9K2HN (thru August 11, 1999) G5M and GB0SM (IOTA EU-011, July 1999)
JW/DL4OCM (August 1999)

QSL SV2AEL/8 (Op Savas) for the July/August DXpedition to Ithaki Island (IOTA EU-052) to SV2AEL home callsign.

Nello, IK2DUW, reports that he is now the new QSL Manager of the following stations: 3W6LI (Hau), 3W6KA (Hoang), EK6LV (Sem), BA4RE (Yee), RU0LL and RU0LL/p (Alex's IOTA AS-066 DXpedition July 30th-August 1st 1999).

RARE/NEW IOTAS TO BE ACTIVATED (Update, Please Refer to OPDX.421). Stuie, VK8NSB, Team Leader, reports at the present no callsigns are confirmed, but they hope to have VK8MI for Melville Island and VK8CI for Croker Island. A QSL Manager is not set at the moment.

SV, GREECE. Stathis, SV1DKL, reports that he will be in the 1999 CQWW SSB Contest in October from a super DX/Contest site located about 1975 meters high on top of a mountain. He plans on running Single Op/All Bands/Low Power, using solar cells. He has already made accomodations for his antenna setups which include the following: 2 X FD-4 Windoms, Full Diploe for 160m, a 100m long wire and hundreds of 10-50 meters radials. He wants to be in or ranked in the first 10 of Europe's SOAB Low Power Category.

T2, TUVALU (Also 3D2/FiJi). Just a quick reminder! (Please, refer to OPDX.411) Look for Roberto, EA4DX, to be active from Funafuti (OC-015), Tuvalu, beginning August 26th through September 12th. His callsign will be received upon his arrival. Later, he will operate as 3D2DX from Viti Levu (Fiji, IOTA OC-016) from September 13-16th. Activity on both islands should be 80-10 meters SSB. Suggested frequencies: 3795-3799, 7042-7045, 14195, 18135, 21295, 24945 and 28395 kHz. QSL via EA4CP. A log search will be available after his return at the URL: http://www.qsl.net/ea4dx/

T31 & ZK3, CENTRAL KIRIBATI AND TOKELAU (More info!). Lech, LA7MFA, informs OPDX that he is pleased to announce the official Home Page of the 1999 "Double Trouble" Pacific DXpedition to Kanton and Tokelau Islands. The address of their Web page is: http://www.qsl.net/t31t
Lech has been appointed the Web page administrator, and he states that the page is still in its early stagies, but they are working on it. He also mentions that you can also contact them by sending an E-mail to: t31t@qsl.net

VP2M, MONTSERRAT. A group of members from the Bavarian Contest Club (BCC) will activate VP2M (NA-108) from October 25th through November 9th. Activity will be on all bands from 160-6 meters on SSB. Upon request, operators Chris/DL5NAM (Team Leader), Uwe/DL9NDS and KLaus DL7NFK will do CW or RTTY/Pactor. QSL direct via CBA of DL5NAM.

VU7, LAKSHADWEEP ISLAND. Bad News. The planned operation from the Lakshadweep Islands (formerly known as the Laccadive Islands) which was to be active in the fall of this year, has now been postponed until March 2000. The reason for the postponement of the DXpedition is due to some of the final approvals and personal schedules.

ZD8, ASCENSION ISLAND. Paul, ZD8V (KF4OOX), was active this past week on 14247 kHz between 0100 and 0300z. Paul informed OPDX that he will be leaving the island and going on vacation September 8-13th. He should be back on Ascension September 14th. Paul mentions he will be attending the Melbourne (FL) Hamfest on September 11-12th while stateside.

www.dxbands.com - News Digest, 22 August 1999

Lighthouse Weekend

Lots of lighthouses active this weekend on 20m, some with amazing signals.
After all - most lighthouses are quite tall for the antennas!! Good fun
weekend was being had by all those I heard.

In the News

News this week, includes details of a new expedition to Clipperton Islands
(FO0X, IoTA NA-011). For information, see www.dxbands.com/news139.htm

Operations Active Now Include:

P29 - Paula New Guinea - until Aug 31
FK - New Caledonia - until Sept 5
EA - Cies Island - until Aug 30
RI1 - Zelenyy & Lovestskiy Islands - until Aug 27
VP2E - Anguilla - until Aug 25
SV8 - Greek islands - until Aug 31
ID9 - Vulcano island - until Sept 4
UA - Moshchnyy Island - until Aug 28

Operations Starting This Week include:

3A - Monaco
ER2 - Moldova
UA - Various UA Islands
SM - Gotland island (24 Aug only)
T46 - Key Breton
S79 - Mahe, Seychelles
TF - Iceland
T2 - Tuvalu
CE6 - Quinchao Island
JH1 - Sado Island
9M2 - Redand Island
LX - Luxembourg
C56 - Gambia
DJ - Fehmarn Islands
IA5 - Giglio Islands

In all cases above, detailed information can be found at
www.dxbands.com/dxep0899.htm

NEW NEWSLETTER

From this week, dxbands.com is adding the IIA & ILIA Bulletin from the Crazy DX Group. This newsletter covers activity from Italian Islands and other special activity from Italy.

Visit the home page at www.dxbands.com for the link to the current issue.

The End Bit

Thanks for the comments on both this informal newsletter and on the information we carry on the www.dxbands.com site.

Please do help us to increase the number of people who use the site, by giving details to your local club for its newsletter and/or web site.

Until next time.....

Best wishes

You must be in a spacetime warp. Overall conditions have sucked lately.
Right now I'm tuning 20 and 15 meters CW (1300Z, 23 Aug) and I only hear 1
station on 20 - a VK whose CW is so poor no one can make out his
callsign. Nothing at all on 15.

Maybe I can work some AU on 2 mtr CW.

73, Zack W9SZ

2473. Kenwood Nut Tools Almost Gone

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-24 00:00:00 UTC
From: DontDoIt@ImNotHere.com
Message-ID: <37c374e8.524068@news.mv.com>
Source record: 23925
Cross-posted to: rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi all;

The next (and last) batch of Kenwood "Nut Tools" has finally arrived. To those who've waited for me to ship yours, they are all going out TODAY, 8/24. Thank you for your patience!

I now have 3 final tools available for sale, and once they're gone, that's it, I'm going to call it quits.

So, for those of you who have a Kenwood or other rig that you've been trying to remove the silly round nut from the microphone jack, and want a better way than paying a Kenwood repair facility to do it for you, here's your last chance to get the right tool (from me, anyway).

Even if you DON'T need to remove it today, if your rig has a lithium battery inside the front panel, take my word for it, you WILL need to remove this nut eventually. If you're lucky, it won't be jack-hammer tight, and you can turn it (carefully!) with the tips of a needle-nose plier. Otherwise, you'll need this tool.

The deal: For $34 (money order or cashier's check, no cash please) I'll ship you your very own nut tool, to keep, to cherish, TO SHARE!!! If you don't like it, return it unharmed and I'll refund your money, less freight.

That's the best deal I got, and I ain't gonna get rich on this one, I do it simply to stick-it to the "establishment" that wants to charge upwards of $90 to loosen a nut. It's my hope that you will SHARE the tool with your fellow hams. To someone who finds themself (as I did) with a rig that has "lost its memory" and has a nut that's been tightened by a gorilla, you'll be an absolute HERO!

If you're interested you can contact me via mail, email, or phone:

Neil Rosenberg, N1DMA
NeilR@innermedia.com
60 Plain Road
Hollis, NH 03049
(603) 465-2788

The supply is VERY limited, and there are no more after this batch is gone, so act soon. Be sure to check with me before sending any money, to make sure I haven't run out!
==========
The fine print:

I have in my posession a tool that is positively brilliant at loosening/removing/tightening those annoying circular "nuts" that you'll find on various Kenwood rigs. Yes, you know the ones I mean, the ones that no amount of coaxing with the tip of a screwdriver will budge. I've been told (but haven't confirmed) that the same nuts are found on many Icom, Yaesu and other rigs.

Why on earth would you want to remove this nut, you ask? Well for most of the affected Kenwood rigs, it's the ONLY way to get to things like digital front panels, lithium batteries, and so on.

You can see a photo of the tool at:

http://www.mv.com/ipusers/innermedia/kenwood/spanner.jpg

Disclaimer:

I make absolutely NO warranty as to the applicability, performance, or safety involved in using the tool I send to you. If you damage your rig, or yourself, that is totally your responsibility. If you void your warranty, that's also your problem. THINK BEFORE YOU ACT!

If the tool is not as I described it, if you chicken out, or if it doesn't fit your rig, contact me, and I'll refund your entire price (less my UPS cost) as soon as the tool is returned to me undamaged. In other words, treat me fairly, and I'll return the same.

Neil, N1DMA

2474. Pictures of Kenwood Rigs

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-24 00:00:00 UTC
From: DontDoIt@ImNotHere.com
Message-ID: <37c38b60.6277523@news.mv.com>
Source record: 23926
Cross-posted to: rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.shortwave

To those who've not visited my Kenwood Pix site, here's the scoop:

(Ages ago) I was shopping for a used Kenwood rig, and didn't have a clue what an 850 versus a 440 versus etc. looked like, and Kenwood "ain't tellin". They only list information on their newest rigs.

So, I started a collection of pictures of many of their "classic" rigs, and put it up on a web site for all to use. It's still there, and you are all welcomed to visit. It's strictly not-for-profit.

The site address is:

http://www.firstname.com/kenwood

And, if you've got a better picture than one I've put up, or a picture of a rig that I don't have, please email it to me and I'll place it on the site.

Best regards;

Neil, N1DMA
NeilR@innermedia.com

Stupid question: Why didn't you stay on the frequency for a
couple more minutes? They gave their QSL-info frequently enough
to catch it, if one wanted to. Or even (GASP!) call them only
once you have heard both the call and the QSL-info?

There are no stupid questions, just stupid answers. I believe this falls in the latter category.

2479. Solar-terrestial e-reports - Propagation Aid

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-24 00:00:00 UTC
From: nw7us@hfradio.removethisherepart.org
Message-ID: <37c2e196.129448085@news.olypen.com>
Source record: 23931
Cross-posted to: rec.radio,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.packet

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

http://www.qth.com/ and it's links.
arrl.org index of old articles.

Dig enough in these and you'll find mods, I did, but haven't done any.
The one for LF coverage was tempting, but too much noise here.

>
> -troubleshooting or problems you managed to solve on your own.

I blew the ts430s driver transistors, and replaced them.
I'd overdriven them while tuning.

Hi All,
thank you for reading this NON COMMERCIAL message.

I'm looking for info about TS 440 S like follows:

-mods and improvements you have personally experienced or heard about;

-troubleshooting or problems you managed to solve on your own.

All this info will help me to create a web page about ts-440s .
Please help me to make this site as complete as possible.

The site will be free access and the information will NOT be used for
commercial porpouses but only for electronic experimentation.

Please, if you have some info, just send me an e-mail to :
dcl@ascu.unian.it.
Just send me a short summary of what you experinced. I'll chech this info
and, if what you sent is something new, I'll beg you to send me the
complete description of your experince. This procedure avoids to have a
lot of articles dealing with the same matter.

Thank you and 73.

I worked Jim, VK9NS on 20m last night. The path was very poor and whilst I copies my call and report OK, Jim asked where I was and when I told him asked for my 'phone number - I think he said he was going to be visitng Wales soon but the path faded and I never got the end of the QSO.

I'd like to try and contact Jim again to find out what his plans are so if anyone has a phone number or EMAIL address for him, could you please let me know.

Listed below are some RF related jobs, perhaps of interest to qualified amateurs, pulled from our corporate job postings. For further info on these and other engineering positions, point your browser to:

http://adc.com/Corp/Jobs/index.html

Job 1456 - Engineer I
BSEE with emphasis in RF hardware technology and design. Zero to two years of RF hardware related work experience. Telecommunications industry experience preferred.

Job 1406 - Engineer II
Two to five yearsin RF design, board layout, test and production transition. BSEE or MSEE. Experience in telecommunications industry a plus.

Job 1407 - Technician III
Two years experience in electronic test, SMT rework and RF test. Two year electronics degree from a technical college or equivalent training and experience required.

Job 1358 - Manufacturing Engineer
Qualifications include a BS degree in an engineering related field, plus a minimum of two years experience with wireless or RF technology.

Job 893 - RF Mechanical engineer
This individual will research, plan, and design large specialized mechanical substations and base stations for radio frequency filters, duplexers, and amplifiers. In addition to performing all mechanical engineering functions for the development of these stations, including developeent of models using advanced software, evaluation and resolution of design and production problems. A bachelors of science degree in mechanical engineering and RF mechanical design experience is required to become one of our team members.

I just replaced the lithium battery in my TS-440. This is a CR-2032 3 Volt coin cell and is available in horizontal PC mount configuration from Mouser electronics for $1.43. Actually what I did was to use the slightly larger CR-2450 (available from Wal Mart) and soldered in the matching button cell battery holder. This was a good match to the battery leads extending up out of the CONTROL ckt board. There is a metal shield covering the CONTROL board which allowed sufficient clearance for the CR-2450 and socket. But to be safe, I applied a couple strips of black tape to the shield to guard against accidental shorts to the battery.

The most time consuming portion of the project was simply to find the location of the battery. The service manual didn't address battery replacement. The instruction manual suggests having the battery replaced at a service center. However it did have an unidentified sketch of the battery on page 29 where it discusses installation of the IC-10 interface kit. The procedure to access the battery is given on the same page under 6-3-1. Installation, which explains how to open up the front panel. Replacement is fairly straight forward and afterwards, reset the CPU by pressing A=B along with the POWER ON switch. The rig should then power up on 14.000 MHz.

As a TS-440 owner, I'd be supportive of a site that documents problems and solutions. I do have the service manual but it's written on the assumption one has already attended a course in theory and repair :-(

Hi,

I've just been listening to a GM3 portable station, operating on 40m from Flannon Island, Scotland, EU118. Quite a rare IOTA island. Full marks to the two amateurs who carried 150kg of gear across the island, and activated the island, and (if either read this) compliments on the strength of the signal. I was going to call until I heard the following:-

One of the operators, when asked by a PA1 about the non-appearance of a QSL card from a former contact (same station, different island) stated that he never QSLd cards received via the bureau. Only cards received direct with a SAE would be confirmed.

The reason given was that the last batch of cards from the bureau numbered several thousand, and he felt that many of them were simply automatically-generated cards, where the sender did not really want the island confirmed for any particular reason (award), but where the computer log program spat out a card automatically. He went on to say that anyone who was *really* keen to confirm a contact with EU118 would not baulk at the cost of QSL-ing direct and sending an SAE, and (if you wished) also some small contribution towards the costs of the dxpedition.

Now, I can understand the impression that many QSLs sent via a bureau are not for the purpose of chasing an award, and I can accept there is a cost in both time and money to the dxpedition operator in checking the contact, and filling out a return card.

However, if this practise were to be adopted by all dxpeditions, there would be a significant increase in the cost to the anyone trying to collect confirmation cards for awards.

And, besides, I was taught to believe that the exchange of QSLs was the "final" courtesy following a QSO. In which case, in IMHO, the refusal to acknowledge QSLs received via bureau was therefore out of order. I would add that the chap in question said he was a member of the RSGB, and therefore does have the facility for sending cards via bureau available.

Is this commonplace ? It is a good trend ? Or did I hear an isolated incident ?

73, Chris

2496. Scandinavian Activity Contest 1999 rules

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-26 00:00:00 UTC
From: Jarno Savonen <oh6ktd@sci.fi>
Message-ID: <7q3svf$4l4$1@tron.sci.fi>
Source record: 23948

The 41th Scandinavian
Activity Contest 1999
SCANDINAVIAN RULES

Please note that there is two changes in the rules: A) the contest time
has been shortened to 24 hour. Also the beginning and end times are new.
B) There is one new competition class - low/power.

CW: September 18, 1200 UTC to September 19, 1200 UTC 1999
SSB: September 25, 1200 UTC to September 26, 1200 UTC 1999

GENERAL RULES FOR SCANDINAVIANS

1 Aim of the contest.
The aims of the contest are to promote amateur radio activity within
Scandinavia as well as to encourage amateur radio communications
between Scandinavian and non-Scandinavian amateur radio stations.
Scandinavian stations will try to work as many non-Scandinavian
stations as possible. The contest is arranged in 1999 by SRAL
(Finland).

Scandinavian stations are defined by prefixes as follows:

JW Svalbard and Bear I.
JX Jan Mayen I.
LA/LB/LG/LJ Norway
OF/OG/OH/OI Finland
OF&#65533;/OG&#65533;/OH&#65533; Aland Is.
OJ&#65533; Market Reef
OX Greenland
OY Faeroe Is.
OZ/5P Denmark
SI/SJ/SK/SL/SM/7S/8S Sweden
TF Iceland

2 Eligible entrants.
Radio amateurs and SWL's all over the world are invited to
participate.

3 Periods.

CW: 3rd full weekend of September each year.
SSB: 4th full weekend of September each year.

Starts 1200 UTC Saturday and ends 1200 UTC Sunday.

4 Sections.

a) Single Op./Single TX/Multi Band - High power (as before).
Single Op./Single TX/Multi Band - Low power (output 100W or less,),
Single Op./Single TX/Multi Band - QRP (output 5W or less).
Single Op./Single TX/Single Band

Single operator means that one person performs all operating, logging and spotting functions without any assistance from other person(s). The use of DX-Cluster is not allowed. Low power - All band is a new competition class in 1999.

b) Multi Op./Single TX/Multi Band.

Only one signal may be transmitted on any band at any time (running station). When operation has started on one band, the station must remain on that band for at least 10 minutes. The 10 minutes-period starts with the first QSO worked on that band.

Exception: It is allowed to work a station on another band if it is a new multiplier (multiplier station). The multiplier station is allowed to be in the air at the time as the running station. The multiplier station must also stay on the "multiplier band" at least 10 minutes. This rule is similar to the CQ WW DX contest.

Use of multiplier spotting assistance from other persons than the station-operators is not allowed. However, DX-Clusters may be used by Multi Operator stations.

c) Multi Op./Multi TX/Multi Band.

The use of DX-Cluster is allowed. There are no restrictions on the number of transmitters. Only one signal per band is allowed at any time. All stations must locate within a circle with a diameter of maximum 500 meters.

d) SWL. Single Operator/Multi Band.

Only non-Scandinavian stations may be logged for points. Scoring as for transmitting sections.

5 Bands.

3.5 - 7 - 14 - 21 - 28 MHz bands may be used according to IARU HF Band Plans.

(NB: 3560-3600, 3650-3700, 14060-14125 and 14300-14350 kHz to be kept free from contest traffic).

6 Contest exchanges.
The contest exchange consists of RS(T) plus serial number starting with 001 (e.g. 59(9)001).

(QSO's after 999 are numbered 1000, 1001 etc). The same station may be worked once on each band. Cross-mode and/or cross-band QSO's are not allowed.

The minimum content of a valid contest QSO is correct callsign and correct contest exchanges.

7 Scoring.
Two-way QSO with sent and received exchange counts for QSO-points.

EUROPEAN stations give two (2) points per every complete contact.

NON-EUROPEAN contacts give three (3) points per QSO.

8 Multipliers.
Worked DXCC countries are valid for multiplier on each band.

9 Final score.
To calculate the final score, multiply the sum of QSO-points on all bands with the sum of multipliers worked on all bands.

10 Logs.
Signed original logs (or copies of original logs) must be submitted separately for CW and SSB.

Logs to be filled in the following order:
Date and time UTC, Band, Station worked, Exchange sent, Exchange received, Multipliers and Points.

SWL-log must contain:
Date and time UTC, Band, Station heard, Message sent by Station heard, SWL's own report, Station worked by Station heard, Multipliers and Points.

SUMMARY SHEET.
All entries must be followed by a summary sheet showing station callsign, contest category, name of operator(s) and address. Indicate number of QSO's per band less duplicates, number of duplicates per band, multipliers per band, QSO-points per band and final score.

MULTIPLIER SHEET.
All entrants must submit a multiplier check list for each band with more than 200 QSO's.

DUPLICATE CHECK LIST.
Possible duplicate QSO's must be shown in the log and counted for zero (0) points. Each entrant shall submit a duplicate check list for each band with more than 200 QSO's. Duplicate check list to contain worked stations listed e.g. by DXCC-countries.

Electronic log
PC-computerized logs are highly recommended when
log is submitted on disc (only 3.5", 1.44 Mb) or via e-mail. Use ASCII-format. ARRL log standard is accepted. N6TR-file *.DAT is very usable.

Basic rules: Only one QSO on each line. Each line must contain following information: Date, Time (full) UTC, Band, Mode, Station

worked, Sent (full) exchange, Received (full) exchange, Multiplier (if applicable) and Points (dupes to be marked with (0) zero).

If you send log on disc, paper log is not mandatory. Summary sheet must always be on paper (not when using e-mail). Disc must be clearly labelled with call,contest name, class and date of the contest. CW and SSB portion can be on same disc. Use file-names like OH9A.DAT or OH9A.CW
or OH9A.SSB and OH9A.SUM

11 Declaration.
With her/his signature on the summary sheet, the participant declares that all the rules are observed and that the station was operated in accordance with the rules and regulations for amateur radio stations in the country of the participant.

12 Address for logs.
The arrangement of the contest alternates between SSA, NRRL, EDR and SRAL in that order.

Post address in 1999:
SRAL Contest manager Hannu Saila, OH3WW
Muurainkorventie 17, 33470 Ylojarvi, FINLAND

E-mail logs to:
sac99@sral.fi

13 Closing date for logs.
Logs and accompanying control-sheets, addressed to the organizing Society, shall be mailed not later than October 31st 1999.

14 Awards.

TRANSMITTING SECTION:
The top scoring QRO-station in each country, in each category, both CW and SSB, will receive a Contest Award, provided a reasonable score is made. Scandinavian winner stations may also receive a Contest Plaque on
High-power and Low-power multi band categories.

QRP operators will be listed in one common list for all Scandinavians.

SWL:
The top scoring station in Scandinavia will receive an award.

ALL SECTIONS:
Depending on the number of participants, the Contest Committee may consider additional awards.

15 Dispute.
Violation of Amateur Radio Regulations in the country of the contestant or of the rules for this contest, unsportsmanlike conduct and the taking of credit for unverifiable QSO's or multipliers may

lead to disqualification.

Each unmarked duplicate QSO found by the Contest Committee will result in a penalty of five (5) QSO's of same value as the duplicate. A log showing more than one (1) percent unmarked duplicate QSO's will be disqualified unconditionally.

The decisions by the Contest Committee
are final and definite.

Right to changes in this rules are reserved.

The 41th Scandinavian
Activity Contest 1999
NON-SCANDINAVIAN RULES

Please note that there is two changes in the rules: A) the contest time has been shortened to 24 hour. Also the beginning and end times are new.
B) There is one new competition class - low/power.

CW: September 18, 1200 UTC to September 19, 1200 UTC 1999
SSB: September 25, 1200 UTC to September 26, 1200 UTC 1999

GENERAL RULES FOR NON-SCANDINAVIANS

1 Aim of the contest.
The aims of the contest are to promote amateur radio activity within Scandinavia as well as to encourage amateur radio communications between Scandinavian and non-Scandinavian amateur radio stations. Non-Scandinavian stations will try to work as many Scandinavian stations as possible. The contest is arranged in 1999 by SRAL (Finland).

Scandinavian stations are defined by prefixes as follows:

JW Svalbard and Bear I.
JX Jan Mayen I.
LA/LB/LG/LJ Norway
OF/OG/OH/OI Finland
OF�/OG�/OH� Aland Is.
OJ� Market Reef
OX Greenland
OY Faeroe Is.
OZ/5P Denmark
SI/SJ/SK/SL/SM/7S/8S Sweden
TF Iceland

2 Eligible entrants.
Radio amateurs and SWL's all over the world are invited to participate.

3 Periods.

CW: 3rd full weekend of September each year.
SSB: 4th full weekend of September each year.

Starts 1200 UTC Saturday and ends 1200 UTC Sunday.

4 Sections.

a) Single Op./Single TX/Multi Band - High power (as before),
Single Op./Single TX/Multi Band - Low power (output 100W or less),
Single Op./Single TX/Multi Band - QRP (output 5W or less).

Single operator means that one person performs all operating, logging and spotting functions without any assistance from other person(s). The use of DX-Cluster is not allowed.

b) Multi Op./Single TX/Multi Band.

Only one signal may be transmitted on any band at any time (running station). When operation has started on one band, the station must remain on that band for at least 10 minutes. The 10 minutes-period starts with the first QSO worked on that band.

Exception: It is allowed to work a station on another band if it is a new multiplier (multiplier station). The multiplier station is allowed to be in the air at the time as the running station. The multiplier station must also stay on the "multiplier band" at least 10 minutes. This rule is similar to CQ WW DX contest.

Use of multiplier spotting assistance from other persons than the station-operators is not allowed. However, DX-Clusters may be used by Multi Operator stations.

c) SWL.
Single Operator/Multi Band.

Only Scandinavian stations may be logged for points. Scoring as for transmitting sections.

5 Bands.

3.5 - 7 - 14 - 21 - 28 MHz bands may be used according to IARU HF Band Plans.

(NB: 3560-3600, 3650-3700, 14060-14125 and 14300-14350 kHz to be kept free from contest traffic).

6 Contest exchanges.
The contest excange consists of RS(T) plus serial number starting with 001 (e.g. 59(9)001).

(QSO's after 999 are numbered 1000, 1001 etc). The same station may be worked once on each band. Cross-mode and/or cross-band QSO's are not allowed.

The minimum content of a valid contest QSO is correct callsign and correct contest exchanges.

7 Scoring.
Two-way QSO with sent and received exchange counts for QSO-points.

EUROPEAN stations credit their logs with one (1) point for every complete Scandinavian QSO on each band.

NON-EUROPEAN stations credit their logs with one (1) point for every Scandinavian QSO on 14, 21 and 28 MHz and with three (3) points for complete QSO on 3.5 and 7 MHz bands.

8 Multipliers.
Worked call-number areas (0-9) in each Scandinavian country are valid as multiplier on each band.
(e.g. SI3, SK3, SL3, SM3, 7S3 and 8S3 are all in ONE district and counts ONE (1) multiplier on each band).

Portable stations without district number counts for the 10th area (e.g. G3XYZ/LA counts for LA0). OH0 (Aland Is.) and OJ0 (Market Reef) are separate call areas. SJ9 counts for the 9th district in Sweden.

9 Final score.
To calculate the final score, multiply the sum of QSO-points on all bands with the sum of multipliers worked on all bands.

10 Logs.
Signed original logs (or copies of original logs) must be submitted separately for CW and SSB.

Logs to be filled in the following order:
Date and time UTC, Band, Station worked, Exchange sent, Exchange received, Multipliers (e.g. OZ4, SM3, SM4, OH2 etc) and Points.

SWL-log must contain:
Date and time UTC, Band, Scandinavian station heard, Message sent by Scandinavian station, SWL's own report, Station worked by Scandinavian station, Multipliers and Points.

SUMMARY SHEET.
All entries must be followed by a summary sheet showing station callsign, contest category, name of operator(s) and address. Indicate number of QSO's per band less duplicates, number of duplicates per band, multipliers per band, QSO-points per band and final score.

MULTIPLIER SHEET.
All entrants must submit a multiplier check list for each band with more than 200 QSO's.

DUPLICATE CHECK LIST.
Possible duplicate QSO's must be shown in the log and counted for zero (0) points. Each entrant shall submit a duplicate check list

for each band with more than 200 QSO's. Duplicate check list to contain worked stations listed e.g. by DXCC-countries and call areas.

Electronic log
PC-computerized logs are highly recommended when log is submitted on disc (only 3.5", 1.44 Mb) or via e-mail. Use ASCII-format. ARRL log standard is accepted. N6TR-file *.DAT is very usable.

Basic rules: Only one QSO on each line. Each line must contain following information: Date, Time (full) UTC, Band, Mode, Station worked, Sent (full) exchange, Received (full) exchange, Multiplier (if applicable) and Points (dupes to be marked with (0) zero).

If you send log on disc, paper log is not mandatory. Summary sheet must always be on paper (not when using e-mail). Disc must be clearly labelled with call,contest name, class and date of the contest. CW and SSB portion can be on same disc. Please use file-names like: AA1AA.DAT or AA1AA.CW or AA1AA.SSB and AA1AA.SUM

11 Declaration.
With her/his signature on the summary sheet, the participant declares that all the rules are observed and that the station was operated in accordance with the rules and regulations for amateur radio stations in the country of the participant.

12 Address for logs.
The arrangement of the contest alternates between SSA, NRRL, EDR and SRAL in that order.

Post address in 1999:
SRAL Contest manager Hannu Saila, OH3WW
Muurainkorventie 17, 33470 Ylojarvi, FINLAND

E-mail logs to:
sac99@sral.fi

13 Closing date for logs.
Logs and accompanying control-sheets, addressed to the organizing Society, shall be mailed not later than October 31st 1999.

14 Awards.

TRANSMITTING SECTION:
The top scoring High power and Low power station in each country as well as in each US call area, in each category, both CW and SSB, will receive a Contest Award, provided a reasonable score is made.

QRP operators will be listed in one common list for all non-Scandinavians.

The top scoring Single Operator (QRO) station on each continent may be awarded a Contest Plaque provided a reasonable score is made.

SWL:
The top scoring station outside Scandinavia will receive an award.

ALL SECTIONS:
Depending on the number of participants, the Contest Committee may consider additional awards and.

15 Dispute.
Violation of Amateur Radio Regulations in the country of the contestant or of the rules for this contest, unsportsmanlike conduct and the taking of credit for unverifiable QSO's or multipliers may lead to disqualification.

Each unmarked duplicate QSO found by the Contest Committee will result in a penalty of five (5) QSO's of same value as the duplicate. A log showing more than one (1) percent unmarked duplicate QSO's will be disqualified unconditionally.

The decisions by the Contest Committee
are final and definite.

Right to changes in this rules are reserved.

Gosh, I hope not. Much of the charm of DXing is getting the card. It's rather like stamp collecting in that regard. Going to an electronic QSL would be, well, kinda like a steady diet of English cuisine. ;-)

2499. HF Prop prediction - DX Party line - Tech Talk - on HCJB

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-27 00:00:00 UTC
From: Jim <jim@taborsoft.com>
Message-ID: <rsenapv0j7194@corp.supernews.com>
Source record: 23851

Greetings,

Rick, N6NR, hosts the "Tech Talk" segment of the HCJB DX Party line show.
This Saturdays show features our WinCAP Wizard 2 HF prediction app. I don't
know what he's going to say about the app. Please tune in and see. :-)

The show is on DX Partyline and time is:
Sundays (Saturday evening local time)
at 0110 UTC to Eastern North America on 9745 and 12015 kHz and 21455
kHz USB
at 0410 UTC to Western North America on 9745 and 12015 kHz and 21455
kHz USB

If you have any comments, questions or suggestions on any of our software
please do not hesitate to.

73 & Good DX,
Jim

Really, it looks like too many people these days consider DXCC (and WAS, IOTA, etc.) as *contests*, not *awards*. It's as if your DXCC is worthless if it takes you 10 years to earn it.

I live in a rare county, and am fairly active in contests. A box of 2,000 blank QSLs lasts about a year. Luckily, most of those cards go out via the bureau -- and now that there's an outgoing bureau (a relatively recent development in the USA!) the cost is managable.

I do get a handful of direct cards (probably about 50/year). Only half include return postage. (USA and DX are about equal in this area. Except that I don't ever remember getting a JA card without return postage.) If all 2,000 cards came direct - and the rate at which return postage was provided was the same - I would not be QSLing at all!

Incidentially, most cards I receive from the bureau are less than a year old.

For what its worth...I believe that QSLing has become as abused as the 5x9 report people use even if they can barely hear someone.
I seldom worry about QSL's anymore and I never join in the "quick" version of amateur radio (signal report, qsl info, 73) when a nice conversation is much more interesting. If after having really met someone in a meaningful way through amateur radio that person wants a QSL card I'd be glad to exchange cards with them. Other than that, my logbook will be record enough for me as to whom I have QSO'd with...
Since taking this approach a few years back my enjoyment of ham radio has increased greatly...no more chasing dx, or wasting money or time on QSLing 3 second contacts...
Amateur Radio is reaching out and touching the world...I don't need to prove to anyone that I've worked some rare station (even if I have) and my QSO's are much more enjoyable than what I'm hearing the many thousands tripping over themselves to participate in...
I know I'll get flamed by those who think I'm being pompous but the truth is that amateur
radio is great fun without all the hassles of QSLing and such...try it...you'll like it!!

One can certainly see and sympathize with both sides of this.
A computer generated QSL does seem to be a little light on
courtesy. Perhaps a better policy would be to respond only
to hand-written QSLs.

>it...you'll like it!!
>
>Robert Wade - K4DRW

Absolutely, Robert. It is making new friends over the world that is the best part of Amateur Radio. One of my fondest memories is helping a Soviet girl with her homework (UA0). She was studying the United States and had no textbook. I spent about three hours with her Father on 20 meter CW that night. Neither of us asked for or sent a card.

On the other hand, I also treasure the memory of a contact with a fellow named "Art" on 20 phone one morning for over two hours. It was only when I got a card that I learned he was Arthur Godfrey.

Let the paper (and cardboard) chasers have their fun. I know where the real fun is.

I need help locating a computer program. The program may have originally been on one of the early 90's Buckmaster CD's. Some of you may be interested in the program and hoping someone knows of the program. I have lost track of it and would like to find it again. The program had several functions, but the one I used and liked did the following: Start the program, tune your receiver to a signal or beacon, rotate beam antenna from stop to stop (360 deg), At the end of the rotation the program would display on screen a picture of the antenna receive pattern. As I find the receive pattern is very close to the transmit pattern in most cases, the program was very useful. The only connection needed was to connect receive audio to the computer soundcard. I have no idea of the program name or who wrote it. Sure hope one of you knows. Please drop me a note if you can help. Thanks, Bill, KG8AW

Gee I would never get a QSL in that case because; a) no one would respond to a computer labeled QSL card and b) no one could read my handwriting. I use computer labels on my QSL cards BUT I type them in by hand in Microsoft Word and also add any comments I want to the label as well. To this day I do all my logging by hand. I was asked recently by one DX station, in an E-mail, what logging program I use (I suspect because of the nicely formatted label) I replied that it was done by hand. The computer only makes it look neat.

2518. Solar Flux and DX

Newsgroup: rec.radio.amateur.dx
Date: 1999-08-29 00:00:00 UTC
From: nw7us@hfradio.removethisherepart.org
Message-ID: <37c96e97.6723093@news.olypen.com>
Source record: 23870
Cross-posted to: rec.radio,rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.packet

Solar flux of 248 today, is record for this Cycle. K index at the moment of 1, A of 14 -- heck, the bands should be hopping today and tonight. Heard long paths fairly loud today. But, Aurora activity (level 4 and 5 today) is indicating some polar absorbtion.

I've added the aurora level report to the eAlert that I offer. The eAlert seems to be a popular service -- I have had a large number of new subscribers.

Do you wish to be alerted when Solar Flux, A index, or the K index figures change? Don't want to carry around a radio tuned to WWV, etc.?

I have a alpha-numeric pager that I can email. I know others have cell phones with the same feature. And yet others read email all day long.

So, I created an automated e-report with the WWV report. This email is only sent when one of the three figures change.

If you wish to subscribe to this e-report, visit http://hfradio.org, and go to the propagation center. There you will find a form that allows you to submit your email address to the list.

Also, I am offering free web pages on the domain hfradio.org -- if you need a place to hang your hat, please consider creating your homepage at http://hfradio.org -- already have some taking up the offer... why not you? Free, after all. No ugly watermark images floating about, or obnoxious banner windows popping up every time you move around.

Need a place for your club website? Your special dx-pedition? Your homepage? Simply fill out the form off of the main page at http://hfradio.org/

Your page address would be http://hfradio.org/yourcallsign/ -- and you can have an email address alias of yourcallsign@hfradio.org. Free. For non-commercial ham sites only. If you need a commercial site, or need custom solutions, let me know with the online form.

And, of course, as always you can create azimuth maps centered on your QTH (or any QTH, for that matter), check dx, propagation, or swap and shop. And more. At the http://hfradio.org site.

Hope I meet you on the air. I hang out on 20, 15, and 10.

73 from NW7US

SB DX @ WW $OPDX.424
Ohio/Penn DX Bulletin No. 424

The Ohio/Penn DX PacketCluster
DX Bulletin No. 424
BID: $OPDX.424
August 30, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA2D, N2OO, N3FTI, W3UR & The Daily DX, KB6NAN, W6SWM, K7BV, K8YSE, KE9KD & DX Central, AH0W/OH2LVG, DJ5AV & DX News Letter, F6AJA & LNDX, F6BLQ, GI0DVU, HK6DOS, JA1ELY, OJ1JR, SP2BIK, SV2AEL, UUA0JGB, VK2NP, VP8LP, ZD8V/KF4OOX and Carlos Mayer for the following DX information.

AUGUST 30TH, A VERY IMPORTANT DATE (Two items).....
1) OPDX's official proof reader (ed. my wife's) birthday. I want to wish her "ANOTHER wonderful 29th birthday" (ed. Hey, this great being married to a younger woman who never ages). Birthday wishes can be sent to: linda@barf80.nshore.org

2) Closer To A Possible New Entity - The "New York Times" reports: "East Timor faces moment of truth in vote". On August 30th, "the people of East Timor will vote on a referendum that could lead it into a new era of freedom and reconciliation or one of even fiercer civil war. The referendum offers a choice between independence or an autonomous relationship with Indonesia."

1999 "HILLVIEW GARDENS" BORNEO DXPEDITION. Bob, N2OO/9M6OO, announced that a 3 week DXpedition partially sponsored by the Hillview Gardens Resort has been set for November, 1999. The list of operators are: Bob Schenck, N2OO/9M6OO (DXpedition leader); Jani Kusmulyana, YB0US/ NM6US/9M6US (Hardware engineer); Mike Mraz, N6MZ; Tom Harrell, N4XP and Paul Newberry, N4PN. Operations are scheduled to include activity from three different DXCC entities/countries. Schedule is as follows:
November 7-11th - 9M6AAC Hillview Gardens, Sabah, East Malaysia
November 12-18th - 9M6OO Layang-Layang Island, Spratly Islands
November 18-21st - The team will be attending the SEANET Convention in Brunei
November 21-25th - V8(???) Brunei (TBA)
November 25-29th - 9M6AAC Hillview Gardens, Sabah, East Malaysia. The team expects to be an entry in the CQWW CW Contest.

Operators N2OO and N4PN.
Currently, 3 or 4 stations are being planned for the 9M6OO operation.
QSL 9M6AAC and 9M6OO via N2OO, Bob Schenck, PO Box 345, Tuckerton, NJ
08087-0345, USA. V85 callsign TBA. A special Web site is being set up and
shall be maintained with regular updates and photos during the operation
at: http://www.qsl.net/n2oo
However, during the 9M6OO "Spratly" activity there is no InterNet access
available and regular updates will not take place. Currently, there are
no plans for a log search. Contributions for this DXpedition would be most
appreciated. Contact point for this DXpedition is Bob Schenck, N2OO, and
he can be E-mailed at: n2oo@arrl.net or via mail: Bob Schenck, N2OO,
P.O. Box 345, Tuckerton, N.J. 08087-0345 U.S.A. Also, check out the
Hillview Gardens Resort's Web page at: http://www.alfons.com
Also, vist the 9M6AAC Web site now found at: http://www.qsl.net/9m6aac

5W, WESTERN SAMOA. Gerard, PA3AXU, will be active again (on SSB, CW, RTTY
and possibly PSK31) as 5W0GD between September 28th and October 14th. QSL
via home call (G.A.M.C. Dijkers, Dokter P.A. Cornethof 3, 6669AZ Dodewaard,
The Netherlands).

DID YOU HAVE FUN DURING THE INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND?
Dates for next year's event will be from 0001z on Saturday, August 19th,
until 2359z on Sunday, August 20th, 2000.

FK, NEW CALEDONIA. Dany, F5CW (ex-FT5ZB and J28EI), is now active as
FK/F5CW, and he is waiting for a FK8V(??) callsign. He will be there for
the next 2 years. There has been some 17 meters activty. QSL via F5PED.

FO, FRENCH POLYNESIA. The "DX News Letter" reports that Patrick, FO5QS
(ex FO8DT, FR7CE, F6ESW), now lives on Huahine Island (OC-067) for the
next several months and is on the air between 14120 and 14150 kHz almost
daily from 0500-0800z. His new QSL address is: Patrick Freys, Box 643,
F-98731 Fare, Huahine, French Polynesia.

FR5/G, GLORIOSO ISLANDS. The "Les Nouvelles DX" reports that Gil/F5NOD,
Eric/F5PXT, Larry/F5PYI and Erwann/F6JJX will be active from here next
year in August. This may be a long wait, but many will be happy to hear
this announcement since this DXCC entity is ranked 9th on the most wanted
list. The group may also visit some different FH island.

HP, PANAMA. Ernesto/HP1EFR and Mari/HP1EGV (XYL) have just started using
PSK31. No QSNs have been reported but keep looking. QSL via CBA/QRZ or
Bureau.

IOTA NEWS.....
POSSIBLE NEW IOTAS. Pat, F6BLQ/9Q (ex-TU5DX, 5N0T) Dem. Rep. of Congo's
ARAC Committee Advisor, reports that Roger Balister, G3KMA,
RSGB IOTA Manager, gives an indication that following 9Q
islands may be potential IOTA targets:
Monpanga Isl 06.01S 12.35E
Ilot des Pecheurs 06.01S 12.25E
Rosa Isl 06.00S 12.27E

Zungu Kia Kambula Isl 06.01S 12.35E
Pat in Kinshasa states any operator willing to put these
"ever first new ones" on the air is already granted a one
week free B+B at his house when stopping by Kinshasa on their
way to those spots. Caution: He recommends you have a secure
9Q licence before paying your airfare!

EU-048. Paul, F6CXV, will be on vacation on Groix island from September
5-24th. Look for him to use the callsign TM0G between September
10-23th.
NA-201. Oscar, HK6DOS, reports that the DXpedition to Key Breton Island,
originally scheduled to begin this past weekend, has been
postponed due to hurricanes in the area. It has been rescheduled
for the week of December 1-6th, 1999.

OC-212. A group of VKs will be activating Broughton Island October
1-4th. They plan on operating 80-10 meters CW/SSB. The last
time this island was activated was in 1992. The opeators will
be using there own call signs signing portable. The QSL route
has not been finalized at this point.

KH2, GUAM. John, K4ANA, now active as KH2/K4ANA has been quite active this
past week on 20/30/40 meters CW between 1030 and 1230z. He will be here
for the next three years. Meanwhile, the DXNL reports that Gus, KH2/K4SXT,
is listening for Europe, Africa and the Middle East on 1824 kHz daily from
1950-2010z. We have also seen reports that he has been active between
1030-1130z.

NEW NRAU CHAIRMAN. Frank Smith, AH0W/OH2LVG, reports that DXpeditioner
Jari Jussila, OH2BU, was just elected for a three year term as Chairman
of the Nordic Radio Amateur Union (NRAU), which represents Scandinavian
amateurs (OH, SM, LA, OZ, TF and OY). Jari was one of the operators of
the recent 3B9R DXpedition and leader of the record breaking 4J1FS
DXpeditions. He is also a member of the Board of Directors of the
Finnish Amateur Radio League and served two full terms as that League's
Chairman. He also has served in a number of leadership capacities in
the IARU.

OH0 & OJ0, ALAND ISLAND AND MARKET REEF (Update/Excerpts From A Press
Release). Dennis, K7BV, reports that he will arrive on OH0 Monday,
September 13th at 2030z. He will be joined by Ari, OH1EH, will go
immediately to the OH0Z super station. They will combine their gear and
set up for a one-night "multi-multi" operating on 80 and 160 throughout
the night until sunrise. Their frequencies will be on or close to 3512
and 1827 kHz. Some SSB may be attempted if conditions are favorable. On
Tuesday morning, Dennis will board a helicopter (along with Seppo/OH1VR
and Lars/OH0RJ) for OJ0 Market Reef, weather permitting. They will begin
operating a few hours later after the antennas are up and the stations
are put together. Look for Dennis to sign OJ0/K7BV from September 14-20th.
Also, look for OJ0 activity in the SAC Contest. They will leave the reef
Monday, September 20th at 0800z. This operation was made possible thanks
to the financial support from the NCDXF and Top Band enthusiasts organized

by W6PBI, K6RK and K3SX. This is K7BV's second trip of the year to Market Reef, and he will place heavy emphasis on the 160 and 80 meters. QSL all OH0/OJ0/K7BV QSOs via KU9C. OH0Z QSLs go to OH1EH. QSL printing for the earlier trip was held until outcome of planning for this trip was known. The printer is preparing the cards now, and SASE requests should be in the mail very soon. Operating frequencies, details of the trip and photos of the May trip are posted on the Web site: http:www.qth.com/k7bv/

PSK31 CONTEST. This contest is sponsored by the Chautauqua County Contest Club and it will take place between 0000z and 2359z on September 4th.

QSL INFO AND NEWS......
QSL cards for the GB2MUL operation from the Lighthouse Station on Mull of Kintyre can be sent through the bureau in the usual way or direct to Jim, GI0DVU, at his callbook address. All callbooks from the last 4 years are correct. All QSL cards received via the bureau or received without the appropriate postage will be returned via the bureau (when time permits).

Dianna, KB6NAN, reports that she is now the new QSL Manager for the following callsigns: JY4NE, JY4NE/OD5, E44A and ZC6A (Ali Yashruti was operator on all operations). KB6NAN's QSL address is: Dianna R. Killeen, P.O. Box 911, Pescadero, CA 94060-0911.

Eric Vancraenbroeck, ON7RN, reports that he is now the QSL manager for: OT6P, OT7P, OT8P and OT9P. He states that QSLs are ok via the bureau or direct.

QSL route for VP8LGT active during the Lighthouse/Lightship weekend is via direct to VP8LP - address is: Bob McLeod, PO Box 474, 75 Davis Street, Stanley, Falkland Islands.

Stan, OK1JR, informs OPDX that more than 1500 direct QSLs were mailed (as promised before the end of August) for his 5N0MSV, 5N99MSV and 5N0/OK1JR operation. He also mentions that some 2500 QSLs have been sent through the bureau and he will continue to send cards through the bureau as received.

SPECIAL AWARD/CONTEST/EVENT. The Polish Short Wave Operators Association in Gdansk announces that several special stations will be active and an award will be available in commemorating the "60th Anniversary of Defense of the Polish Coast" between September 1st and October 2nd. This activity commemorates the ground and naval actions related to the Defensive Warfare in 1939, especially at the Reinfoced Area of Hel Penisula, Oksywie, Polish Postal Office in Gdansk and other units that offered resistance. October 2nd was the date the Reinforced Area of Hel Penisula had surrendered. This contest will be held for all HF and VHF bands, especially 80 and 40 meters.
For award eligibility stations ouside of the Polish area:
DX stations contacts must includes at least two QSOs or any European station shall be at least three QSOs with any of the special event stations that will operate from the following National Memorial Places:

3Z60H from Hel Penisula QSL Manager SP2FJN
3Z60O from Oksywie QSL Manager SP2HJN
3Z60P from the Museum of the Polish Post Office Gdansk
QSL Manager SP2AYC
3Z60W from Westerplatte QSL Manager SP2BNJ
3Z0BLY from the Destroyer Museum "ORP Blyskawica"
QSL Manager SP2PMW
3Z0MDL from the NAval Aquadron in Puck, QSL Manager SP2UUU

The cost of the award is 12 (PLN) for Polish operators and 3 USD or 3 IRC for all foreign stations. Requests for the award must be confirmed by two operators and should be submited with payment to: SP2FJN.

SPECIAL EVENT. Look for station K3T to be active to celebrate "Wellsboro Rail Days" October 9-17th. K3T will be on all bands 160-10 meters both CW and Phone modes. Operation will be from Wellsboro, PA (Tioga Co.), and will be active during the PA QSO Party. QSL w/SASE to: Steven Kerns/ K3T, PO Box 344, Douglassville, PA 19518.

SPECIAL EVENT, Look for UE0JX to be active from September 1st through November 30th. The special event station is to commemorate the 120th anniversary of Zeya city. QSL via DIRECT to RA0JX: Vladimir I. Babynin, P.O.BOX 1, ZEYA-3, AMURSKAYA OBL.676200, RUSSIA.

SW2, GREECE. Savas, SV2AEL, will again activate the special callsign SW2A during the WAE SSB and CQWW SSB Contests. QSL via P.O. Box 22013, Thessaloniki - 55310 - Greece. Also, the logs for SW2A (WPX SSB), SV2AEL/SV8 (IOTA EU-052), J48ISL (IOTA EU-49) and SX2T-SX2THE (1997) will be available at: http://www.qsl.net/sv2ael/

TF, ICELAND. Just a quick reminder (please refer to OPDX.415). Look for Bob, W2SF, to be active as W2SF/TF until September 6th. Activity will be on CW/SSB/RTTY. QSL to his home callsign.

TK, CORSICA. Look for Jack to continue to sign TK/F6FGY and stay on the island until September 10th. His activity has been RTTY on 20 meters.

TU, IVORY COAST. Look for Laurent, F4ATM, to be active as TU2/F4ATM from September 7-17th. He will use a TS-850 and a 14AVQ vertical antenna.

XX9, MACAO. Tomio, JM3DTY, will be active from here as XX9TUP beginning the evening of September 3rd and operate until September 13th. Activity will be on 20/15/10 and 6 meters (50.130). If spaces permit, he will be on the lower bands. Operations will be on SSB/CW/FM/RTTY/PSK31 (all 200 watts PEP). Tomio plans to participate in either the "All Asian DX Phone Contest (September 4-5th) and the WAE DX Phone Contest (September 11-12th). QSL via the Bureau or direct to JL3VUL: Hideki Noma, 15-15 Fujigadai, Himeji, 670-0066 JAPAN

YI, IRAQ. Look for the "German Arab Friends" to be active now through October 1st signing YI9DAF, YI9SEB, YI9JN, YI9MB, YI99BIF, YI/DJ2SX, YI/DH1YVI, YI/DL8ABO and YI/DD3VW. No other details were given.

ZD8V WILL GO QRT. Paul, ZD8V/KF4OOX, informed OPDX that he will now be going QRT from Ancension Island on September 15th and will return to his home back in Sharon, Pa. Paul states. "I will not be returning.... After 15 years of work down here I have had enough of it and need to leave and get a life back in the states."

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to: kb8nw@barf80.nshore.org
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

This is too bad that's it's becoming a trend. I believe QSL's make for a good marketing tool when I have non-ham people over to the house and show them all of the contacts. However, QSLing direct is expensive after awhile and I have starting resorting to more bureau cards as well as using wf5e service. Not everyone can afford a tower, amp, fancy HF rig and direct QSL service. Don't turn this into a rich man's game. Right now we need to reach out to the newer generation.

According to our dx-diary, the following operations are due to start on 1 September 1999:

SV8 - Korfu
ZB2 - Gibraltar
3Z - Poland, special prefixes

Others already on air include:

LX0 - Luxembourg
DJ2 - Fermarn Island
ID9 - Volcano Island
FK - New Caledonia
TF - Iceland
CT3 - Madeira
C56 - Gambia
T2 - Tuvalu
YI - Iraq

Details on these are other September operations can be found in our dx-diary at http://www.dxbands.com/dxep0999.htm
.

QUESTION: Do you find these (almost) daily messages of any interest?
QUESTION: If you do, then do you follow though and look at the web site?

Now that everyone's talking QSL cards...

Is it allowed to send your own bureau packages if your local ARS has a bureau service? As I see it if you send via the ARS it may be years before your cards get out, and if you have several cards to a rare country it may actually be worthwhile to send them directly to the country's QSL bureau... but not good if the other country's QSL bureau is going to send them back with a "please use your local bureau" note..

I hope it's allowed, as I sent a couple of packages out a few months ago
to the German and Japanese bureaus...

In fact, this was the only way to do it from the USA until about 10
years ago. The ARRL didn't *have* an outgoing bureau until long after
most other countries did. Some people did use private outgoing bureaus,
though all they did was accumulate QSLs and send them to the overseas
bureaus.

I'd be careful about using the bureau to rare countries though.
Sometimes they don't have an *incoming* bureau. Or, the station you
worked was a foreigner visiting and doesn't bother to keep any envelopes
at the bureau. (a common situation in the Caribbean, and probably the
Pacific too)

Hello mario,

Some countries only accept cards for members of the national association .
ARRL, DARC etc. You might want to ask if the DX station is OK for bureau
cards.

ARRL bureau will accept incoming cards for non-members, as long as they have envelopes on file.

Outgoing cards, on the other hand, are only accepted from members.

Kudos to the man who disqualified JA DXer and licensing profiteer Zorro.

I'm shocked ARRL stood by and let this happen. After all, isn't Don Miller (CA #978678) still beloved by good buddy (do they have those in Finland ?) OH2BH and the DXCC desk ?

I thought they'd have issued a release that said:

NEWINGTON, CT- After much consideration, the New Orleans DX Convention has decided past actions outweigh present deeds and will give Zorro the DXer of the year award, despite his administration of ham exams for fun and profit and the surrender of his license.

Inspired by K1MAN, Zorro plans to sue the Japanese Telecom Ministry for 10 million yen for telling the truth, and will operate M/M from a bamboo cage in downtown Hiroshima in the ARRL NA CW Sprint.

Other operators will include UN/NWO mogul Martti Laine, friend to former terrorists everywhere, and several prison guards being paid by Zorro's QSL fund.

QSL with an SASE and 15 dollars U.S. drawn on a Swiss bank, to:

Martti Laine
c/o Yassir Arafat
c/o Palestinian Telecom Authority

I don't know if this this is an appropriate place to ask thisquestion,
but I figured if anyone would understand propogation, it would someone
here. My question is this, is the recption of GPS signals affected by
the time of day and/or solar flares? I've noticed that my GPS seems to
me more reliable during the day than during the night.
The worst recpeption seems to be during the time the sun is setting and
rising.

Thanks for whatever help you can give me.

Ken

Only in that the constllation varies. Solar noise is way below the GPS
signal.
You may be seeing dew on your antenna causing the patch to detune.

I haven't been able to buy a recent callbook & my 1992 addresses didn't work.
Anybody, please help out with addresses for

VK4FW & OK1RD

Tnx!

Almost all still work. As expected, the exceptions tended to be pre-1975 units, which had already been replaced with newer models by their owners. Several models later than 1975 made by Garmin had temporary glitches lasting some hours, but are O.K. again now. The major casualty was THOUSANDS of GPSes built into cars in Japan, where they don't name the streets as a rule, and which are receiving upgraded software from the manufacturer URGENTLY. In Japan a car GPS is less of a luxury item than it is over here. [The GPS manufacturer started the software upgrades before the critical time, but was a long way short of completion when it mattered.]

Yep, my Garmin GPS-38 went through the satellites in order one by one,
spending about 15 seconds on each one, but it finally recovered.

The "record" for a Garmin 45 whose owner posted on the GPS newsgroup,
was for a 15 1/2 hour search for satellites, when the owner did NOT put it on
"autolocate" and simply let it seek satellites "normally" using the Almanac, which it
was interpreting as 1980 data. It "eventually" came up and behaved as normal from
then on. Options for owners of "some" Garmin units included: a) hard-reset [losing all
stored landmarks], b) set on autolocate [as you did], b) download a temporary software
fix to be deleted after the rollover AND a fresh almanac had been downloaded,
c) WAIT for hours in some cases until the unit corrected itself, d) or leave it on when
the clock clicked over and for another half hour, in which case it would automatically
update its almanac without losing its fix and getting confused.

Of the above, only c) with the possibility of a 15 hour search was likely to
happen with a user who did not know that there was a potential problem. There
were some Garmin users who gave up after a few hours, and queried the GPS newsgroup
under the opinion that their GPS had been rendered useless, only to be reassured that
their units could easily be revived.

I was monitoring a Trimbleï¿½ Acutime II at WNRO. Just after the
rollover, I watched the various satellites disappear. I cold reset
cleared the problem and it works fine. Heck if this only happens every
19ï¿½ years I can live with it.

Only real difference I noticed when I was qsl'ing DX stations direct was
that QRZ often had the address of the DX when Buckmaster showed nothing.
For stateside I like the layout of Buckmaster better but that is personal
preference. There really shouldn't be much discrepancy between the two on
stateside callsigns. Is that where you see the differences?

Correct. Typo. That should have read 1995! Incidentally, there is a difference between "available to the consumer" and "available." The "start date" on the GPS clock, which just rolled over, was 1980. I suspect that the military had some up and running in the 1980s.

Hi Cecil,
Units prior to 1993 had some problems, mostly fixed with software
patches. My Garmin 12XL had no problems.

2562. Announcing eHam.net

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-02 00:00:00 UTC
From: W4AN <w4an@eHam.net>
Message-ID: <GLBz3.2723$Dj2.173072@monger.newsread.com>
Source record: 23814

Amateur Radio finally has its community site in eHam.net. On September 1, 1999, eHam.net opened its doors at http://www.eHam.net. eHam.net can best be described as a community of ham radio operators from all over the world. These ham radio operators share ideas through chat, contribute news articles, buy & sell, take practice exams, get propagation information, DX spotting, and a variety of other applications designed for hams.

eHam.net Features (version 1.0)

1) Callbook - More than just the FCC data, it also includes interesting personal notes submitted by each person.

2) DX Spots - Spots from around the world with one click access to QSL manager and callbook info.

3) Classifieds - Buy and sell your ham gear here (it's free!)

4) Ham News - Latest ham radio news with an opportunity to post your comments on each story.

5) Chat - Chat with hams around the world. Hold club meetings. Meet people here for on air schedules.

6) Ham Exams - Exams automatically generated from the FCC test pool. Take a test and see your graded answers immediately.

7) QSL Managers - Find the fastest way to get the cards you need.

8) Propagation - Why wait for WWV when you can get up to the minute data from NOAA.

9) Survey - Answer the question of the day.

10) Speak Out - A lively editorial forum for comment on ham radio topics.

11) eHam Detective - Search ALL ham radio mailing list archives on the web. Not just contesting.com.

12) Ham Spotlight - Each view of the home page includes a profile of someone from the ham radio world. Every time the home page is refreshed, the spotlight changes.

3) Links - On every page of the site you can type in a keyword to search. The site has over 2500 different ham radio links already. By far the biggest and best colletion of ham links on the Internet. We also have a rating system for each link entered. The eHam.net community can rate any link from 1 to 5 stars!

14) Friends Remembered - A place to remember SK friends. It occured to us that a callsign listing in the pages of QST magazine just wasn't enough.

15) Product Reviews - Review any ham product you own or come here to read reviews about products you are considering buying. I know a couple of companies that will hate us for putting this one up!

73 & thanks for your time & consideration.

Bill Fisher, W4AN

I have a Garmin GPS II that had a factory repair last summer (1998)(LCD malfunction). Softeare was upgraded by Garmin to version 2.07. I didn't miss a beat. The GPS worked right through the rollover.

Garmin advised for my model that versions with software versions below 2.04 would have the long re-cycle and that it could last for up to a month.

Well, that's what Klinton would have us believe.

He also didn't have "sex" with Monica Lewinsky.

Vince Foster committed suicide, but Waco docs disappeared from his
office, and there were no powder burns on his hand.

That was yet another Russian rocket on time delayed reentry last night
over the West that travelled from OR to CA then to AZ and NV, while being
pursued by fighters from WA.

Oh yes, and Elvis is dead...

>Rick KF7QZ

Maybe as a ham tower just for ham radio, but 1200 feet is a piker for ham antenna heights...

Maybe it's just that in Texas all things are bigger, taller, and, well you know the story .. grin ..

Have a drive by the tower site on US90 just East of Devers, Texas just West of Beaumont. It goes ---WAY--- up there, is a TV tower, I think. Originally sited as a "move-in" on the Houston TV market from about 70 miles East, technically, in the Beaumont market, it has a two meter repeater on it up at about the 1500 foot level on 146.98 if my memory is correct. Service range on that repeater is about 100 miles or so in the flat waste lands of swamp and pine trees in East Texas. I can bring it up from a mobile unit on a mobile whip even as far away as Plantersville, Texas just barely out of Navasota on Texas 105 most all the time and it covers way on into Houston as well. (W5LGQ/R ?)

However, it isn't helium line fed, I've been told. Has the txcvr box and antennas (space diversity, so said) up on the tower. If what has been told me is correct, the transmitter antenna is up about a hundred feet higher than the receiver antenna on the tower. You ride the elevator up to service things...

It actually has very little traffic on it, comparatively speaking. During disaster relief work for hurricane and flash flood traffic, it is often FCC request blocked to emergency communications... simply because of the terrific coverage.

To my understanding, there is another one of these similar sites up in the Temple-Waco area at close to 1700 feet! There is another one up in the Tyler, Texas area up in the mega foot range as well... plus more...

Aside from the novelty, having an HF array up there at that height might be interesting for somethings, but relatively poor for others.

The worst field day score for the work I ever had was the time we got to operate many years ago from the press box at the Texas A&M University

football stadium! I got to climb the football pole lights and get the antennas *WAY* up there around the 170 foot mark!

Lousiest score I(we) ever had! At the same time in the '50's that I had the 605 QSO's on 40CW only in the SS, it was *NOT* the operator(s), there were two of us. It was the fact that the radiation angle of the antennas was too low for stateside coverage to be worth a flip in field day!!!

1200 feet on HF might prove really rotten for some types of work, but quite effective for DX, one would think!

There are ways to get too highfalutin for your own good!

2572. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-03 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7qnisc$dk6$1@news.hawaii.edu>
Source record: 23824
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

According to QST, Laine's expedition to E4, like his crooked expedition to P5, was, of course, approved at the "top".

In this case, by PA chief Yasser Arafat.

The man has had an amazing tendency over th years to use his neutral status to cavort with rogue entities. Note how many others have gotten high level approval ?

But what would we expect; he authored an article extolling DXer Don Miller, a convicted felon, as a great man...

Yes, but not in the eyes of OH2BH, Martti Laine, who visited him in the
pen and wrote a piece that had the gumption to hint one day he may return
!

"He was ready to re-establish his contest records and set up a contest
site on Fiji, the island he had fallen in love with. But many years will
still need to pass - and that massive 5-inch gate is very demanding until
it finally opens up for him. God bless Don Miller."

As you know, Jim, some people will say, "oh but he was such a great
DXer". How can that be when, as you said, he was nowhere near where he
claimed. That makes him a nothing, after the fact.

Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.space

I am clearing out the ham shack of all my QST magazines once again. If anyone is interested, I am selling
1992-1998 at $1.00 ea. (you pay shipping costs however you want them shipped) for 1 to 10 issues. If you
are interested in over 10 issues or the entire collection, make me an offer. I am willing to ship anywhere on
this planet so long as you are willing to pay the actual shipping costs.

Here are the issues that I have:

QST

1992 Jan - April $1.00 ea.
1993 Jan - Feb & April - Dec $1.00 ea.
1994 Jan - Oct & Dec $1.00 ea.
1995 Jan - Dec $1.00 ea.
1996 Jan - Dec $1.00 ea.
1997 Jan - Dec $1.00 ea.
1998 Jan - Dec $1.00 ea.
1999 Jan - Current $2.50 ea.

All the issues are in perfect condition with no ripped pages or covers. Sorry I don't have anymore, but the last
time I did this in 1993, I sold all my 1989 through my 1992 issues less a few months still available.
If you would like to check my references, please feel free to do so. I am on Ebay and my user ID is: Andrew45

It seems like many attendees of the New Orleans DX Convention have been wide eyed enough to see a smack at their conventions success and choice of DXer of the Year by W3UR and the ARRL.

It should not seem too strange that a topic supposedly known last May 99 should appear as a special news worthy item in the ARRL Letter the day before the New Orleans DX Convention was to open.

One would think the ARRL to be above such an action but somewhere within its hierarchy there must be people wielding enough power to take aim at specific amateurs that are not liked. It would be real interesting to see if ARRL Letter Rick Lindquist will be allowed to answer the question of why such an untimely matter was given breaking news space.

Notice of course that ARRL gives mention everywhere of W3UR's Daily DX as being the source of the insult, yet they chose to print and release it nationally.

At least I got my chuckle for the day by being sent a copy of a cartoon printed at the New Orleans DX Convention. Look on web sites for W3UR_QTH.JPG to start appearing. Someone went to nice efforts depicting his QTH and that his Big Gun station status comes from running coax to his neighbors antenna farm.

Since when is telling the truth a "smack" Bob? My hat is off to W3UR and the ARRL for having the guts to report the issue and to NODXC for having the integrity to withdraw their nomination. You also neglected to mention the fact that Zorro also personally requested his nomination be withdrawn! I know because I was there and this was part of the announcement at the NODXC dinner.

Don't shoot the messenger because you don't like the message. Zorro himself decided to cheat and paid the consequences when he got caught. He is responsible...not Bernie, ARRL or NODXC. When we start ragging on others because they stand up for truth and integrity in our hobby, it is a sad day indeed.

A friend of mine has a Magellan which shows a very unusual problem.
It reports the correct position, but the displayed time is 2 minutes off
since the rollover. That shouldn't be possible, but there it is.

All three of my GPS receivers weathered the rollover with no ill effects.
They are a Garmin 45 (not XL), an Icom IC-22, and a Tripmate. I made
sure to have them on and tracking during the rollover, so they didn't
require a long time to reacquire and download a new almanac.

SB DX @ WW $OPDX.425
Ohio/Penn DX Bulletin No. 425

The Ohio/Penn DX PacketCluster
DX Bulletin No. 425
BID: $OPDX.425
September 6, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, W3HC, W4DR, N5KO, N6RT, N6TJ, K8YSE, WA8AA, 9M2TO, BA1DU, DF4RD, EA3BT, JM1LJS, LA7MFA, LU7DIR, PA3AXU, VK4AAR, VK9NS, ZD8V/KF4OOX, ZS5BBO and Kevin Walton for the following DX information.

5W, SAMOA (Update/Refer to OPDX.424). Gerard, PA3AXU, informs OPDX that he will arrive in 5W-land early morning (local time) September 28th, and he states that he should have had enough time to sleep during his flights (total travelling time 29 hours). He states that he will be active on PSK31 and hopes that Pacific will allow at least some low band activity, although he will not be taking an amplifier. All equipment and software has been tested last weekend. Gerard adds, "My XYL Ria will go with me, but she promised me that she will take enough books to read, so that the time I can be QRV is 'unlimited'." Activity will last until October 14th. QSL via: G.A.M.C. Dijkers, Dokter P.A. Cornethof 3, 6669AZ Dodewaard (The Netherlands).

7Q7, MALAWI. NODXA member Edwin, ZS5BBO, reports that he will hopefully be operating a station from the shores of Lake Malawi from December 19-26th. Edwin mentions that he doesn't have a callsign as of yet, but he has been told it could be 7Q7BB or 7Q7BO. This will be a SSB operation only on 10, 15 and 20 meters using his IC-706MK2 and possibly the antenna that is already up at the hotel where he is staying. Please stay tuned for further updated information regarding Edwin's vacation plans.

9A2000, BRIONI ISLANDS (Update/Change, Please refer to OPDX.420). Mac, W3HC, informs OPDX that Sado, 9A2OP, reported that some changes have been made to their DXpedition plans. The authorities have changed their callsign to be used. The new callsign will be 9A2000B instead of 9A2000FT which was announced earlier. They will be active no the Brioni Islands group (EU-110) now until September 8th. As this bulletin was being prepared, activity so far seems to be mainly 15 and 20 meters. Watch 14011, 14260, 21238 and 21260 kHz. QSL via 9A7K.

C9, MOZAMBIQUE. "The 59(9) DXReport" reports that Reinhard, DL6DQW, will be active September 18-21th as C91RF. QSL via homecall.

CN, MOROCCO. Members of the Bavarian Contest Club (BCC) are forming a Multi/Multi team to participate in the upcoming CQWW DX Contests. The contests callsign (CW/SSB) will be CN8WW. CN8WW will have seperate stations on all six bands for the complete 48 hours of both contests. Suggested frequencies for the CQWW SSB Contest (October 30-31st) +/- QRM are: 1855, 3755, 7055, 14255, 21355 and 28355 kHz. Suggested frequencies for the CQWW CW Contest (November 27-28th) +/- QRM are: 1833, 3533, 7033, 14033, 21033 and 28033 kHz. QSL CN8WW to DL6FBL via the bureau or direct to: Bernd Och, Chr.-Wirth-Str. 18, D-36043 Fulda, Germany. For the latest updates, check out the CN8WW Web site at: http://www.dl6fbl.de/cn8ww/ For questions, send to the CN8WW E-mail Address: cn8ww@boc.de

EA8, CANARY ISLANDS. Look for Jeff, G4ELZ, to be active as EA8/G4ELZ/P, September 4-18th from Puerto de la Cruz. Activity will be mainly 20 meters CW during his evenings and mornings. Watch for him around 14060 kHz.

EAST TIMOR VOTES FOR INDEPENDENCE. Over the past weekend the Associated Press reported that the "U.N. Secretary-General Kofi Annan announced Friday night what was apparent all week - that East Timorese had voted in a landslide to end a quarter-century of often brutal Indonesian rule. U.N. officials said that 344,580 people, or 78.5 percent, voted to split with the world's fourth most-populous nation. The news triggered a violent backlash by anti-independence forces, who had favored autonomy within Indonesia and had tried to disrupt the vote by attacking U.N. workers. At least four local U.N. workers were killed this week and another six were missing and feared dead." The Indonesian government is expected to respect the referendum and grant East Timor independence. Stay tuned!

GEARED UP FOR THE CQWW DX CONTESTS. Jim Neiger, N6TJ, reports, "Once again, 'NEIGER'S TIGERS' is forming multiple Teams for the upcoming CQWW DX Contest, both SSB and CW. Just when you thought it safe to return to the jungle....." Last year's CQ WW SSB, Jim's "TIGERS" placed 3 teams in the Top Ten, plus a new all time SSB Team Record. Jim states that he will return to Ascension Island as ZD8Z for the SSB contest, 10 meters only, and then to Brazil for the CW contest, also 10 meters only from ZX5J QTH.

HC8, GALAPAGOS ISLANDS. HC8N will be activated in the CQWW RTTY Contest this month as a multi-multi effort operated by N5KO, W6OTC, K6AW, WF1B, N4GN, W5AP and HC1OT. QSL via AA5BT.

HS, THAILAND. "The 59(9) DXReport" reports that Don, G3VFU (ex A92BE, A45XU), is now active as HS0/G3VFU and only for an unspecified time. We have seen no QSNs reported yet, but look for him on SSB. QSL via W3HNK.

HUNTING LIONS ON THE AIR CONTEST - JANUARY 2000. The 29th annual Hunting Lions on the Air contest will take place on the weekend of January 15-16th, in the year 2000. This contest is to create and foster a spirit of understanding and co-operation among radio amateurs and Lions through worldwide communication. This contest is to comemorate the birthday of the founder of Lionism, Melvin Jones, born at Ft. Thomas, Arizona, USA,

on January 13, 1879. For more details please visit the following Web site: http://www.sarl.org.za/contests/lionita.htm
Edwin, ZS5BBO, will be signing his contest callsign ZS5T and will be operating the station on behalf of the Durban South Lions Club. By the way, Edwin is also the Vice President of the Durban South Lions Club.

IOTA NEWS.....
AS-NEW. Look for BI7Y to be active from Xisha Archipelago (Paracel Island) in the South China Sea. Nine operators from China will participate in this activity. They are: BA1AJ, BA1DU, BA1HAM, BA4RC, BA4TA, BA7IA, BA7JA, BG7YB and BG7YC. The activity is supported by Chinese Radio Sports Association, The Beijing DX Club and The Island Radio Expedition Foundation Inc. The team members will assemble at Hainan Island (AS-094) on September 5th. They will operate there using their home callsign/7 for about 24 hours, and then they will start to go to Yangxing Island, Xisha Archipelago by boat on September 7th. They expect to be active on the island at 0500z on the 8th and will stay for 5 days, and then leave the island on the 13th. They will set up two stations with one beam and one PA and will work on CW, SSB and RTTY on the normal IOTA frequencies from 40 meters to 10 meters. They will answer all QSL cards which come from QSL bureau, or you can send your QSL cards via official QSL bureau (P.O.Box 6106, Beijing 100061, China), or you can send your cards to BA7JA directly (P.O.Box 1713, Guangzhou 510600, China). Any question should be sent to BI7Y team coordinators Alan/BA1DU (ba1du@arrl.net) and Yang/BA7JA (ba7ja@amsat.org).

AS-073. Tex, 9M2TO, will be active again from Redang Beach Resort on Redang Island from September 18-21st. Activity will be mainly CW on 40-10 meters. His son JF0GEV will also be an operator. QSL to the bureau via JA0DMV or direct to 9M2TO Penang QTH. All the QSOs will be sent via the JARL Bureau before the end of October AUTOMATICALLY!

LAST CHANCE TO WORK ZD8V. Paul, ZD8V/KF4OOK, reports: "ZD8V will go QRT on Wednesday, September 8th. I got to pack up everything and turn it in for shipping on September 10th. I will try to be on the air as much as I can. I will be trying to show up on the 247 DX net (14.247 MHz), the ANNSE Net (14.164 MHz around 0700Z) and the JA DX Net (21.365 MHz around 2000Z). I am looking for Pacific DXCC places. I am kind of weak on them. I am also looking for the members of two clubs. The Mercer Co. ARC in Sharon Pa and the Indian River ARC in Cocoa Fl. I would like to work as many of the above as I can as well as working every one else.....On September 8th, I will have to go QRT then go to work on mid-days and then I will pack up my computer and ham station. I hope propagation is very good the next week as I will be spending as much time on the air as I can and I want to get the most out of the bands." NOTE: Please see new QSL route for ZD8V down below.

PACIFIC OPERATION UPDATE (T31, Kanton Island and ZK3, Fakaofo Island). Operator/QSL Manager Lech, LA7MFA, reports that the "1999 Double Trouble

DXpedition" is right on track, and they expect to have their first team members in Pago Pago, American Samoa on Tuesday, September 7th. Look for Steve, KH8/G4EDG, on CW and Nils, KH8/SM6CAS on SSB. QSL via their home callsign. From September 14-17th, there might be some additional operation by the rest of the team. Look for KH8/SM7PKK, KH8/SM0AGD and KH8/KK6HC. QSL via their home callsign except for the last one which goes to LA7MFA. New updated QSL routes are now placed on their main Web page at: http://www.qsl.net/t31t
Lech states that the operating frequencies for the T31 and ZK3 operations can be found on the Web page: http://www.qsl.net/t31t/qrg.html
A quick look at the site shows the following suggested frequencies:
CW - 1825, 3505 (EU), 3535, 7005 (EU), 7035, 10125, 14005 (EU), 14035, 18075, 21005 (EU), 21035, 24895, 28005 (EU), 28035, 50110 kHz
SSB - 3795, 7045, 14145 (EU), 14245, 18145, 21245, 24945 28445 kHz
RTTY - 14080, 21080, 28080 kHz
Remember the T31T Kanton Island operation will be from September 23rd through October 3rd. The ZK3DX Fakaofo Island (Tokelau) operation is scheduled for October 7-12th. Very shortly, the update news page will be activated at: http://www.qsl.net/t31t/news.html
There will be no online log on their WEB page! Please do not send E-mail to the WEB-master. Everything should go to: t31t@qsl.net.
Lech mentions that some of the sponsored money will actually be used to buy supplies for the locals on Kanton (T31) and Fakaofo (ZK3). There has not been any supply boats on these islands for months. Lastly, the team still needs more donations!

PACIFIC OPERATION (ZL1AMO on move again). Ron Wright, ZL1AMO, will leave New Zealand on September 8th to operate for one week as 3D2RW from Fiji. After Fiji he will then spend one week at Samoa and will operate as 5W1CW, if a suitable location is found. On September 22nd, Ron will leave by ship for ZK3 and will arrive at Nukunono Atoll September 24/25th. Ron will stay on the island approx. 4 weeks until the ship returns. Look for Ron to be active mainly on CW and the lower bands, especially 160 meters.

QSL INFO AND NEWS......
Jim Smith, VK9NS, reports to OPDX that he will be leaving Norfolk Island soon, and the QSLing will stop until he gets back. He wants us to tell everyone to "Please ask the guys/gals not to re-QSL." Jim is due back on Norfolk Island in mid November. By the way, Jim has been working some RTTY and is really enjoying PSK31.

The new address for QSLs for ZD8V is as follows: Paul L Hutley, 298 Logan Ave., Sharon, Pa 16146. Paul informs OPDX that, "This is my parents' address and will be a good one for a long time to come. I don't know how long they will forward my mail from my address from Ascension to my parents address in Sharon Pa., so I would like to get everything moving that way now so I don't have to worry about missing mail."
It has been reported that Abdollah, EP2FM, states that he is not receiving all the envelopes that he should and is having a difficult

time cashing in IRCs. He states most postal workers in Iran have not heard of IRCs, and currently one IRC is not enough for one stamp to send a letter to a country like the USA and Canada. However, he still prefers IRCs over green stamps because they seem to make it through the mail better. Abdollah's E-mail address is: as@neda.net

Alan, VK4AAR, reports that the Australian Overseas Postal Charges **WILL RISE DRAMATICALLY** in the immediate future. Please act accordingly.

The following new/updated logs are now online at: http://dx.qsl.net/logs
KP2/K6RO (July 1999) 9X0A (March 1996 thru April 1998)
WP2Z (1999 IARU Contest) IZ4AFW (thru August 29, 1999)
VQ9CV (thru August 29,1999) 4K9W (thru August 16, 1999)
DU1ODX (thru August 31,1999) KP4AH (thru August 28, 1999)
DS5DNO (thru August 31,1999) ED6EIG (August 1999)

L27DIR special event station active May 16-23rd to celebrate the "75th Anniversary of the World Record of Distance" should be QSLed to LU7DIR via the bureau or direct to: Jose E. Campos, P.O. Box 26, 1650 San Martin, Bs. Aires, ARGENTINA.

QSL 9M2K via QSL Manager 9M2AA as per Callbook and QRZ.COM. This was a special event station in Port Dickson, Malaysia in commemoration of year 2000 (Y2K) by the Malaysian Amateur Radio Transmitters' Society. There will be a special commemorative QSL card issued for the event.

T8, PALAU. Toshi/JA6QXW and Mac/JA1OYP will be active as T88XW and T88XX, respectively from September 12-15th. Activity will be on 20, 17, 15, 12, 10 and 6 meters. HF power will be 500W and on 6m 200W(?) with beam antennas. QSL T88XW via JA6QXW and T88XX via JA1OYP.

VP2, MONTSERRAT '99 DX-PEDITION. A press release by Josep, EA3BT, reports that an operation will take place October 22-30th. Team members Josep/EA3BT and Nuria/EA3WL (YL station) will use the callsign VP2MBT and VP2MGL. Activity will be on 80/40/30/20/17/15/12/10 meters SSB, RTTY and some CW. Josep states, "Because of the last eruption of the Soufrieres volcano on the island of Montserrat that happened in 1997, the radio amateur activity from the island has been very poor. This is the reason why we think that it is convenient to organize a DXpedition that covers the demand over this DXCC country. Our aim is to be active in the maximum number of bands and modes, attending the requests that can be done to us." QSL via EA3BT. An online log search will be available and is under construction at: http://www.qsl.net/ea3bt

ZF2, CAYMAN ISLANDS. Look for Steve, W7TZ, to sign ZF2CQ now through September 18th. This will be a SSB only operation. QSL is via W7TZ direct.

ZS5, SOUTH AFRICA. Edwin, ZS5BBO, reports that he will be active in the upcoming CQWW DX SSB Contest as a single station on a single band signing ZS5T.

SPECIAL NOTE FROM OPDX'S OFFICIAL CHIEF PROOFREADER (ed. Linda my XYL).
I'd like to thank each and everyone of you who sent me special birthday wishes. I have never had so many birthday greetings in my whole life. This was quite a surprise because Tedd sneaked that entry in on me, and I had no idea he let the whole world in on my "29th birthday". Thanks again; I enjoyed hearing from everyone!!

To: QRZDX@dxpub.com
From: Carl Smith <carl@dxpub.com>
Subject: 1999 DX Magazine Most Wanted Survey

This afternoon we finished putting the 1999 DX Magazine Most Wanted Survey form on my web site. You can log on at: http://www.dxpub.com and from the home page go directly to the survey. Simply answer the questions and mark the ones you need on the list, by mode. At the bottom just click on the "submit" block and your survey will be included in the totals.

Should you need something that is not on the list, PLEASE send me a separate email message so I can include those in the final tallies.

I am very pleased to be able to offer this service for the first time. While we made every effort to "de-bug" the system, we're not perfect. Any comments on this method of taking the survey, pro or con, would be greatly appreciated.

Please tell your friends about the survey and encourage them to submit their own "needs" - especially those of you outside the USA. The results of the survey will be published, as usual, in the January/February 2000 issue of The DX Magazine. They will also be posted to the web site around February 1st.

Have a safe weekend.

Highwayman

Written By M.F. Luder

I was a codeless "ham"
Along the coach roads i did ride
With dual band HT by my side
Many a young maid ran from my tirades,
Many a repeater contact I had made
The League grandfathered me in the spring of o-one
But still I want more, my whinings never done

I was a sailor,
I was born upon the tide
On 14325 did i abide
I sailed a schooner 'round the horn to mexico
I went aloft to furl the Outbacker in a blow
And when the mast broke off,
They said that my signal was killed
But i am living still

I was a damn CBer
Across the South deep and wide
Where shooting skip was my only pride
A place called New Orleans on the Mississippi low
I bought an amp that would let me bellow
They DF'd me by listening for the crackling sound
But i am still around
I'll always be around and around and around...

I'll talk on 10 meters
'Cross the Continental divide
And when i reach the other side,
I'll find a place to rest my Budweiser in a can
Perhaps i may become a highwayman again
Or i may simply be a single jamming pain
But i will remain
And i'll shoot skip again and again and again...

Over the past 25 years, my opinion of the no-code license has changed 180 degrees. As of today, an international treaty requires some proficiency in CW for hf operations. Many countries consider 5 wpm sufficient to meet this requirement. If the FCC approves the new restructuring, that will be the norm for General Class.

I would think that eventually the international requirement for CW will be eliminated. When that happens, then the US can drop CW for hams.

As one person commented, I am in total agreement that courtesy is far more important than CW.

(BTW 90 percent of my operation is CW.)

>Since when is telling the truth a "smack" Bob? My hat is off to W3UR and the
>ARRL
>for having the guts to report the issue and to NODXC for having the integrity
>to
>withdraw their nomination.

The smack is that this unfirmation was known back in May 99 yet it was held for 4 months to be relaesed nationally on the eve of the evnt.

The "smack" is at the people running the New Orleans DX Convention. One does not get the impression that ARRL or W3UR are looking to make compliments regarding the convention, but too drop a small bombshell to maybe convince a late coming attendee not to attend.

The announcement does not make any reference to the months known fact that there would be no award, just that a terrible travesty has occured in the decision of Zorro as DXer of the Year.

As to truths, etc, of the stories. Yes, Zorro has turned in a secondary license, but so far no word that his JH1 license has been turned in. NOTE turned in, NOT revoked.

The more information coming out from Zorro's detractors makes ANY information questionable.

The latest reports from Zorro's detractors placed him un prison for 38 days until just recently bailed out for very big money. His licensing accomplice also just recently bailed out a few days before.

Neither man was "jailed" by the police but only questioned and released.

The donation of amateur radio transceivers has been escalated to the delivery of nuclear detonation triggers.

I am on the road with my laptop todau or I would love to send you a copy of the last message from Japan with all of the "facts" of Zorro's wrongdoings. While quoting facts, proven wrong, and loaded with upcoming trial dates, it is laughable in its own right

Wrong. ARRL previously publicized the information based on W3UR's release (back in June as I recall).

>
> The "smack" is at the people running the New Orleans DX Convention. One does
> not get the impression that ARRL or W3UR are looking to make compliments
> regarding the convention, but too drop a small bombshell to maybe convince a

Wrong again. How could W3UR's or ARRL's reporting of NODXC's decision (announced at the end of Convention) have influenced someone to not attend? W3UR's and ARRL's announcements were made after the Convention was over!

> The announcement does not make any reference to the months known fact that
> there would be no award, just that a terrible travesty has occured in the
> decision of Zorro as DXer of the Year.

The NODXC decision was made BEFORE all the information came out on Zorro. Unfortunately they were not clairvoyant but at least they corrected their mistake by withdrawing the nomination.

Again, kudos to W3UR for being the fist to research and then report this sad incident. Bernie took a lot of grief when he first published it but he has been proven correct.

Dear Future Associate,

You Can Work At Home & Set Your Own Hours. Start earning Big Money in a short time

NO Newspaper Advertising!

Your job will be to stuff and mail envelopes for our company. You will receive $.25 for each and every envelope you stuff and mail out.

Just follow our simple instructions and you will be making money
as easy as
1 2 3

For example stuff and mail 200 envelopes and you will receive $50.00. Stuff and mail 1000 and you will receive $250.00. Stuff and mail 2000 and you will receive $500.00 and more

Never before has there been an easier way to make money from home!

Our Company's Home Mailing Program is designed for people with little or no experience and provides simple, step by step instructions.

There is no prior experience or special skills necessary on your part, Just stuffing envelopes.

We need the help of honest and reliable home workers like you. Because we are overloaded with work and have more than our staff can handle. We have now expanded our mailing program and are expecting to reach millions more with our offers throughout the US and Canada.

Our system of stuffing and mailing envelopes is very simple and easy to do!
You will not be required to buy envelopes or postage stamps.

We will gladly furnish all circulars at no cost to you. We assure you that as a participant in our program you will never have to mail anything objective or offensive.

There are no quotas to meet, and there no contracts to sign. You can work as much, or as little as you want. Payment for each envelope you send out is Guaranteed!

Here is what you will receive when you get your first Package. Inside you will find 100 envelopes, 100 labels and 100 sales letters ready to stuff and mail

As soon as you are done with stuffing and mailing these first letters, your payment will arrive shortly, thereafter. All you have to do is to order more free supplies and stuff and mail more envelopes to make more money.

Our sales literature which you will be stuffing and mailing will contain
information outlining our highly informative manuals that we are advertising nationwide. As a free gift you will receive a special manual valued at $24.95, absolutely free, just for joining our Home Mailers Program.

Plus you will get your own special code number, so that we will know how much you are to get paid. And to make re-ordering of more envelopes, that our company supplies very simple for you.

We are giving you this free bonus because we want you to be confident in our company and to ensure that we will be doing business with you for a long time.

Benefits Of This Job:

1. You do not have to quit your present job, to earn more money at home
2. You can make between $2,500 to $4,500 a month depending on the amount of time you are willing to spend stuffing and mailing envelopes
3. This is a great opportunity for the students, mothers, disabled persons or those who are home bodies.

To secure your position and to show us that you are serious about earning extra income at home we require a one-time registration fee of $35.00.
This fee covers the cost of your initial start up package, which includes 100 envelopes, 100 labels and 100 sales letters and a manual, your registration fee will be refunded back to you shortly thereafter.

Money Back Guarantee!

We guarantee that as soon as you stuff and mail your first 300 envelopes You will be paid $75.00 and your registration fee will be refunded.

Many of you wonder why it is necessary to pay a deposit to get a job. It is because we are looking for people that seriously want to work from home.

* If 3.000 people told us they wanted to start working from home and we sent out 3.000 packages free to every one. And then half of the people decided not to work, this would be a potential loss

of more than $60,000 in supply's and shipping that we have sent out to people that don't want to work

We have instituted this policy to make sure that you really want to work and at least finish your first package.

To Get Started Today Please Enclose Your Registration Fee of $35 Check,Cash Or Money Order and fill out the application below and mail to:

MOHW Co
PMB

Larry B wrote:

> Why did not the people at the new orleans covention know about the zorro
> problem ?

Because the award was announced BEFORE he was arrested. The Daily DX forwarded NOCXC's announcement re DX'er of the Year on June 8 and I'm not sure how much before this the NODXC made their actual release (the attached article implies May).

On June 18, W3UR broke the story in The Daily DX as follows:

"The June 16th issue of the Asahi Shimbun Newspaper reported the arrest of Japanese Amateur Radio operator Yasuo ï¿½Zorroï¿½ Miyazawa, JH1AJT. In October 1995 Hirohiko Daikoku, JG3QCW, holder of a first class license in Japan, allegedly had taken the second class amateur license test for Miyazawa using false identification. At the time JH1AJT was a fourth class ticket holder.

The Japanese PTT received a tip from someone close to Zorro and started an investigation in March of this year. The two men were both arrested on June 16th.

The JARL web page says that Fourth Class Amateur Radio Operators may operate all modes (except CW) running up to 10 watts on frequencies from 21 to 30 MHz and 8 MHz and lower.

Last month Zorro was announced as the 1999 New Orleans International DX Conventionï¿½s DXer of the year (see http://www.gnofn.org/~w5ru/DX_Cnex.htm). Over the years Zorro has been to many DX spots throughout Asia, Africa and the Pacific Ocean including 7O1A, XW30/XW30A, A51/JH1AJT, XU1A, XW8KPL, E31A and many others. During the 1998 Visalia International DX Convention he announced that he had been invited back to the Kingdom of Bhutan for another DXpedition. This operation was originally scheduled for early 1999 and has yet to happen."

> Why did not zorro come forward and discuss the problems with them
> himself ?

After he was caught, he apparently did and requested that his name be withdrawn, according to the announcement at the NODXC dinner.

> He was going to accept the award if offered, was he not ?

Who knows...ask Zorro!

2622. QSL question

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-09 00:00:00 UTC
From: Mark Cooper <coop@neotek.net>
Message-ID: <37D858EB.406F@neotek.net>
Source record: 23774

Hi folks. I was wondering what the initials QSL stand for? I know it is a signal reception report, but was wondering the exact meaning.

Also, what is the most common format you use when sending in a QSL? I've been thinking about trying some dxing, although I've only got a Grundig Yacht Boy to start out with.Perhaps I'll spring for a tabletop unit in the future.

Thanks for any help you can provide,

Mark

Hi Mark -- here is some history on the origin and reasons behind
Q- Signals:

"The Q Code came into being internationally in 1912 to overcome the
language
problems involved in communications by radio among ships and shore
stations of all
countries. The original list of 50 adopted by international agreement in
London contain
many which are still familiar to amateur operators: QRN, QRM, QSO; the
traffic
operator's QRK, QSY, and QRV - are now well past the half-century mark
in
continuous usage. QSL still has the official 1912 definition despite the
changed
informal usage in amateur parlance."

Also see URL:
http://ac6v.com/pagear.html#QZ

The military and amateur radio picked up on Q-signals as a means to
abbreviate the length of messages.

QSL back in the 40's meant " Can you acknowledge receipt? I am
acknowledging receipt." Used when handling traffic from point to point.

In SWL and Ham parlance -- it means a written card confirming a contact
or listening report. For example in Ham speak the phrase "QSL direct"
means send me your card to my home address and I will confirm this
report (by a return card). Some use it to mean "Do you understand", but
this is a kind of slang usage.

The letters in Q-signals do not stand for anything -- they are not acronyms or abbreviations -- but an arbitrary assignment -- from way back when.

For a massive list of Q-Signals from the 40's -- see URL:
http://ac6v.com/pagel.html

For commonly used Q-Signals see URL:
http://larc.unl.edu/qsign.html

For report writing there are two URL's to see both at URL:
http://www.ac6v.com/pagej.html#QSL

Has a tutorial and a recommended form.

Aslo SOS does not stand for save our ship or save our souls. It is simply three dots and three dashes followed by three more dots. For the history of this distress signal see URL:
http://www.qsl.net/ae0q/sos.htm

Side note: SOS was originally proposed as SOE by the Germans. A committee
decided otherwise -- due to the possible loss of a single dit (E)

Good QSL returns

Why What ?
With many of the foreign names you cant tell which is the first and the last
and for mailing purposes it would be nice to have it right the first time.

I dont think that the letters QSL stand for anything. Many years ago the Q code was started. And each of them had their own meaning. And QSL meant acknowledgment or roger or confirmation. So a QSL card means a confirmation of either working a station or receiving them.
You as a SWL can listen and log down the time (UTC), date (UTC) and freq and who they are talking to and mail them a letter and get back their QSL card.

QSL stands for "Quaff Some Lager", referring to a longstanding ham tradition of popping the top on a cold one after breaking the pileup on that rare new one.

Try sci.geo.satellite.nav
Good luck

2635. PicturePacket 1.41 available for download

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-10 00:00:00 UTC
From: Stan Huntting <stan@sni.net>
Message-ID: <7rbdo3vuj1@news-2.csn.net>
Source record: 23787
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

PicturePacket is a Windows95/98/NT control program for TNCs. In its Lite mode it's all the software many packet users may ever need, and it's free! Download version 1.41 from the SA Watch/KaWin/PicturePacket home page: http://www.sni.net/kawin/

PicturePacket 1.41 adds Internet DGPS Beacon mode for registered PicturePacket/Plus users. Now, any packet radio station can beacon DGPS correction signals obtained directly from the Internet. This beacon data is decoded by the receiving TNC to dramatically reduce the position error of GPS.

If I want a QSL I will always send an SAE + $ for DX and SASE for Stateside. In my 25+ years of doing this I've always received a card back. In return, I always QSL to those who do the same...immediately. I wish I could say the same for "BURO" cards. I've gotten so far behind that I've decided to save them for my "retirement years" and if the Ham is not a SK by then, he will get his card! Most of these cards were from the last sunspot DX chasing/contesting I did....when I was single! Wih family obligations now it gets harder to even find the time to operate, let alone go back through the cards and reply....many of which are from the same person...but different bands for a contest.

I don't think the "snail-mail" card will ever vanish, since it truly is like stamp-collecting. But like others have commented, I think for contest ops that generate a zillion contacts, some kind of electronic confirmation should be acceptable.
73 es good DXing

You hit that one on the head Walt, nice seeing you on again.

Notice that the newspaper will not supply a copy of the original articles text as there are reports that it never contained anything regarding Zorro's amateur radio license.

There is just too much data known to be false that has been spread.

I would hate to be the spreaders of this bad news as I know USA lawyers have been already retained to track the comments.

Hello...

This is HL4CAN from Kunsan Korea.
Now I am running my HF station in Kunsan for 18 years.

And I am looking for some friends who can do share our interests and who can do QSL manager service for me in USA 7 area. My american call is KJ7PV with Advanced license.

I am running HF station with TS520X running 100W and Ground Plane antenna. I just tunned my antenna in this afternoon. After this, I got a contact with KC1XX for 56 report from the east of USA. So great!!

Looking for any mail from any country ...sharing our friendship!

I was born in 1962, single business man.

The 'Q' codes were introduced in the early days for telegraphy (Morse).

a) At the completion of a transmission "QSL" would be sent. (Do you acknowledge receipt?.)

b) If the transmission was fully understood "QSL" was the response. (I am acknowledging receipt.) Otherwise "QSM" was sent. (Repeat your last message.)

Easy and quick - no superfluous keying. Nothing to do with sending cards; QSL ***cards *** are something different from the "Q" codes.

Whether or not the Q codes are appropriate to phone traffic is often debated; but if they are, to confirm receipt of specific information (signal reports, numbers, or anything else needing confirmation), the voice exchange "QSL ?" by the sender, and "QSL" by the recipient does not debase the meaning of the codes. Using them in this context is economic of bandwidth too. No waffle.

Best wishes (or 73 if you prefer),

--
Dennis Rodgers GM4CKF, Nairn, Scotland.

Ohio/Penn DX Bulletin No. 426

The Ohio/Penn DX PacketCluster
DX Bulletin No. 426
BID: $OPDX.426
September 13, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WF1N, WB2RAJ/WB2YQH & The 59(9) DXReport, K3TEJ, W3HC, KF4OOX, K5OVC, W5FKX, W5KFT, K8YSE, AH0W/OH2LVG, DJ5AV & DX News Letter, EA2BUF, EA5BY, EA5BD, EY8MM, F6AJA & Les Nouvelles DX, G4ZVJ, HB9CYN, LA9VDA, OH6LI, ON7GB, OZ5AAH, RW3AH, UT5RP, UX0FF, VE3ZZ, VK6HD and VK8NSB for the following DX information.

3B8, MAURITIUS. The French DX Bulletin "LNDX" reports that ON4LAC will be active as 3B8/ON4LAC from October 1-28th. He will operate on SSB on 20, 17, 15, 12 and 10 meters.

3C0R ANNOBON DXPEDITION. By the time you read this, the DXpedition team SHOULD be on the island. From a press release by Tony/EA5BY, the DXpedition crew departed from Alicante airport Sunday, September 12th, at 0430z and arrived on Sao Tome on Sunday night. They will depart from Sao Tome to Annobon on Monday morning. It was reported that the generators, fuel, food and some hardware arrived safely on the island over the past week. Tony states that he will announce the operation starting time on Tuesday via the InterNet and DXClusters. They will have four operating stations. The team was provided with propagation charts for the following areas: USA West-Mid-East Coast, Caribean, South America, Africa, West-Central-Eastern Europe, Mid Asia, Japan, Alaska, Hawaii, South Pacific and Australia. The suggested operating frequencies will be:
SSB - 28395, 24945, 21295, 18135, 14195, 7065, 3799 kHz (They will announce their QSX during the operation.)
CW - 28025, 24895, 21025, 18075, 14025, 10105, 7005, 3505, 1833 kHz.
RTTY - 21085, 14085. (for the moment).
Operations on 6 meters will depend of propagation. They will try 50110 kHz. ALL the antennas are donated by CUSHCRAFT thanks to BIT RADIO - EA3NY. They will test the NEW model MA5B during the expedition. The QSL information is: EA5FVY, Angel Garcia Mendoza, P.O. Box: 3045, 03080 Alicante, Spain. All QSLs received via Bureau will be answered after direct QSLs. There will not be log-chek via InterNet during the expedition.

They will post them after it. Any questions or comments are welcomed at:
galiana@jet.es
Details on the 3C0R DXpedition can be found on the WEB site at:
http://web.jet.es/lynx

4U1ITU. Look for Miquel, EA5FFC, to be active from ITU-HQ September 13-24th. He plans to be active on all bands including the WARC bands CW/SSB. QSL via 4U1ITU.

9M6, EAST MALAYSIA. "The 59(9) DXReport" reports that Phil, G3SWH, plans to be active as 9M6PWT from Sabah November 3-12th. QSL via homecall.

9X, RWANDA. Beginning September 15th, the special field club station, which belong to the Russian Amateur Radio Emergency Service RARES will once again be activated for the next several months. This station was orginally activated by Andy/RW3AH in 1997-1998 as 9X0A. Look for Vladimir, RE3A, to be active as 9X/RE3A from this station. Vladimir Legoshin is a well-known Russian rescuer (lifeguard) from the Ministry of Emergency situations and Civil Defense and has operated in 1996 as 5H/R3ARES from Tanzania during the UNHCR and EMERCOM humanitarian actions for the Rwandies refugees in Tanzanian camps. Vladimir's mission to Africa is to create a school for local rescuers (Lifeguard school) which is supported by UNDP-EMERCOM (a joint project). Vladimir is leader of the Russian team who will stay there for several months. The school location is near Nyanza village in the center of Rwanda (Same QTH as 9X0A). All HF equipment was granted by Andy/RW3AH and has been installed there earlier. The antenna is a TH3mk4 from "HyGain". The transceiver is a FT-900 and a Henry Radio Amp is there and only works on 14-21-28 Mhz (the 7 and 3.5 MHz needs work). It has been requested to "Please NOT call Vladimir during his operation on the daily RARES Net." Check out the Web page: http://www.qsl.net/rw3ah/eng/e_re3a.htm

A3, TONGA. The "DX News Letter" reports that Klaus/DJ4SO and Manfred/DJ7RJ will be active from Fafa Island (OC-049) as A35SO and A35ZL between September 27th and October 27th. They intend to operate in CW, SSB, RTTY (also PSK31) on all HF bands and 50 MHz. QSLs via homecalls (direct or via bureau). Also see ZK2.

ATTENTION POLICE AWARD HUNTERS (This is a CODE BLUE). Ben, OZ5AAH, (ex-OY5IPA, OX3IPA, TF/OZ5IPA, LA/OZ5IPA, HS0/OZ5IPA and E44/OZ5IPA) is on the move again. From 1100z November 5th until 1100z November 8th, including the IPARC Contest (November 6th 0600-1000z and 1400-1800z [CW] plus November 7th 0600-1000 and 1400-1800z [SSB]), he will be active as SM/OZ5IPA. He requests to PLEASE, PLEASE notice in the contest hours PRIORITY to other police radio amateurs and contesters (the contest is open to all hams). QSL OZ5AAH Ben, 9 Knoldager, 2670 Greve, DENMARK direct only. Contest information can be found on the Web page at: http://www.iparc.com Outside contest hours look for Ben on the WARC and low bands.

C6A, BAHAMAS. Look for Ed, WA3WSJ, to be active as WA3WSJ/C6A from Abaco Island (NA-080), November 23-30th. His activity will be QRP on all bands CW/SSB. Also, look for him in the CQWW CW Contest. QSL via homecall.

EY11, TAJIKISTAN. The Tajik Amateur Radio League is planning to use the special callsign EY11OO (EY11 Oscar Oscar) to celebrate the 1100th anniversary of the first Tajiks-State of Samanids which was found by Ismoili Somoni. Special activity is planned on all 9 HF bands CW, SSB, RTTY, PSK31, SSTV through the end of September. QSL via DJ1SKO.

FO0, AUSTRALS AND FRENCH POLYNESIA. Marcel, ON4QM, is on his way to Tahiti where he will take a boat to Raivavae (IOTA OC-114) in the Australs group. He expects to be active as FO0DEH with 100 watts and SSB only around September 17th for at least two weeks, possibly even 2 months. Depending on transportation facilities, he may also travel to OC-131 and/or OC-051. IOTA OC-051 is Rapa Island and also belongs to the Australs group for DXCC credit. He will use an Icom IC-706 and a Cushcraft R-6000 vertical. Additionally, he may take an 80 meters dipole with him to erect in between some coconut trees if there are any available. QSL via the bureau or direct to: Marcel Dehonin, Eversestraat 130, B-1932 Saint-Stevens-Woluwe, Belgium.

FP, ST. PIERRE AND MIQUELON. Henry/KE1AC and Tony/LA9VDA will be active as FP/LA9VDA from October 20th to November 2nd. Activity will be on 160-6 meters. Modes to be used will be CW, SSB, RTTY and SSTV. They will try to get a FP5 callsign for the CQWW SSB contest. QSL via LA9VDA with SASE to: Trond Johannessen, Helgedalen 13, N-1528 Moss, Norway.

HS0, THAILAND. Don, G3VFU (ex-A92BE and A45XU), has been here since May on a work assignment (length of stay is unknown) and has been active as HS0/G3VFU from a friend's station (TS-950s and a TL-922 linear). He is currently trying to get his own station approved by the authorities. Meanwhile, Don will try to be active once a week from his friend's QTH. Check 14200 kHz between 1330 and 1500z. QSL via W3HNK.

IOTA NEWS.....
NA-046. Gregg, VE3ZZ, will be active from the island of Martha's Vineyard, Mass. (USI MA-005S) from September 26th to October 6th. He will be looking particularly for Europe and Asia on normal IOTA frequencies. In addition, a short operation from Chappaquiddick Island (NA-046 and USI MA-004S) is planned for either October 2nd or 3rd, if there is interest. QSL to VE3ZZ via the Bureau or direct to P. O. Box 1345, Ottawa, Ontario K1P 5R4 CANADA.

NA-148. Tony/WF1N and Lou/W1DIG will be on the Isles of Shoals, Appledore Island, September 17-20th, starting around 1900z Friday and ending about 1200z Monday. Operations will be on 20, 15 and 10 meters, on/near the usual IOTA frequencies, SSB. QSL direct (sase, pse) or Bureau via home calls. Any questions, E-mail Tony at: megahertz260@mindspring.com

LIGHTHOUSE ACTIVITY. David, CX5ABY, President of Radio Apoyo Castillos, located in Castillos city in Uruguay, reports that they have planned to activate two ligthouses, the Polonio Ligthouse and La Paloma ligthouse. Times/Days/Callsigns/QSL information were not given, but keep a look out for them.

OH0, ALAND ISLAND. Jukka, OH6LI, informs OPDX to look for OH0V to participate in the Scandinavian Activity Contest (SAC), CW, September 18-19th, 1200-1200z) in a Multi-Multi category with the youngest M/M team ever. The average age is 28 years. Suggested frequencies will be: 3507, 3527, 7007, 7027, 14027, 21027 and 28027. Various callsign will be available outside the contest hours mainly on WARC bands. QSL via bureau/OH4JLV or Antti Tiittala, Akselinkatu 14A, 57130 Savonlinna, Finland

QSL INFO AND NEWS.....
NEW ZIP. NIKOLAY, UX0FF, reports that he will still be active with his personal special contest callsigns ER0F (from MOLDOVA) and EO6F (from UKRAINE). However, September 1st he will have a new ZIP code. Please, now QSL his QSOs via UX0FF, Nikolay Lavreka, P.O. Box 3, Izmail, 68600, UKRAINE.

MORE TO ADD ON NEW ZIP. Dima/UT5RP Post system has changed the ZIPs in their country. He mentions hams
in the Odessa and Region areas need help to get the word out to change databases and callbook addresses.

EA2BUF/3 was active from Medas Islands (IOTA EU-078) in August. QSL EA2BUF/3 via EA2BUF.

Mac, W3HC, reports new routes for BA1DU/7 and RA3OU go to W3HC.....

Frank Smith, AH0W/OH2LVG, reports that they are still pumping out lots of QSLs for 3B9R with at least 10,000 to go. They appreciate the nice compliments on the card as well as everyone's patience. Also, he would like to request that if you haven't requested your card yet, please do so soon. They would like to receive all card requests by October 31st, if possible for 3B9R as well as any outstanding requests for AH4/AH0W, K7K-Kure and K4M-Midway.

Michael Bondarev, UA6LU, President of Rostov-on-Don region radioclub (FCC), states, ".... that license of RV6LAH is not released to anybody. Stations EP3LAH, EP/RA6LGM (via RV6LAH) and EK1X (via RV6LAH) are pirates. PLEASE do not make QSOs and do not send QSLs! Save your money!"

MORE ON VK POSTAGE RATES. Mike, VK6HD, provides OPDX with the following: Beginning October 4th, airmail to the USA...now $1.05 goes up to $1.50. The new rates are: Asia/Pacific $1.00 and the rest of the world $1.50. On the plus side, postcards can be sent world-wide for $1.00...provided there is only one card. Also the new $1.50 rate allows an increased weight up to 50 grams. One IRC will still buy one unit of airmail postage...$1.50.

V2, ANTIGUA AND BARBUDA. Look for John/K3TEJ/V26KW and Bud/AA3B/V26K to be active from November 23-30th from Antiqua. They will participate in the CQWW CW Contest using the callsign V26K. QSL V26K to AA3B, and QSL V26KW to K3TEJ.

V3, BELIZE. Several members of the Delta DX Association will again activate Ambergris Caye (NA-073) on October 7-12th. Returning operators are Mike/W5ZPA (V31MP), Wondy/K5KR (V31KR), and Stan/W5JYK (V31YK),

joined by Don/W5FKX (V31KX). Plans are to operate 80-10 meters on CW, SSB and RTTY, with a possibility of some 6 meter activity as well. An attempt will also be made to activate one of the Turneffe Islands (NA-123), if transportation can be arranged. QSL via home callsign.

VK8, CROKER AND MELVILLE ISLANDS (Update on Rare IOTA DXpedition). Stuart, VK8NSB, reports that Peter, ZL1HN (Extra class operator), will be joining the DXpedition team of Stuart/VK8NSB, Peter/VK8PDG and Allan/VK2NNN to IOTAs OC-173 and OC-229. This will mean that they will be on all bands (80-10 meters). They plan to have 4 HF stations running with two stations 24 hours. Modes that will be used will be SSB/CW/RTTY/SSTV and possibly some others. QSL via VK9NS. Please refer to OPDX.421 and OPDX.422 for more details or go to the Web site: http://www.rustman.com/IOTA

VP5, TURKS AND CAICOS ISLANDS. Chris/HB9CYV and Martin/HB9CYN will be active next from North Caicos from September 16-26th, as VP5/HB9CYV and VP5/HB9CYN. Activity will be 160-10 meters CW/SSB using a 1kW amp into Delta Loops, Inverted-Vee and beam antennas. QSL via home callsigns (bureau or direct). QSL policy for direct requests:
- Europe: at least 1 USD or 1 IRC
- Outside Europe: at least 2 USD or 2 IRC
- QSLs for requests with not enough return postage will be sent via bureau
- SAE required
Direct Addresses:
HB9CYV, Chris Zeller, Jaegerstr. 19, CH-8200 Schaffhausen, Switzerland
HB9CYN, Martin Ghermi, Wyden 5, CH-5242 Birr, Switzerland
More information and logs can be found at the URL address:
http://mypage.bluewin.ch/hb9cyn

W5 DX BASH. This event will be held on October 8-9th at Lake Buchanan in Texas. Bryan/W5KFT reports to OPDX that there will be lots of good programs, including remote operation of a station using the new Kachina computer radio, new Alpha products demo by John/W0UN, and demo set up for actual operation of the new Ten-Tec Pegasus computer radio. All the registration and other information is on the "W5 DX BASH" Web page at: http://www.dxer.org/w5bash

XE, MEXICO. Bela, N8SHZ, will be active sometime this month until mid-December as XE1/N8SHZ. His activity will be on most bands using a FT-100, DX70T and various antennas. QSL via homecall.

XU, CAMBODIA. Andy, G4ZVJ, reports to us that he will be in Cambodia from September 15th for approx. 10 days. He has applied for an XU licence, but his callsign is unknown yet. Activity will be CW only and QSL via G4ZVJ. After XU, he will be active as DU3/G4ZVJ and HS0/G4ZVJ up to October 6th.

ZD8V QRT. Paul, ZD8V/KF4OOX, reported to OPDX on Friday: "ZD8V is now permanent QRT. I have done 2860 QSOs and 674 QSLs are done so far. I have worked 134 countries. I may not have been the most active ZD8 but I think I did a fare job. I have tried to work as best as I could. I know in the face of some of the other DXepeditions these totals are very small but I

was not on a DXpedition I was here to work. And work I did. I also did as much hamming as I could...... Well So long from Ascension Island".....73's de Paul L Hutley, ZD8V/KF4OOX

ZK2, NIUE. Ater his A35ZL Tonga operation Manfred, DJ7RJ, will make a short trip to here from October 7-14th. This callsign is not known yet. QSL via bureau or direct to DJ7RJ.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to: kb8nw@barf80.nshore.org
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

To: All who worked A35LU in Tonga during 1999
Fm: A35LU/K1LU
Subj: QSL Cards

The A35LU QSL Cards WILL BE SENT SOON. We did not use computers for logging and transcription is not an easy part of the project.

Our logs are all safe and dry and we have all the incoming cards carefully stored. The logs will be transcribed in Q4 and cards mailed as contacts are verified.

Sorry for the delay and next time we will use computers!

73,
Len

Appreciated radioamateur operators:

I�m an operator that habitually transmit in the band of 11 meters.
I would request to an operator of a difficult prefix that had the kindness
to activate their country in the band of the 11 meters.
Is this possible?
Does somebody of the operators remember without license of HF?
I will thank to the possible activators some letters in my e-mail address.
sdniko@arrakis.es
Good Dx & 73!!!

2657. Conditions Lousy

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-14 00:00:00 UTC
From: thompson@mindspring.com
Message-ID: <7rme1j$3pl$1@nntp6.atl.mindspring.net>
Source record: 23709

The Solar Flux goes up but the past few days so does the A index (23 now 31 yesterday).
Negates the High SF! Conditions only North South on 21, 24, and 28Mhz limited EU
on 17 and 14Mhz. Sure does not sound like Mid September.

Would have tended to agree with you until 11:00 this morning<g>. After a fairly successful QSO with a Swiss station on 18MHz (albeit with severe QSB) I called a CQ on 15 CW & got a little pileup of southern Europeans. Couple of UA6s coming in up the band too.

Nothing north of Hungary on 15 though. It's certainly not the best sunspot cycle ever...

Hi,

I heard 6PW on 10m in qso with a G0-station this afternoon.

According to the ITU-list, 6P belongs to Pakistan. But 6PW sounds so unnaturally to me. A strange combination of a one-letter suffix, combined with the fact that the AP2-prefix is widely known to be originating to Pakistan, this 6PW-station puzzles me.

Is this a special suffix allocated to foreigners or special people ?

I logged AP2JZB earlier this day, and that's at least a regular call :)

73,
Robert.

Greetings Rusty, others..

I *am* interested in why you think the Radio Amateur's Callbook CD is superior to the rest. Could you site specific examples where this edition exceeds your expectations relative to what else is on the market..

I'm in the market and looking for what would be considered a 'better than most' callbook CD that is flexible regarding lookup and comprehensive regarding worldwide callsigns. Obviously, if it can be kept to one CD so much the better, however, if what you consider the best exceeds the capacity of one CD advise why it's superior..

Cheers,
Gary

To claim something is superior without sighting examples isn't helping too much..

Howdy Neighbors,

The NCDXF beacon system is an awesome resource. It's also lots of fun.
http://www.ncdxf.org/beacon.htm

We provide a download able software app called Active Beacon Wizard ++, or ABW++ to help listeners make easier use of the beacon network.

ABW++ displays the currently active NCDXF beacon over a topographic map, along with the solar terminator. Tools for setting the system clock, via the net, are also provided.

ABW++ will download and display selected, totaling 14, Space Environment Center (SEC) solar reports and forecasts. In addition, ABW++ provides the comprehensive SEC glossary of solar terrestrial terms. This glossary, along with report explanations, is provided in windows-help-file format and may be of use when interpreting the propagation reports and forecasts.

ABW++ requires win95 or later.

Look for the "Active Beacon Wizard ++" link at the URL below.

Greetings Jimmy, others..

You bet there's AM DX ! There's a LOT of folks that enjoy listening to distant cities on the AM broadcast band especially in the wee hours of the morning! There IS a radio still manufactured that you *may* want to look into regarding AM DX. This radio manufactured by GE is designed especially for the more serious AM radio listener of distant stations. This radio is called the GE Superadio III and I've found a rather good picture of it at Bob Grove's Web site.

Jimmy, in addition, there are commercially manufactured loop antennas that will work with nearly any AM radio put next to it through inductive-coupling. The Select-A-Tenna I have personally used *many* years ago and it was truly amazing what this loop would do for commercial AM broadcast stations. In fact I believe it helped me on my way to eventually becoming a radio amateur as a kid. At the time I was putting it next to a portable radio and it was doing wonders! The following URLs show what varieties *are* available to those that enjoy some AM DXing.. Jimmy, sincerely, I don't work for Grove however, after picking up a few of the Monitoring Times magazines (for SWL frequencies and times) and seeing his advertisements inside, I remembered that I had seen some loop antennas. Called it up on the Web and, low-and-behold..

GE Superadio III:
http://www.grove-ent.com/RCV5.html

AM Loop antennas along with a few active varieties:

Greetings Jimmy, others...

One last thing I forgot to mention is if your *really* interested in weak signal commercial broadcast AM stations - you'll want to stay away from ANYTHING that's 'digitally' controlled or computer enhanced. Reason is that the sheer RF hash that's created by the internal computer chips AND (quite often) the display itself will all too often raise the noise floor so much as to make the really weak ones wash out in the background noise. While this has become less of an issue with the latest amateur radio gear, the portable AM type radios aren't usually designed under the same criteria as the more selective / sensitive amateur gear. As such, the portables tend to be more susceptible to being interfered with by stray RF from computers. Further, any local computer equipment, no mater how RF tight it is will often wreak havoc with AM reception. Therefore, I often turn off the computer when I'm interested in listening to the other side of the country on commercial AM broadcast. Thereby *not* getting a consistent whining sound in the background. By the way, one of the many reasons that the old tube type radio gear (receivers included) is sought after by some DXers is all the noisy RF harmonically rich square wave generators (better known as microprocessor based electronics) simply isn't in there (or NOT-Ragu). This is of course relative to the many of todays designs - which, as mentioned, is getting MUCH better at shielding that internally generated RF.

To prove my point, take your hand held AM portable radio and tune in a rather distant station and set it next to your computer case while it's on. Then move it around the case. Then shut the computer off.. Notice a bit of a difference..?

Have fun and enjoy..

Cheers,
Gary

Howdy,

You are invited to my non-commercial, sometimes boring, hopefully useful, and always-undergoing-updates website. The URL is http://hfradio.org and features:

- DX information, including QSL Route/Manager Lookups and Callbook Lookups
- Propagation Center including the eAlert service (allows you to sign up an email address to the automated email propagation reports)
- Equidistant Azimuth Map software (allows you to create maps of any QTH)
- Swap and Shop
- Bookstore (I've hand-picked over a thousand book titles on radio, etc.)
- Free website space for YOU to create your own Ham or SWL site

There's more. Easy to navigate. Open for suggestions. And there's no "light left on for ya" -- since there's no need for a light. If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

2670. CW reception questions

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-16 00:00:00 UTC
From: Jean Barto <jbarto@mindspring.com>
Message-ID: <7rrvii$3mt$1@nntp6.atl.mindspring.net>
Source record: 23722

Hello--

I'm new to the newsgroup and wanted to ask a question about reception the last couple of days.

I have a new radio--the Sony 100--that I bought primarily because of its very small size. I've been fairly successful in picking up the NC/SC emergency frequencies on 41 and 75 meters--but have difficulty in picking up any VA stations (I've only picked up one that I was able to get a clear signal with). I live in SE VA, and was interested in listening to the VA hams, especially during the hurricane. I've been switching between USB and CW/LSB, and although I know that a station is transmitting, the transmission is garbled, or weak, or both.

I'm using either the radio's "active antenna" when I'm on battery power, or just the radio's own antenna when I've had electric power.

Is it a case of being too close to the VA stations, or something inherent with my antennas/radio?

I've just now ordered the "Now You're Talking" book from the ARRL, so I realize that the answer to my question is probably in there--but since it will be a week or so before I get the book, I hope someone can answer my question now, so I can listen to the tail end of the hurricane traffic.

Thanks--

Jean Barto
Newport News, VA

Source record: 23723

Hi Jean!

You are actually about as close to the NC stations as VA stations from your location, so there is no reason you should hear a difference in them from a propagation standpoint. It may be that you have not found a hurricane net for VA (I would try 3.950 MHz since I believe it was restricted by the FCC for all hurricane traffic). By the way, most hams use LSB on 7 MHz and below and USB on 14 MHz and above, so you should set your radio to LSB for all stations on the 80 meter nets.

Good luck with your ham ticket!

73, Bill W4ZV
New London, NC (Where it was sunny and clear as a bell after Floyd today!)

2672. Re: CW reception questions

Newsgroup: rec.radio.amateur.dx

Message-ID: <37E1806A.2A1E868F@alum.MIT.edu>
Source record: 23725

> Here are the correct frequencies to use per the FCC bulletin:

NEWINGTON, CT, Sep 14, 1999--At the request of the ARRL, the FCC has declared a voluntary communications emergency requiring the protection of Amateur Radio emergency communication frequencies. It is requested that these frequencies, plus or minus 3 kHz, be protected: 7242 kHz (daytime) and 3950 kHz (nighttime) for emergency traffic only in the
Florida Area; 3993.5 kHz for emergency traffic only and 3915 kHz for health and welfare traffic if necessary in the South
Carolina area, and 7275 kHz (daytime) and 3975 kHz (nighttime) for emergency traffic only in the Georgia area.

On 40 meters, it may be that you are in a skip zone (for stations over about 100 miles away) but that should not
be the case on 75 meters.

2677. Seeking info on portable Panasonic radio

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-18 00:00:00 UTC
From: jlnordbo@facstaff.wisc.edu
Message-ID: <7rvlas$hr8$2@news.doit.wisc.edu>
Source record: 23729

Greetings! I would very much like to get some information on a radio I used to own. It's a 1970's era Panasonic portable. I do not remember the model number. By the description I've sent to several newsgroups and radio club sites, I've been told I am describing an RF2200 or RF1150. Now that I have seen a picture of the 1150, I know that's not it. The radio I am looking for is very similar to the 1150, but probably a bit less 'upscale' than the 1150. I am thinking that it was a fairly good radio for MW DXing and would love to get my hands on one.

Below is a description of the radio I am looking for:

It is a portable Panasonic AM/FM (&SW) radio manufactured in the '70s. Dimensions are *about* 10x10x2. It was all black and had a large (about 8-9") speaker on the "front", with volume, treble, and bass knobs on the "top" (not at the top of the front side of the radio, but on the top of the radio. I can't remember where the tuning knob was--probably on the "side"--but the analog dial was on the "top". Also, the three (?four?) position toggle switch for changing bands was on the "top". It had a sleep timer down toward the bottom on one side. I think it had a squelch control knob (somewhere--on the other side??). It also had a removable and adjustable nylon handle/shoulder strap. I think it retailed for about US$99, but this is a guess.

The main diffrence that I can tell from the picture of the 1150 and the radio I had is:

Mine had:
-no rotating ferrite bar antenna -- I think it must have had only a telescoping antenna

-most controls on the"top" and "sides"; the speaker takes up most of the surface area of the "front"

-removable nylon shoulder strap (I didn't see this in the picture but I guess that doesn't prove that the 1150 *doesn't* have one...)

-all black finish

I would very much appreciate any information about the radio I have described. Specifically, the model number and if possible, information about where I can see a picture of it so that I know it's the one I am looking for. Once I know the model number, I can start 'shopping' for one.

Thanks in advance for your assistance!

Regards,
John P. Nordbo

I am clearing out the ham shack of all my QST magazines once again. If anyone is interested, I am selling
1992-1998 at $1.00 ea. (you pay shipping costs however you want them shipped). If you
are interested in over 12 issues or the entire collection, make me an offer. I am willing to ship anywhere on
this planet so long as you are willing to pay the shipping costs.

Here are the issues that I have:

QST

1992 Jan - April $1.00 ea.
1993 Jan - Feb & April - Dec $1.00 ea.
1994 Jan - Oct & Dec $1.00 ea.
1995 Jan - Dec $1.00 ea.
1996 Jan - Dec $1.00 ea.
1997 Jan - Dec $1.00 ea.
1998 Jan - Dec $1.00 ea. (May issue is missing page 73)
1999 Jan - Current $2.50 ea.

All the issues are in perfect condition with no ripped pages or covers. Sorry I don't have anymore, but the last
time I did this in 1993, I sold all my 1989 through my 1992 issues less a few months still available.
If you would like to check my references, please feel free to do so. I am on Ebay and my user ID is: Andrew45
http://cgi2.ebay.com/aw-cgi/eBayISAPI.dll?ViewFeedback&userid=andrew45

2679. What is the new MSY TelNet Cluster Address?

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-18 00:00:00 UTC
From: mike.luther@ziplog.com
Message-ID: <ru7q9ctklg775@corp.supernews.com>
Source record: 23731

Would someone be so kind as to post here, or send me by email, the
newer telnet port address of the MSY cluster? I never paid any attention
to the "high speed" port announcement. Stupidity has its own reward. :(

--> Sleep well; OS2's still awake! ;)

Mike.Luther@ziplog.com
Mike.Luther@f3000.n117.z1.fidonet.org

2680. doesn't anyone know their own call?!

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-18 00:00:00 UTC

GEEZ!

I just gave up on working 3C0R. (15 CW, about midnight UTC Sat.
night/Sun. morning) I can hear them just fine. (except when someone
forgets to press SPLIT; the error-prone operator is no problem, but the
pileup of "UP LID" stations clobbers the 3C0...) But they're listening
over about 25KHz of the band, and there's no way to tell where in that
25KHz segment they're listening.

Why?

Because every time the 3C0 stops transmitting, at least a third of the
pileup calls him:

TU 3C0R
<pileup>
9NM? 5NN
<KV8H KV8H><WB7TKB><KV8H><W1IQT><WY8F><KH6HJ>
WB9NM? 5NN
<W3BA><W3RDW><W3BA><N3YK><W6VCV><W5BZG><NR4F>
WB9NME TU 3C0R
<repeat>

Hint: DON'T CALL THE DX UNLESS YOU'RE REASONABLY SURE HE CAME BACK TO
YOU!!!
DON'T CALL A DX STATION ON CW UNLESS YOU CAN COPY CODE!!!
IF YOUR CALL IS K8TAM AND THE DX STATION SAYS "W6OTZ 5NN", HE DOESN'T
MEAN YOU!!!

That way, those of us who *can* operate CW can figure out where the DX
is listening, and stand some chance of working him...

Disclaimers:
1. I made up the calls of the "lids" above. If one of those calls is
yours, sorry, I didn't mean you...
2. I was "shouting" on purpose...

19 Sep k9yo (2309Z) : 3C0 is a mess with traffic cops.. ham radio sucks

Cedric, hush. This is ham radio; if you're under 50 you're not allowed
to speak. You must kiss the asses of old fart geeks, even if they've
worked 3C0R on 5 bands already. Didn't you read that part of the ARRL
licensing books ? Now send in your QSL card with the 18,000 dollars the
Spaniards ask for on their site and go stand in a corner.

AF4Y 14025.0 K9YO If U cant stand it get out of 2318 19 Sep

Just another bureacrat authoritarian, on the public dole at the Center
for Disease "Control". I recall the only thing they control is the flow
of information to prevent the public from knowing the truth about
dangerous situations.

He must think he's at work still, and the truth expressed by Cedric
hurts.

Now the rest who will die or suffer permanent mental scars if they don't
work this expedition:

I was particularly offended by a certain WB9 mobile station that started calling CQ just above the 3C0R's
transmit frequency (he was very loud on the west coast). When asked to move a little, he went into a tirade
about the amount of band used by the DX-pedition.
This is a fairly common excuse used to justify intentional jamming of DX-peditions. It's based on the idea
that rag-chewers are, somehow, more deserving of the band than DX'ers. That since they use a particular
frequency often they are entitled to it. Of course, the rules state otherwise on both points.
In fact, from the point of view of band utilization, DX-peditions are more deserving. Let's say that there are
about 1000 guys in a DX pile-up for a major DX-pedtion (not unreasonable considering the number of qso's
for one of the large operations). On 20 meter the DX-pedtion would probably be listening from 14.200 to
14.230 that's 33 stations per Kilohertz. If you compare that to the average rag-chewers' utilization, 2 to 4 guys
per qso space about 3khz apart over 30 Khz would be 40 amateurs max.Only about 1.3 stations per Kilohertz.

True, though I should say the people yelling at the WB9 were a much
bigger problem than the WB9. If everybody would simply ignore the WB9,
we'd all be better off...

Those calling split do need to take a quick listen & make sure they're
not about to call on top of an existing QSO. (which happens too often)
That said, nothing in the rules says you're entitled to an open spot in
the band for a regular QSO, or even your weekly schedule...

SB DX @ WW $OPDX.427
Ohio/Penn DX Bulletin No. 427

The Ohio/Penn DX PacketCluster
DX Bulletin No. 427
BID: $OPDX.427
September 20, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, WF1N, AB2E, WB2RAJ/WB2YQH & The 59(9) DXReport, N4GN, KG6AR, N6RT, K8YSE, KE9KD & DX Central, CT1END, DJ5AV & DX News Letter, HA0HW, IK0AZG, JI3DST, JY4NE, LU3FCK, OH1EH, OH3LQK, OZ1ACB, PA3BWK, PY1KS, S21J/KF6WJY, SM0BFJ, SV1DKL/EX, UU2JQ, Z32ZM, 4X1VF and 9A3ZG for the following DX information.

9A, CROATIAN ISLANDS (IOTA and IOCA activity). Frane/9A5V, Matko/9A3VM, and Fredi/9A5KV, who activated the island of Kolocep (which counts as CI-038 for Croatian IOCA Award) this past weekend, will activate the island of Lopud (CI-057) September 24-26th. By the way, both islands are also valid for the IOTA award too (as EU-016). Activity will be on all bands. QSL to home callsign. Some may remember Frane was active in the 1999 IOTA contest as 9A2FK/p from the island Sipan (CI-120, JN82WR). He made some 800+ QSOs.

9H, MALTA. Wilko, PA3BWK, will be active as 9H3R now until October 1st. He states that most of his activity will be 20 kHz from the lower band edges. No QSNs were reported as this bulletin was being prepared. QSL via PA3CBU or via bureau.

9M6, EAST-MALAYSIA. Brett, VR2BG, will be on active as 9M6BG now until October 4th. His activity will be CW on 160-6 meters including the WARC bands. Over the past weekend Brett was heard on 20/17/15/12 meters between 2300-0400z.

C6, BAHAMAS. Look for Gary/KI6T, Glenn/WR6O and Salvatore/KA6WHA to be active as homecall/C6A between October 26th and November 1st. They will all be active as C6AGS in the CQWW SSB Contest as a Multi/Single entry. QSL C6AGS via KI6T.

E4, PALESTINE. Ayar, OZ6ACD, will be active as E44/OZ6ACD from Hebron again. The length of his activity is unknown at this time. No QSNs have

been reported as this bulletin was being prepared, but his operation was to have started as of September 17th. QSL via OZ1ACB.

HI, DOMINICAN REPUBLIC. "The 59(9) DXReport" reports that Julio, AD4Z, will be active between November 26th and December 3rd as HI3JH. Also, look for him as HI3K in the CQWW CW Contest. QSL via AD4Z.

IOTA NEWS.....
AS-041. Takeshi, JI3DST, will be active as JI3DST/4 from Oki Archipelago (Oki-Gun Shimane), beginning at 0800z September 23rd, lasting until 2200z September 25th. Activity will be on 17/15/12/10 meters (40/80 meters SSB for JA). QSL via the JARL Bureau or direct to: Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021 Japan.

AS-067. Takeshi, JI3DST, is planning a trip to Uji Archipelago in October with JA4PXE AND JF6WTY.

AS-100. Jan, 4X1VF, reports that he will lead a group of hams to operate from Akhziv Island, October 23rd. They will use the callsign 4Z0A. They will have 3 stations active between 0530-1400z on 10, 15, 20 meters CW/SSB. They are obliged to leave the island before dark. QSL via 4Z5DW, Leon Cherbakov, P.O.BOX 489, Hadera 38104, Israel

NA-148. Tony/WF1N and Lou/W1DIG had to cancel their operation scheduled for Sept. 17-20th due to Hurricane Floyd. Storm surges would have made landing difficult and/or unsafe even after "Floyd" has passed! They cannot reschedule the operation until next year.

LU, ARGENTINA. LU4FM will be active in the next CQWW RTTY Contest as a Multi/Multi entry. This will be the first RTTY contest from this station.

NOW STATESIDE. Mamtaz, S21J/KF6WJY, reports to OPDX that he is now stateside in Albuquerque, NM. Her husband Saif, S21A/KF6WJZ, is working in the U.S. Her daughter Maria's (age 15) callsign is S21JA/KF6WJX, and she is also stateside. Mamtaz wants everyone to know that they have a Web site at: http/www.geocities.com/Paris/Metro/6949/index.html
You can also contact Mamtz via E-mail at: mamtaz _s21j@yahoo.com

OH0B, "MARTTI IS BACK HOME"! The following is a press release from Tim, N4GN:
"OH2BackHome - and to go to Aland Islands, OH0B"
Martti has returned to his native Finland after his almost 6 years in Asia--and several new DXCC counters and contest operations under his belt.

But he will not stay long; just pack up and proceed for another outing in Aland Islands, launching a new callsign OH0B. They have re-built their original site with multiple direction antennas on all bands. Array Solutions, WX0B, has furnished their station with a two-radio operating automation.

Why not welcome Martti back home this coming weekend? He will run
24-hours non-stop in the SAC SSB Contest, starting 12 UTC on Saturday.

QSL via OH2BH CBA address: Martti J. Laine, Nuottaniementie 3D20,
02230 Espoo, FINLAND

OH0, ALAND ISLAND. If you missed last weekend's OH0V and OH0Z operations
you will have a second chance. Pertti, OH3LQK, informs OPDX that he and
others will be active September 25th through October 2nd, on 40-6 meters
CW, SSB and RTTY. Look for the following (along with QSL routes):
Pertti/OH0LQK via OH3LQK, Alpo/OH0MFP via OH3MFP, Markus/OH0KCB via
OH3RM and Jari/OH0/OH6LGM via OH6LGM. QSL via the Bureau is OK.
Just a quick reminder! OH0Z will be on the air during the SAC SSB Contest
September 25-26th. Station operated by OH1EH on 80-10 meters. QSL via
OH1EH: Ari Korhonen, Kreetalank. 9, FIN29200 Harjavalta, Finland. For
more information on OH0Z, check out: http://www.qsl.net/oh0z

PY, BRAZIL. Alex, PY1KS, reports that he will be active in the CQWW RTTY
Contest September 25-26th as a Single Op/All Band Low Power entry. He
states his best band will be 10 meters.

QSL INFO AND NEWS.......
Spyros, 5B4MF, reports to please remove any reference to IK8DYD because
he has not been Spyros's QSL Manager for many years now. Also, please
remove any reference to G0KUB because this was his old callsign in the
UK from 1988-92. QSL only to his new number/code of the Cyprus Post
office at: Spyros Stavrinides, P.O.Box 29129, 1621 Nicosia, Cyprus. By
the way, the above information applies to H22H (his contest callsign),
C40A (old contest callsign), H25MF and 5B25MF (old special callsign).

NEW QSL MANAGER. QSLs for OX3LG now go to OZ1ACB. Allis, OZ1ACB, reports
that if you have already sent QSL cards direct or via bureau, do NOT
send again, as he will answer all cards within the next month.

NEW QSL MANAGER. QSL E44A, JY4NE, OD5/JY4NE, and ZC6A now to KB6NAN:
Dianna R. Killeen, P.O. Box 911, Pescadero CA 94060-0911

J41DKL AND J41Y QSL CARDS OFF AT BUREAU. Efstathios, SV1DKL/EX, reports
that he finally received the full colored QSL cards from the printer
after a misunderstanding with the typographer. These cards are for
Efstathios last year's special callsigns (J41DKL and J41Y) where he
participated in the CQWW and CQ WPX Contests. He informed OPDX that
all cards should be finished for mailing by the end of last weekend.
All QSLs will be ready to be delivered to the bureau of SV1SV, in the
Radio Amateur Assn of Greece headquarters by Wednesday morning.

Mome, Z32ZM, informs OPDX that you can now QSL Z32ZM via I2JSB:
Giorgio Savini, c.p.55, Rozzano-20089 (MI), Italy.

The following new/updated logs are now online at: http://dx.qsl.net/logs
KH3/NH6D (thru September 10, 1999) OX3NUK (1999 IOTA Contest)
WP3C (thru September 7, 1999) TK/OE5XVL (May 1999)

"Please no cards via bureau", states Leif, SM0BFJ. Only QSL 5X1D, 9Q5TE and 9X/SM5DIC direct to SM0BFJ. Leif states he has received some cards via the Bureau, but did not mention what he is going to do with them.

SPECIAL EVENT. Carlos, CT1END, reports that special event station CR8END, in Massam, Portugal, will be active daily (during various periods of the day) around +/- 14.180 in order to inform the world about the Timor Loro-Sae tragedy. To help the Timorese in this very dificult times Carlos states all QSLs request will be paid out of his own pocket. All SASE received with IRCs/USDs will be converted in funds and put in the Timor Loro-Sae help fund Bank account. QSL via CT1END.

SPECIAL EVENT. GianFederico, IK0AZG, reports to OPDX to look for special event station IR0MFP (Millennium For Peace) on the air next September 23-24th (last 100 days to 2000). QSL via IK0AZG.

SPECIAL EVENT. Look for UU4JZB/P to be active on October 1-4th, during the international meeting of speleologists in Crimea on Chatyr-Dag mountain (1527m, LOC KN74DS), near Marble Caves (the most beautiful caves of the Europe). Activity is planned to be on all HF bands + 2m, CW and SSB. Operators are: Rusty/UU2JQ, Ken/UU2JZ, Yuri/UU4JQE, Mike/UU4JV, Toly/UU5JLW and Yuri/UU0JX. A special photo QSL and photo award with a beautiful view of Marble caves will be available via QSL Manager UU2JQ, Rustam R. Muhametzianov, Mate Zalki st.9-32, Simferopol 95053, Crimea, Ukraine. To qualify for "CRIMEAN CAVES" award, amateurs and SWL's around the world must collect 10 points. QSO with UU4JZB/P gives 5 points; UU1JA, UU2JQ ,UU2JZ, UU3JM, UU4JAA, UU4JQE, UU4JV, UU4JXL, UU5JLW, UU7JF, UU8J, UU9JT, UU0JG, and UU0JX - 2 points; other QSO with Crimean amateurs (prefix UU)- 1 point. Dupe contacts is valid on different bands or modes. All contacts since September 1, 1994, are valid. The award fee is 10 IRCs for world, 6 IRCs for CIS, 5 IRCs for Ukraine. Send your applications signed by two amateurs and fee to award manager UU2JQ (IRCs only PSE, better registered mail with return notification.)

SPECIAL PREFIX. Look for EO55JM to be active October 25-27th, to celebrate the 55 years of libration of the Ukraine. The activity will be a major operation by the Crimea Contest Club and the QSLs will be via KG6AR Chris Williams, 1117 S. Del Mar Ave. San Gabriel, CA. 91776-3034

SV5, DODECANESE. Geza, HA4XG, will spend his holiday at Faliraki, Rhodes Island (EU-001) between September 28th and October 5th. He will use the callsign SV5/HA4XG/p. Activity will be on CW/SSB using an IC-735 and vertical antenna on 40 meters and up. QSL via home callsign direct or via bureau.

YJ, VANUATU. Ed, K8VIR (ZL4IR), will be active on Iririki Island (OC-035) as YJ0AIR for only a few more days. Check around the IOTA frequencies on or near 14260 and 21260 kHz. QSL direct via W8WC.

Z3, MACEDONIA. Look for YL operator IV3FSG to be active from Skopje until the end of September on a humanitarian mission. She hopes to be active as Z38/IV3FSG on SSB and RTTY. QSL via IV3FSG.

ZP, PARAGUAY. A multi-national team will activate ZP as a Multi/Multi entry
for the 1999 CQWW CW contest. Dale/N3BNA (V26A), Darrell/AB2E (V26E),
Jorge/CX6VM (CX5X), and Juan/ZP5MAL will activate Juan's contest callsign
ZP6T on his farm near Asuncion for the contest. The plans call for some
ops to be in ZP from November 20th until December 6th. Also, look for
ZP6/N3BNA who will enter in the ARRL 160M Contest. An inverted L for 160
meters, with beverages will be added as well as a new 40 meters yagi to
Juan's world-class antenna farm. Also, planned to be added is a 3 element
wire yagi identical to the one built at the V26B site and designed by
WX0B. Because ZP is considerably rare on CW, much attention will be paid
before and after the contest to work the highest open WARC band. Also,
attempts will be made frequently on 160/80 meters CW after the CQWW
Contest. QSL info is as follows: ZP6/AB2E via AB2E, ZP6/N3BNA via WB3DNA,
and ZP6/CX6VM via W3HNK. Do NOT QSL ZP6T via W3HNK.

Hi Doug,
I'm sure that's true for you and much of the rest of the pile-up but out
here
he completely obliterated the 3C0. The guys that got in a argument with
him didn't help, but it didn't make much difference here.
This was a particularly egregious case since this guy didn't have a
schedule
nor was he in QSO. He just wanted to call CQ and he insisted on using the
same
freq. as the DX pile-up. When he found he couldn't, he started to QRM the DX
station.
b.t.w. I politely asked him to move and identified myself. When he refused
and
started his tirade, I just shutup.
Steve AI7W

>25KHz segment they're listening.

Aw, Doug, did you expect to benfit from knowing that? Wouldn't
make any bloody difference since they operate with a telereader.
Any reasonable operator who is trying to establish a listening
pattern with this guy is bound to fail. They make a QSO on .036
and the next one takes place on .042. What's the use of
listening, if you can't benefit from it.

>
>Why?

Because the 3C0R operators are lousy, poor and unskilled
operators. LUPOs in short.

>MEAN YOU!!!
>

>That way, those of us who *can* operate CW can figure out where the DX
>is listening, and stand some chance of working him...

Sounds reasonable, but in fact it is not. It would be reasonable
under the assumption that the DX-station would stick with one
call until the QSO is finished and that his copying skills are
modest. In case of 3C0R, however, that assumption fails:

They copy by machine and only get 50% of the calls or even
single letters correct. They ask for "4SY?" and finish a QSO
with WB1ABC. That is an invitation to the Non-DX LUPOs, since
they correctly assume "What the heck, this guy doesn't stick to
calls, so why not call him". You ask for trouble, you will get
it, guaranteed.

By the way, one thing escapes me with that CW-Op: They copy with
a machine and yet the keying is done by hand. And that keying is
painfully error-laden and slows the whole story down even more.
Why couldn't they use automatic keying at least?

>
>who still needs Annobon for an alltime new one, but won't bother trying
>until the weekend is over.

Well, good luck with that. Want to know my strategy? Don't even
bother to call them, when they are less than 599. Stick to one
frequency way above the pile up, say on .042 or even higher.
Don't move. I said DON'T MOVE! Don't try to establish a pattern.
There is none. Stick to this one frequency and call. Call. Call.
Frequently check this frequency for other callers. The second
you can hear another station calling near your TX-QRG ---> Move
away. You want your own frequency. You want to give them a loud,
QRM-free and crystal clear signal, otherwise their telereader
fucks up. Eventually you will work them. You won't be proud, but
what the heck, you want them anyway.

Hi all. I'm earnestly looking to buy a Kenwood SM-220 with the BS-8 Panadapter. It must be in 100% working order, and cosmetically clean, free of damage. Non smokers please only.

In particular, I'm looking for a rig with a stable, well-operating BS-8, with minimal drift from cold start.

I will pay the right price for the right rig; this is a keeper I'm looking for.

Please email to NeilR@innermedia.com, or you can call me at (603) 465-2788

Thanks in advance.

Howdy,

You are invited to my non-commercial, sometimes boring, hopefully useful, and always-undergoing-updates website. The URL is http://hfradio.org and features DX information, including QSL Route/Manager Lookups and Callbook Lookups; Propagation Center including the eAlert service (allows you to sign up an email address to the automated email propagation reports); Equidistant Azimuth Map software (allows you to create maps of any QTH); Swap and Shop; Bookstore (I've hand-picked over a thousand book titles on radio, etc.); Free website space for YOU to create your own Ham or SWL site, and there's more. Easy to navigate. Open for suggestions.

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

Hello,

WB8RCR has recently posted a new version of his program, 'QSL Maker' - check it out at http://hfradio.org/wb8rcr/

This is a Windows 95 program, It will not work under Win 3.1. The program has also been used on Windows 98 and Windows NT Workstation 4.0.

- When you first bring up the program, you are shown a dummy QSL design.

- Simply enter your call and address and you have a useable, if somewhat dull, QSL.

- Your call, name and address are remembered for future launches.

- You can adjust the position, color, and font for all the elements of the card.

- You can use a Windows bitmap as a background for your card.

- Once you have the design you like, you can save it for future use. In fact, you can save any number of designs for special purposes, events, etc.

- There are 2, free-form lines for your QRP-L #, FISTS #, 10-10 #, grid square, awards, etc.

- The info block can be removed for those who would like to write this information on the back.

- Dockable toolbars, put them where you want.

- There is a full-blown installation program, and complete deinstall.

- There is extensive help.

- If you use custom colors, they are remembered across launches.

Again, this is software by WB8RCR. Come check it out.

I have listened for them on 24, 18, and 7Mhz SSB. Heard on 7Mhz at 2230Z but where were they at 0100Z when the band was open for USA? Heard on 18.130 at 1600Z 3/3 where were they at 2000Z when band was open to USA? Saw them listed at 16 or 1700Z on 24Mhz but nil for the past 2 days. They seem to QRT about 0100Z. Only consistent places to hear them are 21025 and 21295. Will the real Dxpedition step forward?

Hey fellow DJs and audioheads...

I can't believe I found what I have been looking for so long!!!! ....

A decent DJ program that does everything you really need and with style.

I'm sick of DJ programs that promise the earth but are too impractical to even consider. Well, now I've found one that truly does what it claims.....

OtsJuke DJ fully handles volume with a built-in AGC, compressor and limiter!

Plus it actually does decent mixes using auto-detected points. It's got this program which you run on ya MP3s and it calculates it all for ya while ya sip a coffee. Buggered if I could be stuffed putting them all in myself anyway.

And there's no 2 second latency issues. Volume, pitch and a tempo shifter all respond instanty. And tis got a 20 band GraphicsEQ in it too, and unlike most it responds instantly!!!!

if anyone figures out how it works out the beat in the song let me know. I thought that was impossible.

I think the best thing is the clear interface it so simple - it's just too easy. with all this extra time saved I guess i'll have a chance to become a bit more creative in my work.

It says on the web page it only got release on the 9/9/99. Must of been a product of all those supposed malfunctions, actually going well! All the good karma made this cool DJ/radio program.

Anyway if ya interested go to http://www.otsjuke.com

The demos pretty quick to download.

Chow,
DJ Rail

2697. 10 Meter question for the DX operators out there.

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-21 00:00:00 UTC
From: Gary McAdams <g.m.mcadams@worldnet.att.net>
Message-ID: <7s8e9dfjj1@bgtnsc01.worldnet.att.net>
Source record: 23652

Hey Guys,

A little background first...

My name is Gary, and I've been a ham for a while, (since about 1987 I think)...
One of my favorite bands has always been ten meters. During the last sunspot cycle, I heard a lot of weird things, including lost military operators,
illicit cb type operations, taxicabs from various countries, including our own, and even FM broadcast way up in the top sections. The FM appeared to come from Indonesia, and could be heard every evening on about 28.900.

This cycle, there appears to be a increasing amount of trash coming in. So far, it appears to be from South and Central American countries. At any rate Spanish is the dominate language, and mostly female operators. Who knows what we will hear when the cycle ripens?

I think that we can thank the makers of all those cheap "10 Meter" radios for the proliferation of the crud. I'm assuming that, in many places, these radios are purchased and used "as is" meaning on ten meters. We all know that the intent was that the radio would be purchased, usually by a CB'er in the USA, and modified for 11 Meters.

The question(s) then, are these:

A. In your country, are these "10 Meter" radios manufactured, and if so, what are the
laws regarding sale and use of these radios?

b. What, if anything can be done to curb illegal on ten?

c. What is the normal usage of ten in your vicinity?

d. What are those Spanish speaking ladies really chatting about on ten (and 15) meters?

e. What is the situation looking like in SE Asia?

Thanks for your thoughts and suggestions

Gary, WG7X

Yeah really... (are they *really* using a telereader?!)

For awhile I did see a bit of a pattern - moving up about 2KHz at a time
- I guess they stopped when they hit the SSB band<g>.

This morning on 10, can't hear enough of the pileup to even venture a
guess.

Hi Nathan -- good catch -- the Canary Isles EA8

If you are an ARRL member -- see ARRL Outgoing QSL Service at URL:
http://www.arrl.org/qsl/qslout.html

If non-member -- see WW QSL Burros at URL:
http://www.iaru.org/iaruqsl.html
I believe it goes via Spain -- but not positive.

The 3C0R is still missing on most bands. Weak at 1500Z on 28025 (better on Long Path to W6). NADA on 28SSB, 24SSB, 18130SSB. Only 3/3 Max on 21295 at 1730Z Now working EU on 40 and 80CW and its broad daylight in Georgia so ESP only. Then they QRT at 0100 each day. Rest of Africa booming on most bands.....as I said 3C0R is missing (still).

The ARRL site has info on QSL bureaus. Basically, join ARRL then you can use their "Outgoing QSL Bureau", 226 Main St., Newington, Ct.

They accept cards in intervals of 10, 20, 30 etc at $1.00 for each 10 cards and will forward to the dx.

QSL bureaus take longer than direct mail.

Check the ARRL site for more details.

... that depends on wether or not you are an ARRL member. If ARRL member,
send the card via the Outgoing Bureau, and have an envelope on file with
the W3 Incoming Bureau.

If not an ARRL member, look up his call sign and send your card direct.
And keep an envelope on file with the W3 Incoming Bureau. Sending a self
addressed envelope plus an IRC or a Green Stamp (well, one dollar does NOT
cover the postage for even a postcard, but an IRC does, and it costs just
1.05 at the post office) does not always translate into a direct card
back. Always prepare for card coming back via burro even if when sending
along the return postage or some dollars to cover the return postage.

Sending direct is always in good taste ... and when you think of it,
for occasional cards, it's even cheaper. Up to ten cards is 1.- $ at the
outgoing bureau, plus the 33 cents to get your card there. An airmail
letter to the EA8 is just 60 Cents ...

Well, the QSL bureau would be something, that could make the ARRL a
veritable national amateur radio organization, and one with real clout in
Washingzton by sheer numbers. Like the DARC in Germany ... There, QSL
bureau service is included in the membership dues, incoming and outgoing,
even DL-to-DL is free. And the annual dues are just 40 times the rate of
an airmail letter to overseas... or 60 times the postage of an overseas
postcard. Now, if you're an avid DXer, every card sent to DX over those 40
per year saves you real money...

Guess, why more than 9 out of 10 DL hams are members of DARC?

Next time, when the ARRL posts a "new identity" ... let's hope it will not
be just a new label on the old package. But a real new identity, with real
new advantages of being a member.

I believe you're making up the "bitching." I don't know of anyone
past or present who sends exclamation marks in Morse. And how
do you decipher lower-case Morse from upper-case Morse? What
the Morse for <shift>?

Jeff, you're showing your ignorance. The traffic posted by
Mr. Luder is excerpted directly from a DXCluster screen, exclamation
points (which many of us use routinely on CW) and all.

>fucks up.

Is this true? That they are using telereaders? That's unbelievable. I've been DXing for a long time but had no idea that this was the case, although it does explain their inept operating style. That almost certainly means that many, many stations won't be able to work them. I have low power and an indoor antenna, so my odds are really slim. I can work properly run DXpeditions, such as ZL9CI and H40AA, even with this setup, but no telereader can match the skilled ear of a good DXer. Where are the Finns when we need them?

The most authoritative way is to check the RSGB IOTA Yearbook. You can also get a short format version of the information at the RSGB site at http://www.logiciel.co.uk/iota/shtlist.html.

What island are you on? Note that IOTA islands cannot be inland or in enclosed or partially enclosed coastal bays. They must be coastal islands. Manhattan Island here in New York does not count for IOTA (but it does count for the U.S. Islands program which also counts inland islands).

I have used the MFJ 1278, the Kantronics KAM Plus and the AEA PK-232. In my
experience I found the KAM to be the best at copying CW, Pactor, Rtty.
The Pk-232 comes standard with a 200 Hz shift which is designed for HF packet
as opposed to the 170 hz shift used om Pactor and RTTY. It will work but it
is not the optimum setting. The KAM does have multiple selectable shifts.

One last note the KAM plus or KAM 98 is the smallest one of these units, if
size is any
concern.

Good luck Dave Struebel WB2FTX - Running HF NTS Winlink- Amtor,
PActor,Clover.

I didn't imply that it bothered me, jackass. However, porno featuring 12-16 year olds is sick. If you like child pornography, that is your business, Grunt. I wouldn't admit it in such a public forum if I was you, since the FBI does look for kiddie pornphiles such as yourself.

Dear hams,
A severe earthquake took place in Taiwan on Sep 21, more than
1,700 died and 9000 wounded. Chinese hams had setup an emergency
network on 7.060Mhz. To make the traffic more efficiently, please keep
the frequency clean for emergency communication, and help to listen on
this frequency for any BV signal. If necessary, help to forward
messages between BV and BYs. Thank you very much in advance.

2722. 3C0R is a two person effort

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-23 00:00:00 UTC
From: thompson@mindspring.com
Message-ID: <7scb1p$35g$1@nntp1.atl.mindspring.net>
Source record: 23674

After listening to the operation for much of the day (I worked them on 40 and 15) and hearing the SSB and CW op on several other bands/modes I have identified this is a two operator show. The CW op is crisp but moves slowly. The SSB op likes to work in Spanish but seems quite capable altho he spends a lot of time on asking for 1 or 2 letters so he takes several exchanges to complete the QSO and he says IK2XXX 59 and sometimes work another without a confirmation to the IK2. Both ops spread out the pile up over much of the band which is good in that they don't have to call by district but the general ham population is beginning to get mad as their non Dx QSOs get messed up.

I had to be away when they were on 17 and 75 SSB and I heard them weakly at 1700 on 12 SSB. They were also heard weakly on 28395 at 1800 working PY but a group of W6's were on frequency (they tried to start a net) but a TI2 told them off in at least two languages.

The propagation charts show the best chance from W4 is 1300 to 1500Z on 10 and 12, 2000 to 0200 on 15, 17, and 20. 2300 on 40 and after 0100 on 75/80. Since they are only two ops they seem to go QRT at 0100 so miss some of the USA opening.

A minor point, but a 200Hz shift is actually the "standard" for
Pactor, although a lot of the fellows do use a 170Hz shift.

Dave, I think you have assessed this operation accurately. For a two person expedition they seem to be doing ok in my opinion, and they are probably totally exhausted by now considering how much they have been on the air. I too wish they would do better acknowledging/confirming a call/qso before they move on to the next one; this would clear out the pileups faster, even though it may take a few more seconds per qso. Working by numbers might also help us out a bit here on the northwest coast, if they timed the openings right. We are only hearing them on 15 and 20 only between 2300-0100 when they always qrt. Propogation hasn't been all that hot either, with auroral and flare activity on top of it all! 73 and gl to all. K7JY, Seattle.

For the most part I agree, for a small group they are handing out a lot of
"new ones" for folks.

They did try by the numbers the second morning on 21Mhz, They started on 1's
at about 1300UTC and 70 minutes later were on 9's. Then they took 2 zeros
since the band had already closed into the midwest. If they do run by the
numbers I hope some one can point out that the best Q rate is gotten if the
1-2-4-3-8-9-5-0-6-7 pattern is followed. Thats the typical prop best signal
pattern. Its standard procedure on VK0IR and all K0IR's operations.

The sad thing this they will be a large number of "not in log" replies from
the CW pirates and the rush of some SSB hams to tail-end. Before the call is
acknowledged. If you want to tail-end.. Do it right. Its a thing of beauty
when done well.

Message-ID: <19990923193432.16253.00001515@ng-fw1.aol.com>
Source record: 23681

Rumour has it that our comments are all now moot; they are QRT for good according to some dxcluster posts. Well I'm grateful to them for giving me an all time new one on one band at least. Based on the huge pileups still remaining yesterday, sounds like another expedition to 3C0 would be useful. Anybody interested?! 73. K7JY

Source record: 23683

It has been awhile since I have used an overseas (outside of US) QSL
manager.
What do they require now, or what is the usual to send them for return postage.

Do they want $1 or $2 US, or is it a combination of IRCs and $1 US.
I know that some of them dont want IRCs also, so what do most of you send
now for return postage with your SAE's.

Howdy,

New content is being added this week. Check out the SWL links, the DX news, or the Propagation Center.

I've moved the QSL and Callbook section off of the main page and onto a page dedicated to just this information. And I've added a lot more to this section.

So, come on by and check out my non-commercial SWLing/Ham Radio website. The URL is http://hfradio.org and features DX information, including QSL Route/Manager Lookups and Callbook Lookups; a Propagation Center including my eAlert service (allows you to sign up with your email address. Then the eAlert system will send you email propagation reports. I use this with my pager.); Equidistant Azimuth Map software (allows you to create maps of any QTH); Swap and Shop; Bookstore (I've hand-picked over a thousand book titles on radio, etc.); Free website space for YOU to create your own Ham or SWL site, and there's more. Easy to navigate. Open for suggestions.

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

Rick,
I agree with you about QRM to existing QSO's. It is the responsibility
of
the stateside callers to make sure the frequency is clear before calling. It
isn't reasonable to expect the DX station to be aware of QSO's all over the
world when he selects his listening frequency.
I have to disagree with you about the alternative of a single frequency
and
working by the numbers. That would slow the rate down and exclude completely
most low power stations. Not to mention requiring much greater operationg
skill
on the part of the DX station.
The objection that the pile-up is using up to much of the band isn't
reasonable
either. If 2000 hams are calling over 30-40 Khz, then there are 50 to 60
hams per
Khz, much better band utilization than usual.
I object to the stations that intentionally jam the DX station because
'their' frequency
is tie up for a few days. If you can't move the dial on your radio for a few
days to
give a few thousand of your fellow amateurs a chance to enjoy the hobby too,
maybe
you should take up something else.

>A. In your country, are these "10 Meter" radios manufactured, and if so, >what are the
> laws regarding sale and use of these radios?

Radios are not manufactured here, they are imported from the US or from Panama. What you see are Ranger/Midland/President 10 meter radios modified for CB use. There's also a lot of 148GTLs and such that are modified for out of band operation.

>b. What, if anything can be done to curb illegal on ten?

The best way, IMHO, is to get amateurs on the 10 meters segments that are used for illegal activity, which is normally the lower end (where most modified CB sets reach)... many pirates use these segments because they hear no one on them. Many would say to tighten up restrictions on manufacture of modifiable sets, but I believe that'll do you no good since most manufacturers will find ways to comply with your requirements and still allow their radios to be modified.

>c. What is the normal usage of ten in your vicinity?

In Costa Rica 28.000-29.700 MHz is reserved for amateur use. The space between 27.405 (ch 40 CB) and 28.000 is not allocated to anyone at the present and is used by pirate stations. You can hear a lot of "CB DX" on 27.455 MHz USB.

>d. What are those Spanish speaking ladies really chatting about on ten (and >15) meters?

What I hear in the 10m lower segments are a lot of cab/commercial conversations: a dispatcher sending a cab to X place, people asking where Y unit is at the present, etc. There's many countries in which 27 MHz is strictly commercial segment.

> are clearly in use.

I doubt very much that the 3C0R station could even hear most stateside
qso's. I maintain that it is the responsiblity of the calling station (that
can
hear the local qso) to verify that the frequency isn't in use.

> station.

I guess opinions vary. I've been DXing for 25 years. I've got 316 counties
confirmed (over half while running low power) and I've seen every kind of
DX operation there is. Only in the case of the most skilled DX operations
are the qso rates fast on a single freq. pile-up. If you reduce the rates
then
the chances for the low power stations (who have to wait while the high
power stations are worked) are reduced. This varies according to the
demand for the DX station. In this case we are talking about a very rare
station.

> stuff deleted
> If someone is going to participate in a dxpedition, I would

As far as I know, the only requirement to qualify for a DXpedition is money.

> stuff deleted
> You can't go by the number of callers--only by the number of
> simultaneous qsos. Look at it this way, by your argument, since 17m has
> stuff deleted

I guess I have a more democratic view of the spectrum use. In my opinion
more hams are participating in the pile-up.

I would prefer to simply 'agree to disagree' . (your arguments are getting
a little absurd anyway).
As of the 21-Sept., 3C0R had logged 20,000 qso's. It looks to me like a lot
of
hams had a good time, sorry you didn't

I agree with Steve, Rick does not realize that operating simplex in a major operation will not allow you to work anyone. The pileup sounds like the inside of a stadium just after the hometown team scores. Individual calls, even letters are impossible to log.

The "score" for 3C0R speaks for itself. If a 2 man crew can handle 20K plus Q's they have done their part, and done it well.

I speak as one that has been on both sides of the pile. And I enjoyed working this one, Number 317 all barefoot..............

After reading his Mary Poppins (everything perfect and in it's place)
philosophy, I can understand why he's the way he is....he's seems to be
the only one following the rules!!!!!

Must be lonely at the top, no one to talk too, neck in a brace from
holding his nose so high in the air, eyes strained from looking down at
all the lowly scofflaws...oh well...more for us

Seems at the end the 3C0 guys started to get a feel for what works and
moved the split closer together. Not enough for Rick cause he only qrps
and never EVER steps on anybody else....RIGHT ;-o

Ever notice that the pissers and moaners always seem to be the ones that
couldn't work 'em, why is that??

In other words, if you failed the Mary Poppins, practically perfect
person test, YOU LOSE!!!!

This is so dull. Practically perfect people rarely are except in their
own minds..... And then to bring up some asinine 80m net?? What's with

this?? Funny, the biggest losers seem attracted to the upper end of 80...

Congrats on the contact, it's a good one. So say I and so saw the DX community. The naysayers can go off to 80m and work themselves, leave the rest of the bands for fun

Agreed! Small splits with a 5-10Khz should accommodate most (If not all)
DX-peditions. The 3C0R team was so small they could not keep multiple stations
on. A great way to split the pileup. The also did not make real good use of
geographic splits, i.e. JA's now, Europe later.

But as was pointed out else where in this thread, they were learning and the
operation improved as time passed.

By the way Rick, your not alone in your position. The ARRL is also critical of
these very wide listening windows.

2764. IOTA QSLs

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-27 00:00:00 UTC
From: park@cascade.kriss.re.kr
Message-ID: <7snp2pjlc1@usenet.kreonet.re.kr>
Source record: 23616

Hello all ?

I recently was a part of mini-IOTA pedition to AS-080 and made about
150 QSO's. I have read IOTA QSL rules before I prepare to issue buro cards and
reply to the only direct request, and the rule says callsign on the QSL
must be printed NOT hand-written. Is this rule always enforced ?
My printer says he prints at least 1000 QSLs in a single batch, but I need
only 150 of this QSL cards. Seems reasonable to use labels for QSO info and
hand-write my callsign and IOTA information on pre-preinted cards that
I can buy in the units of 100.

So, what is accepted and what is not ?
I have no intention to print 1000 QSLs knowing that I will use only 150 of them.

Thanks in advance.

Bullshit, Steve. I worked them and I still think that 3C0R (at least the CW part of it) was one of the worst expeditions ever. The QSO rate was very slow, the errors in keying were far too numerous, the split was way too big, no discernible pattern of listening whatsoever and they did not stick to calls they initially heard. Without a 599 signal it was almost impossible to work them. I was one of the lucky little pistol guys to work them, because of a great 10m opening with huge signals. Still, it took me 30 min to get them and a huge effort on my side to forget everything I ever learnt about DXing: I just tuned to a very distant frequency, made sure no one else war transmitting nearby and called and called and called. I had my QSO, yes, but fun it was not.

And now compare this to T31T. Barely audible on 20m last night, 329 at max. Took me two calls to make the contact. Any more questions?

Sure...how's the wx where you are?? No seriously, there is no doubt that
they might have bitten off more than they could chew, but they are
learning and I got them on the last day when the split was smaller and
they operator a tad better (learning curves I guess). My comments are
made, not so specific, but in general from comments that appear here and
on the flectors as well. There always seems to be some general gripping
about poor operating. There was for the ZL9 group, the 3BR and even the
Heard guys. And in 9 out of 10 complaints, it always ends..I didn';t get
to work them because of (fill in lame reason here)

It seems to me, rather than constantly complain about the poor quality of
the operators, focus on what they did right al;lowing them to improve
even more..but alas, it's much easier to tear down than build up.

Sooner or later, the rare and semi rare ones aren't going to get on the
air unless some big time dx'er does it.

My goodness. We should be happy that these guys tried and hopefully
opened the doors to more operations (from what I've read that's exactly
what they did) Cut them some slack. You don;t get the OH2BU's or the
5X1T's right off the bat, do you?? NO!! They all start as rookies and
knowing that you make do with what you have, knowing that the next time

(if there is a next time after the slamming they got here) they'll learn by their mistakes.

My main point, so many are quick to criticize, but given they same opportunity to be on the receiving end of the pile ups, they wimp out and piss and moan some more (generally speaking)

As to fun?? Well no one every said that every day of the week a hobby is sunshine and orange juice

Look for me on a good one this coming winter (spring in the down under areas)if all goes according to plans Talk about your rookies!!!!

We should all sit back, talk a deep breath and at least thank those 2 for putting a new one (for most of us) on the air and wait to see exactly what happen over there. There could be stories we aren't aware of yet.

Enjoy the week, Peter. Look for you in the next pile up

Until then 73,

Steve

HelloYongsup,

In this case I would print 150 Labels with your call sign information and
stick these to the card. I would then initial the cards so the initials are
on the sticker and on the card also

I am sure this would be OK as I have submitted cards with labels and they have
all been accepted by the IOTA checkers.

You can also go on the internet to the IOTA homepage and ask if this method is
acceptable.

Thanks for the efforts to put on AS-080.

hello Peter,

I agree with your point. Remember that operators like OH2BH did not start as an A-1 op. The T31T and T31K ops are long time DX'ers. The EA lads were new to the DX-pedition world and learned a lot during the operation. I hope they read this thread and develop their skills to the point they can run CW at 6 to 8 per minute sustained.

John,

one of my points also is that the EA lads should have gone
through a learning process _before_ the expedition. With PED
any mildly skilled CW operator can learn to handle a pile up
easily within a couple of hours of practice with this program.
And another point I failed to mention so far is my impression
that anyone going on an expedition wants to have fun working a
pile up. I can hardly think of sitting in front of a telereader
and trying to read a callsign as fun. Oh well...

Peter Lemken
DF5JT
Berlin

who had a lot of fun handling pile ups with his ears :-)

>
> Rick

??? What does that prove?? All it does is prove that you are indeed in the log, as I am now on 10, 12 15 and 20. So what?? It sure as heck does not prove you followed your own rules to make the contact and can absolutely state that you did not step on any body else NOW DOES IT?? NO, I thought not.

Your switching tactics is unbecoming a supposed professor who should know logic and therefore follow through. Editing out the whole statement serves to prove you are less that truthful in your statements

you stated....

> I _did_ work them--operating properly and at 5W!
>
> Rick

I stated..

If you say so. Since there is no way to prove otherwise, to quote you, the point is meaningless

You can no more prove that you did indeed work them properly and with 5 watts than you can prove I worked them properly with 100. Since your logic is flawed (after reading your posts elsewhere) one can ascertain that you are less than accurate in your taking the ARRL Operating Manual as gospel..but that's a story for another time and place

TA TA and I'll be listening for you. Can't wait to see the Mary Poppins of DX in action. SHould be quite entertaining

Thanks for playing, try again

>
> Now that I offer to prove I worked the station, that suddenly
> becomes irrelevant and I am challenged to prove that I did so ethically.

That was the premise from the outset. You stated how ethical you are and
were being called upon to prove it. The fact you fail to comprehend a
simple statement seems a sad state of affairs for the institution of
higher learning

>
> You're right--I _can't_ prove that. However, given my very
> public stand on ethical operations here in this group, I would have been
> taking quite a risk of exposure (and ridicule) if I _failed_ to do so.

> station in a less than ethical manner after having taken this public
> stance. I'm quite sure you--and others who disagree with my
> statements--would love to hear me operating in a manner that contradicts
> my stated beliefs about good operating techniques.

It's more of a street corner preaching than a moral stand. The simple
fact that the very people you seek don;t inhabit this NG or any of the DX
related mediums has been obvious to most of us for several years. The
fact you suddenly show up, soapbox in hand, and expect everyone to pay
attention to you..welll...kinda 1st grade, if you ask me

> > >Ever notice that the pissers and moaners always seem to be the ones that

>
> It looks to me as though you were accusing me of not working
> them at all--not of not having worked them ethically.

Reading comprehension, not your strong suit I C. Again, prove the statement in total, not by breaking out the bytes.

>
> I simply replied (ignoring your insults) that I was quite
> willing to prove that I _had_ worked them, and would willingly do so.
> And I challenged you to do the same.

No insults...insights into an ego really impressed with itself. As to whether you think I worked them..unimportant. The DXCC desk will know I did, as did the people who acknowledged I did.

>
> Incidently, if you read your own post, you'll discover that you
> challenged me to "prove" YOU "worked them properly with 100." Sorry, I
> can't do that. And given your attitudes about the "rights" of dx'ers
> here, I doubt that anyone else could, either.

How can I discover it Rick. I asked it therefore there is no discovery possible. I simply applied your flawed logic in a statement that can not be proved.

>
> BTW, it doesn't take a "Mary Poppins" to operate properly, it
> just takes respect for the rights of others--something EVERY ham should
> practice. Sorry you don't agree.

I do agree with the principles. I just don't agree the your holier than thou, preach 'em till they bleed attitude. It don;t cut the mustard. Perhaps you do belong on the upper end of 80m with the other preachers.

Ta Rick. Enjoy your life. Like I said, must be damned lonely at the top of Mt Olympus

No more for you. I really enjoyed this at first, but, after reading your drivel in the other NG..you're dull and boring. No fun, too easy. Like working DX on a net....

Hi all;

Once in a very rare while I sell off equipment that just isn't being used. If you knew me, you'd know that EVERYTHING I own is absolutely functional, clean, and kept in a non-smoking, humidity controlled environment.

Here's the list, get it while you can...

Kenwood TS440SAT 80-10 Transceiver, with internal automatic antenna tuner, SSB and Narrow CW filters, computer interface chips, broadband transmit enabled, hand mic, power cable, SP-430 speaker (upgraded), and includes perfect original Operations AND Service manuals. This is the sweetest little rig you're likely to use, and has regularly earned outstanding signal-quality reports. Full output, 100% operational. Cabinet is free of damage, with only very slight wear around the front outer edges. Super receive audio, too, typical of Kenwoods. $750 or BRO, worth every penny.

Kenwood TH79A Dual-band HT, 2m plus 440, 5 watts out. This is ABSOLUTELY like new, less than 1 hour use. Comes with new original high-output battery (PB34), plus new additional NIMH PB33 style battery, Kenwood 2-slot KSC-14 fast charger, MFJ lapel speaker/mic, soft case (new), original box and manual. I paid over $550 for it recently, will sacrifice for $350. Check with your local toy store; the options ALONE are worth almost that much.

Timewave DSP-59+ digital signal processor, with version 3.0 firmware. Like new, no marks, amazing abilities. Includes manual and original box: $175. Really pulls them out of the "mud"; great for voice, CW and DATA..

TR-44 rotator with control box, mast mount and manual. Just back from the Rotor Doctor, it's been fully refurbed, lubed, cleaned, repainted and checked out; it looks new. $155 or BRO.

Heath SB610 Station Monitor, clean, fully operational, well built. This is a sweet monitor, with a nice bright trace, and plenty of controls. A steal at $110, includes manual.

Heath SA 2060 Legal Limit Antenna Tuner. This is Heath's "top-of-the-line" tuner, and one look inside will tell you why. Well built, like new, no scratches, works perfectly. Dual-meters, easy to adjust, supports coax, ladder-line, and end-fed antennas. Includes manual. $195 or BRO.

InfoTech M200F RTTY/CW Terminal Unit. This is from a day gone by, but it still kicks butt for RTTY/CW when compared with any of the newer "better" multi-mode units. It requires an external composite video monitor, works really great. Looks and acts new, includes manual and cable. $125 or BRO.

All of the equipment is guaranteed to be as described, you have my word of honor. I prefer postal Money Orders or Certified or Bank Checks, I ship same day via UPS.

Thanks, and I look forward to hearing from you!

2779. HAARP: Fouling our Bands ?

Newsgroup: rec.radio.amateur.dx
Date: 1999-09-29 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7srnka$382$1@nnrp1.deja.com>
Source record: 23631
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.dx,rec.radio.amateur.misc

As I looked at the NCDXF beacon monitor (HAARP has been running experiments after 0000 z the past several days) it occurred to me that the strong signals I thought were overloading the spectrum analyzer centered on 14.1 were not alone, if one then looks at the 1-30 MHz waterfall.

Extremely strong (-60 db, likely greater) signals are present at sporadic intervals- which match our bands.

http://www.haarp.alaska.edu/haarp/cgi.data.fcgi

I hope the Navy isn't using our bands like an RF dumping ground, most are EXCLUSIVE.

They have their own to go play with. Did we not fight this fight before and after WWI ?

I'd like to give my point of view on this as one who is presently
selling a perfectly good DSP 59+, having replaced it with the 599zx.

It's strictly economics versus features; I bought the 59+ not knowing
what I'd do with it. It works super on Voice and on CW, and gives a
credible performance on Data. Where it "falls down" is switching from
mode to mode. In a word, frankly, it's laborious. You've got to
twist knobs, and push several buttons to go, say, from Voice to Data.
Once you're there, however, it's great.

The 599zx, on the other hand, remembers whole combinations of
settings, and you can click from one to another with a single button
push.

So, it's up to the buyer. If you're constantly switching back and
forth between RTTY, Voice, Packet, etc, then you'll probably get a
cramp from the 59+.

If on the other hand you want to save a hundred or two, and the above
limitation doesn't bother you, then the 59+ is super.

Jus my 2 cents.

Neil

P.S. My 59+ is STILL available, make me an offer:

What everyone seems to be ignoring is that the announced purpose of this DXpedition was
not to be a full bore 24 hours a day, two week, DXpedition, but rather to lay the ground
work for future trips by hams. Several previous attempts to operate from 3C0 had failed
due to the inability to get the right paperwork through the Equatorial Guinea's bureaucracy.

These operators may not have been the high QSO rate operators DXers hope, but they
do have some experience. They gave me Equatorial Guinea last year when they were
only running 100 watts to wires. They have now given me 3C0. Thank you very much!

DXpeditions take many forms. Some are vacations, some are scientific trips, some are
professionally managed affairs with lots of operators, while others may be shoe string
operations. I might complain about the FR/T operation basically being a list operation,
but I don't because it still put out a rare DXCC entity by a one person operation.

Let's lighten up and enjoy the opportunity to work the rare ones.

Mark, W4GP

Unfortunately Mark, it will never happen. Too many would rather sit back and Monday morning quarterback rather than participate in a positive way. I agree with you as I too had read that this was essentially an exploratory venture. Still, it was a new one and even though it took some effort, I did have the satisfaction of getting them into the log.

Let the pissers and moaners cry their alligator tears. Better they piss and moan here and leave the airways for those who appreciate what the dxpeditioners were trying to do

All it tells me is that many newer rigs have DSP built in and so a lot of the guys that had the money to go out and buy these units when they hit the market are now upgrading to newer rigs with built-in DSP and selling off the old rigs and filters.

Doug

I think that people are also realizing that audio DSP has it's limitations
and that rigs with built-in IF DSP are far superior and will ultimately
provide capabilities that cannot be performed with audio filtering.
Brian Denley

Hi,
do you know about
what could you hear if you had a FM/AM receiver in Alpha Centarury, with

a big antenna targeted Earth? (Earth rotates, revolves etc)
is that true that radio astronomy nowadays could only work in the
farside of Moon where the moon is a good shield against Earths radio
signals?
what will be the effect of transition from analogue to digital? Is it
good for radio astonomers or even worse?
How about SETI? I have heard that some military signals were thought to
be UFO data... Can we do anything to filter earth signals here?
and anyway:how doest Earth sounds from space in the electromagnetic
spectrum?

Can you receive normal domestic radio/TV from the spacestation?

Thanks
Henrik Hargitai

HAARP does not operate in any of the amateur bands. The recent operation referred to by "mf_luden" was at 6.9 MHz, within the frequency range where HAARP is permitted to operate. The test was to measure the antenna pattern of the array and it used an unmodulated carrier.

The NCDXF and waterfall charts on our web site are produced using signals received on an antenna located less than a hundred yards from the HF antenna array. The amplifier chain in this receiving system has a fairly good dynamic range but is still susceptible to overload when the HAARP transmitter is in use. The harmonics visible in the charts on the web site are created within the spectrum monitor amplifier chain and the spectrum analyzer itself. They are not transmitted harmonics. The apparent broad spectral width is also created within the spectrum analyzer.

The spectrum monitor can be placed in a low sensitivity mode to avoid overdriving the analyzer. We have done so in previous operations. The result, of course, is that there is nothing else to see on the charts. All signals are attenuated equally, so the NCDXF and waterfall charts go blank.

We operate HAARP is strict accordance with the caveats given us by the NTIA. Those rules do not permit operation in the amateur bands and we abide by those rules.

Sincerely,
Ed K3NS

Hi all;

For Sale: Heath SB610 Station Monitor, clean, fully operational, well built. This is a sweet monitor, with a nice bright trace, and plenty of controls. A steal at $110 OBO, includes manual.

This equipment is guaranteed to be as described, you have my word of honor. I prefer postal Money Orders or Certified or Bank Checks, I ship same day via UPS. I'll split the shipping with you.

Thanks, and I look forward to hearing from you!

hargitai henrik wrote:
> what will be the effect of transition from analogue to digital? Is it
> good for radio astonomers or even worse?

I don't see it making any difference. The signals they're looking for
are generated outside our planet. Those generated by natural sources
are not in any way affected by any decisions humans or any other life
form may make. And those that may be generated by life forms in other
solar systems are not affected by our analog-digital decision either.

Our decision here on earth would not affect the ability of other systems
to detect us either. It is EXTREMELY unlikely any signals they might
detect from earth would be intelligible to them (it's rather unlikely
they understand any Earth languages<g>) so it's the mere existance of a
radio signal - something better-coordinated than noise - that would be
of interest.

> Can you receive normal domestic radio/TV from the spacestation?

I don't know if anyone's tried. VHF-FM radio and television should be
receivable up there, except for *enormous* amounts of interference.
(for example, if the space station was over Europe, and someone tried to
listen to 88.3mHz FM, they would hear a mix of *every* 88.3mHz station
on the European continent and north Africa) LW and MW AM radio would
probably *not* be receivable, as the same atmospheric layers that
"bounce" those signals allowing long-distance reception at night would
confine them to areas closer to the earth's surface.

Kudos to you for responding.

However, why were there strong signals present at or around each amateur
band, far stronger than what occurs when it's not running ?

Perchance the graph isn't entirely accurate as to the frequency, hence
the appearance ?

No, the PS is not like in the New York City school system numbering,
it's part of his unofficial CB call. So we can see he already has
an interest in radio communication, and that should be encouraged.

More likely the proliferation of cheaply made consumer electronics goods. My retired neighbor just got on the Internet and his "white box" PC and Monitor (both made in China) radiate hash in my HF radio. This from inside his house, 100 feet from mine with his PC monitor and CPU next to his window in his above-ground rec room. You might want to see if the noises peak around prime time and drop off after midnite. Sure sign the RFI is man made from poorly designed cheap consumer electronics.

2808. Electromagnetic pullution? (!)

Hi, is there anyone who knows something about:
- how many watts planet Earth trasmit signals to deep space
- if you would be in alpha centaury (or anywhere) what would you hear if you had a big antenna targeted Earth and could receive AM/FM signals (note: Earth rotates, revolves, FM trasmitters are doing it so with it)
- what is the fact about Earth having a ever expanding AM/FM sphere now 70/40 light years big
- how can you be shielded against earth's electromagnetic pollution? Is there total silence on the far side of the Moon? Is it a real problem for radioastronomers???
- in the space station can you receive normal AM/FM transmissions?
- now changing from analogue to digital (in broadcasting) from space the sound of Earth will change?
- I have heard that Earth as planet with magneto and ionosphere has its own electromagnetic radioation. What is that? Freq?

And anyway: is there an electromagnetic polllution?

Bye

> >
> > Mark, W4GP

Amen. A few things could have been done better, but who knows? Have
any of us ever been the first to operate from somewhere in decades?

There were some rather liddish things done during this expedition, but
they were committed by those calling the 3C, not the 3C themselves.
(even the wide spread of the pileup would not be a problem if the
callers would listen on their transmit frequency before transmitting)

It's especially (not) amusing to watch the cluster during one of these
expeditions & see how many people are complaining about the DX not being
where they'd like to see them...

Hello,

I am inviting you to come visit http://hfradio.org - a site with many resources for Shortwave Radio and Utility Listeners, Ham Radio Hobbiests, and others who might be interested in this type of content.

So, come on by and check out my non-commercial SWLing/Ham Radio website. The URL is http://hfradio.org and features DX information, including QSL Route/Manager Lookups and Callbook Lookups; a Propagation Center including my eAlert service (allows you to sign up with your email address. Then the eAlert system will send you email propagation reports. I use this with my pager.); Equidistant Azimuth Map software (allows you to create maps of any QTH); Swap and Shop; Bookstore (I've hand-picked over a thousand book titles on radio, etc.); Free website space for YOU to create your own Ham or SWL site, and there's more. Easy to navigate. Open for suggestions.

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

It is possible that a typical cheap computer used to run HAARP might be
making the ham band area signals while experiments are running, not the
project itself. They were indeed there on the analyzer at Gakona,
however.

I should have explained this more clearly the first time.

HAARP was transmitting at 6.9 MHz (only) at approximately 900 kW. There were no harmonics transmitted.

The Spectrum Monitor (SM) receiving antenna (located close to the transmitter) picks up this single frequency, delivers the sample to the SM amplifier, an Anzac high performance module. The signal coming from this receiving antenna has a level of approximately 0.001watts. Because of this high signal level, the amplifier produces, internally, a spectrum of harmonics along with the original signal (eg., 6.9 MHz, 13.8 MHz, 20.7 MHz, etc.). This signal then goes to the spectrum analyzer, a Hewlett Packard HP-8560. The analyzer, in turn, samples the incoming RF sample, converts it to IEEE 488 compatible signals and delivers it to the computer and its processing software which produces the charts that you see on our website.

You can read a description of the SM system at the address:

http://www.haarp.alaska.edu/haarp/Monitor.html

>
> Perchance the graph isn't entirely accurate as to the frequency, hence
> the appearance ?

The graph is accurate. The graph displays the incorrect spectrum being produced by the overloaded spectrum analyzer.

When the Spectrum Monitor is being used for its primary purpose, to evaluate and confirm the purity of the output spectrum of the HAARP transmitter, we use attenuators and filters to ensure that the monitoring system is NOT overdriven. However this produces very *uninteresting* waterfall and NCDXF charts.

I hope I answered your question better this time. By the way, we have an e-mail account where you can send your technical questions. The account has been around since Feb 1995 and many folks use it. The address is:

I once read that the reason we've never been contacted by extraterrestrial civilizations (a point I won't argue with the Roswellians among us) is that at the very leading edge of the sphere of television emissions are the Howdy Doody Show and the McCarthy hearings. Seems like more than adequate reason to avoid us.

Source record: 23521

There seem to be two categories of QS cards: Those mailed during the course of 'normal' contacts and those sent via QSL bureaux for competition working etc.
I would be interested to know if radio amateurs email QSL cards to each other or not. If so, are emailed cards acceptable for confirming competition contacts?
If emailed QSL confirmations are not acceptable for competitions could someone please tell me why not.
Thank you.
Ted.

I do think that oversimplifies the situation. I receive quite a few QSL
cards via the bureau for regular QSOs. (and occasionally, a
direct-mailed QSL for a contest QSO)

> I would be interested to know if radio amateurs email QSL cards to each
> other or not. If so, are emailed cards acceptable for confirming competition
> contacts?

Email QSL cards are EXTREMELY rare. (I have made over 60,000 QSOs and
received my first -- and only -- email QSL about 2 weeks ago.)

"eQSLs" are not considered acceptable for award credit.

My guess is because under current protocols it's too hard to tell
whether a card is legitimate or a forgery. (sure, you could forge a
printed QSL too, but for the very rare countries printed QSLs can be
checked against the printed cards submitted by other applicants to
verify their legitimacy. That's not practical for very common countries
e.g. Germany, Japan, Russia, Canada, but it's so easy to get a
legitimate QSL from those countries that forgery probably isn't worth
the effort.)

I do understand the ARRL is working on protocols for electronic QSLing.
I'm sure something can, and will, be worked out.

> >Has literacy finally been abolished in British high schools?

As I wade through some 60,000 QSOs and about half as many QSL cards, I note... that most German, Belgian, Dutch, Scandanavian, Swiss, and Japanese hams speak and write nearly perfect English. More than once, I've mistaken a German or Japanese caller (on SSB) for another W. It's usually more correct than what I see from other Americans. The English I see and hear from British hams is also (of course) excellent -- and what I see from British non-ham posters in other newsgroups is usually quite good too, again much more than I can say for American posters.

There used to be a substantial difference in English ability between East and West Germany when they were two different countries. The gap seems to be closing very quickly.

I've been lurking in an Australian (broadcast radio) newsgroup and have found the written English there to be simply atrocious, even worse than what we write here in the States. Yet the Australians I work on the air, and the ones who send me QSLs, seem to be quite literate.

Had occasion to place a phone call to Canada this afternoon. I'd forgotten how different the "American" and "Canadian" languages were<grin>!

(Yes, Walt, I will admit that what we speak over here may not actually be English<grin>.)

2823. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-02 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7t4744$n3t$1@news.hawaii.edu>
Source record: 23525
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

SB DX @ WW $OPDX.429
Ohio/Penn DX Bulletin No. 429

The Ohio/Penn DX PacketCluster
DX Bulletin No. 429
BID: $OPDX.429
October 4, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1LU, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, W4WX, N5FG, W5FI, K8PYD, K8YSE, K9MIF, Antonio Bosso, DF7ZS, DJ5AV & DX News Letter, EA4ABW, EA5GMI, G3SWH, G0IAS, G0PSE, HK3TAS, JI3DST, LU9AY, ON6TT/5X1T, SM0DJZ, SM0BFJ, SV1ENG, UR5WCW, VE2EH, VE3FU, 3A2MF, 4X1VF and 9U5D/SM5DIC for the following DX information.

3A PIRATE. Gino, 3A2MF, informs OPDX that a station operating on CW signing 3A/I1YRL between August 1-22nd was a pirate. Gino has talked to Luc, I1YRL, and it was confirmed that Luc was not in Monaco during this period. Do not QSL because cards will be returned to sender.

5R, MADAGASCAR. John, SM0DJZ, reports that from October 21-31st, he will visit Ake, 5R8FU, and hopes to be able to operate as second operator from his home station. He will try to activate 160 and 80 meters, if they can find ways of erecting an large enough pool supporting antennas for these bands. Also, he will be active on WARC bands and maybe 6 meters and RTTY. John states that they will enter the CQWW DX SSB Contest as a Multi/Single, but on a small scale! (At least 5R8 and Zone 39 will be activated!!). He provides the "Sunrise and Sunset" for 5R8 around October 25th, which is approx: 0215/1457z. An online QSO-look-up will be available after his return in November. Please check the Web page:
http://dx.qsl.net/logs
Contacts for 5R8FU are already now avaible for all his activity up to July 12th. John hopes he will be able to make some photos available on some WEB-pages afterwards. QSL via SM0DJZ, Jan "John" Hallenberg, Siriusgatan 106, SE-195 55 Mersta, Sweden

7Q, MALAWI. Eli, 7Q7CE, has been very active over the past weekend on 10 meters. Check around 28495 kHz after 1315z and as late as 1430z Meanwhile, look for Harry, 7Q7HB, to be active from Club Makokola on the south west shore of Lake Malawi as of Sunday, October 3rd. By the way, this is the same QTH as 7Q7CE. Harry's activity will happen when

time and work permits him to operate. QSL via G0IAS (DIRECT only).

9U, BURUNDI. Ragge "Gus" Jagero, SM5DIC (aka 5X1D, 9Q5TE, 9X/SM5DIC), informed OPDX by E-mail that he is now active as 9U5D and will stay there up to Christmas. He states that he received his new license last week by the Dept. of Ministery of Defense (ARCT) who now gives out LEGAL licenses. Gus reports that his license's serial number is 001! Gus will be active on all HF bands including 6 meters. Also, Leif, SM0BFJ, Gus's QSL Manager, has sent along some additional information. He states Gus is in Bujumbura and has a station at his office which is in another part of the city. Gus states that he will be active on all bands, but unfortunately, 40, 80 and 160 meters may be difficult because of the 1800-0500z curfew. However, Gus has promissed to stay over some nights at the office in order to work some lower bands. His equipment is an IC-706, and the antenna is an inverted L with a total length of 41m. On 6 meters he will use a yagi. QSL via SM0BFJ (Direct only, no bureau) at: Leif Hammarstrom, Birger Jarlsgatan 38, SE-114 29 Stockholm, SWEDEN. By the way, Gus has forwarded all his documentation to the ARRL, who apparently accepted his documentation.

CO9, CUBA. Look for CO2WF, CM2KL and others to participate in the CQWW SSB Contest (October 30-31st) as CO9BCC from Boca Ciega beach. Operations will be 160-10 meters. QSL via VE3EH. Check out the CO9BCC Web site at: http://www.qsl.net/ve2eh/co9bcc.htm
ADDED NOTE: Pierre, VE2EH, states that you will find the latest results of the 1999 ARRL International DX Contest, plus photos, check out the Web page: http://www.qsl.net/ve2eh/co9.htm

CP6, BOLIVIA. Mats, LU9AY, will go to CP6-land to work the CQWW SSB Contest from October 27th through November 7th. He will be on the air as CP6/LU9AY on SSB and CW. Activity will be mainly CW, and he will try to hang around the WARC bands. Look for him before and after the contest. QSL via NU4N. Mats states, "Please no more homecall cards.. or LU bureau.. because I am not replying those.. all should go to NU4N."

D44, CAPE VERDE ISLANDS. "The 59(9) DXReport" reports that Angelo, D44BS, has informed them that Julio, D44BC, had a heart attack and is in critical condition. OPDX wishes Julio a complete recovery.

EAST TIMOR. Peter, 5X1T/ON6TT, reports that one member of his team, Brian 'Joe' Poole, G3MRC (5X1P), is in East Timor and Darwin installing their stations. He knows that Brian has a VK8 license already, but forgot his callsign. However, it will probably take a while before East Timor will be qualified as a new country. It must conform to one of the 3 criteria for a DXCC entity.

GB2, GIBRALTAR. Gary, W5FI, informs OPDX that he will be active as ZB2/W5FI now through October 10th. Although this is a business trip for Gary and business will come first, he anticipates being on during the openings to NA, SA, JA, and Europe almost every day. His emphasis will be on RTTY, CW, and SSB on 80-10 meters. QSL via W5FI.

HB0, LICHTENSTEIN. Helmut, DF7ZS, reports that they will be active from here and participate in the CQWW DX SSB Contest from October 30-31st. The callsign is not known yet, as they are trying to get a short callsign from the HB0 guys. The worst case would be HB0/DL0TS. QSL info is via DF7ZS. They are planning to operate mainly on 40 meters operating split (looking for DX at night) and a second station on 10/15/20 meters. The team is going to test the 40 meters band setup during the WAG (Worked all Germany) Contest, October 16-17th, using the DF2OOO callsign.

IOTA NEWS.....
AF-NEW. The Italian team composed of Peppino/I8IYW, Tony/IK8UHA, Tony/IK8VRH, Robby/IK7XIV, IZ7ATN, Alex/IZ0CKJ and Robby/IS0JMA will be activating Giftun Island in the South Red Sea Group. Activity from this new IOTA will take place in May 2000. The team is looking for sponsors and expects that this DXpedition will cost 10,000 USD for a 5 day operation. If they succeed in retrieving enough funds, they could also activate from Tawila Island (Another new IOTA) in the North Red Sea Distant Group. The QSL Manager is: IK8UHA, Antonio Barbato, PO Box N.5039, 80144 Naples, Italy. A Web page is under construction at: http://www.qsl.net/su9dx

AS-032. Look for Takeshi, JI3DST, to be active from Oosumi Archipelago (Tanega-Shima) (Nishinoomote-City Kagoshima), as JI3DST/6, November 20-22nd. Activity will be on 17/15/12/10 meters SSB (40 meters for JA). QSL via the JARL Bureau (The BEST Route) or direct (address below).

AS-049. Takeshi, JI3DST, is planning to be active from Takara at the end of December, 1999.

AS-067. Look for Joe/JA4PXE/JA6, Yuichiro/JF6WTY/JA6 and Takeshi/JI3DST/JA6 to be active from Uji Archipelago (Kawanabe-Gun Kagoshima), October 8-10th. Activity will be on 40/20/17/15/12/10/6 meters SSB. QSL via JARL Bureau or direct to:
JA4PXE - Joe Kuwahara, 1-74 Midorimachi, Tokuyama-City Yamaguchi, 745-0075 Japan
JF6WTY - Yuichiro Hayashi, 2-40-27-101, Murasakibaru, Kagoshima City Kagoshima, 890-0082, Japan (99 CBA OK)
JI3DST - Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku Osaka-City Osaka, 545-0021 Japan.

AS-100. Jan, 4X1VF, reports that the callsign has been changed for his group to be active from Akhziv Island on October 23rd. Look for them to be active as 4X0A instead of 4Z0A. Please refer to OPDX.427 for more details.

AS-136. ED, BD4ED/4, operating from Chongming Island at the mouth of the Yantez River, can sometimes be found on 21024 kHz around 0100z. Also, check 30 meters after 2000z, as late as 2200z. QSL via CBA.

EU-060. Kostas, SV1ENI, has moved to Evia Island, his wife's home, and will operate from there. SV1ENI will operate CW 160-10 meters. His previous address in Athens is not good any more. QSL only to the bureau or to his new address: Kostas Sarmas, Gialtra, 34300, Evia, Greece. Please do not add any callsigns to the address.

EU-120. The Taunton and District ARC will be operating from the old light-house (200m above sea level) on Lundy Island with the callsign GB0LI from November 1-5th. Operators Bill/G3WNI and Tom/G0PSE will be active on 160-10 meters CW and SSB. QSL via Bureau or direct to G3WNI. After the DXpedition, the log will available at: http://dx.qsl.net/logs

NA-031. Scott, W1LU, will be activating Goat Island and Aquidneck Island, RI, as W1LU/p on Tuesday 10/5/99, beginning at 1600z, for an hour or so on each island. Special QSLs will again be available via W1LU (ex WA1P).

NA-142. The Magnolia DX Association will be active as W4D from Dauphin Island on SSB and CW during the CQ WW DX Phone Contest weekend. Check the usual IOTA frequencies as well as the WARC bands. QSL via W5OXA.

J6, ST. LUCIA. Members of the "Florida DXpedition Group" (W4DXP) will be here October 25th through November 1st. They will be active in the CQWW SSB Contest (October 30-31st) as J6J. Look for J68WB (William/N2WB), J68AZ (Clarence/W9AAZ) and J68WX (Bill/W4WX) before and after the contest on all bands/modes. QSL cards for J6J go to N5VL and others to home calls.

QSL INFO AND NEWS......
4V30CNT was active this past week in celebration of the 30th anniversary of the foundation of CONATEL by the Radio Club of Haiti. All stations who made a contact with 4V30CNT will receive a special QSL card. QSL Managers are Alan, WA4JTK (for international contact), and Bernard, HH2B (local contacts).

Gilles, F6IRA, reports that Zoli, HA1AG, has confirmed by E-mail that the CQ ZONE printed on his QSL is wrong. The 21 should have been 20. Zoli states that he is sorry for this mistake.

Alex, HK3TAS, states he was active in last week's CQWW RTTY CONTEST, and a lot of stations need his QSL info. His callsign HK3TAS is new and you will not find it in the Callbook. Alex does have a QSL Manager. Please QSL via Siso, HK3SGP.

QSL Manager Leo Fry, K8PYD, was operating in the CQWW RTTY contest from HZ1AB. All QSLs will be answered by himself. Outstanding QSLs for all modes in the months of June, July, and August should be answered in the near future. Leo informs OPDX that HZ1AB now has RTTY and PSK-31 capability and should be active on these modes in the coming months along with 160 meter SSB and CW operation. HZ1AB is planning participation in the upcoming CQWW SSB and CW contests.

Takeshi, JI3DST/3, was active this past weekend from Honshu's Coastal Island (Awajishima Hyogo), IOTA AS-117. QSL via direct or the JARL Bureau.

NEW QSL MANAGER. Phil, G3SWH, reports that he has taken over the QSL management of ZF2NT from N2AU. Phil states that he has a full copy of the logs since the 5th of June 1998, but has been asked by Bruce to answer "ONLY" direct QSLs with return postage and SAE, i.e. (no bureau applications will be processed). Phil's postal address is: Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom

Chris, VE3FU, reports that he has recently moved, and Buckmaster still has his old address. QRZ has his new address, and Chris has paid to have his mail forwarded until the end of the year, but after that any QSLs sent to his old address will be returned by the post office. Of course, via the bureau always works. If you need cards for VO2AC, VO2CQ and VE3FU/NP2, QSL via the bureau to VE3FU or direct to: Chris Allingham, 3417 Torwood Drive, Dunrobin, ON, Canada K0A 1T0

WB1HOF was a special event station activated last weekend and was sponsored by the Hampden County Radio Association at the Basketball Hall of Fame in Springfield, MA. The WB1HOF callsign stands for "World Basketball One Hall of Fame". QSL via Hampden County Radio Association, P.O. Box 705, Agawam, MA 01001.

SPECIAL ACTIVITY. Jaime, EA4ABW, would like to inform everyone that on October 15-16th the JOTA (Jamboree On The Air) will take place. A lot of special Scout event stations will be on the air. In Madrid, Spain, Jaime states that he will be on the air possibly as ED4SDM (Scouts De Madrid) or with his personal callsign EA4ABW/J (Jamboree). The special callsign has not been approved as of yet and is still waiting for authorization. QSL will be via EA4ABW through the bureau or via CBA.

SPECIAL EVENT. Look for EO55WL to be active between 2100z October 24th, and 2100z October 29th, to celebrate the 55 years of libaration of the Ukraine in WWII. The activity will be on all bands CW/SSB/RTTY/PSK31/SSTV. QSL via UT1WA either bureau or direct to: P.O.Box 5951, LVIV, 79054, UKRAINE. The same callsign was used in July this year to celebrate the liberation of Lviv City. The QSL cards are OK via the same manager, UT1WA, either bureau or direct. After the end of October, QSL cards for both operations will be sent as soon as they will be received from printer.

SPECIAL EVENT (Attention Prefix Hunters!). The very special callsign EG0UV will be used during the 500th anniversary of the University of Valencia. The special event station will be again on the air October 6th (next Wednesday) because of the official inauguration of the academic year 1999/2000 by his Royal Highness, the Prince of Asturias. The number zero (0) is only issued to stations where some member of the Spanish Royal Family has taken part in a special event and as the personal callsign of the King of Spain, EA0JC. QSL via EA5GMI.

UP ONE. The ARRL DXCC List is officially up one entity as of October.
With the addition of Palestine (E4), the current entities are now 332.

VK9C, COCOS-KEELING ISLAND. The "DX News Letter" reports that a VK2 ham has said to be on Cocos Keeling now and should be able to be on the air after October 1st. No QSNs were reported as of yet.

ZK3, TOKELAU. Ron, ZL1AMO, has cancelled his trip to ZK3 due to being sick from the boat ride to 5W (Samoa). He states that he could not face the trip on the boat again. However, remember the "Double Trouble" group will be heading here October 7-12th.

ZX, BRAZIL. "The 59(9) DXReport" reports to look for ZX7G from Fortaleza de Nazare Island, October 8-11th. Activity will be on 80-10 meters, CW and SSB. QSL via PY7MEU.

2834. Why is KP5 Desecheo a rare one?

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-04 00:00:00 UTC

Anyone know why the Desecheo reef is so rare? I thought it was a popular diving destination off the northwest coast of Puerto Rico. Apparently there are scuba diving tours around this reef island every week. What is stopping people from setting up a portable operation on the beach? Anyone know when the last approved dxpedition occurred there? Tnx for any info. 73 de John, K7JY.

> > Know any good propagation forecast sites on the web?

The following is one of the best sources for predicting solar flux and A-indices which will be needed by most programs:

http://www.dxlc.com/solar/

To predict these values, just look at the readings 27 days ahead of the date you need. For example, October 1 was a flux of 121.6 and A-index of 11. That means October 28 should have approximately the same values (with possibly a higher flux assuming sunspots are still rising).

Note that on this page comparing Cycle 23 to 21 & 22 (http://www.dxlc.com/solar/solcycle.html), he forecasts that we may have already seen the peak in August 1999!

"My current (October 1999) prediction is that cycle 23 will peak in January 2000 (could
be as early as August 1999 or as late as August 2000) with the monthly SSN reaching 116 (uncertainty +15/-20)."

Let's hope he is wrong, but after you look at this cycle compared to others, it does appear that Cycle 23 is developing into one of the weaker ones we've seen in some time.

See the graphical comparison at http://www.dxlc.com/solar/cyclcomp.html

I've heard that illegal activities make the island unsafe for
unprotected visitors but cannot vouch for this. However in 1992,
December I did work KW2P/KP5 and AA4VK/KP5 on 10 and 15 meters.

To my knowledge that was the last legitimate operation from the island.
I was out of town over the holidays and missed it!

The government states that the island has dangerous drug-running pirates
on it which they either can't or don't want to expend the effort to
remove, so they prohibit legal landings there. A DXpedition would have to
have a license AND legal landing papers for the island in order to get
DXCC accreditation.

I hope it happens soon, as I still need it for an all-time new one and I
know others who do too.

73, Zack W9SZ

I thought that was the problem with Navassa (it's been occupied by drug smugglers?!) but didn't think the same problem applied to Desecheo. I thought it was a national wildlife refuge & was difficult to receive landing permission for.

Some of these Caribbean islands can also be simply physically VERY difficult to land on.

For RTTY, I would suggest the PK-232/DSP3 TNC, In addition to the DSP filters
it provide a signal identification mode that helps a lot ID'ing commercial
transmissions.

Codeless ham self check:

Are all your antennas magnetic ?

Are all your antennas safe for children to get poked in the eye with ?

Are you thrilled the more useless UHF bands Keyacom put in their radios
?

Can you remove your antenna "farm", visit a park, and do your part to
keep America beuatiful by picking up loose trash ?

Did you buy a used state police Crown Victoria because all those holes
were a selling point to you ?

Did you buy a IC-706 because you want it for 6 through 432 but are an
"avid swl" and "need it because even though I have my codeless license,
I am working on the 5 words per minute, but just am having so much
trouble gtting it down, but I'm working on it" ?

Do you use Q signals on phone because you have underlying inadequacy
that you don't know a bit of CW and want to act more like a CW operator
than an actual CW operator ?

Sent via Deja.com http://www.deja.com/
Before you buy.

In fact, 10 has been in quite good shape since at least last Friday. The extreme north (Scandanavia) has been missing, but just about everything else has been in. Including UA1 & UA6, and the British Isles. (no GMs heard in awhile though) Did not hear any JAs over the weekend though, despite having the antenna looking up that way. I'm sure they'll show up soon.

(I have also noticed that the ranks of intruders in 28.0-28.1 seem to thin out substantially after a few hours of USA<=>Europe propagation. One can only hope they're frustrated by the QRM!)

The most important thing is to learn the *sounds* rather than the
dot-dash patterns. In my opinion, probably the best thing to do is just
to practice, practice, practice.

There is excellent software available for code practice. "Morse
Academy" is one that comes highly recommended.

I suggest you set aside a period each day
say 15 minutes in the morning
there are a number of software programs -- Morse Tutor is the one my wife
used (she earned her Extra at age 52!)
Also get a HF radio and listen to the code
you will find slower operators and you will be able to copy a character here
and there then a word etc
Good luck to you
K6EXO

I used the Farnsworth method on LPs many years ago. I found that there was no
best way for me. I used a lot of different methods and learned from all them.

The thing one needs is desire and a little time to work on that desire. I have
heard that from scratch takes an average of about 80 hours practice. I took a
lot longer than that. I now am comfortable at about 25 wpm.

Don't expect to have it down pat in just a few days. Forget instant
gratification on the code. It will take a while. If the method you are using
doesn't seem to help you, switch to something else.

Also, get a key and oscillator. Sending practice is very helpful in learning
the code. Send a page from a book of newspaper. Concentrate on sending good
code and you will be surprised at the results.

Approach it from the angle of wanting to learn the code and not from wanting to
get on HF.

Enjoy.

I've had my Tech + for 7 months and here is my advice.

Learn code using the Koch method which, to me, is a special way of
using Farnsworth. You learn a few characters at a time but at a
character speed of something like 18 wpm. I wish I had done this from
the start.

I started by doing that mental look-up table in my mind and now it is
very difficult to get to 13 wpm for my general exam.

You should be able to find info on the web.

Learn from my mistake.

Bob,

I have to agree with you. I learned CW and studied for both written tests for my Technician Plus--took me 8 days (I had to go test since the next session after that was over a month away!). I passed both written exams and had to wait for the Morse portion. I sat in the hallway and learned the numbers while I waited. I copied about 35 characters in a row and got so excited I failed to copy anything else! I didn't even bother with the 10 question test.

I hit the air and made QSOs daily on 40 and 80 meter CW. Upgraded to General at the next session, Advanced the session after that, and Extra on the third session.

After getting my Extra I took up contesting--nothing else like it will get your code speed up to 30 wpm!

I never learned the code by sight and still have to translate ".-" into "didah" in order to recognize the character as an "a". Learning at 18-20 wpm character speed and leaving bigger "gaps" is the only way to go.

Keith,

I'm running a cable modem here and often stay connected to an Internet cluster for hours. Over the past few days there seems to have been a problem with several of the usual amateur radio Internet clusters. I went back to VHF for a few days. I'm not sure what's causing the problem. I'm hoping it will get worked out in the near future.

Hello,

I am inviting you to come visit http://hfradio.org - a site with many resources for Shortwave Radio and Utility Listeners, Ham Radio Hobbiests, and others who might be interested in this type of content.

So, come on by and check out my non-commercial SWLing/Ham Radio website. The URL is http://hfradio.org and features DX information, including QSL Route/Manager Lookups and Callbook Lookups; a Propagation Center including my eAlert service (allows you to sign up with your email address. Then the eAlert system will send you email propagation reports. I use this with my pager.); Equidistant Azimuth Map software (allows you to create maps of any QTH); Swap and Shop; Bookstore (I've hand-picked over a thousand book titles on radio, etc.); Free website space for YOU to create your own Ham or SWL site, and there's more. Easy to navigate. Open for suggestions.

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

Do you still display your old spark gap transmitter and Quaker Oats cat whisker radio to new visiting hams?

Do you whine and complain about these newfangled Space Cadet kids, No Code and computers?

Do you whine and complain more about these newfangled Space Cadet kids, No Code and computers?

Do your dual pocket to ear hearing aids squeal as you pull them out to adjust the already high gain?

Have you changed the Colostomy bag today between CW contests?

Is your house still wired with silk wire and the occasional oil lamp and a still functional Crosley TV?

Still trying to tune in "Amos & Andy" on that state of the fart Super Regen? ;-)

Source record: 23470

Hello !
I've learnd CW by myself using a software called super-morse
and a CW teaching course (vy old) in records from Howard and
Sams (hope I've spelled it right !)
I know other hams who did well on the CW exam just studying by
software. Look for this kind of software on the web and will
find several.
One thing I strongly recomend, once you begin your trainning
do not stop until you reach the end (knowing all characters).
You should practice with the course or software EVERY DAY !
Do not extend your practice time too much so that you never
get tired , only 15, 20 minutes or half an hour per day is enough
the point is to do it every day so you wont forget it and the
sounds will gradually become familiar in your mind.
Once you know all letters and numbers, tune in on the ham bands
specially on 21 and 28 MHz on the novice seccion and try to copy
some QSOs.
73 and Good Luck !

Just because I enjoy CW most of the time doesn't mean I'm not technically
advanced. I also enjoy the digital modes (have you been on PSK31 yet?)

I also have built state-of-the-art gear for the UHF and microwave bands
through 10368 MHz. Unfortunately there don't seem to be too many people
to work up there.

Hello fellows ... I usually just read through the messages and smile at
all the different views of our service, hobby, endeavor, passion or what
ever one may call it. I however do feel rather strongly about the need
to make fun or light of peoples problems. I am sure that the above
writer does not have a colostomy. I thank God that I don't. I have had
many patients over the years struggle and accept this unfortunate
situation for whatever reason in lieu of death. To make light of this
for humor reflects nothing but ignorance upon the writer. I would
really like to have the writer sit in on a counceling session with a new
colostomy patient .... then I am sure that his idea of what generates
a laugh would change. Sincerely ... Tom Popovic PT KI3R

2886. IOTA

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-10 00:00:00 UTC
From: orang@pondok.orgy
Message-ID: <38001f5d.2074960@news.tm.net.my>
Source record: 23488

The Radio Amateur Society of Thailand (RAST) wishes to announce a special DX Pedition to a new Thailand IOTA Island Group and participation in the RSGB IOTA Millenium Competition, to celebrate the Year 2000.

A "first-time" operation is planned for the Malay Peninsula South East Group (including Kra Maeo, Nu etc) for March 2000. The Islands are uninhabited and located off the coast of the Southern Thai Provinces of Sonkhla and Nakhon Si Thammarat,in the South China Sea. They are about 1000 km South of Bangkok, and close to the Northern Malaysia border.

The operation is being scheduled for March 2000 so that contacts qualify for "premium" (bonus) points in the RSGB IOTA Millenium Competition.

An initial survey and analysis by E21AOY, G3NOM ,HS1CKC,HS9CA,HS9DP, HS9FV and HS0GBI, has indicated that access by sea to all of the islands in the group is difficult for various reasons, and further survey work will be needed to find the best plan. It appears the operation may be relatively expensive and financial assistance may be needed to make it a success.

Participation is open to all individuals and groups who are interested in DX in Thailand. Several RAST members (Thai and Foreign) have already expressed an interest, along with the TG96 DX Group,and the Nakhon Si Thammarat Radio Club. RAST will be the coordinator. Any overseas IOTA enthusiasts or DX Groups interested in assistance, participation or sponsorship are invited to contact RAST. Further detail will be announced in due course..

73 de Ray

HS0/G3NOM

Secretary (International) RAST

SB DX @ WW $OPDX.430
Ohio/Penn DX Bulletin No. 430

The Ohio/Penn DX PacketCluster
DX Bulletin No. 430
BID: $OPDX.430
October 11, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The GoList, N2VW, NT2X, WB2RAJ/WB2YQH & The 59(9) DXReport, AJ3M, K3TEJ, WB3JFS, K4AVQ, W5FKX, NI6T, K8YSE, K9RZ, 9A3ZG, CE6TBN & Bolrtin de DX, CX3AL, DJ5AV & DX News Letter, F6AJA & Les Nouvelles DX, G3NOM, HA0HW, HP1AC, ON4VT, PS7AB, PS7KM, RA3AUU, UT7ND, UX0FF, VE2EH, YO3JGC and ZL4OI for the following DX information.

3F, PANAMA. Cam, HP1AC, reports that he and others in Panama will be using the special 3F prefix between Decmeber 1st and January 5, 2000, to commemorate the turnover of the Panama Canal over to the Repubic of Panama. Cam states to look for him as 3F1AC on 40-10 meters CW only and to QSL his operation via HP1AC.

4U1, ITU HQ. Masa, AJ3M, informs OPDX that after his business trip in Moscow he will be in Geneva from October 19-21st. He will be on the air from 4U1ITU during his visit. QSL via Bureau or CBA to 4U1ITU.

4X, ISRAEL. Enia, YO3JGC, informs OPDX that she is currently active as 4X/YO3JGC. QSNs reports show that she was active this past week on 10 meters (28436 kHz around 1515z). However, Enia wants everyone to know that her QSL info is not always correct in a few callbooks. QSL 4X/YO3JGC via Eugenia Radu, P.O.Box 18-56, Bucharest 71500, Romania.

9A, CROATIAN ISLANDS (IOTA AND IOCA Activity). Frane/9A5V, Matko/9A3VM and Fredi/9A5KV, who were active this past weekend from the island of Lokrum (CI-056, JN92BP), will try to activate the island of Mrkan. This will only be a one day DXpedition. According to Frane, this DXpedition to Mrkan Island (CI-072, JN92CN) will be the most adventurous one. Operations will take place October 16th or 17th. Later this year, the group could activate the island of Jakljan (CI-033, JN82VR) which is also located in the same region. All islands mentioned here are also valid for IOTA EU-016. QSLs go to home callsigns. For those interested in the basic IOCA award, island chasers must contact 10 different

Croatian islands. The fee for "The Islands of Croatia Directory" is 10 USD which covers the cost for the basic IOCA award. For more details and a list of all Croatian islands, go to the Web page at: htttp://www.qsl.net/9a6aa

9H, MALTA. Deryck, G3VLX, will be active as 9H3AM once again from October 21st until the early part of November. He will use a FT-757 with a vertical and dipole antennas.

ANTARCTICA. Jeff, WB3JFS, reports the following to OPDX: As the Austral Summer approaches the southern hemisphere many of the Antarctic bases are coming out of "hibernation" by preparing for another season of new crews and visiting scientists and explorers. Along with these groups are a few hams who like to operate from "the ice". Some operate from remote camps or huts with dipoles or verticals while others operate from major bases with yagis or log periodics. It is never known how many or which bases will be active, so you never know what you will hear next. There is a great website that contains a vast amount of information about Amateur radio on "the ice". Everything from old and new QSL cards, up to date QSL information, and a map of the continent. The address is:
http://www.avana.net/~polar
It is maintained by Bob, K4MZU, and it's worth checking out if you're interested in working the bases on this remote land.

CE0Z, JUAN FERNANDEZ ISLAND. Operators CE6JOE, XQ3SAI, HC5EA, LU9AY and CE6TBN will be active from IOTA SA-05 between Janury 6-16th in the year 2000. No callsign has been announced yet. The group plans to be active on all bands 80-6 meters plus the WARC bands, on SSB, CW, RTTY, SSTV and Satelite with 5 Stations. The team is looking for another operator, if interested contact Marco, CE6TBN at: ce6tbn@qsl.net
Any donation for this operation is welcome and QSLs can be sent to: Marco A. Quijada, CE6TBN, Box 1234, Temuco, Chile. For more details, check the Web page: http://www.qsl.net/ce6tbn

CO9, CUBA (Correction). Activity by the CO9BCC group from Boca Ciega beach during the CQWW SSB Contest (October 30-31st) should be QSLed to VE2EH not VE3EH. Please refer to OPDX.429 for more details.

EA8, CANARY ISLANDS. Steve, G0UIH will be active as EA8/G0UIH/P from October 21-28th. His operations will be SSB only on 20-10 meters. QSL via his home callsign.

ER0, MOLDOVA. Gene, UT7ND, will be active in the CQWW CONTESTS from the village of Otaci, Moldova, as ER0N. All QSLs via the Ukrainian QSL Bureau or direct to UT7ND, Gene Chumakov, P.O. Box 5235, Vinnitsa, 286018, Ukraine.

FK, NEW CALEDONIA. Danny, FK/F5CW, has received his FK callsign and is now signing FK8VHY. He was spotted this past weekend on 17 and 15 meters CW after 0300z.

FO, FRENCH POLYNESIA. "The 59(9) DXReport" reports that Yann, F1NGP, will be here October 29th through November 13th. His modes/bands of operations

were not mentioned. Also, Yann will receive his callsign upon his arrival.

FY, FRENCH GUYANA. You have a few more days to work Baldur, DJ6SI, as FY/DJ6SI. He will leave October 15th. Over the past weekend he was heard on 12 and 160 meters CW. QSL via DJ6SI. Also, look for Joel, F5PAC, to be active as FY/F5PAC from November 1-14th.

HB0, LIECHTENSTEIN. A Hungarian group will be here this year again from October 30th through November 7th, to participate in two upcoming contests. The HA-QRP Contest, sponsored by "Radiotechnika" (the journal of "electronika"), will take place 0000z, November 1st through 2400z November 7th. The team members of Laci/HA0HW, Tomi/HA4DX, and Geza/HA4XG will be active on 3511 kHz (-/+ QRM) 24 hours a day with the callsign of HB0/HA5RT/p as QRP station. Their QTH will be at Triesenberg at 1400 meters ASL. However, the operators will use HB0/homecall/p on other bands, mainly on CW and RTTY with two different stations with 100 watts, GPs and dipoles. They will participate in the CQWW SSB Contest to give out new multipliers for those stations who need it. Suggested frequencies are:
CW - 1831, 7011, 10104, 14011, 14026, 18071, 21011, 21026, 24891, 28011, 28026 kHz
RTTY - 7040, 14086, 21086, 28086,
QSL cards for confirmation with HB0/HA5RT/p QSOs should go to HA0HW, and the others should go via their home calls.

IARV IN TAIWAN. International Amateur Radio Volunteer (IARV) team leader Yoshi, JA1UT, has just returned from Taiwan, where IARV donated 35 VHF handheld transceivers to the CTARL President BV5AG for use in the Earthquake Disaster relief. He also assisted with rescue communications.

IOTA NEWS.....
AS-NEW. An excerpt from a press release by Ray, HS0/G3NOM, states that the Radio Amateur Society of Thailand (RAST) announces a special DXpedition to a new Thailand IOTA Island Group and participation in the RSGB IOTA Millenium Competition to celebrate the Year 2000. The "first-time" operation is planned for the Malay Peninsula South East Group (including Kra Maeo, Nu etc) for March 2000. Contacts qualify for "premium" (bonus) points in the RSGB IOTA Millenium Competition. The islands are uninhabited and located off the coast of the Southern Thai Provinces of Sonkhla and Nakhon Si Thammarat, in the South China Sea. They are about 1000 km South of Bangkok, and close to the Northern Malaysia border. More details will be annouced at a later date. SPECIAL NOTE: OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

OC-033. Philippe, FK8VHT, will be FK8VHT/P from Lifou Island from October 14-21st.

OC-114. Marcel, ON4QM, active as FO0DEH from Raivavae Island at the moment, will stay there until October 18th or 19th. From here he will go on to Tuamotu (OC-066).

SA-020. Joel, F5PAC (as FY/F5PAC), will go with FY5FU and activate Salut Island, while in French Guyana, from November 5-7th.

KH5, PALMYRA AND/OR JARVIS ISLAND. By the time you read this, Norbert, DF6FK, and his XYL Judith, DL2ZAD, should be active from here now through October 21st as KH5/homecall. Activity will be on 80-10 meters SSB only. QSL via DF6FK direct or via the bureau.

LIGHTHOUSE ALERT. A new one will be activated for the "Brazilian Light-houses Award" (DFB). Look for St. Alberto Lighthouse (DFB RN-03) to be activated by PX7ZZ on October 23-24th. Activity will be SSB/CW on 80-10 meters. QSL via PS7ZZ, F.E P. Freitas - Av. Sao Miguel dos Caribes 31, 59086-500, Natal/RN, Brasil or via the PS7 bureau.

NOIDXC GOES QRT. From a press release by Don, W5FKX: "After several weeks of review and soul-searching, the Board of Directors of the New Orleans International DX Convention voted to dissolve the convention. Faced with a financial deficit and a flat attendance for the last several years, a majority of the Board were no longer willing or able to justify the extensive amount of work and effort that was required to maintain a quality program. It was with great sadness that this final step was taken. The Board extends its sincere thanks to all of our friends and supporters, as well as to all those who have attended over the last 8 years."

OD, LEBANON. The LNDX reports that Genevieve, F5SQM, has received a licence and is active as OD/F5SQM. She is active mostly on CW and will participate in all major contest. QSL via her husband F6FYA.

P4, ARUBA. Alan, K4AVQ (ex-W0RIC, V2-W0RIC), will be active as P40AV from December 18th through January 1st (2000) at P49V's QTH. Activity will be on all bands 160-10 meters. QSL to his home callsign K4AVQ. More inform-ation later.

PY0S, ST. PETER & ST. PAUL ARCHIPELAGO. The Natal DX Group announced this past week that the Brazilian Navy has scheduled a new departure date for St. Peter & St. Paul Archipelago. The group states that they will depart from Natal November 3rd. After a three day trip, the group will be there and the start of the operation will happen as soon as they set up the stations. The distance between Natal and the rocks is around 1100 KM. They plan to be on the air 24 hours a day, on 80-6 meters. On SSB, CW, RTTY and SSTV. They will try to set up a longwire for 160 meters band. Their callsign will be:
ZX0SK - For SSB/RTTY/SSTV. QSL via PS7KM, via callbook.
ZW0SP - For CW. QSL via PT7AA, via callbook.
Please note, cards with insufficient postage will be returned via bureau. The group states that the "Brazilian bureau is working very bad and slowly".

QSL INFO AND NEWS.....
3B9R QSL STATUS. Garry, NI6T (3B9R member), reported that Frank, AH0W/W7, has informed him that about 2/3 of the many thousands of 3B9R QSL requests have been answered, and the rest are being worked on.

Frank notes that a great many second requests are coming in from DXers who seem to think their cards may have been lost. These additional cards slow the process, and, of course cause, additional expense to the senders. Again, patience is called for here. Your cards are coming.

Excerpts from a press release by Ed Kritsky, NT2X, he states that he will collect QSLs for Mike, RW1AI, operating at R1AND and forward them to him sometime before May 2000, when he returns home from Antarctica. No cards will be issued prior to his return. Technically speaking, Ed is not a manager, but a "mail collection point". Mike has a serious mail pilfering problem in Russia. Ed will not have logs or cards, and will not issue confirmations. This will be done by Mike himself, when he returns. All replies will be mailed out of Russia. Mike has always done his own QSLing, and his wishes must be respected. Ed STRONGLY recommend sending cards DIRECT to this address: Mike Fokin, R1AND, c/o Edward Kritsky, P.O.Box 715, Brooklyn, NY 11230, USA. Please enclose SAE with either an IRC or USD (please, no SASEs with US postage). Airmail letters out of Russia cost approximately 0.75-0.80 USD. Ed also request not to QSL him and Mike via the bureau. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

Leo, CX3AL, informs OPDX that the mailing cost of one letter from Uruguay is around 1.50 USD. A lot of stations have been sending SASE to him with only 1.00 USD. Leo states that over the last two years he has been paying the difference out of his pocket for return direct QSLs. However, Leo has received many QSL cards, mainly because of his activity on the WARC bands, and he cannot support it any more. He requests OPDX to "Please inform the DX comunnity that in the future direct requests that not cover full postage charges will be answered through the buro."

S21, BANGLADESH. It has been reported that Yoshi/JA1UT, Shigeharu/JA1AFF and Tada/JS1QHO will visit Bangladesh and plan to operate as S21ZE (this callsign was reissued, used back in 1994). They will be assisted by Rashid, S21AR. They plan to be active from October 14-18th. Activity will be mainly CW on the WARC bands, 29Mhz FM, and 6 meters. QSL via JA1UT.

SPECIAL EVENT (Another EO55 station). Nikolay, UX0FF, reports that he is the team leader of EO55FI special event station to commemorate the 55th anniversary of the "Liberation of Ukraine" in WW2. They will be active on all bands/modes October 25-29th. QSL via UX3FW, Yuri Kucherenko, P.O. Box 60, Izmail, 68600, Ukraine. PLEASE NOTE: Nikolay reports that they are having some problems with the S.A.S.E. from USA with stations sending Ukrainian Post stamps. Stamps being sent have a price of only 1.20 Ukr. Grivna. Ukrainian postage now is about 3.00 grivna....

SPECIAL EVENT. Members of the Otago Branch of the "New Zealand Association of Transmitters" (NZART) have been granted the special event callsign of ZM75AA for the month of October. The special callsign will be used in celebration of the 75th anniversary of the first trans-world 2-way radio contact. The contact took place on October 18, 1924, between Frank Bell,

Z4AA, of Shag Valley Station at Waihemo, near Dunedin, and Cecil Goyder, G2SZ, at the Mill Hill School in London. The Otago Branch members will be active mostly on the WARC bands now through October 31st. QSL either via the Bureau or direct with SASE to ZM75AA at: PO Box 5485, Dunedin, New Zealand (overseas stations enclose 2 IRC and self-addressed envelope for return card.)

SPECIAL EVENT. Look for VC7A to be activated by the Cowichan Head Contest Club in both the CW and SSB "CQWW Contests" to commemorate the 50th Anniversary of the founding of NATO.

TM5, FRANCE. The "LNDX" reports Dominique, F5SJB, will use the special callsign TM5CW from November 22nd through December 6th. He will also participate ino the CQWW CW Contest.

V26, ANTIQUA. Look for Bud, AA3B, to be active as V26K from here November 22-29th. Also, look for John, K3TEJ, to join Bud (after his Montserrat operation, see VP2 below) from November 25-30th as V26KW. Both will be active on 160-10 meters including the WARC bands. They will be in the CQWW CW Contest using the V26K callsign as a Multi/Multi entry. QSL V26KW via K3TEJ and QSL V26K via AA3B.

V31, BELIZE. Hugh/K0GHK and Roger/WA0ETE will be active from Ambergis Caye (NA-073) October 10-16th using the callsign V31KQ. Operations will probably be in the mornings and evenings, as they are planning on playing (other than hamming) during the day. Look for them on both SSB and CW, especially 10 and 15 meters. QSL via WA0ETE.

VP2, MONTSERRAT. John, K3TEJ, will be active as VP2MHJ from November 22-25th. This operation will be CW only on 160-10 meters. QSL via K3TEJ.

VP5, TURKS & CAICOS ISLANDS (Update). Jack, N2VW, reports that the team of Frank/WA2VYA, Ken/K2WB and himself are on track with plans to operate from the Providenciales Island (NA-002) from October 26th through November 2nd. The team will participate during the 1999 CQ WW DX SSB Contest (October 30-31st) as VP5T and as a Multi/Multi entry. They are members of the Frankford Radio Club. Emphasis will be on CW and the WARC bands before and after contest. QSL to N2VW with SASE/SAE+return postage, or bureau via N2VW. QSL VP5/ portable calls to home call CBA.

VP8, SOUTH SHETLAND ISLAND. Oleg, R1ANF/A, has been active this past week on 20 meters CW after 0100z from the Korean Antarctic Research base King Sejong HL-001. Two weeks ago he was operating from the Chinese Antarctic Research base, Great Wall. QSL via RK1PWA.

Hi there,

Apologies for the bandwidth. I'm constructing a list of stations who do and do not acknowledge SWL cards, so fellow SWLs know who to, and who not to bother sending to.

If you either do, or don't please send me your callsign and I'll include it in my database. If you do ackowledge them, but only do so direct, or whatever, please include those details too.

The information will be made available on my web site.
TIA es vy 73 to you all,
Karl - RS174461
http://www.swl.net/rs174461/open.htm

If SWL includes postage then,Yes, I acknowledge. No postage
means no acknowledgement, unless there is a 'free' way to send card.

..

2899. Question about ground for vertical antenna

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-11 00:00:00 UTC
From: Don Ware <dgware@voicenet.com>
Message-ID: <lq0COA1YRQ8y8mdaAIckzEbJkOys@4ax.com>
Source record: 23551

Hi,

I'm thinking of putting up a 40 meter vertical antenna out back. I was curious about the ground radials. I've heard different opinions about whether I need to pound in 8ft spikes at the end of each radial or not.

I'm sure it would help but is it really worth the effort ?

Tnx, de kb3dma

2902. Conditions good on weekends?

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-12 00:00:00 UTC
From: ti2dll@expressmail.net
Message-ID: <slrn801l8t.eu.ti2dll@ti2dll.dynip.com>
Source record: 23554

For these past few months I've been noticing something interesting in solar activity reports: during the week, the flux seems to maintain a steady level, sometimes dropping and sometimes rising, and the A index is always quite high (normally above 10).

However on the weekends I always see that the A index drops to less than 7... which I believe means good conditions.

So during the week, conditions bite... but during the weekends conditions get better. Is there a scientific explanation for this or is it just coincidence?

No. 30 radials in on top of ground will work well. More is better!

2904. ZK3CW on 40m - embarassing!

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-12 00:00:00 UTC
From: Peter Lemken <plemken@gmx.de>
Message-ID: <7tv5thkec1@fu-berlin.de>
Source record: 23556

Went home from work early yesterday since I saw them spotted on the WebCluster. However, what I heard was not ZK3, but constant jamming on his frequency, someone calling CQ QRM etc. The DX-operators must have guessed what's going on and changed their TX-frequency a number of times. However, the constant jammer always found him. Which leads me to the assumption that the deliberate jamming must have come from someone with 1.) a good receiving antenna, 2.) good enough operating skills to follow the DX. That leads me to the conclusion that the jammer is a moderately successful DXer, who already worked ZK3 on 40 and is now having fun preventing others from doing so.

And that's even more than embarassing.

I always acknowledge SWL cards! either direct with postage or via the buro.

I can still remember the excitement, as an SWL of getting cards back 20 plus years ago - hell, I still have them.

SWL's are hopefuly tomorrows Hams - we should go out of our way to encourage them.

Cheers,

/Denis MW0CBC/GW8OQV

I wouldn't bother with 8 ft ground rods at the ends of the radials. I would put out as many quarter wave radials on top of the ground as I could. The more the better. I worked DXCC on 40 with a homebrew ground mounted vertical with lots of radials. Good luck & 73,
Dale Richardson AA5XE

I regularly respond to SWL reports I get through the bureau, or
direct with return postage.

Back in the USSR's heyday, I would get a lot of SWL cards from there.
Nowadays it's pretty much all Western Europe.

Source record: 23564

This will get me lots of mail; but, trust me, it works. On a field day project several years ago in Colorado I bought a 150' roll of one inch opening chicken wire, two feet wide. I cut it in half, and formed a "cross" with it under my Butternut HF6V Vertical. It worked so well, that when I got home, I used it in my back yard as well, with an 8' ground rod next to the antenna base, and soldered a copper wire from it to the chicken wire cross as well. I've worked all states and about 101 countries on 10m to 80m with that antenna, with and without power. And a lot of it was during the bad part of the last cycle.

So what do I now have in West Texas, you guessed it, a ground mounted HF6V with a ground rod next to the antenna and two foot wide chicken wire in a red cross underneath it. Only difference is I've now made all four legs of the cross 1/4 wave length for 80mtrs. In the past two days I've worked the Netherlands and Japan with a 59 report running 'barefoot.'

The wire just lays on top of the lawn or ground and is virtually unnoticed by most people. Almost anything will hold it down in place. Don't knock it till you've tried it. A roll of 150' chicken wire is under $35 --- cheap, cheap, cheap.

Alternatively, the jammer has a Cluster connection & is following the
spots?
(in which case it may be productive to spot the DX on the *wrong*
frequency & see if the jamming follows?)

Man, if you're running SSB in 95.165-97.995, you're going to have a hard time contacting the vast majority of listeners who are using FM! You're also going to have a very hard time overriding those legal 100,000 watt stations with the 2,000' towers...

(assuming he doesn't know his 9's from his 2's, at least he's staying below 28MHz...)

I guess I'm just lucky. I stumbled across ZK3CW calling CQ
on 12 meters yesterday and worked him on the first call (with
an R7 vertical). Especially sweet was that not five minutes
later he was mobbed by an obviously packet-induced pileup.

Bandscanning trumps packet watching yet again.

The WAS was on 75mtrs on the Geritol Net and I worked most of the 40mtrs WAS on the Century Club Net. The DX was across the spectrum except for 20mtrs which was surprisingly poor for me. I am not crazy about the band and did not try to retune it for better results. To my surprise the 10, 12, 15 and 17 got good daytime results for DX with and without power. I just worked Hans PA7BT in the Netherlands this week on 21.275 running barefoot.

Yes, 100%. They go back the same way they come, either direct or via the bureau.
I still remember I had only about 10-20% card return when I was SWL some years ago.
I hope it's better today. (?) GL !

Some of the things that happen around big DXpeditions....

You have to give the "Double Trouble" guys lots of credit. They ran a great DXpedition on both T31 and ZK3. Both the phone and CW ops were outstanding controlling the pileup. I had to laugh when the DX cops got so bad on 14025 that the DX guys moved to 14024. I was listening to the split and heard a few people working. I spun the dial down one and made one call on the split.

My amp died (plate to grid short), yet I still made 13 QSOs with the T31 (no dupes) including RTTY--missed them on 40 meters! Missed the ZK3 on RTTY but got them on 40.

Now some of the so-called DXers...DXing is 90 percent listening (great advice from my elmer!).

Oh well...#266 in the past year.

Hello,

Check out http://hfradio.org - a site with many resources for Shortwave Radio and Utility Listeners, Ham Radio Hobbiests, and others who might be interested in this type of content.

So, come on by and check out my non-commercial SWLing/Ham Radio website. The URL is http://hfradio.org and features DX information, including QSL Route/Manager Lookups and Callbook Lookups; a Propagation Center including my eAlert service (allows you to sign up with your email address. Then the eAlert system will send you email propagation reports. I use this with my pager.); Equidistant Azimuth Map software (allows you to create maps of any QTH); Swap and Shop; Bookstore (I've hand-picked over a thousand book titles on radio, etc.); Free website space for YOU to create your own Ham or SWL site, and there's more. Easy to navigate. Open for suggestions.

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

Hi all;

Once in a very rare while I sell off equipment that just isn't being used. If you knew me, you'd know that EVERYTHING I own is absolutely functional, clean, and kept in a non-smoking, humidity controlled environment.

Here's the list, get it while you can...

Timewave DSP-59+ digital signal processor, with version 3.0 firmware. Like new, no marks, amazing abilities. Includes manual and wall wort power suppy (normally an extra cost item): $145. Really pulls them out of the "mud"; great for voice, CW and DATA..

TR-44 rotator with control box, mast mount and manual. The rotor is just back from the Rotor Doctor, it's been fully refurbed, lubed, cleaned, repainted and checked out; it looks new. $115 or BRO.

Heath SB614 Station Monitor, clean, fully operational, well built, looks and works virtually like new. This is a sweet monitor, with a nice bright trace, and plenty of controls. A steal at $145, includes good copy of manual.

Heath SA 2060 Legal Limit Antenna Tuner. This is Heath's "top-of-the-line" tuner, and one look inside will tell you why. Well built, like new, no scratches, works perfectly. Dual-meters, easy to adjust, supports coax, ladder-line, and end-fed antennas. Includes manual. $195 or BRO.

All of the equipment is guaranteed to be as described, you have my word of honor. I prefer postal Money Orders or Certified or Bank Checks, I ship same day via UPS. I'll split the shipping with you.

Thanks, and I look forward to hearing from you!

I've read the other replies. A note about the summit. The climbers only spend a few minutes at the summit. Lack of Oxygen, unpredictable weather and nightfall create life threatening conditions.

Base camp operation sounds like the most likely.

Read some of the many accounts of the various climbs. I don't think any dedicated climber would allow such a thing. What would be the point? It's so incredibly difficult as it is, why further endanger the climbers and Sherpas?

Work Katamandu and be satisfied.

Hi Murray,

Just a couple of points for info:-

It certainly doesn't take 30 days to get to Everest base-camp these days. You can take a scheduled flight from Kathmandu to Lukla (2,800m) and walk in from there in ten days - even allowing for aclimatisation. An alternative would be to fly from Kathmandu to Namche Bazarre - but this is very high and might well present aclimatisation issues.

I did a small peak (5,300m) about 15 miles North of Everest last year - pretty poor from a radio point of view because we were either in narrow valleys with steep sides with very poor reception at the bottom or once higher up, it was too damn windy and cold to play radio! (I only had a RX and long wire)

Add to this unusually heavy snow for the time of year, the Sirdar of another group we shared some facilities died overnight and finally, two of our party having to be evacuated by Yak and helicopter due to altitude sickeness problems - I'd go with the advice of the guy who said "stick to Kathmandu"!

Cheers,

Denis MW0CBC/GW8OQV

Hi Denis,
I certainly cannot argue with someone who has been there. Two weeks or ten days seems more reasonable for the acclimation walk-in. Perhaps I had read or watched a TV special and they allocated 30 days and took their time or my recall is incorrect. Probably more the latter as I get older.

I suspect that the DXpedition to Everest that the LA received a card from back in the 80s (as reported in a previous message here) was not anywhere close to Everest but back in Kathmandu celebrating the climb. I just cannot conceive it was at base camp. Well, nuff sed on the subject. These things can go on and on.

By the way there is a fascinating book about ALL of the attempts and successes to climb Everest. Some unbelivable stories including someone who made it half way up without equipment or adequate protective clothing. Unfortunately, I do not have the name or it's author but Im certain it can be located at the library. 73 Murray, K3BEQ

Agreed, I wouldn't think you could hear your *own* echoes after only one
trip around the world..

However.. the 1/7 second delay is obvious when you can hear *someone
else* both via short and long paths. (as in his example, where the
other station in question is only a few km away) In fact, it can make a
CW QSO quite a challenge when the long-path signal is almost as strong
as the direct-path one!

Also, there have been reliable reports of "long-delayed echoes" - as
long as several minutes, but also sometimes on the order of a few
seconds - and which seem to happen under this kind of conditions.
Nobody has a solid explanation for them, but signals getting trapped in
a kind of "round-the-world duct" and going around several times before
getting out have been proposed, and seems concievable...

Hi,

Does anyone have experience of the 40m add-on kit for this antenna? I'm assuming that it effectivley adds a 40m rotary dipole to the antenna. Any comments or experiences would be welcome.

I'm very pleased with the performance of the A3 in general - first rate litte beam!

Thanks in advance,

Denis MW0CBC/GW8OQV

Howdy, Folks.

This is an open invitation to browse http://hfradio.org, the NW7US Ham Radio and Shortwave Radio Resource Website.

This non-commercial site offers:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

I started this thread after working W0CF long path and hearing "long-delayed"
echos. Both Tom and I could hear the echo.

Thanks nuch for the LDE URL. I've always sought a better explaination that the
simple "It went arond 2 or 3 times before you heard it.

BTW, It was on 28 Megs which might have some bearing on the experiment. I have
never heard of a case on low bands.

I will study the references. Thanks for the tip

Had a discussion with a good friend who is an audio/acoustics engineer and he
pointed out the ear can begin to pick out echos at about 50 millisecs. This
would allow a single orbit explaination.

Source record: 23349

I am trying to compile a listing of 10 meter Novice SSB
allocations. For example, in the USA Novices and Technician Plus
licensees can use SSB from 28300-28500. If you have information
on other areas of the world, please forward to me. The only others
I have presently are:

Argentina: 28300-28350 and 28900-29300
Australia: up to 28500 but I'm not sure of the lower limit.

I would especially like to hear from Europe and Japan!

73, Bill W4ZV

P.S. "Novice" may not be a common term for overseas areas, but I
am referring to beginner or lower class licensees. In Japan I
believe this is called Fourth Class.

I'll try to summarize the gist of it for you. For years those if us with gain antennas on 40 and 80 have noticed that signals from Europe often do not arrive on the great circle path. They arrive from much further toward the East. Of course the reverse is true, if you are at the European end of the path. As well, it is well known that when signals travel over the polar area, there is often a bending that appears to take place around the auroral zone.

The writer used complex analysis of the different segments of the ionosphere which provides contour maping of the ionization state of the ionosphere. That technique is much more advanced today becasue of all the improvements in computer modeling programs. Not all areas of the ionosphere, at a given frequency, exhibit the same characteristics. That's obvious in that not only are they at different angles of incidence to the sun's ionization, but over any summative unit of time, there will be variations in the sun's ion stream as well. Thus, the fluxed state of the overall ionosphere has areas which are more and less important to a signal at a given frequency which approaches it.

I do not have the article at hand. This is my lay summation of what I think I learned from it.

Signals now have been proved to follow a contoured path along an area of higher ionization. If, for example, a higher level of ionization, much like a warm front or cold front in the weather, exists on the mean between the USA and Europe, such that there is a pretty good high level "shelf" at the mid point of the path South and East of Europe, a signal will follow the contour

of that "shelf" from Europe and be fed into the USA area from an apparent direction of even as far away as due East - North Africa!

Now I am a layman. I am not propation specialist. However, the only way it is possible to cross cultures with explanations, is often to use a shared experience in some allied discipline to make a point. I will do that, I bet!

I assume that you are not a blind person. My appologies to you if you are and I don't know this and you are using a "reader" on the mail.. Once or twice I've gotten tripped up over that in one of these responses like this.

It is virtually certain that you have seen the weather maps on television. It is virtually certain that you have noticed that when we have major frontal movements of cold fronts or hurricanes, as the front moves South, the flow of air ahead of the advancing front gets squeezed or pushed sidewise, much like the frosting on a cake as you swirl it with a batter to make pretty swirls in it for folks to see!

If you could visualize that the front, the boundary layer that forms the barrier between the hot and cold air, is a mirror, you may vizualize something else. While the direct path for a signal may not be open, or poor between the USA and Europe, there is this big shimmering signal mirror like it which is South of the path. You can shoot a signal against this mirror to the south and bounce it off it toward either end.

As well, there is also a ducting effect, I believe I understand. Signals can get to just the right entry angle into the edge of this front-like area which may be formed in a curve. The curve dishes Southward between the two ends of the path. As the signal enters the boundary layer between two vastly different ionization levels, much like the frontal comparison, it gets trapped in this boundary layer and bent along it! That happens sort of like having light carried along inside a fiber strand. You put it in one end of the strand and it appears out the other end, like a pipe!

Poof ..

Bent path to Europe!

--> Sleep well; OS2's still awake! ;)

Hello Bill,

In France we only have 3 Licence classes :

- "Novice" = 144 Mhz only - 10w - all modes but no packet - Callsign = F0 (zero) - No CEPT Class
- "Tech" = VHF and above - 120w - all modes - Callsign = F1 (Older), F4 - CEPT Class 2
- "Full" = All amateur bands - 250w on 10m ; 500w on other HF bands ; 120w VHF and above - all modes - Callsign = F2xx, F3xx, F5xx, F5xxx, F6xxx, F8xx, F8xxx, F9xx

So, you can see that french Novices or Tech do not have HF allocations even on 10m.

KH5/DF6FK has been around for a couple of days now - SSB only,
so I couldn't work him. What surprised me was the fact that KH5
hasn't been around for quite some time. Is it a problem to get
to the island? I have found no indicator on this web page:

http://members.aol.com/lostatoll/page2a/index.htm

I remember having heard a weird story about a bunch of CBers
that would voluntarily do anything to keep hams from operating
there, but that can't be true, can it?

Any info?

This mail to inform You that I have resently uploaded an updated
beacon list at my website covering a 50 MHz world wide in six
continantal splitted listings covering, Africa, Asia, Europe,
North America, Ocean/Pacific and South America. An worldwide
70 MHz list is added too.

These lists can either be viewed in html or downloaded as a ZIP
file in band pacages, the ZIP&#65533;ed version contains a bandplan aswell.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

The 40m add on kit works very well. Just don't run any more than 300 - 400 Watts into it. The traps flash over very easily, particularly when there is moisture about.

While it's "illegal" to solicit contacts during a contest by non-amatur means, i.e. internet and telephone, YCCC has devised a new way: beg on your website and give a convenient list to print out. How is a list printed out and kept by your radio days before a contest any different than having the same screen up during a contest ?

I thought it was bad during Cheerleader of the Year K1ZM's reign, but this is worse. Leave it to an old fart (K2KQ) who declares upon being jammed by some guy from 3832 (probably), "I've been a ham for 41 years, I hope you live that long." There's an attitude a certified pecker who sets up shop every Monday night 2 kc down from a frequency in use should take.

It's 2.4 kc, oh "great operator FOC" LIDS.

Love from PVRC country. I'll work them on all bands just to spite you cranky

Here's another twist.

It's _legal_ to solicit contacts via dx packet cluster. It's
illegal to solicit contacts via the web.

Is it legal or illegal to solicit contacts via web cluster?

If _legal_, how does that differ from other forms of Internet
solicitation?

If _illegal_, how does that differ from packet clusters?

Hmmmmmmmmm . . .

Rick

Bill,

All the Japanese hams - irrespective of class - can use SSB on
28200-29000kHz and FM on 29000-29700kHz. The maximum output
power permitted on ten meter band is 10 watts for the 4th
(Novice) class, 50 for the 3rd, 200 for the 2nd and 1 kW for
the 1st class licensees.

Howdy, Folks.

This is an open invitation to browse http://hfradio.org, the NW7US Ham Radio and Shortwave Radio Resource Website.

This non-commercial site offers:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

2972. I'm about ready to hang it up and get a CB (frustrated)

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-23 00:00:00 UTC
From: Don Ware <dgware@voicenet.com>
Message-ID: <0TMROH1LrDoF8uBbE7LoqOpxxFUv@4ax.com>
Source record: 23374

I sure hope somebody can help me.

I'm trying to tune up a 20 meter dipole and can't get better than a
1.2:1 SWR. Here are the particulars.

Rig: knwd TS120S

MFJ 949E tuner (used in bypass mode here)

Spi-ro mfg balun 1:1

Cheap Radio Shack RG8M coax (yeah I hear the alarm bells)
Length is unknown at this point. Approxmiately 55 feet.

The antenna is about 15 feet up (the best I can do unless I hire a
monkey).

There are tree branches within 2 feet of each end.

Above about 50 watts output the rig makes a faint hissing or "noise"
kind of sound and the DC current to the rig drops off sharply. I
wonder if it's oscillation or arcing in the cable ???

My money is on the funky cable at this point.

Any help would be greatly appreciated and save me from becoming a
:good buddy". :)

SWR of 1.2 : 1 is just fine. Something else is the problem. Does the rig do this in a dummy load or different antennas? It could be something breaking down at that power level.

Wow! 1.2:1 is just great. I would never have the patience to get my antennas that good. Once I get below 2:1, that'll do me.

Your problem sounds like an rf feedback or coupling problem.

Check your station ground setup. You should aim for a single point ground in the shack and run that via a short heavy cable or braid to some buried wires outside.

A line isolator from Radioworks would be good value as well.

Also try a .01uF cap accross the output of your power supply.

73, good luck,
Alek. VK6APK

2977. Expedition to Farallon Centinela IOTA SA-058

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-23 00:00:00 UTC
From: RR <r.radloff@gmx.de>
Message-ID: <sswROFqgh3PVTSVIhwT4a8tZFJHt@4ax.com>
Source record: 23379

Hello DXers, specially IOTA-hunters !

Hereby I announce a new expedition to one of the Venezuelan Islands:

The "Grupo DX Caracas" is celebrating it's 10th anniversary and will arrange a DXpedition on November 12, 13 and 14 to FARALLON CENTINELA [IOTA SA-058]

Farallon Centinela (FC) is a small rock in the Caribbean Sea, located in front of the coast of Venezuela.

The location is: 10 deg 49' N and 66 deg 5' 24" W

The size of FC is about 20m wide by 30m long and 20m high.

We hope to have a calm sea when we arrive, because it's a very difficult operation to land and climb the rock.

We will try to get on all bands on SSB and CW. Our callsign will be YW5FC.

The DX-station which has made most contacts with YW5FC on different bands and different modes, will receive a special a commemorative plaque. If several stations have the same amount of points, "luck" decides.

The QSL-info for YW5FC is: W4SO

Cross the fingers, that WX is favorable for our operation.

I try to get a photo of this unique place. If I get one, I will announce it here....

73 from Caracas

A VSWR of 1.2:1 is extremely acceptable as 97% of your transmitted power
will be delivered to the antenna for radiation.
Even with a 2:1 VSWR nearly 90% of transmitter power is delivered.

Also from the operations perspective you would never notice the difference
and no one you worked would either) between 1:1 and 2:1 VSWR.

Personally I strive for 1.5:1 or better. If it gets to that level I stop
tinkering and enjoy Amateur Radio. I cordially invite you to do the same.

HB0/DK7ZS/p Multi Multi at CQ WW DX SSB 30/31 Oktober

We are going to activate HB0 Lichtenstein at the
CQ WW DX SSB Contest from the 30/31 Oktober.

We have planed to operate mainly on 40m with split
(looking for dx at night) and a secound station on
10/15/20.

The callsign is still not 100% sorted yet, as we try to get
a short call from the HB0 guys.As it looks like the HB0 office
is not willing to give away a call and the german club-calls
do not have a CEPT permit, we decided to use HB0/DK7ZL/p

We hope that the location will support all our needs.
This is the first trip to HB0 and we have no chance to
evaluate the location before, as the whole trip was a
last minute call.

We hope that we can work many DX on each band.

If someone is intrested joining the team - please email me.

Infos via DF7ZS@gmx.net

Once again, the two big DX events of the year are upon us.
Just a reminder, you can find the NG3K contest operation
listings at their usual home:

http://www.cpcug.org/user/wfeidt/Misc/cqssb99.html
http://www.cpcug.org/user/wfeidt/Misc/cqcw99.html

As always, corrections and interesting additions are welcome.
When supplying a new operation, please be sure to include:

Callsign to be used in the contest
DXCC location
CQ zone
Class of entry
QSL route(s)
Band, if SB entry
Operators
Other details likely to be of interest

Send to: wfeidt@cpcug.org

Also, the NG3K DX/Contest pages are getting a new home:

http://www.ng3k.com

I hope to add full search capability on that site eventually, but it
may be a while. The http://www.cpcug.org/user/wfeidt/ and
http://www.his.com/wfeidt/ sites will continue to be available for
some time as well.

Best wishes,

Bill/NG3K

ab.shaw@prodigy.net

Hi Abe -- DX is an abbreviation for distant -- there are two types of
DX enthusiasts.

Amateur Radio -- where DXing is the pursuit of communicating with
distant amateur radio
stations. Requires a Ham license and a transceiver and good antenna.

Shortwave Radio -- listening for far away broadcast stations. Requires
an SWL receiver and
moderate antenna.

If you are a licensed Amateur Radio Operator -- see URL:
http://www.alltel.net/~johnshan/findex.html
Click on DX

If you don't have a license and want to get one see -- see URL:
http://www.arrl.org/iands.html#license

If you are a Short Wave Listener -- DXing is the pursuit of listening
for distant broadcast
stations -- see URL:
http://www.danatkinson.co.uk/html/sw/faq.htm

Hello Abe,

There are lots of good books on DX'ing. But my favorite is "Where do we go next?" by Martti Lane OH2BH

In in you'll meet:

Big Gun DX'ers
Old Timers

Martti makes clear the:

Eternal Enigmas of DX
The creed of the believer

Martti also points out that you can recognize a DX'er because they wear their pants with the seat cut knee high. The higher the country count, the lower the seat.

By all means.. This is a fun book to read. And I think, conveys why we all DX.

2986. Re: Newbie needs info on DXing

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-24 00:00:00 UTC
From: Andrew Thall <thall@icsi.net>
Message-ID: <B9JQ3.591$b4.2548@news.intnet.net>
Source record: 23388

DX refers to an old CW abbreviation for distance -- so, a DX station is one that is far away ie: a foreign station. Ham radio offers many opportunites for long-distance communication. The 10 meter band, which is available to Novices, is an excellent place to find stations from all over the world.

Andy, WS7J

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1CC, AI2Q, K2KQ, KF2TI, N2VW, N2NL, NA2M, WB2RAJ/WB2YQH & The 59(9) DXReport, AA4XR, N4GN, N4OKX, K6RIM, N7NU, K8YSE, NE8Z, BA1DU, CE6TBN, DL2GG, E21EIC, EP2FM, EU1EU, F6AJA & Les Nouvelles, G3SXW, G4ZVJ, HA0KHW, JA1ELY, JI3DST, JI3ERV/NH2C, LA7MFA, LX1NO, OK1YM, P43P, PS7AB, PY1KS, RN3ZQ, SP2BIK, UA0SJ, UK9AA, UN5PR, UN7LZ, ZS5BBO and 9K2HN for the following DX information.

10 METERS NET TO RETURN. Beginning the first weekend of November, the "Brazil DX Net" will return to 28430 kHz from 1200-1400z. All amateur radio stations are welcome.

3B8, MAURITIUS. The LNDX reports that Jacques, F6HMJ, will be active as 3B8/F6HMJ from November 15th through December 5th. He will be active on all bands and hopes to be on 160 meters. He will also be active during CQWW CW Contest, mostly on 10 meters.

4L, GEORGIA. Look for Omari, 4L5O, to be active in next week's CQ WWDX SSB Contest as a Single Operator/Single Band (28 MHz) entry with low power (100 watts).

8R, GUYANA. Olli, OH0XX, will operate 8R1K in the CQWW SSB Contest as a Single Op/All Bands entry. QSL via Suite 599, 1313 So. Military Trail, Deerfield Beach, FL 33442, U.S.A.

9G, GHANA. Excerpts from a press release by Roger, G3SXW, announces that the Voodoo Contest group will again be active from West Africa in the CQWW CW Contest (November 27-28th) for the SEVENTH year. After successes as 5V7A, the group returns to Ghana this year and will sign 9G5AA. They will enter as a Multi/Multi category installing seven full stations and 18 antennas at a new coastal site in Central Ghana. Team members (with personal 9G callsigns that are known) are: Jeff/9H1EL, Roger/G3SXW/9G5SX, Don/G3XTT, Fred/G4BWP, Cris/G4FAM, Andy/G4PIQ, Vince/K5VT/9G5VT, Mike/ KC7V/9G5MF and Jim/KF7E. Just before the contest, November 24-26th, look

for activity on various bands, including short spells on 160 and 6 meters, which is likely to be all CW. QSL 9G5AA via GM4FDM, Tom Wylie, 3 King's Crescent, Elderslie, Renfrewshire, PA5 9AD, Scotland. Bureau replies may be requested by sending QSO details and your callsign by E-mail to Tom at: twylie@net.ntl.com
Also visit the Voodoo Contest Group Web site at: http://voodudes.com
The OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

9K, KUWAIT. Hamad, 9K2HN, will be participating in the CQWW SSB Contest as Single Ops/All Bands entry. QSL is OK via the Bureau or direct to: Hamad Alnusif, P.O. Box 29174, Safat 13152 Kuwait

AH2, GUAM. Members of the Guam Contest Club will be active in the CQWW SSB Contest as AH2R. The club was the Oceanic leader as a Multi-Single category in 1996 and 1997. Last year they made an effort in the Multi-Multi category and won the second place in the Oceania area (close behind of KH7R). This year they are trying to build an Oceanic record in the Muliti-Single category. The operators will be Aki/JI3ERV/NH2C, Kaz/JG3RPL/N1BJ, Seo/JR3RVO/WX8M, Toshi/JR7OMD/WI3O, Sam/JR8VSE and Taka/JR8PPG. They suggest to listen carefuly for them between 7075-7100 on 40 meters, and their sunrise/sunset is: 2012/0757z. QSL via JI3ERV (Direct or JA bureau, NOT KH2 bureau).

B1, CHINA. The contest callsign B1Z of The Beijing DX Club will once again be active during this upcoming CQ World Wide SSB DX Contest. They will participate in the multi-multi category. Operators include Tong/BA1AA, Cheng/BA1CO, Alan/BA1DU, Jerry/BA1FB, Guo/BA1GYS, Chen/BA1HAM, Qin/BA1KA, Ban/BA1MK, Chen/BA1MT, Zheng/BA1TU and Chen/BD1CU. QSL via JA4HCK only.

BORNEO/SPRATLY DXPEDITION UPDATE. The 1999 "Hillview Gardens" Borneo DXpedition has announced the operators and the schedule for this operation. The team is: Bob Schenck, N2OO/9M6OO - DXpedition leader; Jani Kusmulyana, YB0US/NM6US/9M6US - Hardware engineer; Mike Mraz, N6MZ; Tom Harrell, N4XP; Paul Newberry, N4PN; William Beyer, N2WB; and Jim Stahl, K8MR. All seven well seasoned operators (SSB/CW/RTTY). The schedule is as follows:
November 7-10: 9M6AAC Hillview Gardens, Sabah, East Malaysia
November 11-17: 9M6OO Layang-Layang Island, Spratly Islands
November 18-21: The team will be attending the SEANET Convention in Brunei
November 21-25: V85OO Brunei
November 24-29: 9M6AAC Hillview Gardens, Sabah, East Malaysia, with an entry expected in the CQWW-CW by the team.
They will have a Web page set up linked from: http://www.qsl.net/n2oo
Full updates will be posted as well as pictures from the team during the operation, however not during the 9M6OO "Spratly" activity as there is no internet access available there. Contributions for this DXpedition would be most appreciated. Contact point for this DXpedition is Bob Schenck, N2OO, and he can be E-mailed at: n2oo@arrl.net
or via mail: Bob Schenck, N2OO, P.O. Box 345, Tuckerton, N.J. 08087-0345 U.S.A.

C6, BAHAMAS. The Cinco Nueve Contest Group (CNCG) will be active between November 23rd and December 2nd. The members include Lee/N7NU, Al/K7AR, Ron/WJ7R and Bob/W7RR. They will participate in the CQWW CW Contest as C6AJX (QSL via N7NU). Outside the contest they will sign homecall/C6A. QSL to home calls. During the operation, or as uploads permit, logs and photos will be posted on the CNCG Web site at: http://www.qsl.net/k7ar

C6, BAHAMAS. Ed, WA3WSJ, will operate as WA3WSJ/C6A from Abaco Island (NA-080) in the Bahamas from November 23-30th. He will take his Elecraft K2 rig and operate QRP on 80/40/20/15/10 meters. QSL via WA3WSJ with SASE, IRC etc......

C6, BAHAMAS. The C6AGS CQWW SSB operation has been cancelled due to a direct hit by Hurricane Floyd on Treasure Cay.

CE0Z, JUAN FERNANDENZ ISLAND (Update). Marco, CE6TBN, reports that the Ministry of Telecommunication has granted them the callsign CE0Z for his DXpedition to Juan Fernandez Island Janury 6-16th, in the year 2000. For more details, please refer to OPDX.430. Marco also mentions that he is still looking for a sixth operator. If interested, send him an E-mail at: ce6tbn@qsl.net

CT3, MADEIRA ISLANDS. Siggi, TF3CW, will be back in CT3 during this year's CQ WW SSB/CW Contests as a Single Op/All Bands High Power entry. He is going to use the callsign CT3FN. QSL via HB9CRV only. He will be active before the contest as CT3/TF3CW. QSL via LX1NO only.

EV5, BELARUS. Igor, EU1EU (President of AGB - Activity Group of Belarus), reports that he will be active as EV5M during October through the New Year. Activity will take place on Thursdays, Fridays and Saturdays, every week. QSL via his home callsign EU1EU: Igor Getmann, POB 143, Minsk-5, 220005, Belarus. QSLs for EU930EU, UC2ABO and the club station EW1WC ("Argonauts") can also be sent to him.

FO0, AUSTRAL ISLAND. Marcel, ON4QM, will still be active from here as FO0DEH until October 30th.

HK, COLOMBIA (Bad News). Gerard, F2JD/HK3JBR, is heading back to Bogota after a few weeks vacation in France. During his stay all his equipement had been stolen.

HS0, THAILAND (CQWW Contest and More)......
Bruce, AA4XR, reports to OPDX that he will be active as HS0ZCY from November 20th through December 7th. Activity will be on 40-10 meters CW/RTTY. QSL via WB4FNH.

Look for RAST's HS0AC club station to join in during the big contest next weekend. Operators will be HS1CKC, HS0GBI, HS6NDK, E20NVH, E20REX/YL, E21EIC, JA0QZ, JA4RWN and G3NOM. QSL Manager is G3NOM.

Look for HS72A to be active during the CQWW SSB Contest. This is a special callsign to celebrate his Majesty King Bumipol's (HS1A) birthday. QSL Manager is Winit, HS1CKC. The King will be 72 years old, and the special operation will last until December 1999.

Also, look for the special JOTA callsign, HS0AJ, to be active. QSL Manager is HS7AHV.

IOTA NEWS.....
AS-117. Takeshi, JI3DST, will be active as JI3DST/3, from Honshu's Coastal Island (Awajishima Hyogo) October 30th through November 1st. Activity will be on 15 and 10 meters during the CQWW SSB Contest. QSL via JARL Bureau or direct.

OC-177. The Indonesian Amateur Radio Society (ORARI) is planning a DXpedition to Samut Island, located north of Jakarta in the Thousand Islands. The operation will start on October 28th and last until November 1st. They are planning to participate in the CQWW DX SSB Contest. A special DXpedition callsign was issued with a prefix that has never been used. Look for 7A0K to be aired. The DXpedition will be on SSB and CW, 160-10m, including the WARC bands. The QSL information is via YB0AI.

SA-058. The "Grupo DX Caracas" is celebrating its 10th anniversary and will arrange a DXpedition on November 12-14th to Farallon Centinela Island in the Caribbean Sea, located in front of the coast of Venezuela. They will try to get on all bands on SSB and CW. Their callsign will be YW5FC. QSL via W4SO.

J3, GRENADA. Don, K2KQ, reports that he will be active as J3A as a Multi/Multi entry in both CQWW SSB and CW Contest. Ann, WA1S, will be the QSL manager for both contests.

KH2, GUAM. Dave, N2NL, reports that he will be active in the CQWW SSB Contest next weekend as KH2/N2NL, operating from Danny's, KH2JU, new hilltop QTH. It will be a serious Single Op/All Bands effort, 160-10 meters. He is also planning the same thing for the CQWW CW Contest. QSL via W2YC. Dave mentions that these 2 contests will probably be his last hurrah before he transfers back to the states early next year.

LS0, ARGENTINA. "The 59(9) DXReport" reports that the "Radio Club Villa Angela" will be active from the El Suazalito Region November 27-29th as LS0G. Activity will be on 40-10 meters CW, SSB, SSTV and PSK31. A special certificate will be available for 5 IRCs from LU4GO.

NCDXF PRESS RELEASE. At its Board of Directors meeting on October 17, 1999, in Cupertino, CA, the Northern California DX Foundation re-elected the following officers and directors:

President Len Geraldi K6ANP
Vice President Al Burnham K6RIM
Secretary Tom McShane NW6P
Treasurer Bruce Butler W6OSP
Director Lou Beaudet K6TMB
Director Rusty Epps W6OAT
Director Bob Fabry N6EK
Director Chuck Ternes N6OJ
Director Steve Thomas N6ST
Director Glenn Vinson W6OTC

Dave Pugatch, KI6WF, was newly elected as a Director.

Information pertaining to the Northern California DX Foundation is available at: http://www.ncdxf.org

OCEANIC TRIP (EAST MALAYSIA and BRUNEI). A JA group will visit Brunei to attend the SEANET Convention and East Malaysia in November. The operators are: JA3AA, JA3CF, JA3IG, JA3UB, JA3AER, JA3ART, JA3NGW, JR3WXA and JH3GAH. They will be active on 160-6 meters CW/SSB/SSTV. Their schedules are as follows:
November 18-21st - In Brunei signing V85TG and V8SEA. QSL V85TG via JH3GAH. QSL info for V8SEA will be announced on the air.
November 21-25th - In East Malaysia signing 9M8TG. QSL 9M8TG via JH3GAH.

OH0, ALAND ISLANDS. Look for OH2MAM to be active in the CQWW SSB Contest as OH0Z. QSL via OH1EH.

P4, ARUBA. Jacobo, P43P, will be participating in the CQWW SSB Contest as Single Op/All Bands (QRP?), from his QTH on the North Coast of Aruba with the callsign P40B. A new PHOTO QSL card is now available via his new QSL Manager, so update your QSL Manager records as follows. QSL P40B via Mario Ambrosi, I2MQP. These new and colorful P40B QSL cards are available for all contests, and, of course, for any previous QSOs made with P40B.

PJ2, NETHERLANDS ANTILLES. The Caribbean Contesting Consortium (CCC) will be active from Curacao during the CQWW SSB Contest as PJ2C. The team, consisting of Geoff/W0CG, Dan/K8RF, Hillar/N6HR/ES1HR, Harry/W8KKF, Ron/WA8LOW, Noel/W9EFL, Elsie/N7WDX and Mark/N4OKX will operate PJ2C as a Multi/Single entry next weekend. Various members of the CCC team have been active from the Caribbean in another operation which included VP5FXB, CY9RF, VP5CW and PJ9T. XYLs Cindy Howard, Marge Flasher and Tanya Tuell will join the team in support roles including photograpy, scuba diving and operating co-ordination. Outside the contest period, team members will be active from October 27th through November 1st as PJ2/homecall with a special emphasis on 160, 75 and 6 meters CW and SSB as preparations for the contest allow. QSL manager for PJ2C is W8KKF. Check out the PJ2C Web site at: http://asgard.kent.edu/ccc/pj2c
Following the operation, contesters and DXers will have the opportunity to vote on their choice for the QSL photo by logging on to the PJ2C web site and viewing a selection of photos from the operation.
ADDED NOTE: Contest operations by non-residents in the Antilles are no longer receiving PJ9 prefixes. PJ contest callsigns will now reflect the regular prefix of the appropriate island and reciprocal temporary callsign as PJ(x)/home call.

PY, BRAZIL. Alex, PY1KS, states that he will be active in the CQWW SSB Contest as a Single Operator Single Band Low Power entry. He has not decided if the band will be 10 or 15 meters.

QSL INFO AND NEWS.....
A message from Lech, LA7MFA, states the following: "It seams like there is a lot of different addresses of mine out there. I guess I have been

moving around too much lately: QSL for KH8/KK6HC goes via LA7MFA: Lech Slawomir Tomczak, Froeyas vei 61, 3472 Boedalen, Norway. All bureau QSLs will be answered. But I need some time to make my special color QSL card. I have been operating for 24 hours last Saturday/Sunday from Leone on Tutuila, Am. Samoa using my American callsign KK6HC. I was using IC751A with just 100W into a Butternut HF9VX antenna. I made total 1200 QSOs on 40, 30, 20, 15, 12 and 10m. The condx were very poor as my QTH was on the southern part of the island behind a huge mountain. I enjoyed this very first own radio expedition. Thanks to all who came to say hello. I was trying to make any QSO from the boat on the way back from ZK3CW/T31T expedition but it seems that LA7MFA/MM was not interesting enough. Nobody would bother to answer my CQ call! I will put a log search on my WEB page http://www.qsl.net/la7mfa shortly."

Jurek, SP2BIK, reports that their operation from the Polish Lighthouse in Krynica Morska during the "International Lighthouses Weekend" they operated on CW, SSB, FM and Packet Radio. They made over 1600 QSOs on HF bands. Presently, they are still waiting for printing of the QSL cards to be done. Once the cards become available, they will be distributed the same way they were received.

NEW QSL MANAGER. A new manager has been announced for the upcoming operations: PX7G, Fort Queijo (Nov. 12-16th); ZY7G, Fort Brum, (Nov. 19-22nd); and PQ7G, Fort 5 Pontas (Dec. 3-6th). QSL via PS7AB to the Bureau or direct to: Rony Reis, Caixa Postal 2021, 59094-970, Natal/RN, Brazil.

SEND NO GREEN STAMPS. UK9AA reports that they have a problem with the postal service in their country of Uzbekistan. He requests to "PLEASE, DON'T send your QSL cards with Green Stamp". He states that foreign letter asre being opened, and it is better to send IRCs instead of "Green Stamps".

RN PREFIX IS RUSSIAN. Igor, RN3ZQ, reports that many outgoing QSL Mail from the USA for the Russian radio amateurs (with prefixes RN) are being sent to the UN QSL Bureau (Kazahstan). This is wrong, RN prefixes are for RUSSIA.

SAVE YOUR GREEN STAMPS. Abdollah Sadjadian, EP2FM, reports that the station signing EP2AS on 30 meters on October 10th, stating to QSL via UR5SAS, is not a licensed station. He mentions that the EP2AS callsign was issued to Mostafa Shafii a good 40 years ago, and he was a very skilled CW operator. He may be a possible silent key now.

NO LONGER QSL MANGER. Jack, N2VW, reports to OPDX that in the past he was the QSL Manager (and licensee) for VP5O (1992), VP5N(1993), VP5R (1994) and P40T (1995). However, he no longer acts as a QSL manager for ANY of these callsign. Those particular logs are closed. These contest callsigns have been re-issued by the respective licensing authorities in recent years. He requests and states the following: "Please remove my call from your any of your data bases that show me as manager. Hope it works ... The flood of bureau cards is getting expensive. However,

those I do receive are redirected via the bureau if I can find a manager."

SPECIAL EVENT. For the 50 year anniversary of the Aviation Civil School, the club F6KRQ will be using the callsign TM0AC now until October 31st.

SV, GREECE. Look for SV1DKR to be active next weekend in the CQWW SSB Contest as a Multi/Multi entry. QSL cards are OK via bureau.

T8, BELAU REPUBLIC. Look for JA1WSX (T88WX), JH4OWG (T88??) and JA7AYE (T88??) to be active from Belau between October 28th through November 2nd. They will participate in the CQWWDX SSB Contest as T88WX as a Multi/Single category. Before and after contest they will operate on all bands with their own callsign. QSL T88WX via JA1WSX and the others via their home callsign.

TI, COSTA RICA. JA6WFM, JM6EBU (TI5EBU) and JM6UAA will be activate from here between October 29th through November 2nd. They will participate in the CQWW DX SSB Contest as TI5EBU together with TI5KD as a Multi/Single category. Before and after the contest they will operate TI5/homecall. QSL TI5EBU via JM6EBU and all others via their home callsign.

UA0, ASIATIC RUSSIA. Yuri, UA0SJ, lives in the city of Bratsk, 600 kilometers on the north side of Lake Baikal. He plans to be active in the CQWW SSB Contest as a Single OP/Single Band (15 meters) entry. Please send QSL via direct to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-city, 665700, Russia (Asiatic).

UP2, KAZAKHSTAN. Valery, UN7LZ, will use the special callsign UP4L in both CQWW DX Contest (SSB and CW) as a Single Op/Multi-Band entry. QSL all direct cards to: Valery Zhilyaev, P.O.Box 7, Kostanay, 458000, Rep. of Kazakhstan.

UP5, KAZAKHSTAN. Romeo, UN5PR, will be active in the CQWW SSB Contest as UP5P as a Single Operator/All-Bands entry. Yuri, UN6P, will take his turn and be active in CQWW CW Contest as UP6P as a Single Operator/All-Bands entry. QSLs for UP5P and UP6P are via UN5PR direct: Romeo Y. Loparev, P.O.Box 73, Temirtau, 472300, Rep. of Kazakhstan. Romeo tells OPDX that their QSL-bureau in Kazakhstan is not working.

VQ9, CHAGOS ISLANDS. A report received from Rick, NE8Z, states that Ron, VQ9DX, has been looking for stateside on 1828 kHz for about 4 nights a week, but with no takers. He has had a couple of fair European openings at his sunrise, but no stateside. Ron states, "Currently we're back on the hook, not dockside, so I can't get to the club for sunrise for the next couple weeks at least. But continue to be QRV at our sunset on 1.828. Usually stick around till after W6 sunrise." QSL via AA5DX.

XU, CAMBODIA. Andy, G4ZVJ, was active for just 24 hours on September 18th, after eventually being issued the callsign XU7AAV in Phnom Penh. He made 850 CW QSOs. Andy will return to Cambodia around November 20th for approximately two weeks including the CQWW CW Contest. QSL via G4ZVJ. Also, check out the Web page: http://www.g4zvj.demon.co.uk/xu.htm

ZS5, SOUTH AFRICA. Edwin, ZS5BBO (NODXA member) will be active next weekend in the CQWW SSB Contest. He will be operating as a single operator on 10, 15 and 20 meters using his contest callsign ZS5T. Also, he mentions that he will be part of the International DX team consisting of K1DWQ (North America), PT7BZ (South America), DL8PC (Europe), VU2PAI (Asia) and himself, ZS5T (Africa). QSL cards can be sent direct via ZS5BBO, address ok in QRZ.COM / BUCKMASTER or International Call book. Edwin also mentions that an operator named Ron (no callsign given) will be active as ZS5T in the CQWW CW Contest as a Single Op.

ZX0, FERNANDO DE NORONHA. The Araucaria DX Group in Brazil has organized a multi-national operation from Fernando de Noronha for the CQWW SSB Contest as a Multi/Multi entry. The team will have U.S., Bulgarian, and Brazilian operators at the ZX0F contest station from Fernando de Noronha Island. Operators include PY5EG, PY5CC, PP5JR, PY5GU, PY0FF, PY5ZBU, K1CC, K1LZ, K1ZM, K2DM, N5FA, LZ1JK and LZ1JY. The group will be using all ACOM 2000 amplifiers from ACOM. The antenna system is as follows:
160 meters: Verticals using balloons, phased inv-L
80 meters: Rotatable dipole, 4-square, wire beams
40 meters: 3 el yagi, 2 el yagi
20 meters: 5 over 5
15 meters: 5 over 5
10 meters: 6 over 6
Several tribanders and beverages.
For further information check out the Web site at:
http://www.inepar.com.br/araucaria
-or-
For live WebCam pictures from the 10m tower: http://www.noronha.com.br
Special awards will be mailed to entrants who work ZX0F on all six bands during the contest.

Try a dummy load and see if the HISSING stops
the 1.2:1 SWR is probably OK
The HISSING is the issue
sounds as if there is some arcing
cable
connectors
eliminate as much as possible then add stuff back in
good luck

K0SR 28019.9 VR2JB Not sure of call, lousy fist 2350 26 Oct

Maybe he has a bad style. But perhaps Mr. K0SR doesn't realize VR2JB might have had a stroke. Perhaps he had a car accident and is missing two fingers.

Maybe K0SR developing MS at 44 and in 5 years I can make fun of HIM.

When people make comments like this, they only prove how far they've helped move ham radio away from a hobby or service to a business, as KC1XX, W3LPL and their Lloyd's of London style "names" will prove this weekend

Perhaps all of those things. However, what K0SR was reporting on was the quality of the CW being sent, period. Nowhere in that spot can anyone except Mr. Negativity read anything into WHY the fist was lousy. He might just have a lousy fist. It's unimportant, except insofar as how one might help identify the signal amongst the pileup once one tunes to the frequency.

> Maybe K0SR developing MS at 44 and in 5 years I can make fun of HIM.

That sounds about like your style. There sure isn't any evidence that it's K0SR's.

What are these riddles you speak in? "Lloyd's of London style 'names'"? Is this another of your snotty anti-contest remarks? As a matter of fact, your anti-contest, anti-ARRL remarks have as deleterious an effect on ham radio as any you complain about. Your political correctness diatribe above doesn't help much either.

There's another post on the ng today wherein a newly licensed general is concerned that he might get on the air and say something wrong. It's the P-C police like you that have him paranoid. You're one of those "Q-signals were *designed* for CW" pedants, aren't you?

Did your daughter recently win a scholarship?

What's happening this weekend? Another redundant ARRL sponsored and sanctioned clowntest where the bands get filled with yet more "Lloyd's" calling "CQ Clowntest" and exchanging pointless points atop existing QSO's with 5 Kw like two stations in Texas I know of..?

"QRZ your 5 and 9 - QRZ your 5 and 9 - QRZ your 5 and 9 . . . one lug nut - two lug nut - three lug nut......"

Hmmm, a little testy, aren't we? From the above, I gather that you are not an avid contester. But what's your real point? You don't like the idea of the congestion on the HF bands you wish to use, or you simply disagree with contesting in general? Just curious. (I've also heard comments that two old duffers talking for hours about what colour pills they're taking is just as meaningless as a contest-type exchange - to each his own.)

73, Darrell
NR3Y.

There will be several large contest-free zones this weekend, areas in which other license holders can operate without having to worry about contest QRM -- indeed, with probably less general QRM than normal, as many of the normal denizens will be contesting. Specifically:

1800-18?? (probably 1825-1830)
3500-3600 (3500-3700 and 3900-4000 in North America)
7000-7040 (7225-7300 will also be relatively open in NA)
10100-10150
14000-14100
18068-18168
21000-21150 (there are often holes around 21400-21450 too)
24890-24990
28000-28300
50000-and all amateur frequencies above

That's an awful lot of spectrum, and a good chunk of phone spectrum as well. Add 1.9-2 and 29-29.7MHz which, while not formally contest-free, are almost certain to be so in practice.

I like to work a few West Coast newcomers on 28MHz SSB from time to time, by pointing the beam out west & calling CQ. On more than one occasion (with no contest in progress) I've been unable to find a suitable frequency to do so. Does that mean we should prohibit the various 10-X and WAS nets in the 28.3-28.5 segment, to guarantee a spot to call CQ?

> I shall be monitoring 7000 - 7040 kHz this weekend and making a list
> of callsigns of the FOC members I hear using SSB in that segment of
> the band.

Here, you're on the right track. The 40m situation is indeed getting out of hand. It's certainly ammunition for the defense of the US principle of enforcing phone band limits by law.

3001. 30 Meters...from the West Coast

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-28 00:00:00 UTC
From: dm <dmandjos@olypen.com>
Message-ID: <s01S3.37149$7I4.680737@news5.giganews.com>
Source record: 23403

I find good openings into Eu from about 2300Z thru to about 0500Z...
Never hear DX on 30 from any other direction or time. I DO have a mountain
ridge to the south...does a job on low angle from there...but otherwise
would like to know if anybody ON THE WEST COAST has a result different
from mine. 73 "DM"

The Magnolia DX Association will be operating W4D from
Dauphin Island, Alabama (NA-142) this weekend, October 29-31.

We plan to be active on all HF bands, Phone and CW, including
the CQWW contest, and also 6 meters. Look for us on the WARC
bands for Phone QSOs outside of the contest.

Here is more on R1AND from a search on DX Summit:

The location is at NOVOLAZAREVSKAYA on IOTA AN-016. For DXCC, it counts as Antarctica.

In recent QSOs, both RW1AI and NT2X have been given as the QSL manager.

Walt Davidson wrote:

>You can easily QSY up or down a few kHz to avoid the >leeeeests. However, there is no escape from the >contesters.

Those situations when there is "no escape from the contesters" are very limited. The CQ WWs, CQ WPXes, perhaps the ARRL DX contests, the IARU HF Championship and maybe the WAE contests. These can only dominate the bands because there are many more people participating in those contests than there are non-participants. Admittedly, this is the democracy of the mob in action, but when you're severely out-numbered, however temporarily, it may be more wise to adjust to the overwhelming majority rather than to rail against them.

Those nine contests include 408 hours of operating. That is just 4% of the hours in a year, and 16% of the hours available on weekends. Think of these times as "rush hour" on the roads. Have you ever adjusted your driving time to get around "rush hour?"

Those who truly detest contests have the following options:
- Work the opposite mode (CW on SSB contest weekends, SSB on CW contest weekends). This is available during all but the IARU HF Championship which uses both modes but lasts only 24 hours.
- Operate on 30, 17 or 12m which are completely contest-free.
- Move up to the higher end of your chosen band. Contest activity tends to spread from the bottom of the band up.
- Operate on a band where the contest activity has ebbed.

If you're clever, you can find a work-around.

Better yet, join in the fun for a few hours. You might just enjoy yourself and give a hand to someone else.

73,

Dave Goodwin VE2ZP/VE9CB

Walt Davidson wrote:
> So you are saying that non-contesters this weekend should be forced
> either to use CW or digital modes, or to QSY to the WARC bands?

Yesterday morning, I wanted to make a few QSOs in the popular 10-meter Novice band. But I couldn't find any open frequencies; there were too many ragchews going on. I guess we should have "ragchew-free zones"?

Of course, I'm being facetous. My amateur license doesn't guarantee me the ability to operate on any specific frequency, or even any band. If I want to work some DX on 28.450, but I find you chewing the rag with someone in Florida, I don't expect you to end the ragchew - I QSY and find another frequency to DX on. If none are left on 10 meters, I go to 12, or 15, or 6, or CW. Similarly, I don't demand "net-free zones" on 75 meters, even though it is often difficult to impossible to find a hole to call a regular, non-contest, CQ on that band.

Quite simply yes, I do think non-contesters need to be flexible enough to select a different band/mode during major 'tests. They have plenty of useful options.

> I suggest that there ought to be mandatory contest-free zones within
> each HF/LF band SSB section.

I believe that would be counter-productive.

1. The greater QRM within the contest-permitted zones would make it more difficult for lower-powered and antenna-restricted stations to participate. More serious contestants would find it necessary to use high power; QRP and antenna-restricted search-and-pouncers would find it more difficult to collect states/countries/etc. for awards.

2. Contesters would be less able to QSY for non-contest operations within the contest-permitted zones. (if 14.230 were to fall within a contest-permitted zone, it would no longer be the "SSTV clear channel"!) With the knowledge it's less likely that a satisfactory replacement frequency would be found, it's less likely one will be willing to surrender one's existing channel for anything less than an emergency. They'll also find it necessary to work closer to existing QSOs and less practical to accomodate wideband modes like DSB AM and (in the CW bands) digital modes.

3. Might we see additional "frequency fights" within the contest-free zones? As some non-contesters find it impossible to operate in the contest-permitted zones and move their schedules/etc. into the "CFZ's", there's conflict with the schedules/etc. already operating there.

IMHO the existing "CFZ's" are more than adequate.

From: Jerry Benson <jerryb@greenapple.com>
Message-ID: <%wnS3.78$s2.9243@news>
Source record: 23414

Yesterday afternoon, 10/27, on ten meters, at about 1800 UTC, came the strong signal of ZD8Z. The usual pile-up ensued, and lo and behold, a certain W6 tail-ended and proceeded to hold the conversation for at least twenty minutes. I understand that it is the DX station's prerogative, but by the same token, it is also the onus of the domestic station to not be so sickeningly selfish. And, I would like to speak for the rest of the DX community in apologizing for forgetting that the W6 in question is the only station that matters.

SB DX @ WW $OPDX.433
Ohio/Penn DX Bulletin No. 433

The Ohio/Penn DX PacketCluster
DX Bulletin No. 433
BID: $OPDX.433
November 1, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K3BU, W3HNK, KF4OOX, N4GN, N5UR, K7BV, K8YSE, W8DO, BA1DU, CX6VM, DJ5AV & DX News Letter, DL7BY, ES1AKM, F6AJA & Les Nouvelles, F1UVN, FK8HC, G3SWH, G0AZT, LA7MFA, LU3FCK, OH1EH, OH2TA, ON6TT, SV1DNW, TA3YJ, TA3J and ZP5AZL for the following DX information.

3W, VIETNAM (XU Also). Members of the Tallinn Youth Radio Club (TYRC) ES1AKM and ES1AX will be active from Saigon starting December 4th, lasting until January 4, 2000. Callsign possibly may be 3W6KM, but it is not final yet. Activity will be all bands and all modes. QSL via ES1AX CBA. Jack, ES1AKM, told OPDX that after their 3W operation they will be active during 2 weeks from Cambodia (XU). Callsign is not sure yet, but possibly XU7AKM.

4U1VIC, VIENNA INTERNATIONAL CENTRE. Remember this station will be participating in the CQ WW SSB contest in Multi-Single cathegory. QSL via OE Bureau or CBA.

5W, SAMOA. Steve, G4EDG, CW operator of "Double Trouble" team, has left Tokelau, and is now in Samoa. He has obtained a license with the callsign 5W0ST. Steve does not have a radio with him, but fortunately he has his CW keyer. He will try to visit Atsuo, 5W1SA, and operate from his QTH. Steve is a CW only operator, and he is very interested in low band operation. He will stay in Samoa probably for one month. QSL via G4EDG.

5X, UGANDA (Last good chance to work Peter!). Peter, ON6TT/5X1T, will be active in the CQWW SSB Contest as Single Op/Single Band (10 meters). However, Peter also mentions that he has been in 5X for almost 4 years, and his time in Uganda comes to an end. During this stay, Peter has made roughly 150,000 QSOs as 5X1T on SSB/CW/SSTV/PACTOR/RTTY from 160-6 meters. He will leave 5X on November 5th, and will go back to Kosovo. From then on, Peter will only be back in 5X twice for one week until the end of January (once middle December, and once middle January). He will keep his station and the setup there until the middle of January, though

activity after this coming CQWW SSB weekend will be very limited. OPDX InterNet Subscribers will receive Peter's complete press release as an additional bulletin.

8S, SWEDEN. Look for John, SM7CRW, to use the callsign 8S7A during the contests in October and November. He is on IOTA EU-037. QSL via W3HNK.

9M6, EAST MALAYSIA. Just a reminder! Phil, G3SWH, will be active as 9M6PWT from Sabah between November 3-15th. He will be on a holiday, so times of activity will be on an "as and when" basis, but he will probably follow his established pattern of early mornings and late afternoons, local time. Operations will be on all bands 40 to 10 meters, CW only. He will be staying in three different hotels, and he has already received permission to put up his antennas. QSLs will be via his home address of: Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom (with SASE and return postage, or via the RSGB bureau).

BY, CHINA. BY1PK, the headquarters station of Chinese Radio Sports Association will participate in the CQWW SSB Contest as a Multi-Single entry. Operators will include Yan/BA1AB, Wang/BA1OK and some students. QSL via BY1PK.

CX, URUGUAY. Jorge, CX6VM, will be operating as CX5X in the CQWW SSB Contest as a Single OP/Single Band (15 meters). QSL Manager is W3HNK.

E4, PALESTINE. Pekka, OH1RY, is reportedly headed back to be active as E44DX or E44/OH1RY from Gaza, now through November 1st. His goal will be to break the Asian record on 80 meters in the CQWW SSB DX Contest. QSL via OH1RY.

EA8BH CQWW SSB OPERATOR CHANGE. Due to some unforeseen factors, Martti, OH2BH, cannot run his EA8BH site, but he has invited a "skilled guest operator" to make a serious effort in the 1999 CQWW SSB contest. Jeff Steinman, N5TJ, 35, will pilot an SOAB effort using the latest contesting technology, including FT-1000MP dual-radio operating. Jeff is remembered for his WRTC-96 victory in San Francisco. Please listen for Jeff--give him a call and earn a special Yaesu certificate and a folded QSL card for your four-band QSO with EA8BH. The team behind Jeff is: EA8ZS, N5NJ, OH1RY, OH2BE, OH2BH, OH2MM and OH3QK. The station will be on all six bands in the single operator category. Contest participants are invited to please take a moment to record the relative signal strength of EA8BH compared to other Zone 33 stations. After the contest, E-mail your reports to Martti at: oh2bh@n4gn.com Stations reporting and/or confirming QSO with EA8BH on at least four bands will receive a direct QSL and a special award. Reports and QSL requests may also be sent via regular mail to OH2BH: Martti J. Laine, Nuottaniementie 3D20, 02230 Espoo, Finland

GU, GUERNSEY. Eddie, G0AZT, informs OPDX that he will be operating as GU0AZT along with Phil, GU0SUP, and possibly other members of the GARS, in a Multi-Single effort for WAE RTTY Contest (0000z November 13th until 2400z November 14th). Direct QSL requests go to: P.O. Box 5194, Richmond, CA 94805 USA with SAE/SASE (W6/G0AZT). Via the Bureau to GU0SUP, CBA

(1998 onwards).

IOTA NEWS.................
EU-039. Look for TM2F to be active from Chausey Island (also MA004,
CF50002) from October 30th through November 6th. Activity
will be on 160/80/40/20/17/15/12/10/6/2 meters.

NA-120. After several years of trying, permission has been granted
to operate from the Louisiana Fish & Wildlife camp on Marsh
Island, November 19-21st. This is the most wanted IOTA group
on the East Coast of the U.S. It is a wildlife refuge and
access is restricted. Five operators, Max/K5PP, Randy/WX5L,
Mike/W5ZPA, Mike/AD5A, and Buzz/N5UR will be making the trip
with a goal of 3000 plus QSOs in their long weekend of
operation. All five are experienced dxpeditioners. They have
a hexbeam for 20-10 meters including the WARC bands, a
Butternut for 80-30 meters, and they will take various wire
antennae for backup. They will concentrate on areas outside
North America (when the bands are open). They will operate
2 stations on 80-10m including the WARC bands on CW/RTTY/SSB.
A generator on the island will provide 110 vac. They will be
using a YAESU FT100 and an FT1000MP. The callsign will be
K5PP/p. QSL via Max E. Maxwell, 1036 Webster St, New Orleans,
LA 70118 USA. All bureau cards will be answered when received.
This is a joint operation of the Delta DX Association and the
Texas DX Society.

OC-032. Franck, FK8HC, will be active October 30-31st, from Ile Verte
(New DIFO FK077). Activity will be on 40-10 meters including
the WARC bands. Because there is a CONTEST going on, Franck
will be working a lot on the WARC Bands, 18/24 MHz with the
possibility to QSY on other bands if there is no QRM on
40/20/15/10 meters. Frequencies on the WARC bands are 18150
and 24950 +/- QRM (Only on SSB). QSL is only via VK4FW:
P.O.Box 929, Gimpie 4570 QLD, AUSTRALIA

LU, ARGENTINA. LU4FM will be active in the CQWW SSB Contest as a Multi/Multi
entry from his antenna farm.

OH0, ALAND ISLANDS (Update). Ville, OH2MM, will sign OH0MM as a Single
Op/All Band entry during the CQWW SSB contest. QSL OH0MM via OH2MM:
Ville Hiilesmaa, Rakuunantie 18 A 14, 00330 Helsinki, Finland

OH0, ALAND ISLANDS. Look for OH2MAM to be active as OH0Z during the CQWW
SSB Contest as a Single Op/All Bands. QSL via OH1EH, Ari Korhonen,
Kreetalank. 9, FIN29200 Harjavalta, Finland.

QSL INFO AND NEWS.............
Paul Hutley, KF4OOX (aka ZD8V), reports to OPDX that he has started
on the stack of QSL cards he needs to reply to (the stack is 3 ft.
tall). Paul just recently got things set up in a room at his parents'
house and with access to the InterNet. He hopes to get many QSL cards

out in the next few weeks.

R1, MALYI VYSOTSKIJ ISLAND. Look for R1MVZ to be active as a Multi/Multi entry in the CQWW SSB Contest. Activity outside the contest will be mainly on 160, 80 and 40 meters CW. QSL via K6VNX.

SPECIAL EVENT. Look for station VC1A to be active from Nova Scotia, Canada between October 29th and November 29, 1999. The "Tesla Radio Club" members will operate this station in commemoration of 50 years of NATO. During the CQWW SSB Contest, Yuri Blanarovich, VE1BY, VE3BMV and K3BU will operate VC1A as a single band 80m category. Special QSL cards will be issued; color cards will be used for direct requests, B/W for cards via bureau. QSL manager is K3BU, Box 282, Pine Brook, NJ 07058 USA

SV, GREECE. "The 59(9) DXReport" reports that members of the SV1AFA contest team will be a Multi-Single entry in the CQ WW SSB Contest. QSL to: P.O. Box 84, Agrinio, GR-30100, GREECE.
Updated from last week's bulletin, look for SV1DKR in the Multi/Multi category in the CQWW SSB Contest to be operated by SV1DKR, SV1/OK1YM and SV1DNW on all bands. QSL info is via QSL bureau via SV1DKR.
Also in the CQWW SSB Contest, look for Stathis/SV1DKL to run in the contest as an All Band Category Low Power. QSL info via QSL bureau via SV1DKL.

T31, KANTON ISLAND. "Good News" reported by Lech, LA7MFA, states, "Last Sunday, Kanton Island was QRV once again. After using the T31K callsign with LA7MFA/MM for a few times, Ueata (resident on the island) has received his own license with the callsign T31UA. He is running FT-747 with 100W into 20m vertical or longwire..... Please be patient with him, and take good care of him if you hear him. I hope his interest in amataur radio will not get spoiled by some DX maniacs, who just want another "59" QSO. I guess he is not able to run big pileups yet! He is very new to Amateur Radio, although he is a professional radio operator, and he even knows CW and the Q-code..... We will try to send him ARRL Handbook, and maybe even a CW keyer for Xmas. The supply boat reaches Kanton only 3-4 times a year, so I guess it is better to send your QSL card via LA7MFA. I will try to get his logs somehow, and print a nice color QSL cards together with my own for KH8/KK6HC operation..... I have told Ueata... about the upcoming CQWW DX Contest on SSB. He should be able to make some QSOs, and he knows his zone number. He will probably only call other stations, and please be patient with him if you receive his call!"

TA, TURKEY. Look for TA3J to be active in the CQWW SSB Contest as a Single Op/Single Band Low Power (3.8 MHz) QSL via Bureau or direct to TA3J: Berkin AYDOGMUS, P.O. Box 987, 35214 Izmir - TURKEY (E-mail: ta3j@yahoo.com)
Also, look for TA3YJ in the contest as a Single Op/Single Band Low Power (28 MHz). QSL via bureau or direct to TA3YJ: Nilay Mine AYDOGMUS, P.O. Box 876, 35214 Izmir - TURKEY (E-mail: ta3yj@yahoo.com)

V3, BELIZE. By the time you read this Joe, K8JP, and his XYL Beverly should be in Dangriga (they were scheduled to arrive October 30th) where he will operate as V31JP. Joe told OPDX that he will be here until the 1st

of April 2000. They are driving to Belize so travel time may vary due to the flooding and mud slides in southeast Mexico. Joe states that he expects to operate in most major contests with varying levels of activity. Outside of contests he will be active on 160 through 6 meters, mostly CW, but with some phone and RTTY. QSL via KA9WON, Lonnie Miller, 12031 Blue Spruce Drive, Roscoe, IL 61073, USA. Any QSLs sent via his home callsign or the bureau will not be touched until they return in the spring of 2000. Check out Joe's WEB site for updates at: http://sites.netscape.net/v31jp/homepage

V4, ST. KITTS. Look for Conny, DL1DA, to sign V47DA from November 2-13th. Activity will be on 160-10 meters, mainly CW, some SSB and PSK31. QSL via DL1DA.

V4 & VP2M, ST. KITTS AND ANTIGUA. Gerd/DL7VOG and Ben/DL7BY will go with their families on a trip to St. Kitts, November 4-18th, and will operate as V47GU and V47BY on all HF bands, mainly CW and RTTY. The equipment will be a IC-704 with HF-6V-vertical-antenna and a FT890 with DX88-vertical-antenna. Other wire antennas will be built up if needed. Their location will be near Basseterre at Frigate Bay. Gerd will take part in the WAE RTTY Contest (November 6-7th). Skeds are welcome. Just send E-mail to: DL7VOG@snafu.de -or- DL7BY@qsl.net (up until November 3rd)
Gerd will continue his trip with a stay at VP2M-land, November 18-29th. His expected callsign is reportedly VP2MGU. The QSL route is via their home callsigns.

VK0M, MACQUARIE ISLAND. The "DX News Letter" reports that Alan, VK0LD, is currently on contract with the Australian Antarctic Research Division and will be active until January 2001 from Macquarie (AN-005) and possibly other Australian Territory locations. There is a possibility for a special callsign (VM0xx) during December 1999/January 2000. This is NOT a DXpedition, but Alan has many years of experience for DXing from different locations and is used to working pile-ups. There is no QSL manager at present. A Web site is under construction at:
http://www.geocities.com/vk0ld/

WP2Z CONTEST STATION (Change of the Guard). Dennis Motschenbacher, K7BV, announced that as of October 24th he is assuming trusteeship of Woodwind, WP2Z, the magnificent station sitting high on the tallest peak overlooking the island of St. Croix. Steve, KU9C, will continue serving as the QSL Manager for the station. Larry, KE2VB, and Dennis will be doing the complete hand over in the next few weeks. Larry has done all the Contesters/DXers a major favor in getting this Caribbean rental station up and running (a job Dennis promises to fulfill with the same commitment and devotion). Millions of points have been scored from this station by contesters from all corners of the earth in recent years and millions more will come in the years to come. The station website will be updated shortly describing the changes. Dennis will make a few other exciting additions which will make the station even more competitive and user friendly...if that is possible. The Web site is: http://www.qth.com/windwood/
In the mean time, please feel free to contact Dennis with any questions you might have regarding this fantastic contester's dream QTH at:

K7bv@aol.com

ZB2, GIBRALTAR (Update from OPDX.431). Dave, ZB2/W8DO, reports to OPDX that he will be active from ZB2 for approximately two more weeks. The best time for contacts is about 2:00 on EST on the FISTS frequency of 14058 and 21058 kHz. He has made over 1,200 contacts (he states, "big pile ups for Gibraltar on CW"). He is working with a Ten Tec Argosy and mobile whip ...aboard the sail yacht "Kiwi". In two weeks, he will depart for Gran Canary and then across the Atlantic to Antigua.

ZP, PARAGUAY. Look for ZP6T to be active in the CQWW SSB Contest. The operators will be Juan/ZP5MAL, Tom/ZP5AZL, Anibal/ZP5VAY, and Luis Alvarez. The will use monobanders for 40 through 10 meters and dipoles on 80 and 160 meters. The team will be a Multi/Multi entry with two stations running at the same time. QSL via ZP5MAL.

3016. Green Stamps?

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-29 00:00:00 UTC
From: Kimberly Weiss <kaweiss@indiana.edu>
Message-ID: <x0saOMzFT2OPcg7JIY1hAm6MoTPx@4ax.com>
Source record: 23418

I had a QSO with a Jamaican station the other day, and he
requested an SASE (no problem) with green stamps, rather than with
IRC. The onyl green stamps I know of are (or were) S & H, and that was
a long time ago. Can someone clarify for me?

TIA,

Pete.

Green stamps are dollar bills. Sometimes it is difficult to excange
and IRC for stamps and they ask for green stamps (dollars). other
folks are mercenary and want the bucks just to send you a card. i had
heard of some rare spots requesting 100 bucks for a card but that was
years ago (I haven't dx'd seriously in a long time).
Take care

OPDX news bulletin posts:
==========
EA8BH CQWW SSB OPERATOR CHANGE. Due to some unforeseen factors, Martti,
OH2BH, cannot run his EA8BH site, but he has invited a "skilled guest
operator" to make a serious effort in the 1999 CQWW SSB contest. Jeff
Steinman, N5TJ, 35, will pilot an SOAB effort using the latest
contesting
technology, including FT-1000MP dual-radio operating. Jeff is remembered
for his WRTC-96 victory in San Francisco. Please listen for Jeff--give
him a call and earn a special Yaesu certificate and a folded QSL card
for
your four-band QSO with EA8BH. The team behind Jeff is: EA8ZS, N5NJ,
OH1RY,
OH2BE, OH2BH, OH2MM and OH3QK. The station will be on all six bands in
the single operator category. Contest participants are invited to please
take a moment to record the relative signal strength of EA8BH compared
to
other Zone 33 stations. After the contest, E-mail your reports to Martti
at: oh2bh@n4gn.com Stations reporting and/or confirming QSO with EA8BH
on at least four bands will receive a direct QSL and a special award.
Reports and QSL requests may also be sent via regular mail to OH2BH:
Martti J. Laine, Nuottaniementie 3D20, 02230 Espoo, Finland
==========

I wonder if this station should be disqualified, IMHO it should. This is
nothing else but soliciting QSOs in contest and rewarding op's who do
so.
If we take this as a common practice in the following years what the
contesting will be like at all ? One will offer a can of beer per band,
another a video tape for 6 bands qso and who knows what else. So we can
forget Single OP, multi op, low power and all other types of competition
and introduce "poor" and "rich" station instead.

The other station who is doing about the same thing is DX-ped to V2, I'm
not sure about the call. (V26B ??) They announced a few months ago that
the first station who works them an 5 bands will receive special plaque
or something like that. Same story. I actually e-mailed CQ WW contest
comitee but never got an answer (?)

I'm just thinking - what if it works, should I save a few dollars for
the next years wpx or ww contest and promise a can of Fosters to every
station who works me on 3 bands ? :-))

Opinions ?

73 de Mike, VK4NM

Hi Pete
Green Stamp -- USA dollar bill -- Don't send dirty ones -- visit ur bank
for a fresh issue
SAE -- Self Addressed Envelope
SASE -- Self Addressed Stamped Envelope

I suspect the Jamaican station wanted an SAE
Also you can buy foreign stamps at URL:
http://www.net1plus.com/users/ryoung/index.htm
and make an SASE for just about anywhere in the world.

For those who don't remember S&H Green Stamps -- see URL:
http://berkshireblues.com/stamps.htm

Never heard a DX station ask for Blue Chip Stamps though!!

Yes, they're being rather presumptive assuming everyone knows what they
want... (a few people have actually sent S&H Green Stamps, which leaves
the *DX* confused!)

A "green stamp" is a US $1 bill. (I'll bet the S&H green stamps are
more valuable these days, as collector's items!)

Walt! Thank you so much for answering! I am surprized you have not worked more than ONE W6. I recently built a three element, fixed, wire Yagi for the sole purpose of a little Front to Back against those powerful sounding "6" guys. I begin hearing S6 sigs from EU about 2330 GMT. About an hour of that...then pretty quiet until 0330 GMT. Then again, S 6 to 8 from Eu. It must be the guys that either stay up late, or rise early and get on before work. A number of stations from OK and OM, and S5 have said they had to QRT to work. I have QSO a number of UK as well. The signals are usually very good for dipoles and inverted Vee and modest power. Here I run 200 watts on my Bird Wattmeter...our legal limit, and seem to get better reports than I give.

Still, even before the "beam" came along, I never heard or worked any "dx" guys in any other area of the World. Very strange...and in view of the way it looks, and my status as about the only CW op in my county, I get a lot of QSL requests..even to the point of receiving IRC or money. I always delight in returning that! Hope to hear you on one of these {for you} mornings, and thanks again for the reply Walt. 73 "DM"

Well said Walt,

We had the same situation on 28 MHz yesterday with many contest stations operating all over the beacon sub band. This situation cannot be tolerated - it's bad enough having to dodge the illegal cb'ers on the band with out having to put up with contestants obliterating the beacons - no doubt the same thing will happen today. Lets hope the CQWW contest committee are monitoring the situation and disqualify the offenders.

Roger.

3039. CQWW SSB 1999 - Some highlights

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-31 00:00:00 UTC
From: Peter Lemken <plemken@gmx.de>
Message-ID: <7vhnfv$413$1@fu-berlin.de>
Source record: 23441

Hi folks,

My absolute highlight on 40 meter was YY5OIA - calling CQ contest on 7.000.57, listening on 7.249.00 at 0150 UTC. The following QSOs should be in the log in that order:

K4IE
W2OW
N3II
KK9A
W2MHK
K8WDQ
N4TO

Some other goodies:

0100 UTC VU2WAP 7.011.00
9K2HN 7.014.00 listening 7.230
ON6DP 7.016.00 listening 7.224
0125 UTC TM8A 7.006.40 listening 7.159
working K4IE, N4TO, K4RC, KT2ZB (in that order)
0130 UTC N2RM 7.???.?? listening 7.005 (UX8IXX with big QRM)
0155 UTC LY5W 7.010.50 listening 7.241
0200 UTC VO2CQ 7.004.5 calling T94JU for 5 minutes
0200 UTC YY5OIA 7.000.46 again....

After hearing this YY again I switched the rig off.

Why is the CQ Magazine accepting this kind of behaviour? Disqualify the proven offenders and be done with it. Then next year's contest will not see this kind of band violations. The rules of the contest say:

"Violation of amateur radio regulations in the country of the contestant, or the rules of the contest; unsportsmanlike conduct; taking credit for excessive duplicate contacts; unverifiable QSOs; or unverifiable multipliers will be deemed sufficient cause for disqualification."

CQ Magazine, are you listening?

3043. CQWW SSB contest intruders in the Sub Bands.

Newsgroup: rec.radio.amateur.dx
Date: 1999-10-31 00:00:00 UTC
From: LA2EG <la2eg@c2i.net>
Message-ID: <mI0T3.2745$ek.116777@juliett.dax.net>
Source record: 23445

Have you been listening on the band this weekend ? Yes, you are right, the CQW(ild)W(est) SSB contest is on the air again.

Who are the winners and who are the losers , that is the big question ? My friends, I can not tell you who the winners are, but the losers are obvious .

* Amateur radio is again the big looser.
* The band plan of our amateur radio bands are extensively being violated by some of the contestants, as documented on this reflector.
* 160, 40 and 10 m bands are the ones suffering most.
* What about the contestants who cheat, do they loose ?

A competition between radio amateurs is supposed to be a friendly on the air meeting of people devoted to this fine hobby.
In any competition, we also need to have rules, traffic rules, general behaviour rules etc. This is in order to ensure , yes, you are right - a fair competition , and also the right for other users to enjoy their radio hobby in other parts of our bands. I think this is generally accepted as common sense amongst the majority of the ham radio population.

The radio amateur community has an international organisation called IARU, which in consensus has settled upon certain traffic rules for the world wide activity of amateur radio . Any radio amateur, genuine interested in the reputation of our hobby knows or should know this.

It is therefore saddening to observe the ignorance of the contestants whom I think in general are skilful operators who are interested in testing their operating skills in a fair competition. Some contestants would even argue that they are not breaking any rules by operating in other sub bands, as the CQWW contest rules not explicitly state the operating frequencies. Again, amateur radio is , on a voluntarily basis, regulated by the recommendations of the IARU. It is the same whether these recommendations are ignored and violated during contest or in regular radio amateur traffic.

Who is responsible for this situation ? To me it is obvious that the organiser of the contest has a main responsibility . Being aware of the violations taking place, and the frustration amongst the fair playing contestants and other users of the bands, who are in great majority , what do they do to limit the damage the cheating contestants are causing. ?
Again, I must conclude that I don't know. These problems are not of a new date, they have existed for years. To me it looks like the organiser, which is a commercial company, the CQ MAGAZINE, is not interested in doing anything about it. Their main interest seems to be the commercial side of it through the publicity they gain through the contest activity.

This conclusion is drawn, partly based on personal experience. As a former eager contester and former Contest Manager for our national society - NRRL - , I some years ago addressed the CQ contest committee with a report on the sub band violations. What happened ? I think you guessed it. No response at all . Further more, the situation on our bands are even worse today .

What can we do about these violations ? Sorry, I do probably have more questions than answers for you. Let us put it this way:

* What do your national society , or your IARU representative do about this. ? ARRL, RSGB others ?
* Do you still subscribe to the CQ Magazine ? If you do, tell them what you think about their direct and/or indirect support of the violations, both to contest ethics, and IARU recommendations, and the damage this does to amateur radio.

The YY5 is out of the band. The list of stations he worked is fine. On
LSB, you can go right to the upper band edge, since your signal is up
to 2 KHz below that. So what is your problem with those stations?

Well said.

I think the minority, like G3NYY, should accept that it's up to
everyone to call CQ DX, CQ Contest, CQ east, CQ west or CQ whatever...
Should we now partition bands to Contest free zones, DX free zones,
english-language free zones ... ?

Take it or leave it. Ther's always CW and if you can't use it, well then
you can use good old CB. :-)

By the way, how about a nice weekend with your family ?

My problem with these stations is the fact that they are violating the IARU region 1 frequency allocation for SSB on 40m. SSB on 40 starts at 7.040 and not on 7.000 in IARU region 1. They violated the rules of the contest and should thus be disqualified.

I am not a nit picker, but I was royally pissed off, when the _entire_ CW section on 40 was completely useless to CW-Operators. Is it that difficult to understand?

Source record: 23208

I am NOT a contester myself, but I gather that the point of your post was that you don't like the fact that the bands are full of contesters when a major contest is going on.

If you look at worldwide amateur licensing statistics, it is quite obvious that if some event occurs which induces a large number of amateurs to operate at the same time, there is not sufficient space in all the various bands to accommodate them. This is true whether the activity is contesting, DXing, traffic handling, or rag chewing. If all the people who enjoy contesting decided instead to get on the air at a certain time and rag chew, the bands would be similarly overcrowded.

I maintain that any event which encourages activity is GOOD for amateur radio for the following reasons:

1. There is pressure from other interest groups to acquire parts of our spectrum for non-amateur uses. The more our bands are used, the less likely we are to lose any of them.

2. Increased activity generates increased equipment sales. Increased equipment sales encourages manufacturers to stay in the business of producing amateur radio equipment, and to continue to develop new and improved products.

73,

John, K9MM

Absolutely NOT, Pete! Contests are GREAT for DXing and
QSLs are always OK. However, you may find it tougher to
find the appropriate route; when big multi-op groups go
to exotic places, they'll usually let the preferred QSL
route be known (bulletins, etc) but you've got to find
the information.

Also, a lot of the contesters aren't interested in QSLing
as a first priority--answering those cards can be a chore.
So make it easy for them: self-addressed envelope and
postage (IRC or "green stamp") are important if you want
a good return.

Go ahead and get those QSLs, Pete, and good luck!
--Ken

(Apologies to the regulars for pursuing a DX-related
matter on this newsgroup. Please return to whining about
how much you HATE contests and contesters as soon as you
generate another list of nasty rule-breakers.)

3058. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7vki3ooqg1@news.hawaii.edu>
Source record: 23210
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Consider this stolen for my future use.

I never understood how some of these clowns will piss and moan for 5&#65533;
years about lousy band conditions and then piss and moan for another 5&#65533;
years about the crowded bands. It seems to repeat itself every 11 years.

John,

you have completely missed Hans' point. This is about band violations in the CQWW that cluttered the entire CW band on 40 during nighttime. This is not anti-contesting, merely a legal question. And it's about the question of who is responsible for the QRM and what can we do to make ruthless intruders go away.

Absolutely not. A lot of the big contest stations (particularly the non-US ones) employ QSL managers for... QSLing. Some contest stations will send a card via the buro unsolicited, then on the other hand, some don't QSL at all unless you go direct. Best bet is to check out the various newsletters (online or paper) to find out if the contest station has a QSL manager.

Good luck,

73, Darrell.

Did anybody work EA8BH on four bands? Out of 600+ QSOs we only
made one with EA8BH, on 20 meters. Our operation was 99% search
and pounce, too. If there really was a serious SOAB effort from
there, I'm real surprised we only found him once.

If that is what the message was about, then I guess I did miss the
point. However, the original message is vague and doesn't really spell
out what he was complaining about.

What is the 40M SSB allocation in Europe under CEPT regulations?

Not at all. Be sure you have envelopes at your incoming QSL bureau
too -- some big contest operations will generate QSLs en masse and
send them out through the bureaus.

What is difficult to understand is your gripe against the stations up
near 7300. I don't know if the R1 allocation is voluntary or
mandatory. If voluntary, then you have no recourse. There are plenty
of RTTY contests where I operate on 7040 +/-. The stateside CW ops
don't like it (and often QRM me), since it is USUALLY for CW. But it
is R1 RTTY allocation, so that's where I need to go to work 40m RTTY
DX. FCC permits RTTY on 40m from 7000-7150. So, CW ops may not like me
there, but I am within the rules.

3071. Re: CQWW SSB contest intruders in the Sub Bands.

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-01 00:00:00 UTC
From: LA2EG <la2eg@c2i.net>
Message-ID: <aGoT3.318$Ue6.14028@juliett.dax.net>
Source record: 23223

Please observe that the subject is not "anti-contest" , the contrary is true. You will see that by reading more closely my posting . My concern, and others on this reflector, is the ethics of contesting, fair play if you like, and the respect for traffic rules which also considers the coexistence of other radio amateur activities in the bands, CW, SSTV, RTTY and BEACONS to mention some. I am thrilled by the bands boiling with activity, and I also share the views that activity is good for amateur radio in general. So far for my base.

The subject here is the CQWW SSB Contest, and the fact that many of the participants are violating international agreed upon band plans for radio amateur activities. They also cheat their law abiding cocompetitors by going outside the contest crowded phone bands to find a spot in the narrow CW sub bands where they are not permitted to operate.
Here they can catch some extra points and improve their score. The proud winners ? Did anyone mentioned fair play ?

The CQWW SSB contest has grown into a monstrous uncontrollable "no rules apply for me" affair. Unfortunately this also influences the attitude of an increasing number of radio amateurs, disrespect and frustrations over contests in general. That, I very much regret.

The CQWW Contest Committee and the CQ Magazine must bear a major responsibility for this situation.
If they realy cared for fair play and the reputation of radio amateur contests, they could do something about it.

Most important is a revision of the CQWW contest rules.They should in more detail specify the frequency segments in which the CQ WW Contests shall take place. They should also clearly state the consequences of being reported outside these band segments. Finally, the CQ Magazine should promote contest ethics and the respect for other users of the radio amateur bands.

That's entirely possible -- our Australian regulations say
nothing of band plans at all. They are suggested by the Wireless Institute
of Australia, and that's all.

Actually, that's exactly why contests were created. (good to see
they're still fulfilling their original purpose!)

After every contest, I get a handful (if a domestic test) to a boxful
(for a DX test) of PSE QSL cards. (they are all answered) Few of these
cards come from other contesters. Most are from "average JoeHams", each
of whom wanted that W9WI QSO/QSL for their own reason. I think it's the
"First TN, PSE QSL" cards that make the contesting worth the hassle...
(even got one from a JA marked "First USA, PSE QSL"!)

We've been away for a while, but intend to re-start our (almost) daily "Due on Air" message on the reflectors and newsgroups.

Also, the http://www.dxbands.com site has been updated and made faster and easier to use. An on-going project, so not everything is finished as yet, but we are working on it !!

OK, here goes for today:

KC4/WA1O - McMurdo base (AN-011)
TM2F - Chausey island (EU-039)
V47DA - St. Nevis (NA-104)

More details on these operations can be found at
http://www.dxbands.com/dxep1199.htm
.

Mandatory bandplans are IMHO an ugly idea. Band plans need to be
adaptive.

3088. CQWW Log

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-03 00:00:00 UTC
From: Volker Hickmann <dk9pj@qsl.net>
Message-ID: <38207F81.79B9A15E@qsl.net>
Source record: 23152

Hello !

I've made about 100 QSO's during the CQWW. I mainly worked North/South America and the Carribean just to do some DX because it is often difficult with my small station. Would it be a good idea to send my log to the contest manager ? Or would it be just unneccessary work for the contest manager because compared to stations who were "on air" all the time my score is hardly anything.

I was an operator at KL7RA during CQWW and I know Rich QSL's to either all he worked or those who send qsl's. When I am unable to run the contest from a contest station, I will try and pickup some new ones from home also. Most countries will and expect to recieve qsl's. So NO it is not in bad form. The worst that can happen is you dont get a card back. Good Luck, Bill-KL7TC

Pete,

Many of us worked DXCC last weekend--QSLing presents another problem though. First, you have to find a good route since many of these contest stations are "loaned out" to different folks for each contest. Second, always go direct with a SAE and at least one IRC (or an SASE if a stateside address). While I QSL even if it means using my own 20 cent stamp, you can't expect a station that made 5000+ QSOs to pay postage. I'm personally against "green stamps" as I think many envelopes never arrive at the destination.

DX stations seem good about QSLing...stateside stations...

I worked WAS on 160 last year--I'm still waiting on W4OC to QSL. His address with the FCC is not valid (illegal..Riley are you reading this?) and even after I found a good email address and mailing address, Don has still not bothered to QSL or at least respond to my email. I wonder what he does with all those SASEs? Is there a market for SASE's like there is for IRCs?

Don's on my list of stations not to work in any contest and I work them all--CW, SSB,. and RTTY. Now if only we had a list of stations that refuse to QSL (even worse, they keep our SASEs). I bet their scores would take a big drop since the vast majority of people in contests never bother to send in logs and are DXing or looking to complete awards. As a contestor (small, but always there), I expect to answer QSLs.

I'm hoping to work another SC station 160 this year before I move and have to start again.

Well, you started me on one of my pet peeves....

It's not so bad for those of us in Amurrica, as the typical
European on ssb is not really loud. What the Europeans have
to put up with is what we would have if our 40m CW segment
were infiltrated by a lot of Ws contesting on ssb - then we
would be (rightly) as annoyed as they currently are.

Just be careful with some of them who do not QSL at all. I had a very
sad story with a VK2 station as he was the only VK stn I had for a few
years while living in Europe. I sent 2 direct and 2
direct-registered-mail QSLs with plenty of IRC and green-stamps but
absolutely nothing. Not even a post card with: Sorry I do not QSL !
Nothing.
(Don't worry, you'll work him in every contest for at least few more
years.)
Good luck, anyway.

By the way, I live in VK now, hi.

International Reply Coupon. In theory, in any country in the
International Postal Union, you can exchange one IRC for one airmail
stamp adequate to send a QSL (and not much more!) anywhere on earth.

They cost 95 cents at the post office. However, some smaller post
offices don't have them, and those that do rarely have more than 10 on
hand. Some hams (probably mostly QSL managers) sell surplus IRCs for a
substantial discount. Do make sure that any IRCs you buy (whether from
the post office or elsewhere) have the post office stamp on the *left*
side, and no stamp on the right side. (since most of the instructions
on an IRC are in French, sometimes clerks get it wrong...)

IRC = International Reply Coupon. You can get them at the post office. They are in French. The post office that issues them has to validate them in the LEFT hand box, "pays d'origine". I mention this because the people at my post office don't read French very well. Neither do I, but I can manage that much. Yes, I do have one in my hand that is stamped in the wrong box.

According to the latest summary on the cq-contest mailing list,
EA8BH made 10000+ QSOs. (!) Really weird that we missed him on
all but one band. Among other zone 33 stations, we worked EA9EA
and CN8WW both on five bands.

Oh well. No certificate for us. Darn. :)

Yes, it would be a good idea, provided you send it in electronic
format. Paper logs are a burden for them. You can submit logs
via e-mail. If you don't want to make an official entry with
summary sheet and so forth, you can just send in the raw logs
as a "check log".

The CQWW crew does a lot of neat log analysis showing entrants
busted QSOs, uniques, and not-in-log QSOs. The more data they
have to work with the better.

I was suprised when I saw that total too. I worked himi on several
bands but he wasn't real loud. Mu guess is his beam was popinted north
at Europe, and that's where all those QSOs came from.

Provided they are properly stamped, you can get them from 70-80 cents
each from a qsl manager

3109. CQWW Lof Formats

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-04 00:00:00 UTC
From: Marv Luse <mwluse@dimensional.com>
Message-ID: <38219245.467D2AD5@dimensional.com>
Source record: 23161

Can someone point me to documentation on CQWW log formats? The contest rules are vague on this, mentioning only a bunch of file suffixes. This weekend I'll be typing in my paper logs. The following weekend I'll be looking for a logging program. ;-)

Ouch. Where did I get 95 cents from?! They're $1.05...

I do stand by the part about smaller post offices not having them. I've run into at least two that know exactly what they are but never have any...

I'm told that any PO can get them in if you ask for them, it just
might take a while. I've trained my local PO to keep them in stock,
and how to stamp them, but there's only one clerk who handles them.
Apparently, they're just one more thing to inventory in most places.

Anyone out there need a smart terminal. I have 3 which I need
to get rid of. They output ASCII at 100 to 9600 baud and emulate
VT100/200 and the Tetronix 4014,
E-mail if interested, should be good for Ham radio etc.

I don't worry about it, there's another PO 7 miles away (in a town I drive through every day on my way to work) that stocks them. The PO at the Nashville Airport is also very good about it though that's a long way out of my way. (I still get out there several times a year when I need to mail something NOW & the other offices are closed...)

Find a friendly ham in the USA, whom you send a ten US dollar note, or maybe a twenty and who will get you some IRCs at his post office. After all, radio amateurs are a helpful bunch (most of them are). You only need to ask.

Hey!

While mobiling around, and working those rare DX stations, I have found it rather frustrating to scramble for paper and pen. I don't have an easy way to install a laptop in the car, either.

So, I thought, "I can use my Palm Pilot" and create a memo. But that was a bit of a pain. What to do?

Create a log program! That's what I did. It is now version 0.1 -- and works ok.

You have a Palm Pilot? Wanna use this logger? Come download the free Application at:

http://hfradio.org/softdown.html#hflog

I have been using it during my jaunts. Helps. It is very simple, and very basic.

Send comments to: hflog AT hfradio DOT org (you can figure out the address)

In other news: The NW ARRL (Northwest Section of the ARRL) website is now hosted at http://hfradio.org/nwarrl/ - and I have been appointed as new Webmaster. If you are in the NW, and have updates, etc., please let me know. If you are interested in the NW Activity, etc., come check it out.

Also, I am still offering free websites for HAM and SWL sites. Want to make your own page? Come and fill out the form.

Don't forget: http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a

Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

SB DX @ WW $OPDX.434
Ohio/Penn DX Bulletin No. 434

The Ohio/Penn DX PacketCluster
DX Bulletin No. 434
BID: $OPDX.434
November 8, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL Letter, AI2Q, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, K8YSE, W8DO, KE9KD & DX Central, DJ5AV & DX News Letter, DL3LAR, EB3GCP, G4UOL, HK6DOS, HP1AC, IK4AUY, JA4RED, JI3DST, LU7DIR, OH1KAG, OZ5AAH, PR7AR, PS7ZZ, VK4AAR and Bob Treacher for the following DX information.

3A, MONACO. Look for Mike/W0YR, John/N9NA and Ilyes/HA5JI to be active as 3A/W0YR as a Multi/Single entry in the CQWW CW Contest.

3F, PANAMA (Update, please refer to OPDX.430). Cam, HP1AC, reports that he and his special operation as 3F1AC to commemorate the turnover of the Panama Canal to the Republic of Panama, has a new QSL address. This 3F1AC operation will take place starting December 1st, lasting through January 5th (2000). Effective immediately, all cards going to HP1AC have to go to: Camilo A. Castillo, P.O. Box 0860-00144, Villa Lucre, Panama, Panama. Please note that his drop mail address in Miami, Florida is no longer good for QSL's and QSL's arriving at his old Box number in El Dorado will be forwarded to his new Box in VILLA LUCRE.

9M6OO DXPEDITION. Just a quick reminder that the Layang-Layang Island (Spratly Island) operation will take place this week, November 11-17th. Please refer to OPDX.432 or checkout the Web page: http://www.qsl.net/n2oo By the time you read this, the team should be active from the Hillview Gardens (Borneo) Resort as 9M6AAC.

A5, BHUTAN. There have been a few sources reporting that Jim Smith, VK9NS, is now in Bhutan. He may be there until the end of next week, and we are all sure Jim will try his best to obtain a A5 license. Jim has worked very hard over the last several years to obtain a license in hopes to operate from here again like he did back in 1990 and 1994. Best of luck to him on his efforts.

CO, CUBA. It has been reported that Raul, CO8ZZ, will be active in the CQWW CW Contest as Single Operator/Single Band entry (10 meters). His QSL Manager is AD4Z.

GD, ISLE OF MAN. Steve, G4UOL, will be active as GD4UOL from 2000z Friday, November 19th through 1600z Friday, December 3rd. He expects to concentrate this year, again, on 18 and 24 MHz as long as the bands produce QSOs. In the CQWW CW Contest he will be Single Op/Low Power, unassisted, not as active as previous years but trying for plenty of QSOs rather than a big score! Skeds are welcome outside the contest via E-mail address: steve@g4uol.demon.co.uk
QSLs should go to the GD buro rather than his home callsign as this speeds up the process. QSLs direct are via his home callsign of G4UOL: Steven Muster, Flat 4, 60 Genesta Road, Westcliff on Sea, England, SS0 8DB, UK
More information about his previous trips, 1988 to 1998, can be found on his Web pages at: http://www.g4uol.demon.co.uk

HS, THAILAND. "The 59(9) DXReport" reports that Bruce, AA4XR, will be active from November 20th through December 7th as HS0ZCY. Actiivity will be on 40-10 meters CW and RTTY.

IOTA NEWS.....
AS-032. Takeshi, JI3DST (7N3UXO), will be active from Oosumi Archi-pelago (Tanega-Shima). His QTH will be Nishinoomote-City, Kagoshima and activity will be from November 20th (0800z) through November 22nd (2400z). Operations will be on 40/17/15/12/10 meters SSB. Callsigns to be used are: JI3DST/6 and 7N3UXO/6. QSL via the JARL Bureau (the BEST) or direct:
Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City
Osaka 545-0021, Japan

KH4, MIDWAY ISLAND. Mert/W0UFO, Thor/W0QIK, and Ed/N0OKW are expected to be active from Midway now through November 13th. Their primary task is to work with the Oceanic Society as part of the Elderhostel program, but they will also be operating Ham Radio in their spare time. If conditions are good, they will pay particular attention to the QRP frequencies on 20, 15 and 10 meters and operate QRP. Otherwise, they will increase power to up to 100 watts and do what they must to make some contacts. Mert mentions that Midway is -11 hours from UTC or -5 from CST. They would guess that they will get some operating time in the early morning (1100 CST) and in the evening (2200 to 2300 CST). They will use two callsign KH4/W0UFO and KH4/W0QIK.
Meanwhile, Dick, KH4/W4ZYV, has been active this past weekend on 10 meters on or around 28480 kHz between 2200 and 0300z. This station will be here until January 10th (2000). QSL via home callsign.

KH0, MARIANA ISLANDS. Kazumasa/JA4CZM, Hiroyasu/JA4RED and Yasuo/JH4RLY will be active from Saipan, November 19-22nd, using the callsigns AA1NY/KH0, KH0/JA4RED, and KH0/JH4RLY. Activity will be on 160-6 meters CW/SSB/PSK31 and SSTV. QSL via home callsign. AA1NY/KH0 via JA4CZM.

LU, ARGENTINA. Jose, LU7DIR, reports that he will be active in the CQWW CW Contest as LU7DIR from Zone 13 as a Single Op on all bands.

MU, GUERNSEY. Asko/OH3GI and Juha/OH1KAG/OH9MM will be active from Guernsey Island (EU-114) as MU/OH3GI and MU/OH9MM in the CQWW CW Contest (November 27-28th). They will be active from the Guernsey Amateur Radio Society premises. QSL MU/OH3GI via bureau to OH3GI. QSL MU/OH9MM via bureau to OH3LQK. By the way, Juha informs OPDX that his birthday is on the 28th of November, so QSOs are welcome as a birthday gift ;-)

NEW EDITORS FOR THE BPDX. Jose, CT1EEB, reports that he will no longer be able to publish the Portuguese DX Bulletin (BPDX) because he will be "heading out of the country for work reasons and cannot take in hands the responsabilities of publication anymore." The BPDX will continue and the new DX Publishers are:
CT1UD, Roger, (well known DXer and IOTA chaser)
CT1END, Carlos, (a DX Editor himself).

NEW LIGHTHOUSE. Look for PV7ZZ to be active from the lighthouse "Ponta do Mel" (Lat 04 58 06 S, Long 036 54 01 W, Grid SQ HI15NA) from December 3-6th. Activity will be on all bands CW/SSB/RTTY/PSK31. QSL via PS7ZZ: Francisco Edvaldo Preira de Freitas, Av Sao Miguel dos caribes 31, 59086-500, Natal - Rio Grande do Norte - Brazil.

OA, PERU. The "DX News Letter" reports that Yves/F5TYY, Alan/F6BFH, and Bernard/F9IE are to be active from several places in Peru (perhaps also IOTA) now through November 20th. QSLs via bureau.

PIRATE. Lars, OZ1HPS, informs us that there is no callsign 4L80. Any operations by this station is a pirate. There are only 4L8A and 4L8T in the 8 area. Lars is also QSL Manager for 4L8A.

QSL INFO AND NEWS.....
FO0EEN QSLS. Many have been waiting for these cards. ONLY a few have received their cards. It has been reported on the QSL Reflector that QSL Manager LA1EE is only sending a few cards out each week. The reason was not given. We hope LA1EE will contact OPDX and give the readers a update on the status of QSLs. The operation took place in December, 1998.

8S7IPA (in Sweden) was operated by Ben, OZ5AAH, between November 5-8th (which will include the IPARC Contest on both CW and SSB). QSL direct ONLY to OZ5AAH: Ben Jakobsen, 9 Knoldager, 2670 Greve, Denmark. Also, checkout the Web page: http://www.iparc.com

Alan, VK4AAR, states/reports the following: "AGAIN I must advise DXers to keep up to date with call book changes. More than 50% of QSL requests come to me via my old address in Dalveen. It has been more than a year since I moved but still people insist on using out of date info. The Dalveen post office will soon cease to forward mail to me. I am also astounded that many are still using the address in Arana Hills which was PRIOR TO AUGUST 1993....yes, 1993. The person at that address is becoming impatient at the amount of mail going to him. Come on people.. ...GET WITH IT !!!!! On behalf of ALL QSL managers may I remind the "new comers" that we get a great deal of mail and therefore NEED reply postage. There are many expenses for us to cover besides postage...so do the right thing, PLEASE. My correct address is: Alan Roocroft,

PO Box 421, Gatton 4343, Australia

QSL SW2A, who was active in the CQWW SSB Contest (10M ONLY SO/LP), via SV2AEL: Savas Pavlidis, PO Box 22013, Thessaloniki-55310, Greece.

9H3RS INFO. Rolf, DL3LAR, visited Gozo Island (EU-023) from October 21-27th. He operated as 9H3RS mainly on CW. Please QSL via DL3LAR (bureau or CBA).

QSL S79AU via IK4AUY, Sergio Cartoceti, Via di, Corticella 241, I-40128, Bologna, Italy. Sergio was active from Seychelles Island and its IOTAs which include Mahe Is. (Barbarons) from October 21-27th, and then moved to Praslin Island, Anse Boise de Rose, (both have same IOTA ref. AF-024) through November 3rd. He states Dave/S79JDC is still active there (while on business) for about two or three weeks. QSL via G3TBK. They were the only two stations active during the CQWW SSB Contest last weekend.

Please QSL ZZ7Z via PR7AR.

Snooky, KA1DE, reports that he is the QSL Manager for James, ZD9CR, on the Island of Tristan Da Cunha as of September 10, 1995. There was a previous operater with the same call prior to James Glass and the QSL Manager was a W5. Snooky states that he has the up-to-date logs and keeps in touch with James via E-mail.

NEED A QSL MANAGER? Rich, KK7PL, is interested in becoming someone's QSL Manager and if interested, send a E-mail to: KK7PL@WANfear.com -or- Rich@WANfear.com

SPECIAL EVENT STATION. The Catalonian Ham Radio Union, Television of Catalonia and YAESU will be active on the air December 11-12th, from TVC studios using the very special callsign EG3TVC. This callsign is used to promote the "8th Edition of The Marathon of TV3" dedicated to collect funds for non-cure diseases/transplantments. They will operate on HF, VHF, UHF, Meteor Scatter and Satellites. For more information, check out the Web pages: http://www.urc.es and http://www.urc.es/eg3tvc.htm

SPECIAL MILLENNIUM STATION. Look for M2000A to be active on all bands (HF, 6m and 2m) with 5 stations from December 31, 1999, to February 29, 2000, by Cray Valley Radio Society (CVRS) to celebrate the Millennium from the Greenwich Meridian in South East London, England. Skeds with other groups planning special Millennium activity are invited. Any licensed amateur who plans to visit G-land early in 2000 can operate M2000A if they become a temporary member of CVRS for 4 (USD). Special awards will be available. QSL via G4DFI <owen.g4dfi@virgin.net>. For further information, contact Bob Treacher (Chairman) via E-mail at: brs32525@compuserve.com
Also, visit their Web site at: http://www.qsl.net/m2000a

WELL-KNOWN DXER HOSPITALIZED. The ARRL Letter reports: "Chod Harris, WB2CHO/VP2ML, hospitalized: Former ARRL HQ staffer and well-known DXer and CQ magazine DX columnist Charles J. "Chod" Harris reportedly suffered

a massive heart attack and has been hospitalized in Santa Rosa, California. Bob Locher, W9KNI, reported November 4 that Harris, 50, was gaining ground but remained in intensive care. "While Chod is not out of the woods, things are definitely looking better," Locher said. Flowers are not permitted in the intensive care unit, but friends may write Chod Harris, 3201 Franz Valley Rd, Santa Rosa, CA 95404. While he was at ARRL HQ, Harris and ARRL Educational Activities Manager Rosalie White, WA1STO, started the Club and Training Department in the mid-1970s." OPDX and its readers hope for Chod's quick recover. Get well soon Chod.

ZB2, GILBRALTAR. A message (on Monday) from Dave, W8DO, states he is still active as ZB2/W8DO and continues to be active on 15 and 20 meter C.W. and was helpful giving many a new multiplier during the the past weekend's CQWW DX Contest. His operation continues through November 15th, during the evening. Look for Dave on the FISTS frequencies of 14058 and 21058 kHz. As of November 1st, he has made over 2,000 contacts using the small 25 watt Argosy. His antenna is a Hustler Whip on the stern of a 50' Oyster sailboat.

ZF, CAYMAN ISLANDS. The "DX News Letter" reports that Bruce, N6NT, will be active again as ZF2NT now through at least May 2000. He was spotted on 12 meters this past week on or around 24900 kHz after 2300z. QSL via G3SWH (See OPDX.429).

Hi Charles -- FB on the WAZ. For zone 18 -- it "ain't" easy to figure..
Some possible help, see URL's:
http://www.cpcug.org/user/wfeidt/Cis/russia.html
http://people.ne.mediaone.net/ad1c/russia_a.htm
http://www.cqww.com/images/wazmap4.gif
http://members.EUnet.at/hagenbu/ftp.htm

CQ Magazine sez:
Zone 18. Central Siberian Zone: UA8 (T,V), UA9 (H, O, U, Y, Z), and UA0 (A, B,
H, S, U, W).
See URL:
http://members.aol.com/cqmagazine/wazrules.htm

A lot of looking I know but hopefully you can figure it from these.

Good Luck

Look for the nines, RA-RU9, UA-UM9. They will all be in Siberia. Check twenty meters in late afternoon-early evening. Watch the dx spots at http://oh2aq.kolumbus.com/dxs/oldlook.html

Some will say Zone 18. Good Luck

3137. Contesters

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-08 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <8054r9ufn1@nnrp1.deja.com>
Source record: 23189
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

A ham was walking along a beach on a "rare" island in the Pacific when he spotted a contester with no arms and no legs crying at his radio.

He said to the contester, "what's wrong", to which the contester replied, I'm 56, I have no arms, no legs and I've never been kissed. So the ham's wife walked up to the contester and kissed him. The couple started to walk away when they heard the contester crying again.

The ham went back to the contester and said, "what's wrong now ?"

The contester replied, I have no arms, no legs, I'm 56 and I've never been screwed. So the ham went over to the contester's tower, disconnected the coax and said "you're screwed now, buddy."

Join our systems development team and help us meet challenges of growing complexity. Industry leader in the development and deployment of remote sensing systems seeks electrical engineers or those with a related discipline for programs in eastern Massachusetts, California, and elsewhere. Successful candidates will specialize in: algorithm development, mathematical modeling, or phenomenology. Computer simulation experience, test engineering, and other system design skills are also desirable. Openings exist for B.S., M.S., and doctorate level candidates. Competitive salary and generous benefit package. --Please reply to jreqs@my-deja.com for more information--

I've often found that plugging callsigns into a decent web search
engine will often catch these. You also rather quickly learn about the
sites dedicated to this type of information.

I haven't tried simply searching on the callsign, but I do use
dx-central.com rather often. They've got a search form that lets
one search all the recent DX bulletins--extremely quick and handy!
It's a heck of a nice site, IMO.

Hello and thanks for reading,

Tuesday, 8th November, 20:00 utc onwards, one evening only, Club station M0CKY will be active on 40m or 80m sending SSTV worldwide, most likely is SSTV section on 80m if 40m is quiet...or at least as far as we can get HI! We hope to use a digital camera from the Club QTH. If you can hear/see us, pse send a reply! Much appreciated. Hope to see you !!!

73's
Best regards

A typical ham reply, hopelessly bereft of creativity.

I bet in your version of the "real" world, a callsign equates with a
life.

Perhaps on your wall hangs your DXCC certificates in lieu of a degree ?

Or perhaps you just have a swastika, since that country is heading back
that direction anyway, infringing on free speech, assaulting foreigners,
while your companies experiment on the unwitting public ?

The wrong forum for this, but as I understand it, the Monarchists only won, because a lot of Republicans didn't like the currently proposed alternative, and they'd rather have another shot at getting it right, with more momentum then if they were just trying to change one republican form for another. And for another off topic post, there stands a reasonable chance that we'll have a queen for mayor of San Francisco soon. Up the Red Queen!!!!

And, back to amateur radio, particularly in VK land, is there and email adress or web page for ANARTS? I'm having no luck finding either.

And to keep it on subject, they run a good contest.

I've had this notion to set up a beacon but know almost nothing about it. Naturally I knew I could get information here.

Can anybody tell me if there are any limitations beyond those that apply for my General class license?

I might want to operate anywhere from 10 to 80 meters.

Is CW the only mode or could it be data or phone ?

Does the CW have to be at a certain speed ?

Is there any special format I have to follow besides station ID ?

I *do* know about the power steps. Are these required ?

Thanks, Don KB3DMA

Hi Don -- I think all your questions will be answered in FCC Rules and regs Part 97.
See URL:
http://www.fcc.gov/wtb/rules.html
Click on Part 97 -- it downloads a PDF file -- search for beacon. See 97.203 for beacon operation.

Good Beaconing

3160. Re: Is this necessary (hams with no manners: K0SR)

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-10 00:00:00 UTC
From: pllo2a@aol.com
Message-ID: <19991110162855.11072.00003216@ng-fi1.aol.com>
Source record: 23262

if you want to see bad-mannered hams, go to rec.radio.cb and read the posts with the call sign id's.
i personally don't label all hams as idiots but the RF police there can be really annoying.
personally, i'm an out-bander and i enjoy my hobby probably as much as most of you do. when i tune into 10 meters, the mic. is NEVER in my hand. i only monitor.
the RF police at rec.cb, to the un-initiated observer, can give all hams a bad name.
this is the 3rd ham-related ng that i've scanned over today and i haven't recognized one call sign on any of them yet from rec.cb. it seem that they spend all of their time on rec.cb trolling instead of one of these ng's being constructive.
the RF police there, instead of trying to "elmer" people there and gently try to "show us the error of our ways" come in like a pack of wolves and act like their halo's have never been cock-eyed at any time in their past. never j-walked or broke a speed limit? they are just as nit-picky there as i had sounded here in my last sentance.
i don't support the mega-watt stations or big power on cb. just comparatively low power on the out-bands.
i've read the rules. my equipment is spectrally pure. i conduct myself in a responsible manner on the air. basically the only difference between most of you and me is a piece of paper and a few khz of spectrum.
the so-called RF police on rec.cb try to associate us with burglers, murders, rapests and unlicensed auto drivers which is like comparing apples to oranges.
i've never heard of anyone being struck and killed by an unlicensed radio operator nor have i heard how a radio license had ever prevented a rape, murder or burglery.
to them to break radio "law", (which does not exist, only rules) is as black and white as guilt or innocense for murder.
they come on with threats like one had posted that he was collecting posts and associated e-mail addresses of people who posted about mods and cb linears to happy hollingsworth for further action. this is rediculous as the fcc can not take action on such flimsy evidence because if a congenital liar were to come on and brag about owning a bunch of illegal equipment when in fact he had none, if the fcc were to inspect his non-existant station, they would be in for a huge law suit.
they also come on with intimidations that sound like the fcc is conducting house-to-house searchs nation wide which makes them look like babbeling idiots.
there's no doubt that there are jerks on both ham and cb and no one has denied this but for the sake of amateur credibility, these people really need to be reined in.
there are some of us that feel the need for more than cb but less than ham.
for myself, i would advocate a licensed class for such a service. with out code

and with a higher power limit than cb.
i know about the itu treaties and band assignments above and below cb but these assignments are outdated with the advent of cheaper business band rigs and uhf broadcast links.
just as you hams home brew a lot of your equipment, we cb'ers can home brew ours from older cb equipment too just like you do with 10 meters now.
judging from the attitudes, opinions and lack of any overwhelming reasons not to open up these bands, it appears that their only arguement against opening these bands up is jealousy about our short cut to HF DX instead of getting a ham ticket.
almost daily for two months, i have posted two questions in one form or another.

1) why not open these bands with a license for legal use?

AND

2)who gave them the authority to come into the cb ng and order people around as though such authority was granted with their amateur privledges?

both questions have met with either a lot of side-stepping subject changing or apples to oranges comparisons that do not apply.
never have i receved a direct, reasonable answer.
admittedly,they do have somewhat of an arguement concerning cb as they do have the right to use this service too.
in the out-bands where they have no privledges, they are just as rabbid about "cleaning up" those frequencies too.
they are welcome to come debate the issues on the cb ng but when they come in like the un-touchables, their point gets lost in all the screaming confusion.
if you try to push a mule, you usually get kicked, which is what has been happening to them there lately.
if you try to lead him, you still may not get anywhere but at least you'll still walk away with your knee caps intact.
have a good day, fellow radio hobbiests.
jeff

Jeff,

No side-stepping here.

The 10 meter band _is_ available with a license. You can go to a local VE team and pass two written tests and a simple (my 8 year old passed it) 5 wpm Morse test. After that you can operate legally on sections of 80, 40, 15, and 10 meters (200 watt PEP output limit). While you'll find quite a number of people in favor of eliminating the Morse test, I don't know of any amateur in favor of eliminating the written tests.

As far as your out of band activities--they are illegal, plain and simple. You call yourself a CBer yet you operate illegally. Give me one reason why you would obey the rules on the amateur bands even if licensed...

CBers cannot homebrew--they can only use FCC approved equipment. I'm not sure if that includes antennas, but it does apply to equipment. If you're "tweaking" your own equipment, it's illegal.

Amateurs can design, build, maintain, calibrate, and repair their own equipment--we're FCC licensed to do so.

Of course, I've never been on the CB newsgroups--I have no interest in those activities. An amateur ticket grants no enforcement authority on-the-air or newsgroup--the FCC is does all the enforcement.

If you want HF DX, get some integrity (learn to obey the rules), study, and get a ticket--if not go enjoy local communications on the CB band.

That's exactly right. Media polls say that 91% of people in Australia
want a republic, but most of them didn't like this particular system.
(The president would be chosen by a 2/3 majority of members of
parliament, and lots of people want the president to be chosen directly
be the public -- although it would not be an executive president like
you have in the USA.)

I am currently working on radio simulators for maritime applications for VHF FM and MF/HF SSB.
Does anybody have a good formula for somewhat realistic calculation of radio range or path loss
for different frequencies, tx power, time of day and geographic position?
This is for training and does not have to be super accurate, but somewhat realistic.

3173. Clowntesters: W3UR Editorializes in Tongues

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-12 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <80g9au$2ro$1@nnrp1.deja.com>
Source record: 23275
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.dx

From one rerun topic to another do their neurotic little repetitive brains jump.

Now clowntester Good Buddy W3UR has raised the standard of bitching to Hollingsworthless about the "last two" phenomenon. Could it be that these clowntesters, who think manhood (not to mention succes in life) is determined by the size of their towers, have decided this is the best way to shut down the DX nets they find so annoying ?

Nets which give those unable to crack the chaos their giant stations, which cost more than their dumpy houses and 2.4 American cars put together, a chance at the same DX ?

How many clowntesters are REAL MEN, stand by their prnciples and boycott Abu Baker, 5A1A, because he checks into nets frequently (presumably to give all a fair crack at the Libya QSL) ? None, because they're hypocrites.

Losers in sports, emasculated by their harpy wives, clowntesters think they'll use their "pull" as self-proclaimed "great ops" to harass others who don't mortgage their house for a listing in QST 6 times a year and a cheap plaque the rest of the world would know not the meaning of if it were to be explained.

Dunno what your problem is but I nailed my 5BDXCC and 300 confirmed
with a station which cost me about the same as my used car cost.
Without any "DX net" crap. And yeah, I've run some million point
scores, too. What freq does that 5A hang out on? I still need Libya.

Get a life, deal with it, beep-beep.

Net groupies are losers too, and often nets are crap, I did not comment
on that. If you "earn" DXCC on one frequency, you're a dim wit. However,
they are just as viable a tool for occasional use as a Packet Cloister.
How are the two different ? In a cluster do you not hang out on 144.xx
and wait for the NCS to send you the frequency and call ? Does the fact
that you then get on the same frequency in a disorderly, over powered
(often illegal) rucous make you a man or your QSO any more real than if
conducted with the very same station on a net ?

Honk-honk back at you.

I feel generous today. 28.500 to 28.525.

But you knew that already having 300 confirmed, didn't you ?

[... diatribe snipped...]

I'm sorry, but I don't see what your point is really about. If it's the tired old contesting vs anti-contesting thread, then I'm sure everybody on this newsgroup has overdosed on this topic. As far as the QST editorial is concerned, as I understand it, using just the "last two" for identification is an infringement of the license, albeit a minor one. In that respect, Bernie is probably correct.

Regards,
Darrell (NR3Y)

ps. If all you want to do is slag-off W3UR, then perhaps you'd have the courage to sign your posts with a callsign - it would help to add credibility to your point of view.

:>these clowntesters, who think manhood (not to mention succes in life) is
:>determined by the size of their towers, have decided this is the best
:>way to shut down the DX nets they find so annoying ?
:>

I see you must have read the article in last month's QST about
this subject. And Mr Hollingsworth shot this crapolla down when
he made it known that the practice of using last two's, such as
was described by W3UR, is not illegal as long as the station is
not being deceptive about their identity. (I take this to mean
that once Mr Last Two is recognized and given the opportunity,
he will make his full call know for those that are there & care)

Gee whiz, I think if I had written that article in QST and then got
a response like that from the Big Man himself???

Now I don't use DX nets anymore. But that was how I got started
in DXing in the first place. After I moved on to other methods it
was perfectly OK with me that they keep doing what they liked.
I don't work clowntests anymore but it is perfectly OK with me
that they keep doing what they like.

Something I thought was kinda funny just the other day on one
of the DX mailing "LISTS". One fella made a comment about
how Hams were losing interest in the so called fine art of DXing.
As example he stated how a large DX club now had few members
and some of those were not DXers and such. And in counter point,
another fella mentioned how he didn't think that interest in DXing
was falling off at all. He mentioned that there were more people
out there working & QSLing DX now more than ever. He also
mentioned how more groups were going to more places just to
pass out that contact and so on.

Then he went on to mention how he WOULD go along with the
idea that interest in clubs & organizations with a CERTAIN MIND
SET is most certainly on the down swing. He gave an example of
how a local club in his area basically went bust after an interior
faction managed to seize control. Yet, former members re-formed
in another place and were flourishing bigger and better than ever.

I think the whole thing has to do with consideration, cooperation, and tolerance. I call this the BIG 3 of Ham Radio. Without it, ALL of us know just how well off Ham Radio will really be. Maybe one day Bernie will consider the Big 3 a worthy topic for his column.

You mean so his call can be added to the Ol "Hate List" don't you?
That's what happens here if you are not familiar with the practice
already. It really does amaze me at what some Hams will do if
you have a different opinion and voice it. Now I'm not talking
about the usual "trolling" or ego fights that go on here such
as the 3950, 14313, and other such stuff. I'm talking about when
one Ham has a difference of opinion from another and speaks it.
I have seen relatively cool-headed people just about go to war
over "He said something different than mine and I think it made
me look bad. I'll show HIM!!!"

Credibility goes right out the window when this happens and I've
seen some of the most credible get sucked into it. Cool-headed
credible responses arn't worth a darn when you are engaged in
battle over "He said, They said, She said". Its still the same old
thing.

State your opinion, support it with your facts, and then let the
others make up their minds. Believe it or not, MOST of the level-
headed people out there will make the right choice. But then again,
that will make some Hams pretty ticked off when this happens.
That's when they decide to use some sort of "tactic" hoping that
it will silence the other opinion. The idea being, "If no one says
different, and the others are made to look bad enough, THEN I'M
RIGHT"

Good thing we all know better,

Actually, that's not what I meant. I have no problem with people having and airing different/opposing views - in fact, I even think it's healthy providing that it is done politely. If everyone had the same view, the world would be a boring place, and this hobby would stagnate.

However, I still think that people should show the courage of their conviction by not posting things anonymously - particularly if they're making an attack on an individual. Sorry, but in that particular instance I think it's cowardly. Hey, if someone wants to put me on a hate-list, then go for it - I could not care less.

73, Darrell.

Dunno what packet cloister you tune but around here there is no NCS,
everybody contributes. Not that it ever mattered to me, I'm still not
running packet. You might notice that packet users do not compete with
non-users in the contests. It's a level playing field.

Hello, everybody

I have a question. I listen to all kind of frequencies. For example, c.b. radio, radio amateurs and ssb/usb on frequency 27.555
I know on ssb/usb (freq. 27 mhz) they use callsigns. (For example: the Netherlands starts with 19)

Who of yoy can help me by sending me the complete list of country's and ther callsigns.

If you have such a list you can mail it to: rwm.music@worldonline.nl

Many, many thanks

Greetings form Ricardo
The Netherlands

I have been using TRX-Manager to control my radio, DX spots etc. I down loaded a trial version of Logic 5 and have tried using it on occasions but seem to have a great deal of difficulty wading through the various screens trying to make sense out of them. I have had a particularly hard time trying to figure out how to use the report formats to print QSL cards, QSL labels and addresses.

My question is: Is it just me or is this comprehensive program just complicated and takes allot of getting use to?

I would like to hear the opinions of anyone who has used Logic5 or 4.

TRX Manager just seems so simple and intuitive to use. This may be an unfair comparison because maybe the Logic product does much much more. Hard to tell by me after maybe a dozen attempts to wade through the Logic 5 Demo I still feel very confused using the program.

Before you settle on any logging program please take a look at DXbase 2000.
There is a link to the Demo on my website on the 'Software' page. You'll
need a Pentium for DXbase 2000.

Tell me, Brothers of the Ether...is this not a lousy Cycle? Better yet, tell me WHY it is so? Since I can remember...a while...I've not seen "A" index number so high. One day, Eu on 10 m from "W7" land, the next...hardly a signal on HF. Makes One think of re-erecting Top Band and 80M verticals...in a time when we all KNOW "D" layer is not as nice to us as in the dark of the cycle. Yea, verily... the curse.

If you think YOU know why that Absorbtion Factor is SO high...please, let us all know??? 73 "DM" N7DM

>Is this new LogPlus still a 16 bit DOS logger program?

DOS ? Is anybody still using DOS ?

Who cares ? Why buy logging software when you get one of the
best WINDOWS logging programs available for FREE ?

LOGGER is a Windows logging package written by Bob Furzer,
K4CY (9K2ZZ) and has the following features:

Easy to use logging
Radio control
DX cluster access (Telnet or TNC)
One click grabbing of cluster spots
Easy Awards tracking (DXCC, WAS, WAZ, IOTA)
Graphical display of Grayline
Database for managing Skeds
Handy conversion calculator (F to C, etc)
GOLIST QSL database interface
Support for current ham CD ROMS
Graphical Satellite tracking display
PSK-31 interface for your sound card
Data Window to drive a TNC in RTTY or data mode
Easy backup and log printing
Completely ADIF compatible (import & export)
Keyer interface for TNC CW keying
Quick STATS display of DXCC and WAZ stats
Easy User maintenance of DXCC and Prefix data

Plus a bunch more.......

One thing to remember, whatever logging program you use, is
that someday you might just want to get your data in a format
that can be moved to another program. Amateur Data Interchange
Format is that format. Many of the commercially available logging
packages support ADIF IMPORT - but don't support EXPORT. So
once you start using them you are stuck using them because you
can't get your log data back out to move it to another program.

Don't buy ANY logging program that doesn't support ADIF EXPORT.

I'll say that again .....

Don't buy ANY logging program that doesn't support ADIF EXPORT.

Matter of fact, you'd have to be NUTS to buy ANY logging program
when you can get a fantastic one for FREE......

I have over 70,000 contacts in Logger and it's the best logging
program I've ever seen - and I've seen them all.

For more information on LOGGER, visit the MIDXA web site at:

http://www.guam.net/pub/midxa and click the big red LOGGER

on the main page. Download LOGGER and give it a try. It's FREE !
There is also an email list with over 750 hams who are using
Logger who are willing to help new users get up and running.
Info on the email list and a subscription form are available on the
web page.

73, Jim KH2D

3212. Ohio/Penn DX Bulletin #435

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-14 00:00:00 UTC
From: kb8nw@barf80.nshore.org
Message-ID: <$opdx.435.1999@ampr.org>
Source record: 23314
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

SB DX @ WW $OPDX.435
Ohio/Penn DX Bulletin No. 435

The Ohio/Penn DX PacketCluster
DX Bulletin No. 435
BID: $OPDX.435
November 15, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, N4AA & QRZ DX, N4KU, N5PO, N6CW, N6RT, ND6S, K8YSE, KQ0B, N0ODK, W0YR, CO8TW, DJ5AV & DX News Letter, DK5WL, G4UOL, HK6DOS, LA7MFA, LZ1PJ, PR7FN, S53R, SM5MX, SM0BFJ, SM0GNU, UN7LZ, V73CW, VK1ZL, VK9NL and Newsline for the following DX information.

3A, MONACO. Operators Mike/W0YR, Tom/K6CT and Gyuri/HA5JI will be active as 3A/W0YR from November 26-30th. Possibly Thomas/N9NC and Gyorgy/VA3EU may join them. Activity includes the CQWW CW Contest. Mike states to OPDX that once the station is set up he will try to do his best to get on RTTY before the CQWW CW Contest.

3W, VIETNAM (Update). Mike, N0ODK, informed OPDX that he will be active as 3W6DK from Ho Chi Minh City during November 16-29th, 1999. He plans to operate SSB on 15 and 20 meters (both advanced and general portions of the bands), and will try to get on 10 and 40 meters. Mike states that he may try some CW, but it will be at a slow speed. QSL direct to N0ODK. ADDED NOTE: Mike mentions that this will be his first DXpedition. He also mentioned that he will activate some Cambodian (XU) and Vietnamese Island in February 2001.

9M6OO SPRATLY ISLANDS DXPEDITION. The 9M6OO operation is now active until November 17th. Activity is all over the bands. Just listen and read below about the "LAST TWO CRACK DOWNS"!

A5, BHUTAN (Update). Jim Smith, VK9NS, should have left Bhutan and was expected to arrive back on Norfolk Island on November 14th. Kirsti, VK9NL, (Jim's XYL) states that "the amateur radio legislation in Bhutan is almost ready, but not quite and nobody gets permission to operate until everything is properly done. Jim has been helping Yonten to get his station set up and ready for operation as soon as the legislation is in place..... With a bit of luck we may hear Yonten on the air in the near future. So we shall wait and see....."

BY1, CHINA. Pertti, OH2PM/XX9TRR, will activate his current "home staion" BY1DX in the upcoming CQWW CW Contest as a Single Op/All Band entry.

C2, NAURU ISLAND. Jack/VK2GJH and Nev/VK2QF plan to be active next year (March/April) as C21JH and C21/VK2QF. Their activity will be mainly 6 meters with some HF operations. QSL via CBA.

C6, BAHAMAS. Ray, ND6S, will be at Treasure Key from November 19th until December 3rd. His callsign will be ND6S/C6A and C6AGY during the CWWW CW Contest. During the contest he will be a Low Power Single OP entry using a a vertical antenna from Steve Rutledge's Villa. QSL to ND6S.

CO, CUBA. Eduardo, CO8LY, is expected to be active in the CQWW CW Contest as a Single Operator/All Bands/Low Power (100w) entry. QSL cards must go to his QSL Manager EA7ADH.

E4, PALESTINE. Robert, S53R, will be active as E4/S53R from November 24th through December 1st. He will operate from the residence of Peter, E4/G3WQU, in Beit Jala, as Single Op/All Band entry in the CQWW CW Contest. A "FORCE 12" yagis will be used and also wire antennas for 80/160 meters, plus a multi-band vertical. Operations are also planned for activity on the WARC bands before and after the contest. QSL via S53R, Robert Kasca, P.O. Box 23, Idrija 5280, Slovenia.

GD, ISLE OF MAN (Update, refer to OPDX.434). Steve, G4UOL, reports to OPDX that he has received several GD4UOL sked requests for FM and SSB. Steve states that he will ONLY be active on CW between November 19th and December 3rd.

HI, DOMINICAN REPUBLIC. Dr. Heinz-Josef Pick, DK5WL, plans to be active as HI9/DK5WL in the CQWW DX CW Contest as Single Op/All band entry (160-10 meters). He will be active after the contest until December 8th, were he will be active on 160 meters and WARC bands. QSL via DK5WL. All contest QSOs will be confirmed via the bureau.

HF0, SOUTH SHETLAND ISLANDS. "The 59(9) DXReport" states to look for SP3GVX to be active next year from the Polish Antarctic Base on King George Island as HF0POL. QSL via SP3WVL.
Also, look for Oleg, R1ANF, to be active again as R1ANF/A from the Chinese Antarctic Base "Great Wall" on King George Island. QSL via RK1PWA.
Also expected to be active soon is Danny, LZ2UU, as LZ0A from the Bulgarian Antarctic Base on Livingston Islands. Currently, the trip is being arranged and possibly will start in 2-3 weeks.

IOTA NEWS.....
AF-NEW. The Italian team composed of I8IYW, IK8UHA, IK8VRH, IK7XIV, IZ7ATN, IZ0CKJ and IS0JMA plan to activate Giftun Island, an Egyptian island in the South Red Sea Group. The callsign will be SU9DX and the activity will take place in May 2000. This will be a new IOTA. However, the team is looking for sponsors to help offset the estimated cost of 10,000 USD for their 5 day operation. If they succeeded in retrieving enough funds, they may also activate Tawila Island, also an Egyptian island in the North Red Sea Group (Also a new IOTA). The QSL

Manager will be IK8UHA: Antonio Barbato, PO Box 5039,
80144 Naples, Italy. For more information, sent E-mail to
" su9dx@qsl.net " or check the Web page: http://www.qsl.net/su9dx

NA-086. Operators from the city of Nuevitas will be active as CO0DX
from Cayo Sabinal (Camaguey Archipielago) from November 25-28th.
Activity will be on 80-10 meters CW/SSB and maybe RTTY. The
provider of this information states that this IOTA was last
activated 11 years ago. They will also be active during the
CQWW CW Contest as Multi-Single category. QSL via CO7DS.

NA-201. Cuban operators will activate Cayo Breton (Jardines de la Reina
Archipelago) from December 9-13th. Operators included: CO6ZG/
Pedro, CO6ZP/Alberto, CO6XN/Abel, CO7PH/Edor, CO6RD/Reinaldo,
CO6WD/Edelve, CO6JL/Jose, CO6SE/Manuel, CO6MZ/Manuel and
CM6MNG/Mario. Activity will be CW/SSB on 80/40/30/20/17/15/12/
10/2 meters.

KP1, DESECHEO. Harry, W8KKF, reports that over the past few months he
has attempted to obtain a landing permit for Desecheo and has been turned
down. He has all but given up in any further attempts. However, after
several amateurs recently inquired Harry about the island, Harry has made
one last attempt by sending a rather long E-mail to the Vice President
of the United States. Harry feels others should do the same if they
want KP1 on the air. If you are interested in doing the same, you can
send a message (using the Web site below) in your own words requesting
consideration to issuing a landing permit, and your desire to make amateur
radio contacts with stations on the island. Harry states, "Do try to keep
your message rather short. You might mention your state or Country in
the message. A very large number of messages, might just be what is
needed." To send a message to the Vice President, go to the Web page:
http://www.whitehouse.gov/WH/Mail/html/Mail_Vice_President.html
The above line should take you right to the form. You have to fill in a
few blanks and put in your message.

LAST TWO CRACKDOWNS. Reports from "Newsline" and "QRZ DX" indicate that
the practice of only using the last two letters of your callsign while
calling on a net or working DX "is not legal under Part 97" as per FCC
Enforcement Chief Riley Hollingsworth. The FCC "is" going to crack down
on anyone not IDing according to the rules. This current decision will
surely effect nets, DXing and contesting "BIG TIME".

QSL INFO AND NEWS.....
Leif, SM0BFJ, QSL Manager for 9U5D, states that those who request QSLs
for 9U5D and enclose IRC for return postage must be aware that the
IRC must be postmarked at their post office. Otherwise, it is not
valid at the Swedish post office.

QSL P40R via NK4U. Allan, N4KU (not NK4U), reports that since the CQWW
SSB Contest he has been receiving a couple of cards and SASES destined
for P40R. The problem is that he is NOT the manager for P40R. P40R's
QSL Manager is NK4U not N4KU! The few that he has received have been

passed on to NK4U.

QSL ZY7W via PR7FN to the Bureau or direct to: Antonio Fernando Alves,
rua Sim&#65533;o Bolivar, 107, 58102-178 - Campina Grande - PB

QSL GU0AZT via Eddie Schneider, P.O. Box 5194, Richmond, CA 94805.
Operators Eddie/G0AZT and Phil/GU0SUP were active in the WAE RTTY
Contest.

Doug, N6RT, reports that the following new/updated logs are now on:
http://dx.qsl.net/logs

5R8FU (thru October 31, 1999) NH0E (thru November 9, 1999)
9K2HN (thru November 1, 1999) VQ9CV (thru October 31,1999)
DK3EG (thru December 1998) VU2WAP (1999 CQWW SSB Contest)
E44A (thru October 6, 1999) WP3C (thru October 30, 1999)
GB0LI (IOTA EU-120, October 1997 YC0LOW (thru November 7, 1999)
& November 1999) ZX4Y (1999 CQWW SSB Contest)
JY4NE (thru October 19, 1999) ZY4K (1999 CQWW SSB Contest)
JY4NE/OD5 (thru September 21, 1999)

T31, KANTON ISLAND. Lech, LA7MFA, reports a correction to Ueata's callsign
which is T31UT (not T31UA), and his name is Ueata Tetabo. He goes on and
states that he has had skeds with Ueata on 40/20/15m SSB and feels Ueata
is making very good progress and will be able to handle QSOs on his own
very shortly. Times/frequencies were not provided and no QSNs were not
reported on the cluster network. Hopefully, they will be forthcoming.

T32, EASTERN KIRIBATI ISLANDS. Paul/WC5P (T32BE), Bob/N5RG (T32BO), and
Lee/N5PO (T32PO) will operate from Christmas Island (T32) November 24-29th.
Activity will be on 160-10 meters CW and SSB. They will operate in the
CQWW CW Contest using T32PO. QSL via home callsigns.

TI5, COSTA RICA. Fred/K9VV and Bob/K4UEE will be another group active
from here during the CQWW CW Contest as a Multi/Single using the callsign
TI5N. QSL via TI5KD.

UP4, KAZAKHSTAN. Valery, UN7LZ, will operate as UP4L during the last
weekend of November on 10 meters or on all the bands in the CQWW CW DX
Contest as Single Operator. All QSL cards must be sent direct ONLY to
UN7LZ (No Bureau cards) to: Valery Zhilyaev, P.O.Box 7, Kostanay, 458000,
KAZAKHSTAN.

V7, KWAJALEIN ISLAND. Bruce, AC4G, signing as V73CW from here, reports
to OPDX that he is active on all bands 160-6 meters and also on the
satellites. He was heard this past weekend on 6/10/12/15 meters at various
times mainly on CW, but there was some SSB. Bruce want to tell OPDX
readers to only QSL directly to the following address: Bruce Smith,
PO Box 1436, APO, AP 96555 USA. He states that his AC4G mail was being
forwarded, but the postmaster is going to discontinue this. So the AC4G
address is no longer any good. Bruce will be on Kwajalein Island for
a year and a half.

XV7, VIETNAM. Rolf, SM5MX, is about to travel from Tokyo, his present QTH, to Hanoi to re-activate his callsign XV7SW from November 25th to December 3rd. Look for Rolf to take part in the CQWW CW Contest. He is now the only remaining XV station on CW, since only 3W calls are issued nowadays. QSL via SM3CXS as usual.

XX9, MACAU. Ulf, SM0GNU, will be active from Macau as XX9TDX from November 25th through December 2nd. He will also be active in the CQWW CW Contest as an all bands low power (100w) entry. QSL via SM0GNU.

ZD8, ASCENSION ISLAND. Glenn Rattmann, K6NA, will be active once again as ZD8A from November 15th through November 30th. Operations are planned for all bands including the WARC bands prior to the CQWW CW DX Contest. Glenn will also operate during the contest. QSL via N6CW: Terry Baxter, 5243 Mt. Burnham Drive, San Diego, CA 92111. All previous ZD8A and ZD88A operations are being confirmed by N6CW, and all direct cards should be in the mail by the end of the month. Do not resubmit QSLs previously sent to K6NA.

I need help identifying two rf cavity configurations from a diagram.
Both diagrams show a cylinder with a smaller cylinder in the center.
The first configuration shows an rf device fed into the left side of the
outer cylinder.
An antenna is fed out of the rihgt side.
The second config shows both the rf device and the antenna being fed on
the same
line into the center of the cylinder.
Thanks in advance.
Neil

Mission Failed :-(

Hi !

I am very sad, but I have to announce, that we failed with our attempts to get our hardware onto Farallon Centinela.

We (5 hams and 2 sailors) tried everything possible for several hours, even risking our health, but the sea was very brave, with high waves. The water level at the cliff changed continuously within seconds about 10 to 15 feet and our boats were smashed against the rocks several times, putting in danger crew and equipment.

I took some pix and within a few days you may take a closer look to Farallon Centinela on my WEB-site.
But in the moments of danger no pictures were taken, so don't expect dramatic views :-)

Once again, we apologize, that we could not fulfill the expectations.

Maybe the main-problem was our limited budget, because with the help of a chopper everything would have been VERY easy.

But listen to these words of Ramï¿½n (YV5EED):

We Will Come Back !!!!!!

>I would like to hear the opinions of anyone who has used Logic5 or 4.
>

I have used Logic as my logging program since version 3. I love the program but agree it is complicated. The instruction manual leaves a great deal to be desired. There are many things that the program does that are not even mentioned. I usually have to call Tech Support. Their Tech support is good when somebody is there, but most times when I have called nobody answers.

I currently use Logic5. It is a great program once you learn to use it. They do need to improve their user friendliness though.

DM, I'm feeling the same way about this cycle. I've been a ham for over 35 years but have never been active on 10 mtrs during a solar peak due to other "life forces". So I was eager to experience the magic of 10 this year. Like the stories I heard about "working around the world with 5 watts and a whip". So far that's still a myth in my eyes. Ho hum...well we'll see.....I'm staying tuned, but I don't have my hopes up. There were over 320 sunspots this week. How many does it take?? 73, de John, K7JY.

I'm going to put up a page with links to all the logging and contest software I can find. If you sell, or know the URL of software for ham radio use, let me know and I'll add it to the list. I'm tired of hunting all over to find a decent program. I don't care whether it's shareware, freeware, or retail software. Just the URL and I'll make a link to their site.

John, 10 has been very hot and at least 3 people broke the previous 1988 CQWW SSB record during the weekend of 30-31 October. Several of the multi-multi operations had upwards of 180 countries worked over the 2 days! The solar flux was only around 160 that weekend which is roughly equivalent to 175 sunspots. The key to propagation on 10 is a combination of solar flux AND a quiet geomagnetic field. Unfortunately the latter has been very disturbed the past two weeks which has hurt propagation. It is now settling down again so watch for good conditions, especially when the WWV K-index is 2 or less or the A-index is under 10. Look at the following chart and you can see how disturbed the A-index has been recently.

73, Bill W4ZV

P.S. I worked many QRP DX stations and mobiles during the contest with good signals.

The SUN gonna do what the SUN gonna do -- for sure. And its not nice to question OL SOL. The A index being high is the problem at the moment. I have heard the peak is due next year -- so this maybe a preview.

But will tell this much -- have worked 60+ countries on 10 and 12M in the last two weeks -- so I ain't questioning OL SOL at ALL.

3228. Re: Logging Programs (Logic5 etc)

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-15 00:00:00 UTC
From: Charles T Johnston <ctj92@primenet.com>
Message-ID: <80pd2u$t1s$1@nnrp03.primenet.com>
Source record: 23330

Checked out ' Logger '. Another wannabe 'Windows Logging program' that is in
reality a 16-bit Windows 3.1 program.
It is not even in the same league as DXbase2000 which is a true 32-bit
Win95/98 database application. Sorry but on that point alone logger does
not earn and further investigation. It is -OLD- technology.

I have about 20 programs on the list already. Thanks to all who have send me URL's etc. I also found a location with some already on it. However, I am only going to list Logging and Contest software that offer either a Demo or are Free. So you can try and then buy. Take a look at

http://www.mindspring.com/~w4pw/logging.htm

Thanks again and more to come on that page. I may even try to list some stars, depending on feedback from users.

That really is old. Well I don't mean to be such a purist about it but I just recently switched from LogWindows (16bit) to DXbase 2000 (32 bit) . 16 bit applications in a 32 bit OS are to be avoided whenever possible. I know Win9x has the 'thunk' layer to deal with 16bit stuff but it makes everything more streamlined if there are no 16bit apps running. Any Windows programmer knows this basic fact. Also a 32 bit logger for Win9x looks and feels like a real Win9x program and not something out of Win 3.1 by-gone era

>hypocrites.

I could care less about Abubaker! I worked the Ukrainians who went there on the first DXpedition a few years ago, so I don't need to go chasing it now.

Where does such hatred come from?

I have a barefoot station, wire antennas and enjoy contesting immensely just for the pastime. I actually won a couple in the past, but I don't even do it for that.

Most of the contesters I have met are very good people, friendly and willing to help others. You obviously don't care to KNOW any contesters, hence you have nothing solid to base your opinions on.

>
>Losers in sports, emasculated by their harpy wives, clowntesters think

>were to be explained.
>

HOW MANY contesters have done this? You mention W3UR. Is W3UR everybody? Are all your neighbors the same? If you're upset, don't go generalizing your upset to "everybody". That's how bigotry and prejudice come about.

I have to admit, I am put off by 16 bit Windows applications these days.
As you say, they don't fit in well with 95/98/NT.

My text file logging is done on debian linux though.

Actually it has been pretty good to me. I have worked about 20 new countries this fall (giving me 143 all 10 meter phone), including some Eastern Europe & Oceania. I had my best CQWW ever with 51,000+ points 66 countries & 91 multipliers, all on 10 meters with 100 watts and a homebrew 1/4 vertical (actually a copper pipe with some radials).

Am looking forward to the upcoming 10 meter contest. Should be a good one.

Bill,

What part of his question did I miss? He wants 10 meters open with a
license, I replied it already is open with a license.

Now I realize he wants to fill out a form and send it in to the FCC for a
callsign with no tests, but I don't think there will be any support for a
new CB band on 10 meters among the amateur community.

Not the answer he wanted, but it is _my_ answer to his question--there was
no sidestepping the issue.

Same here, I got a batch about a month ago. As Robert says, there could be a problem with the person who handles your letter of the alphabet. Also, it takes a while for the envelopes to get setup after they get your check.

>Well Jim seems you ' guessed ' wrong. Through a 3rd party program DXbase
>2000 now supports ADIF export. I have been in this ng for sometime and
>until your post had never heard of Logger......must not be too good.

Well, Charles, first off let's clear something up. I'm not posting here
because
I'm looking to start a pissing contest with you about who's
logging software is better than who elses logging software. Somebody was
making comments about logging software, I offered some info on a free
logging program that's available for anyone who wants to download it. If
you want to use DXBoss 2000, LogPuss, or Hyperventalated, be my guest.
I can assure you that I will never show up at your house and twist your
arm to use a different logging program than what you are using now.

Secondly, we can't use the fact that you've never heard of something to
verify that it is not good - you've never met my mother, but she's still a
good old lady, irregardless of fact that she doesn't frequent this newsgroup
and you've never heard of her.

When it comes to computer software, 'good' is like women - what's 'good'
for you might not necessarily be 'good' for everybody else.

There are a bunch of what you call '3rd party' conversion programs around
that have been written by hams (including a few I wrote) to help other hams
convert logs to ADIF format so they can try different logging programs and
move data from one program to another.

The fact that somebody wrote a '3rd party' conversion program to convert
DXBase 2000 logs to ADIF format seems to verify what I said before - the
author of DXBase 2000 doesn't have that function avaliable from within the
program. And if it's not available, I can only assume that he (like the
authors
of some other logging programs) is more concerned about keeping you as
a customer than giving you the oportunity to export your log data and try
a different program. But the author of DXBase 2000 is not the Lone Ranger
in the keeping you as a customer department. Other program authors have
flat out stated that they will NOT support ADIF exports - even though they
support ADIF imports - and I can only assume the reasoning for that is
because when they suck you IN as a customer, they want to be damn sure
somebody else doesn't come along and suck you OUT....

If I am wrong in that assumption, and there is, in fact, another much better
reason why DXBase 2000 doesn't support ADIF exports, then please have
the author of the program drop by and explain it to us.

Third party support, in most cases, evolves for the sole reason there is no first party support, as in the case of ADIF exports and DXBase 2000. You and I obviously have a different definition of the word 'support' as it applies to computer logging software anyway....

In the first three months I used Logger, I converted over a half million records
to ADIF format for hams all over the world - because the logging programs they were currently using didn't support ADIF export - and because they wanted
to try a different program.

Go to the ADIF web page at:

http://www.hosenose.com/adif/adif.html

and read about the concept, maybe you'll learn something. A lot of hams like
to use MORE than one program - personally I use one for logging, one for my QSL manager, and one for contesting - and the fact that they all support ADIF format makes it very easy to move data from one to the other.

A lot of hams, as the year 2000 approaches, find themselves 'stuck' with a logging program that doesn't support 4 characters in the YEAR field, and have no way of moving the data from an old, no longer supported by the author, logging program into a program that does. And a lot of hams have very little computer experience, so five years ago when they were happily logging away they never dreamed the problem would arise.

The program I mentioned before is FREE. No charge. So with no money involved, the programmer (which I am not) could care less if you use it or not. The driving factor in many things in life changes when money is involved.....

I think it was a very nice jesture on the part of the author of Logger to offer it to the ham community at large, for free. It suits my needs, and obviously the logging needs of a lot of other hams. If you don't like it, fine. Please feel free to continue using DXBase 2000 and don't worry, I won't make any comments about your mother even if she does read this newsgroup.

My advice not to buy ANY logging program that doesn't support ADIF exports and imports is based on the fact that many hams are stuck with a particular program, and most hams who have kept computer logs with one program would like to move those logs to the next program they decide to use, whatever that program may be. That advice still stands. It's only advice. Nobody is going to be forced to take it....

If you're happy with DXBase 2000, great. Keep using it. Keep sending the author a check every time he comes out with a new update, and maybe, if you're lucky and he's younger than you and stays interested in programming, you can use it forever.

Please spare me the dribble about 32 bits too. I'm not impressed. When you can work people on the radio faster than you can log them on a 286, then maybe I will be impressed. You have to remember Charles, not every ham in the whole wide world is using a 900mhz Pentium III. Some of them are still using 386's and Windows 3.1. Some of them wish they had a 386...

73, Jim KH2D

Paper logs are VERY dangerous, Bob. One nite I was working a big European pileup on 20 meters, and I drank too much pain killer (need that when you are
working Europe) and I passed out with a cigarette in my hand. The next thing I remember was the fireman carrying me out of the front door.....

I guess what happened is when I passed out, the cigarette fell on the paper log book and started the log book on fire, which in turn started the desk on fire, which in turn started the room on fire, which in turn started the house
on fire.

Anyway, ever since we moved into the new house, I've been using computer logging and never had any problems since......

But that is one of the Eternal Enigmas of DXing! :-)

Actually, I read that the solar cycle is actually a 22-year cycle, with a change in polarity every 11 years (sort of like a sine wave). The alternate 11-year peaks (one of which we are currently in) have been reported less active and more stormy than the cycle just before it.

I put up my 80-meter antenna back in Sept. hoping for a good season. The higher bands haven't been totally disappointing but leave much to be desired compared to last cycle.

I guess you can surmise one of two things (at least) here:

1) Don't drink pain killer while you smoke.
2) Don't smoke while you drink pain killer.

It's my birthday and I'm sitting here smoking a Cohiba (but not drinking painkiller) so I don't expect to have anything burst into flames around me. If it does, I'll let you all know, provided the computer and I both live. :-)

But that would mean we're in the same part of the 22-year cycle as
Cycle 19 (mid-late 50s). I wasn't around for that one but legend
suggests that it's the one all others since are compared to in
terms of great propagation.

C'mon Jim....
Is that the best you can do? My automobile analogy was quite good as it
related to 16 bit DOS loggers compared to true 32bit logging applications.
Do I note a bit of envy in your remarks?

Folks,

I privately e-mailed a poster to this group, telling in a friendly way that 190 lines of useless fullquote below a 2-liner comment is not something regulars in Usenet like to see. In addition to that, I hinted to visit news:newusers.answers to get some background on posting below a quote and snipping redundant stuff of the reference posting.

Well turned out _I_ am the idiot - not him. Here's why:

"Hello Peter,
You may not be aware but Outlook Express always places the reply at the top of the message as opposed to the bottom. This is particularly useful in longer threads where there may be parts of several requotes. So with a reply posted with Outlook Express the reader sees the new reply at the top instead of having to scroll through tons of requotes to get to the new info. it is the new trend you should start getting used to. As far as my requote practice exactly how long did it take your news reader to download that message? 1 second? 2 seconds? My friend you are simply over reacting -or- you are lonely and have nothing better to do then nit pick at other peoples messages. In either case I now have a kill filter set up on you. Good bye"

[Rest of my previous mail mercifully snipped]

OK, Micro$oft redefines Usenet and its users gladly accept it. I really like this company and some of its users.

Peter Lemken posts his email:
>"Hello Peter,
>You may not be aware but Outlook Express always places the
>reply at the top of the message as opposed to the bottom.

Actually OE puts the *cursor* at the top of the quotes when you hit "reply to group" to get a reply window. Simply hitting the "home&page down" keys together will put the cursor at the bottom if you wish to start there. Blaming OE or MS for an (alleged) incorrect reply to Usenet, when in actuality a person is too lazy to move a cursor seems a bit silly.

But the bigger question is where should the reply be, above the quotes or below the quotes? I agree with Peter that it is easier to read a thread with the reply at the top simply because it saves a lot of scrolling. However, the correct Usenet *tradition* has always been to put the reply at the bottom of the quotes. And blind tradition, even in the face or valid reasoning, seems to stymie change. It's kind of like the ham code test...

[...]

Actually, it's not "blind tradition" to place one's reply after the matter to which one is replying. It's only natural.

Many begin reading a thread somewhere in the middle, and the quotes help establish the context of the reply. It's jarringly unnatural to read a reply before its query, or a refutation before its thesis.

It's simply kindness to others (which is the basis of manners and etiquette, including Netiquette), and kindness to the language, to place things in a logical progression.

And it's also a kind consideration for others' time which should impel us to rigorously trim the quoted material to the absolute minimum necessary to fairly establish context.

Auto-quoting and human laziness are, each of them, banes of our existence.

But the two in combination are quite intolerable.

With all good wishes,

3272. Dbase files into a Logging program?

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-17 00:00:00 UTC
From: bill <polar30@hotmail.com>
Message-ID: <JCIzOIaVlJR7LNGEBImGjDqzfRQT@4ax.com>
Source record: 23124

I have a custom made logging program that was written in Dbase III. I have the logs and can open them and manipulate them with Access. Does anyone know what program I can import them into using Access? I have looked at Logger, DX4WIN, and a few others but basically need to know the extensions as well as which ones will let Access convert to.
Any help????

Thanks, Bill-KL7TC

To me it is a lot more convenient to see the most current data (last reply) at the top of the screen. Otherwise one must scroll down through who-knows-how-many requotes to dig out the newest info. At the top makes a lot more sense.

I am looking for an instruction manual for the Kenwood TH-28 FM Transceiver. As you may have already guessed, I am not well versed in the amateur radio hobby, but would like to gain info on using FM / VHF / UHF communications equipment. I live in Croatia and although clubs exist here, unfortunately, getting info from them is slow and unreliable (yes,I have applied for a license). I would like to hear from anyone who is prepared to answer my initial 'silly' questions.

Being a UNIX person who used USENET for nearly 10 years now, I remember the old tradition of putting newer comments at the bottom, but nowadays I realy prefer putting newer comments at the top. It really does save on scrolling. Comments at the bottom just really annoy. For what its worth, nearly all email communications in the company I work for have replies where the newer comments are at the top.

Oh, and nearly all newer UNIX newsreaders automatically quote below the line where new text is written, so I guarantee its not a Microsoft thing, but perhaps a more sensical thing.

Well it doesn't 'work' for a lot of us regardless of the time-honored tradition'. I get no joy wading through several requotes trying to dig out the most recent reply. Having the reply first puts it right there to easily read no hunting involved. The other way you mention is not better..it is a paradigm.

> As you say, they don't fit in well with 95/98/NT.

Of course, you could run a 16bit application in a 16bit OS<g>.
Seriously, going to a 32-bit OS & program at my station would require at the very least a new motherboard and RAM at about $300; plus the cost of the software and the OS itself. I'd rather spend the money on radio gear & keep the 486 machine running under Win3.11.

I've not had any trouble running 16 bit Windows apps on my Win98 machine (not the one in the ham shack) but DOS applications are a problem. And a double problem as I have three such apps for which a Windows substitute simply does not exist.

Hamish, are you aware of any specific ham logging programs running under Linux? That would run nicely in text mode on the 486, and much faster than Win3.11. Maybe if I get my Perl skills improved, I'll work on writing one this winter...

Check out http://radio.linux.org.au and look for logging programs.
There are a half dozen or so, one or two of which I don't mind too much.

I confess that I don't find any of them to be ideal. I've never really
looked at Windows programs to do the job because I don't want to be
running Windows for much longer. I will start to code my own for linux
in the near future I expect.

Obviously there is no right and wrong in this case -- I've been on usenet
for years and I'm not about to change my opinion on this one!

A little selective quoting would do everyone a favour. Almost everyone
who replies at the top is guilty of excessive quoting.

Which you have just failed. Nowhere did I say that the reply should be above
the quotes. Actually that's what my peeve is all about: People unable to
delete quotes and just hacking their irrelevant drivel at the beginning of a
posting and leaving useless junk below that.

BTW, Usenet tradition also requires a valid e-mail address vor replies....

No, it doesn't. Again, I advise you to read news:newusers.answers in order to understand what Usenet is about. I don't care about _your_ convenience. But then, you are just behaving on Usenet as other people do in a pile-up: Yell, no matter what the DX-station (or commonsense) tells you to do. A LID, in short.

Anyone who understands, and has any appreciation of, the
term "wasted bandwidth" will instinctively edit quoted text
to some minimum. There are times when most or all of the
post you're responding to is needed to make the point.
Rarely.

LogWindows can import a quoted-field, comma-delimited text file. I'll
bet many if not most of the others can do it too.

dBase can't directly create such a file, but it's pretty easy to write a
BASIC program to do it for you. Access might be able to create it, take
a look under the "Save As" option.

Whether one quotes at the top or bottom really makes absolutely no
difference, as long as they edit out that part of the quote (most of
it..) that's irrelevant to their reply, and intersperse their comments
among that part of the quote that's relative to that comment.

Quoting the entire original message -- and then including one's comments
in one block after (or before) the quote -- is absolutely useless.
(unless the original post was short, but even then not a good idea) You
might as well not quote at all.

I can't remember *ever* seeing a reply where it was necessary to quote
all of the post being replied to. It is especially difficult to think
of a situation where it was necessary to quote both the entirety of the
post being replied to, and the post to which it was a reply.

Now, how about those Leonids?

It is simply much more sensible for the poster and the reader to have the newest info (latest reply) at the top of the message. Do you others really enjoy wading down thru countless requotes to find the reply? I sure don't. This is the new time-honored tradition. Get used to it.

One egregious sin that OE commits, however, is that
it also puts the .sig at the top. Or did, in 4, at any
rate. I haven't bothered checking on 5, because I
know the odds that MS has suddenly pulled their
head from their ass and conformed to a standard
they didn't write.

There's a simple test that some news posting programs make: Is the
amount of new text larger than the amount of quoted text? If it is
not, and the quoted text is more than a few lines, then it rejects
the posting and tells you to edit it some more.

Unfortunately, the web browsers that pretend to be newsreaders don't
seem to have any such rule. But it turns out to be a useful visual
guideline when reading news too. If I see an article where most of
the lines start with ">" (at least on the first page, which is all
I see initially), it's a pretty strong sign that the person who
wrote it can't extract the essence of the argument they are responding
to. That often means that the new stuff they write isn't worth
reading - or at least isn't worth the *extra* effort of going through
all the quoted stuff. So I often skip such articles entirely.

Hmm - sounds like a good option for newsreaders to have: junk any
articles that contain more quote than new content.

>previous replies is unnecessary for you. Idiots like me tend to want to read
>what has been written before, not just the last out of context reply with�ut
>any reference.

It's conventional to quote *small*, *relevant* portions of the previous
article to provide context for new material. It's seldom useful to
quote the entire article, though. If one particular reader (e.g. you)
really wants to read the entire previous article, any threaded newsreader
should take you to that article with a single keystroke or mouse click.

From there, you can go back to the article previous to it, or to another
branch of the replies - so the discussion *is* available for reference,
at least until the articles in question expire.

Well, everyone should trim the material which is not relevant to their
reply, as I have done here. Sometimes I like to interleave my comments
with previous material, and not place it all at the start or end.

Traditions like this evolve because they work, no other reason.

On rec.radio.cb, there are a number, a large number of guys who preach about how the FCC fails to enforce the rules, how it is fun to run high power, how it is alright to modify and tweak their radios, and they constantly get on anyone who happens to object and point out that they are violating the rules. Sometimes the guy noting the violations is a ham and sometimes he isn't, but PLL02 seems to be one of those who just doesn't get it, and feels that anyone reminding him that he is violating federal law must be a ham and/or the'RF Police', whatever that might be. Now he wants to stir the pot up here in hopes of someone going to the cb group and and giving him something else to complain about. He's a real troll.

So do the "rn", "trn", and "tin" newsreaders on this UNIX system. It only
makes sense to have the curser start at the top, for that's were you begin
to edit out the unimportant comments. Note how I edited both Jones' and
Cecil's comments down to just one line; that's just enough for the reader
of this post to know to whom (and to what) I'm responding.

As has already been pointed out, that sort of thing wouldn't be a problem to being with if clueless jagoffs like yourself avoided things like excessive quoting and .sigs longer than four lines.

[7-line .sig that could easily fit within four, and a helluva lot of needlessly quoted text snipped.]

Call me pessimistic but I'd say we've been trolled.
A successful troll at that, my hats off.

a) "I privately e-mailed a poster to this group" doesn't explain why
he cross posted this to multiple groups. I'm reading from adfp.

b) He waved the Microsoft is evil flag, seeking knee jerking salutes

c) As much as needless quoting seems to be all the rage these days, I
can't blame Microsoft. Not for the inability of it's end users to
grasp what constitutes proper behavior, when firing off a single
synapse in the direction of inquiry, would yield all the information
needed about this oft spoken topic.

If you dump the Access file into Excel, you can then convert it
to an ADIF file by adding the appropriate info. Once it is in ADIF
format you can import it into Logger works great. I have doen it with
Foxplus DBF files..

Hi Bill,
There is a program I wrote called ASC2ADIF - you can use it to convert
DBF files to ADIF. Open the DBF file with a spread sheet, move the columns
around into the correct order, then save it as a CSV file. The program takes
the CSV file and converts it to ADIF for you.

You can download the program from:

http://www.guam.net/home/kh2d/asc2adif.zip

To install the program, unzip it into a temporary folder and run SETUP.EXE.
When the installation is completed, the temporary folder and it's contents
may be deleted.

The ZIP file includes a file named ASC2ADIF.DOC in Microsoft WORD format
which is the documentation for the program.

An updated DOC file and EXE file only can be downloaded from:

http://www.guam.net/home/kh2d/updte104.zip

73, Jim KH2D

Beautiful. Just beautiful.

If you want to be a leader in the 'response at the top' revolution so
badly, then why did you quote something first?

No really, this would have been the perfect usenet post, if you leave
off the integral quote at the bottom...
Quote edited for context, and reply beneath that. Textbook example.

I looked for the same a few months ago, and when I could not find one,
started working on a program myself. I will post some screenshots to
www.leune.org/radio/hfblog/ later today to give you an impression.
This project is under construction, and there will be no quick
results! I'm sort of short in time at the moment.

There are some listed in the "radio software for linux" database
at http://radio.linux.org.au/ ; I looked at a few last week and found
some that sort of suited my needs. There are quite a few VHF+ contesting
loggers; I was looking for a general HF QSO program. The program
"ulog" is completely text based.

I'm glad to hear that you can still get software for your Win16
machine. Since I am running Windows 98 and linux on my shack computer here,
I prefer to have 32-bit stuff.

cheers

Howdy.

I was asked to add a prefix look up utility. It is now available on the QSL page at http://hfradio.org - If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

Don't forget: http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

No, but I don't need to with a bit of selective quoting and
sensible editing.

> This is the new time-honored tradition. Get used to it.

Just like that eh? I'm afraid not.

And, assuming you understand what wrapped lines look like, his
newsreader didn't attribute anything to you. Your quoted posting
would have '> > >' in front of it. The only things with '> > >'
in front of them are other attributes and wrapped lines.

I disagree about 5A1A. Abubaker is quite good about returning cards. Just
make sure
you send the envelope registered. Also, IRCs aren't accepted in Libya.

--or go through WF5E.

I have received two mailings from 5A1A--no problem. I am only waiting on
the 5A39
card from last year. And every time I talk to Abubaker, he says he hasn't
had it printed
up yet.

I am still waiting on a BD4ED card, but it hasn't been all that long.

I have the OD5NJ card on 3 bands, 5A1A needs to be sent via registered mail, I have 3 cards now. my 7X2LS is in, BD4ED also came in good time. I have not worked the ET yet.

These are countries where mail theft is known to be a problem. If anyone is interested we can start a QSL How-to thread that covers fundamentals of getting that tough QSL

All these cards were sent via registered mail, after other multiple attempts. (I knew 5A1A had to be registered) I have been dx'ing for ten years, I know the tricks. Consider yourself lucky, not the norm. Go to QRZ and plug in OD5NJ. Take a look at the station OD5NJ has put together ripping off DX'ERS.I say cut them off, let them get a job like everyone else. That is correct.

Now explain why he didn't snip my name out. Try not to use the words "stupidity" or "laziness."

The same reason that you didn't snip out all the unnecessary quotes in this last response. You may have to use those words though...

Hi DXers !
As probably most of you know, our DXpedition to the rock Farallï¿½n Centinela failed.
Anyhow I prepared some WEB-pages showing the place and additional infos.

Of course I would have preferred to show you a successful expedition :-(

Here ist the story:

http://www.qsl.net/dl2gg

or

http://surf.to/caracas

See you the NEXT time from Farallï¿½n Centinela

WE WILL COME BACK !

I have a card from OD5NJ.
Have not yet received a reply to a QSL sent to BD4ED, but that was for a
QSO on 30 May (and I may have sent mine via bureau) so it's too early to
complain here.

Never worked EP2FM. And found that I never sent QSLs to 5A1A or 7X2LS!

If you need 7X, look for 7X4AN. He's easy & fun to work, and QSLs
quickly. (via a Barcelona, Spain address if I remember properly)

Source record: 22914

Hello and Thankyou for reading,
I am thinking of returning to VHF/UHF DXing after a break, and at present have an FT221 with Mutek F/E and an FT780
but would like to buy something top notch and ideally dual band, but unlike the current trend of all band radios around I want the best 2mtr performance i.e. good strong signal handling, as I intend to use it at the top of a mountain on field days etc, I would also like to be able to add CW filters.
So any comments you have on the current or second hand radio's around suitable for VHF/UHF DXing would be most welcome, please note that this is not a wanted add.
Thankyou Nick G0HIK.

SB DX @ WW $OPDX.436
Ohio/Penn DX Bulletin No. 436

The Ohio/Penn DX PacketCluster
DX Bulletin No. 436
BID: $OPDX.436
November 22, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL Letter/Web Page, K2FF, WB2RAJ/WB2YQH & The 59(9) DXReport, NG3K, W3UR & The Daily DX, W4PJ, WB5KAU, K8YSE, KE9KD, KL9A, 4L5O, CT1CSN, DJ5AV & DX News Letter, DK5WL, DL1HCM, DL5EBE, DL7VRO, DK9TN, ER1DA, F1NGP, F5NOD, G3SWH, G0OFE, JI3ERV, JM1LJS, LU3FCK, OH2TA, OH9HNP, PA3GIO, PY1KS, RA3SL, VK4EJ, VK9NS, ZP5AZL, ZS5BBO and the NATAL DX GROUP for the following DX information.

3D2, ROTUMA ISLAND (and Fiji). Northern Ohio DX Association (NODXA) members DL7IO/Birgit and Holger/DL7AU will be active from Rotuma until November 24/25th, as 3D2AO/R and 3D2IO/R. They will return to Fiji after their operation and remain in 3D2-land until December 9th. This is reportedly a vacation (per Fritz, DL7VRO), but radio operations will take place. There have been QSNs reported on 30/12/10 meters CW/SSB via the cluster network. QSL via DL7VRO.

4L, GEORGIA. Look for Omari, 4L5O, to be active in next week's CQWW DX CW Contest as a Single Operator/Single Band (28 MHz)/Low Power entry. Qsl via CBA.

4S7, SRI LANKA. The "DX News Letter" announced that Felix, DL7FER, is expected to spend time here until Christmas and will operate CW/SSB on 40-10 meters (also the WARC bands). He will receive his callsign upon his arrival on the island. QSL via bureau to DL7FER or direct to: Felix Kuntzsch, Auf dem Berg 12, D-35745 Herborn, Germany.

7Q, MALAWI (Update). NODXA member Edwin, ZS5BBO, will be leaving for 7Q7-land and will arrive December 19th for a short holiday until December 26th. He will be active from the shores of Lake Malawi, signing 7Q7BO. Activity will be on 10, 20, 15 and 6 meters. He will try to be active as often as it is possible using Icom 706 Mk2 for 6m and Kenwood TS450SAT for the other bands. Edwin would likr to give as many operators as possible a new one. All QSL cards are to be sent with SASE (and 2 USD) to his home callsign ZS5BBO: Edwin Musto, P.O. Box 211032, Bluff, 4036, South

Africa. NO CARDS WILL BE ANSWERED VIA THE BUREAU. SPECIAL NOTE by Edwin: "I would like to take this opportunity to thank some of my very good ham radio friends. Firstly, thanks to John/7Q7JL for all the trouble he has gone through to help me in getting a license and callsign. Also, I would like to thank the following for their help and assistance. Special thanks to 7Q7HB, 7Q7LA and G0AIS. Without their help in some small way I didn't think this operation would be possible. Also a very big thanks to Tedd Mirgliotta (KB8NW) Editor of the OPDX and President of the Northern Ohio DX Association (NODXA) for the sponsorship of the logging software (purchased by NODXA).... 73 and hope to work all of you in the pile ups.... Any queries please E-mail me at: zs5bbo@aarrl.net (before 14-12-99)

9M6OO SPRATLY ISLANDS DXPEDITION QRT. Bob Schenck, N2OO/9M6OO, reports that they had a very sucessful 9M6OO operation with 21,000 QSOs logged. The group is currently in Brunei (V8) and is active as V85OO. NODXA's club member Jim, K8MR, reports, "I'm having a blast over here" and was operating from V8SEA station at the SEANET convention. QSL via JA0AD. He states that they (along with N2OO and N4PN) are currently at the QTH of V85AA until Wednesday and are operating as V85OO. QSL via N2OO. They are trying to pay special attention to the WARC bands and the short 160 openings. Then we will be off to 9M6AAC for the CQWW CW Contest (M/S), again QSL to N2OO. Watch for the latest updates on their Web page at: http://www.qsl.net/n2oo/borneo

9M6, EASTERN MALAYSIA. The "DX News Letter" reports that nine Japanese operators visiting the SEANET Convention in Brunei will go here after the convention and be on the air as 9M8TG. Activity will be on SSB/CW/SSTV and on 160-6 meters until November 25th. QSL via JH3GAH.

9X, RWANDA. Vladimir, RE3A, was heard on 10 meters signing 9X3/RE3A this week. He claims that he will be in Rwanda for about a month. QSL are to be sent to: P.O. Box 899, Moscow 127 018, European Russia.

A5, BHUTAN (Update). OPDX InterNet Subscribers will receive a complete press release by Jim Smith, VK9NS, about his trip to A5-land.

A6, UNITED ARAB EMIRATES. Bernie, W3UR, from "The Daily DX" provided the following press release: "Asia's biggest station A61AJ will once again hit the airwaves for the CQ World Wide CW DX Contest November 27th and 28th. Ali Al-Futtaim, A61AJ, has invited last year's Asian record breaking multi-multi team of Rich/KE3Q, Boris/T93M, Sam/T94S/PA4AO, Edin/T97M, and Bernie/W3UR back to Dubai. Joining them this year will be Jeff/K1ZM, Rol/K3RA, Phil/N6ZZ, Danny/T93M, and John/W0UN. Team members started to arrive late on November 20th. While there they plan to do some minor maintenance on the existing antenna farm. Also planned is the installation of two new serious antennas for 160 meters and multiple beverages for 80 and 160 meters. Look for activity on 10 through 160 meters (including 12, 17 and 30 meters) CW, SSB, and RTTY before and after the contest." A new A61AJ home page can be found at: http://www.qsl.net/a61aj/
QSL via W3UR.

AH2, GUAM. The Guam Contest Club will once again be active in next week's CQWW CW Contest. This club has been the Oceanic leader in the Multi-Single category in the last two years, and in 1998 they made an Oceanic record in this category. This year, due to growing sunspot number, the group will make an effort to build a much better score and aim for the World's Top 10. Operators will be Aki/JI3ERV/NH2C, Kaz/JG3RPL/N1BJ, Toshi/JR7OMD/WI3O and Hiro/JH0USD. They will use the callsign AH2R in the contest and be a Multi-OP Single-TX entry from Guam Island (KH2, Zone27, IOTA OC-26). QSL via JI3ERV (Direct or JA Bureau, NOT KH2 Bureau). Their Sunrise/Sunset will be: 2020/0750z. Any questions or comments are welcomed. Don't hesitate to E-mail the Guam Contest Club at: gcc@seo.or.jp

CQWW DX CW CONTEST ANNOUNCEMENTS. There are a few Web sites available with up-to-date announcements for upcoming operations during next week's CQWW CW Contest. Check the following Web pages:
http://www.vramp.com/~ncj
http://www.ng3k.com/Misc/cqcw99.html
http://www.cpcug.org/user/wfeidt/Misc/cqcw99.html
http://www.his.com/~wfeidt/Misc/cqcw99.html

FO, FRENCH POLYNESIA. Roger, KF8OY, is in Tahiti until November 24th and will be active as FO0MAC. Rodger plans to be active a lot of 12 and 17 meters while he is there. QSL via KF8OY. VERY IMPORTANT: DO NOT QSL via K8OU. This is a different operator and operation.

FS, ST. MARTIN. "The 59(9) DXReport" reports that a few members of the North Jersey DX Association will be active from here December 1-8th. Activity will be on 160-6 meters. No callsigns were mentioned.

GJ, JERSEY. Bert, PA3GIO, will be active from here (IOTA EU-013) as GJ/PA3GIO/p or /m, December 11-16th. Activity will be on 10/12/15/17/20/40/80 meters. QSL preferable by the Bureau to PA3GIO. Visit Bert's Jersey Web page at: http://www.xs4all.nl/~pa3gio/GJ99/

GU, GUERNSEY. Jim, G0OFE, will be active as GU0OFE from Wednesday, December 8th, until Monday, December 13th, primarily for the 10M ARRL Contest. However, he will be active on other HF bands outside of the contest; most likely 15 and 20 meters, possibly low bands as well. His contest callsign will be MU0C. QSL info for both GU0OFE and MU0C is as follows:
Bureau cards to the GU bureau, (NOT via G0OFE please)
Direct cards can be sent to G0OFE (callbook address)

HI9, DOMINICAN REPUBLIC (Cancelation). Heinz, DK5WL, reports that he had to cancel his trip to HI9 because of personal reasons. He would have been active as HI9/DK5WL in the CQWW DX CW Contest.

IOTA NEWS.....
AF-067. Look for Jim/G3RTE, David/G3UNA, Rob/5Z4RL, Ian/5Z4IC, Graham/5Z4GS and Phil/G3SWH are planning to activate Wasini Island, which also counts for Kenya for DXCC. Activity will be on both SSB and CW for a week in mid March 2000. Wasini has been activated only once before, for a 24 hour period in the 1993 IOTA contest.

KP5, DESECHEO (OPPS!! Not the prefix KP1 as reported last week). Over the past week, OPDX has learned that there are more than one group trying to activate this one. All reportedly are having the same problem trying to obtain a landing permit. Hopefully, there will be some breakthrough in the coming future.

L5/LO1, ARGENTINA. Look for LU4FPZ to operate as L5F a Single Op/Single Band (10m) entry in the CQWW CW Contest. Look for LU4FM to operate as LO1F in the CQWW CW Contest as a Single Op/Single Band (20m) entry.

LAST TWO CRACKDOWN (Update). You can find a more clarified version of FCC Enforcement Chief Riley Hollingsworth comments about the last two letter crackdowns on the ARRL Web site (http://www.arrl.net) and this week's ARRL Letter. In short, Hollingsworth states, "All we said was that if only the last two letters are given, it doesn't meet Part 97". Hollingsworth pointed out that if a calling station using an abbreviated ID is never acknowledged and given a chance to give a complete callsign, a legal ID would be lacking for that communication. To be strictly legal, stations using a suffix-letter ID always must identify at some point in the communication with a complete callsign. To be completely legal, a station using a two letter suffix ID always must identify within the first 10 minutes of the communication (and each 10 minutes thereafter) with a complete callsign. You can also hear Riley Hollingsworth's discuss this issue (using Real Audio) on the Web at: http://www.rainreport.com/

OD, LEBANON. Slavek, OK1TN, with Vladimir/OK1CW and Pavel/OK1MU, will operate in the CQWW CW contest as OD5/OK1MU. QSL to OKDXF, Bradlec 73, 293 06 Kosmonosy, Czech Republic.

OH9, FINLAND (The "BIG GUY" will be active! Tell the kids!). Santa Claus will be active as OH9SCL, December 17-19th, from Rovaniemi before he makes his world-wide tour. Activity will be on all bands and modes. There will be real time logging on the Web. For more information, check the Web page (site still under construction) at: http://www.oh9scl.com
Or send E-mail to: oh9scl@sral.fi

OH0, ALAND ISLAND. The B.I.G. Contest Station on Aland Island, OH0R, will be active during the CQWW CW Contest with, if possible, even better signals than ever before due to newly installed antennas. They will participate in the Multi/Single category with a joint venture of OH and DL teams (OH2TA/OH0TA, DL1EFD and DL3KDV) representing the Contest Club of Finland (CCF). OH0R QSLs are via OH2TA.

OZ, DENMARK. The Bavarian Contest Club (BCC) will be active from here as OZ/DJ9RR in the CQWW CW Contest as a Multi/Single/High Power entry. The operators are: DJ9RR, DJ7LX, DL8HCO, DK3LT and DL1HCM. Pre-contest activity will start November 23rd. QSL via DJ9RR (via bureau).

QSL INFO AND NEWS.....
Some QSL Manager databases have N6TR listed as manager for FR5FD. Larry Tyree, N6TR, has been asked about this and he states he knows nothing about it. The best route is direct to: Patrick Labeaume,

40 Rue Louis des Jardins, Bois de Nefle, F-97411 St. Paul, Reunion Island via France.

Some databases also list NJ2D as the manager for LA6WEA. This is incorrect. QSL LA6WEA via direct to: Kaare Olufsen, Levang, 8890 Leirfjord, Norway.

FT5WH QSLs. Gil, F5NOD, reports sending out around 350 FT5WH QSLs this past week. All QSL requests received before November 5th have been returned. He states that he has the FT5WH log for QSOs up to October 14th. He will have the complete log in January when Gilles, FT5WH, returns back home (leaves December 7th). Next batch will go out in the middle of December.

QSL cards for the following special event stations from Republic of Moldova (ER1A, ER1CW, ER27A, ER50A, ER50CE, ER7A, ER8C, ER9V, ER0ITU, and ER200P) are to be sent only to ER1DA to the following address: Valery Metaxa, P.O.Box 9537, Kishinev, Moldova, Europe (Direct or via the Bureau). Valery, ER1DA, states, "QSL cards sent to I8YGZ, RW6HS, or to any other address are as good as thrown into a garbage can for I didn't authorized them to do this, and I'll inform DXCC commitee about that." He also states that due to the considerable increase of postal charges in Moldova, it is necessary to send 2 IRC or 1 USD for direct return QSLs. Please don't send envelopes with Moldavian postage stamps for the postal charges can change any time.

Steve, P29BI, should be close to going QRT on Bougainville Island (OC-135). However, he will remain on the island until November 27th, but he must send his equipment and personal effects home early. His QSL Manager VK4EJ states that he is still waiting on some logs as the mail is sometimes slow, but will QSL as soon as he receives them. QSL to: Bernie McIvor, 30 Brennan Parade, Strathpine, QLD, 4500, AUSTRALIA

Chris, KL9A (ex-WL7KY), reports cards for KL9A, WL7KY and KL1SLE can be QSLed via NU4N, but KL9A cards have not been received from the printer yet. ADDED NOTE: Chris wants to remind everyone that Alaskan stations are NOT just KL7, WL7, NL7, or AL7. They are KL, NL, WL, and AL, ANY number, 0-9. The only exception being KL9KAA-KHZ which is South Korea.

PIRATE. On November 17th, a station signing PY0FA was active. This station is a pirate. PY0FA doesn't live on the island anymore and is somewhere in Brazil. Do not waste your time or money sending QSLs. The only stations active from Fernando de Noronha are PY0FF (Andre) and PY0FMZ (Helmut, DL2HMZ until November 25th).

PY, BRAZIL. Alex, PY1KS, states he will be active in the CQWW CW Contest as PY1KS as a Single Op/All Band/Low Power entry. He mentions to look for him 160-10 meters, but his best band is 10 meters. He will try some 80/160 meters (only 100w). QSL via PY1KS: P.O.BOX 18123, Rio de Janeiro-RJ, 20722-970, Brazil.

PY0S, ST PETER AND ST PAUL ARCHIPELAGO (Delayed Again!). Once again, the NATAL DX GROUP advises that the DXpedition has been postponed until April of 2000. The Brazilian Navy, through the Secretary for Ocean Resources, advises that the trip to the Archipelago St. Peter & St. Paul has been postponed due to the reconstructing of the wooden building and anchorage by the Navy and the Brazilian Environment Department which were destroyed by heavy seas. It should be completed by the end of March, 2000 - probably! The NATAL DX GROUP sends apologies to those who may have been disappointed; they hope to contact them on their next DXpedition.

R1, ANTARCTICA. Oleg and his colleague Alex will be using the callsign R1ANF/A during CQWW CW Contest from the Korean station "King Sejong". QSL via RK1PWA direct to: Nick Shapkin, P.O. Box 73, 164744 Amderma, Arkhangelskaja, Russia. ADDED NOTE: Oleg, R1ANF, reports that his QSL Manager Nick, RK1PWA, is having "big problems" in receiving direct QSL in Amderma. Oleg has decided to keep Nick as QSL Manager for his activities under the callsign R1ANF from the Russian Antarctic station "Bellingshausen", South Shetlands. However, for his operations as R1ANF/A from the Chinese Antarctic Base "Great Wall" (first ham activity) and the Korean Base "King Sejong", cards should only be sent to the following direct address: P.O.Box 10, Novodvinsk-1, Arkhangelskaja obl., 163901 RUSSIA. Cards will be answered after Oleg's return to Russia in spring 2000.

S9, SAO TOME AND PRINCIPE. Matt, DA1MH, and Markus, DL5OBZ, will be signing either S92CW or S92DX now through December 4th. They will be active on 20-6 meters and intend to participate in the CQWW CW Contest on 10 meters only.

V6, MICRONESIA. Hide, JM1LJS, will be active as V63LJ from Ponape from December 26-31st (possibly until January 4, 2000). Look for activity on 80-10 meters CW/SSB. QSL via JH8DEH: Akira Miyata 4-28-5, Minami Nishi 23 Jyou, Obihiro 080-2473, JAPAN.

YU8, YUGOSLAVIA. Andy, RW3AH, will be in Kosovo during the next 2 years and will use the callsign YU8/9X0A. QSL info is not known yet.

ZM7, CHATHAM ISLAND. Lothar, DJ4ZB, will travel here in the new year and be active from January 31st through March 3rd. His callsign will be ZM7ZB. His activity, reportedly, will be maninly on 10 meters using a Quad antenna. Suggested frequencies are: 28395, 28495, 28595 or 28460 kHz.

ZP5, PARAGUAY (Update). Dale Long, N3BNA, and Darrell Nerron, AB2E, will join the Multi/Multi team of ZP6T for the CQWW CW Contest. Also joining the team will be Jorge Diez Furest, CX6VM (CX5X). The ZP operators will be Juan/ZP5MAL, Tom/ZP5AZL, Anibal/ZP5VAY and Luis/ZP5WBM. The station is now equipped with 4 towers with stack monobanders from 40-10 meters and a two element wire beam for 80 meters. Also, there is a high inverted L for 160 meters plus phased beverages for low bands. Their last operation in a contest from Paraguay was in November of 1997. They will make a special effort on the low bands for those who need ZP on CW. They plan to have three stations on at the same time. The QSL Manager for this operation is Juan, ZP5MAL, which is "OK" in all callbooks.

Worked this chap on 10m a couple of days back and am now wondering if he's legit? The usual QSL databases don't seem to have any record and the DX summit only has a handful of spots over the last 12 months.

Anyone know if he's genuine - and better still, a QSL route?

Cheers,

/Denis MW0CBC/GW8OQV

Thanks for all the input on the P51BH and reminding me about the P5RS7 fiasco. I had completely forgotten about that.

The op I worked on 15CW was excellent and what fooled me, if this is not legit, was that the op took the time to get my call correct. He initially though I was VE3BEQ and after several quick exchanges got it right..Why go to that extreme if not legal? But, it takes all types.

Again, thanks. 73 Murray, K3BEQ

Begging your pardon Mr. Mayor but my personal bandwidth is
not unlimited no matter how long it takes PacBell to not deliver
DSL to La Honda. I appreciate not seeing certain threads at
all and certainly appreciate a judicious trimming of the quotes
in order to save me time. I can only cram so much text per unit
time through my eyeballs and if that isn't well represented by
the concept of bandwidth I just don't know what is.

Stephen

> term "wasted bandwidth" will instinctively edit quoted text
> to some minimum.

With the available bandwidth being as high as it is, objecting to excessive quoted text on the basis of "wasted bandwidth" comes across as rather silly. When people carp about "wasted bandwidth," they're either clueless about what bandwidth is (and how much is actually available), or they're using a technical term as a smokescreen for what's actually an aesthetic or practical objection. In either case, I release the safety catch on my Browning.

The funny thing is, the aesthetic and practical objections have merit in themselves; there's no need to try and borrow credibility for them by blowing smoke up people's asses with high-sounding cyberqueef that's intended to baffle and intimidate the technically unconversant.

Hi all,

There is a ham station that named hisself DJ2CVN and is working on 3777 KHz at nights. Also on that Freq is then working a group of dutchs hams. DJ2CVN clamed that QRG and is going on call for DX and TA stations.

Please don't work that station. And see to it, that he will get of the air soon. It must be a pirate.

Greetings of A. La krokee.

Well, you know what they say: When you disagree with someone
but lack the skills to cobble together an intelligent rebuttal,
all you can do is take the _ad hominem_ approach and toss out
childish insults in a defiant yet futile attenmpt to recover
the shards and fragments of your shattered dignity.

If opposition is really as difficult for you to deal with as
your response indicates, please bear in mind that you can
always stick a gun in your mouth and paint the wall with
your brains.

Available bandwidth is not very high. I'm not talking about the electronic media here, but rather the channel from my optic nerve into my consciousness. I suspect I've got as much, if not more bandwidth as anyone else here (comes with the job) but it still gets saturated.

The purely technical term has been hijacked as a useful concept in an information-glutted society. Deal with it.

Can't answer that directly, but you could get TRLog which definitely
supports two radios with one computer. You would need to build a relay
box to switch a DVP between two radios. (for CW, you would use two CW
interfaces - maybe one on LPT1 and the other on LPT2) Rig control is
not a problem if you have enough serial ports.

> Any takers for a CW QSO?

Wish you were around when I was wandering around ND with a 3-watt radio
& a Hamstick & could only scare up three QSOs in four days<G>!

Look for WB0O in the contests. I suppose the ARRL 10- and 160-meter
tests are the next two domestic ones.

Take a look at Writelog for Windows (www.contesting.com/writelog). It
has a built in DVP which will work with 2 radios (L channel to one, R
channel to the other). I switched from CT to Writelog about 1 1/2
years ago - no regrets.

Too bad you waited until now to ask. Sweepstakes is an excellent
opportunity to get WAS in one twenty-four hour period - or less.
Check out any upcoming contests, like the ARRL 10m contest. You should
get ND there.

Mark,

The TV colorburst frequency is 3.579545 MHz. Your signal is the 4X
harmonic or 14.31818 MHz. Probably coming from your TV cable provider.
I hear it about S2 and it is on 24 hours a day.

Larry Benko, W0QE

Probably fourth hamonic of an NTSC TV color burst oscillator.

Could be coming from a TV set or other device which demodulates and uses NTSC color signals. i.e. VCR, remodulators, some kinds of cable set top boxes, etc. Also many other devices use oscillators with those NTSC color burst frequency crystals, because they are produced by the millions and they are so inexpensive.

3419. carrier (RFI) on 14319??

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-25 00:00:00 UTC
From: XmarkehX@dnai.com
Message-ID: <383d88cc.451761873@news3.dnai.com>
Source record: 23021
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.antenna,alt.ham-radio.hf,alt.ham-radio.dxing

I am trying to track down a strong (s7+) steady carrier that appears on 14319. I have tried this on several antennas and several receivers - it seems that its always there. When I set my reciever in AM mode and listen, it appears to be several steady tones (it isn't just a carrier). I can't hear any change in the modulation, so I don't think its carrying intelligence. If I zero beat on CW with the my 250hz filter, I get 14318.09 as the peak frequency.

Does this frequency ring a bell with anyone. Is it possible that its cable TV leakage?? Given the steady nature of the signal, I don't think its propogating from any distance.

Any hints or help would be greatly appreciated.

Thanks,

Mark

Well, that seems like a pretty good guess.

I can't hear the fundamental, or the 2nd harmonic. But the 3rd, 4th (1431818), the 5th and 6th are all clearly audible, and all have a similar sounding tonal quality.

So... now what.

I don't think this is coming from my house. I can check, but the loudest signal is coming from the antenna on the roof.

Since TCI has hardline strung above the street in front of the house, is it possible that its leaking from there. If I call the cable company, will they care???

Thanks for your help,

Mark

3427. is this stray rectification?

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-25 00:00:00 UTC
From: XmarkehX@dnai.com
Message-ID: <383d75ab.512409854@news.dnai.com>
Source record: 23029
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.antenna,alt.ham-radio.hf,alt.ham-radio.dxing

I have S9 noise all over 80 and 160 (and frequencies in between). The combined sounds of local AM stations, all mixed together, appear at many different frequencies.

I'm not that close to any transmitters, but I live in the hills, so several that are about 20 to 30 miles away are line of sight.

Reducing receiver input, first by removing the preamp (IPO), and then by adding attenuation, seem to have no effect.

This is a new condition - something changed, but I don't know what. I have the ARRL RFI book, so I kind of know what to look for - I'm hoping its one of the short guy wire/turnbuckle combinations holding up one of the short masts on my roof.

But before I spend a lot of time searching on the roof, I wanted to get a better handle on exactly what to look for.

So - is the sound I hear - multiple AM broadcast signals, clear and understandable (though mixed), appearing mixed together at many frequencies - likely to be a stray rectification problem??

Any suggestions appreciated.

Mark

The signal almost certainly is 4x subcarrier, but it isn't coming from
the cable company. Cable doesn't carry video baseband, everything
is modulated on channels at VHF and higher.

The leakage signal is most likely coming from a TV, VCR, *computer*,
or even an appliance like a microwave oven or "smart" coffeemaker in
your neighborhood. All of them use 14.318 oscillators as a reference
clock.

The signal probably doesn't sound pure because you're actually
hearing *multiple* signals from multiple sources. All of the equipment
using this reference frequency has to abide by Part 15, however, and
at least one of them probably isn't since you to have such a strong
signal at your station. You'll have to DF the offending source and
persuade its owner to either scrap it or fix it.

Are you saying that "bandwidth" is a high-sounding bafflegab word
that we shouldn't expect hams to understand?

I thought "bandwidth" is something that all hams would obviously
understand, far better than the population at large.

Patrick --

I worked Hawaii in both the CQWW SSB and the SSB Sweepstakes (two different stations in the latter), and I run 100 watts into an inverted vee up maybe 35-40 feet at the center. We're not that far apart (I'm just outside of Baltimore, MD), so you should have no problem working it on CW if you hear it.

Do you have access to a PacketCluster in your area? There's always the internet DX spotting sites, but many of the posts are from Europe or the west coast, which doesn't say much about what is being heard in this area.

Although I connect to a west coast 'only' cluster I want to make a comment
about limiting oneself to regional DX spots. How many times have we heard
the DX working by call district numbers and being flooded with callers from
each of the 10 districts? Doesn't this go to show that often times the DX
is heard all over the USA at the same time?
Yes, regional clusters may seem the more logical choice but in practice many
times the DX station is available to everyone in the USA at the same time.

SB DX @ WW $OPDX.437
Ohio/Penn DX Bulletin No. 437

The Ohio/Penn DX PacketCluster
DX Bulletin No. 437
BID: $OPDX.437
November 29, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KH2D, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, K3ZO, NG3K, N4KG, K7WX, K8YSE, 9A3ZG, 9M2TO, A35RK, BA1DU, DJ5AV & DX News Letter, DL1EK, ES1AKM, G4UZN, G0OFE, IK8VRH, JF6OJX, JI3DST, JS6BLS, LU1DZ, LX1KQ, OK1YM, PA3FDO, PA3GIO, PP5LL, RA3SL, VE2PJ, VK3BYY, VK8NSB and YO3FWC for the following DX information.

3W & XU, VIETNAM AND CAMBODIA (Update/Reminder). Jack, ES1AKM, reports that he and ES1AX "will" start their Asian DXpedition next weekend. The members of the "Tallinn Youth Radio Club" (TYRC) will start in Vietnam December 5th and be active as 3W6KM until January 4th (2000). Activity will be on all bands and modes. They will move on to Cambodia and expect to be there January 5th through February 4th. Their callsigns are not known yet, but it should be XU7***. Activity will also be all bands and modes. For more information, send E-mail to: asiaexpedition@hotmail.com QSL via ES1AKM, PO Box 2907, Tallinn 13102, Estonia or via ES bureau.

10 METERS BEACON. The VK3RMH 10 meter beacon is now active 24 hours a day on 28.2565 MHz. Its QTH is approx. 25km N.E. of Melbourne, Victoria, Australia. Grid Square is QF22JH. The CW ID cycles through two messages each followed by a 20 Watt carrier and 2 Watt carrier for 5 seconds each. The CW messages read: "VK3RMH MELB QF22JH 25/2W VERT" (error in power to be corrected - should read 20/2W) and "VK3RMH AT HOTMAIL.COM QSL" QSL currently only via internet E-mail to: vk3rmh@hotmail.com or if no response, send to: m.harrison@medoto.unimelb.edu.au Operator of the beacon is the North East Radio Group, Inc. (the NERGs!)

6Y, JAMAICA. Look for Alan, G3XAQ, to be active as G3XAQ/6Y5, between November 29th and December 9th.

9M6, EAST MALAYSIA. The 9M6AAC Hillview Gardens Resort in Borneo is now active. Operators N2OO, N4PN and K8MR spent the first part of last week in Brunei as V85OO concentrating on the WARC bands as much as possible. They made about 5,000 QSOs from V85. Remember the Hillview Gardens

station 9M6AAC will be in the CQWW CW Contest. For current updates and photos, check the Web page at: http://www.qsl.net/n2oo/borneo/

A3, TONGA. Paul Kidd, A35RK, reports to OPDX that all his ham radio equipment is broken: 3 transceivers, 3 antennas, 2 TNCs, and laptop computer. "I'm QRT until replacements arrive", states Paul. Replacement equipment is now being purchased in the United States and is being assembled in the Seattle area for transport to Tonga. Paul requests that if you know anyone who is planning on coming to Tonga between now and Christmas, and would be willing to hand carry any or all of this gear, please contact his QSL Manager: Bob Preston, W7TSQ (w7tsq@aol.com), as soon as possible. If a "visiting ham" brings this stuff into Tonga, it would save him a big shipping hassle, save him big green stamps on customs duty, and would get Paul back on the air in time for the New Millennium celebrations.

BY, CHINA. Remember that BY1PK, headquarter station of the Chinese Radio Sports Association, will participate in the CQ World Wide CW DX Contest as a Multi-Single category. Operators include Tong/BA1AA, Yan/BA1AB, Alan/BA1DU, Wang/BA1OK and others. QSL via P.O.Box 6106, Beijing 100061, China.

GJ, JERSEY (Update/Correction). Bert, PA3GIO, reports to OPDX that he has to use the MJ prefix instead of the GJ as first reported (Please refer to OPDX.436). So, look for him to be active as MJ/PA3GIO/p or /m, December 11-16th.

GU, GUERNSEY (Updated QSL info). Jim, G0OFE, who will be active as GU0OFE from December 8-13th, primarily for the 10M ARRL Contest (Please refer to OPDX.436), informs OPDX that his QSL information has changed. QSL info for both GU0OFE and MU0C is via G0OFE, and not as previously stated. The address is "ok" in any callbook. Requests for bureau cards can also be sent by email, to: g0ofe@currantbun.com

HS, THAILAND. Fred, K3ZO, reports that stations in Thailand (like HS0AC) will be able to use 160 and 80 meters during the CQWW CW Contest:
160 meters: 1.824-1.826 MHz
80 meters: 3.524-3.526 and 3.534-3.536 MHz

IOTA NEWS.....
AF-NEW. IK8VRH reports that the Web site for next year's SU9DX DXpedition to the Egyptian island of Giftun is now up and running at: http://www.qsl.net/su9dx

AS-049. Take, JI3DST, will be active from Tokara Archipelago (Kuchino-shima, Kogashima-Ken, GL-PL49) from December 29th and January 9th as JI3DST/6 and 7N3UXO/6. Two stations will be used: A STATION (FOR NA, SA) and B STATION (FOR EU,AS,AF,OC). Activity will be on 40/17/15/12/10 meters SSB. QSL via the JARL Bureau (the best) or direct to: Takeshi Funaki (JI3DST,7N3UXO), 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021 Japan

EU-016. Frane/9A5V, Fredi/9A5KV, Matko/9A3VM and perhaps Tom/9A2AA will activate the island of Jakljan (CI-033, JN82VR) on December 3rd (the evening hours) and on December 4th. On December 5th they will be active from the island of Olipa (CI-079, JN82VS). They will be active on all HF bands and modes. QSL via home call.

EU-038. Johan, PA3FDO, will activate Ameland Island (North Sea Coast) from December 10-13th. He will be active during the ARRL 10M Contest using a 3 element yagi for 10 meters. Outside the contest he will use a vertical for the other bands. QSL direct or via Bureau.

SA-008. The Radio Club Ushuaia station, LU8XW, will be active from Tierra del Fuego Island on 21 MHz during the CQWW DX CW Contest. QSL via call book address or Radio Club Ushuaia, Box 58, Ushuaia - 9410, Tierra del Fuego, ARGENTINA

SA-027. A new date has been set for an operation to Arvoredo Island (DIB-46). The DXpedition will take place January 13-17th in the new year. Look for the callsigns PW5W (SSB) and PR5L (CW) to be active on all bands. QSL via PP5LL.

LX, LUXEMBOURG. Look for LX4B to be active in the CQWW CW Contest as a Single Op/Single Band (21 MHz) entry. QSL via LX1TI.

NEED HAWAII ON CW. Thanks to Jim, KH2D, for the following: If somebody needs Hawaii on CW.... This is the weekend to get it. Look for the following Hawaii stations over the weekend during CQWW CW Contest:
KH7R on 10 meters - KH6ND operator.
AH7DX on 15 meters - NB1B operator.
KH7U on 20 meters.
AH6OZ on 160 meters.
NH7A on all bands - multi single.

OOOPPPSS!! In last week's bulletin, your editor somehow mixed Holger/ DL7IO and Birgit/DL7IQ callsigns. Remember to look for them this week from Fiji.

OT, BELGIUM. RA3AUU will be active as OT9T and as a Single Op/ All Bands/ Unassisted High Power entry in the CQWW CW Contest.

QSL INFO AND NEWS......
PIRATE INFO. Tony, G4UZN, reports that he is still receiving lots of cards showing him as QSL manager for ZA1SRB. This station was a pirate and seems to have been active on all hf bands for quite a while in November and December 1998.

Karlfried, DL1EK, reports that if anyone is looking for a QSL Manager, he would like to do this job. He states the station should be (very) active. Foe more details, send E-mail to: dl1ek@ qsl.net

ED8CMT QSLS. QSL Manager Fritz, DL7VRO, reports that he received from Spain 5 kg of QSL cards and expects to send the cards out within a

month.

9M2TO DIRECT QSLS MISSING. Tex, 9M2TO, informs OPDX that a problem has developed with direct QSLs which were delivered to JA0DMV between October 20th and November 24th. These cards came up missing during transportaion between JA to 9M2. Tex states that he knows some cards included were registered mail from LUs, CXs and South America. He is sorry, but anybody needing a direct QSL must please send it again.
SPECIAL NOTE:
1. All the QSLs before November 10th (1999) have been sent out through the JARL Bureau.
2. All the direct QSLs for JA0DMV received before October 19th have been replied to.
3. All the direct QSLs for 9M2TO received before November 10th have been replied to.

SM, SWEDEN (Attention Prefix Hunters!). John, SM0DJZ, states to look for a lot of new Swedish callsigns. Some stations will begin using 2x1 like SM0A and SL3A. Also, look for many 7S's and 8S's prefixes. A special Web page has been set up which gives a very large list of information concerning Contest, Special Events/Anniversary, and Special Callsign in Sweden at: http://www.sk3bg.se/contest/speccall.htm

SV, GREECE. Look for SV1DKR to be active in the CQWW CW Contest as a Single Op/Single Band (40m) entry. QSL via bureau or CBA.

VC, CANADA. Terry, VE2PJ, informs OPDX that he will be using the special callsign VC2K from December 31, 1999, through January 31, 2000.

VK8ML AND VK8CI WEB SITE. Allan/VK2CA/NNN, Steve/VK2SRN and Stuie/VK8NSB have decided not to burden Rusty/KG4AU (Teams webmaster/Pilot) with more info on their IOTA DXPEDITIONS to VK8ML and VK8CI. The reason given was Rusty became a Daddy while the operators were on Melville Island. However, a new homepage for this DXpedition has been set up containing online logs, pictures and information on the two islands that the team operated from. Check out the Web page: http://www.vk2nnn.com/IOTA

VP5, TURKS & CAICOS. "The 59(9) DXReport" reports that Fred, K4LQ, will be active from Providenciales, December 8-15th, as VP5/K4LQ and as VP5W in the ARRL 10 Meter Contest with Bruce, W4OV. QSL via K4LQ.

VP8, ANTARCTICA. "The DX News Letter" reports to look for Niall, VP8NJS (until February 1, 2000), and Art, KC4/KL7RL (QSL via K4MZU), to be active from Antarctic Base Patriot Hills. So far no QSNs have been reported on the cluster network.

XU, CAMBODIA. Yoh/7L1MFS and Koji/JS6BLS will be active as XU2C on December 4th and 5th. Activity will be on 40-6 meters SSB/CW/RTTY with 100 watts into a R7000 and a 5 element yagi for 6 meters. QSL via JS6BLS Bureau (only this operation, the others to 7L1MFS) or E-mail requests can be sent with data to " js6bls@qsl.net " and QSLs will be returned through the Bureau.
Meanwhile, Andy, G4ZVJ, signing XU7AAV, has announced that he has

extended his stay and will be active until 0030z December 5th. Reports indicate that he is doing a good job providing CW QSOs on all bands from 40-10 meters. Also, begin looking for him on 80 meters. He is working on an antenna.

XZ, MYANMAR. Excerpts from a large press release, states the Central Arizona DX Association announces the first major DXpedition of the new year (OPDX InterNet Subscribers will receive the complete press release as an additional bulletin). Beginning on January 13, 2000, and lasting until February 6th, XZ0A will be active from Thatay Khun Island, off the southern most tip of the Union of Myanmar (XZ, Zone 26, Southeast Asia). They will have a total of eight stations with amplifiers and full size antennas active on all bands. Although the great majority of contacts will be made on 80 through 10-meters, there will also be dedicated stations with specialized operators for Top Band, RTTY and 6-meters. This will be the first ever XZ IOTA, and a brand new prefix. The XZ0A DXpedition team will be represented by seven countries: England, Indonesia, Japan, Mexico, Spain, Thailand, and the United States. As of yet, a license is not possible for Myanmar nationals, but they are hopeful that this will change in the near future. XZ0A operators are: EA5XX, G3VMW, G3NOM, JA1UPA, JA1UT, JR0CGJ, KM5EP, N5IA, K6RKE, KD6XH, AF7O, K7TR, K7VS, K7WX, K7ZV, N7XYR, NA7DB, V73GT, WF5T, WA6CDR, WY7K, W8AEF, XE1L and YB0ARA. For several days they will also be joined by members of the Radio Amateur Society of Thailand (RAST). More complete details can be found at the DXpedition web site: http://getnet.com/~k7wx/myanmar.htm
QSL requests can be made directly, or via the appropriate bureau. Direct QSLs: XZ0A QSL Request, c/o Bob Myers, W1XT, 37875 North 10th Street, Phoenix, AZ 85086 USA. Bureau QSLs: Cards should be clearly marked - XZ0A via W1XT. Any questions about XZ0A QSLing may be directed to: Bob Myers, W1XT at: w1xt@superphoenix.com

YO NEWS. News from Romanian Amateur Radio Federation report that the logs from YR99E (special callsign of Total Solar Eclipse seen from Romania) are now available on the Web and stations can search for their logged QSOs. Also, the final scores of the 1999 YO-DX HF Contest are now available at the same Web site. All the above information can be obtained by visiting the Romanian Amateur Radio Federation web site at: http://www.qsl.net/yo3kaa

Could be a harmonic from a nearby cordless remote jack. I had that problem. Route your question to the ARRL section manager, he should be able to point you in the right direction. If it turns out to be a cable leak, df it the best you can..the arrl can send you a kit on how to deal with cable leaks. Contacting the FCC field office is not helpful..been there.."The FCC will not intervene in a dispute between a cable service provider and an amateur radio operator", (FCC's quote.). good luck and 73 Dan W6QX

This is probably a harmonic of the television color burst frequency of 3.58
MHz. As all televisions (color) generate this signal, there is no way to
eliminate it.

--
de Vic, AE5DX

Logging and station control at AE5DX
is accomplished with DX4WIN, ver. 4.05

I disagree on OD5NJ!
I just received a QSL-card from ON5NJ directly.
Hint: send no IRC's, because its difficult for him to use them.
I also emailed with him and in my opinion he does a good job.
If its possible for him to send you a card, he will.

5A1A: registered mail only. He will mention that in the QSO!
So listen!

As indicated in several other replies, it's probably the fundamantal of
an NTSC colour subcarrier reference crystal. The freq is divided by four
to get the required ~3.58MHz. Intended for use in TV sets, these crystal

are 'two-a-penny', and are used in many other applications. I know of one elderly CATV set-top converter which used such a crystal as a microprocessor clock.

I'll take it! I'm sure I can find 10 meters somewhere around here.
Does it matter what sort of meters?

> from any these station. They all
> good QSLers.

That is crap. if either of you read the original post, you would see that all of these fraudulent DX stations were sent multiple qsl's. Several of these were registered, and all three of 5A1A QSL's WAS sent registered. I have received multiple replies direct from other DX'ers here in North America (not Europe) who are waiting on cards as well. The bottom line is that BD4ED, OD5NJ,7X2LS,EP2FM and 5A1A are qsl rip-offs and pocket postage sent by North American hams and keep the cards, without returning one. There are several DX stations (including Europeans) that will ask for QSL's direct, and ask for US dollars for postage. They then return the cards via their bureau. As far as I'm concerned, that is also a rip off. But since they at least RETURN a card, I feel they are much better than the above mentioned thief's. Both OD5NJ and 5A1A have current complaints on file with the league for QSL fraud and face possible loss of their DXCC status. Obviously, it took several complaints filed besides my own for this to occur.

Hello from Vienna !

I have finished my webpages at http://www.swl.net/oe1002419
with a lot of QSL pictures.

1 QSL card from each of my 335 confirmed DXCC countries.
Also pictures from old broadcast QSL's (1963/64), time and
utility stations and a lot of QSL's from Marconi Memorial
stations.

I have also included a QSL info search page (under LookUps).
This page is downloadable as zip file for use on your computer and is a
result from looking for searches for Pathfinder. Also a downloadable
register of all OE callsigns in PDF format. I have running a lot
of databases, if you need some info, please email me !

Last not least a lot of pictures from my boatanchors (some with
downloadable schematics).

Please visit this page and vote for it if you like.

3455. Antenna Help for DX newbie??

Newsgroup: rec.radio.amateur.dx
Date: 1999-11-28 00:00:00 UTC
From: nitecapt@optonline.net
Message-ID: <38425c58.3827450@news.optonline.net>
Source record: 22857
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.antenna

As someone with a new interest in this hobby, I may rely upon you to answer my dumb questions from time to time. Your help is greatly appreciated.
I have just been given a Sony ICF 2010 and I want to set up an antenna. I have 85' of shielded copper with wich to construct either a dipole or long wire. I can't go much longer due to property limits. I live on Long Island in New York about 35 miles from NYC. I live in a corner house and there are phone poles with electric wires running north -south and another set with smaller lines running east- west.
Here are my questions:
1. Set up as dipole or Long Wire?
2. What are the advantages/disadvantages to adding an antenna tuner to this set up.
3. If antenna tuner is an advantage...any recommendation on which?
4. Should the wire or dipole be run north-south, east-west or some other direction given my geographic location and probable electrical interferance problems.
5. Finally, should some sort of filter or filters be considered and if so, what?

I know I will get good advise from this group and I appreciate your patience.
Thaks for your time.
Ray

I've QSLed successfully with both. And if I hadn't received their cards, I
wouldn't jump to the conclusion that fraud had taken place.

Oh, an _American_ indiscretion, is it? S'matter, Walt, are you still
smarting over the fact that we came over there and pulled your country's
fat out of the fire not once, but twice?

Listen, old bean, it's not anyone's fault but yours if you don't have
a better ISP or a more customer-oriented ISP industry in general.
That's either your problem or your nation's problem -- nobody else's.
Kindly deal with it offline, on your own time, and spare those of
us from your advanced countries your caterwauling.

Expecting other Internet users to to compensate for your set-up's
incapacity is like expecting your fellow drivers on the motorway
to slow down for your benefit when you totter on in a wheezing
Austin A7.

> The more lines of excessive quotes I am forced to download from

> of others, the higher is my telephone bill at the end of the month.

If you can't afford the cost of this pastime, then perhaps you should
sell your computer, don your anorak, and take up trainspotting. USENET
was never intended for the use of the proles anyway, and so you could
very well be rising above your station.

Furthermore, considering the speed at which computers run, I find it
exceedingly difficult to believe that any amount of quoted text
makes a significant difference in the time it takes you to scroll
through (or download) an article. At least as much time is probably
accounted for by your normal hesitation between keystrokes.

Geoff

But of course why should Americans be forced to scale back because our free market system gives us unlimited telephone and internet services??
Simply using your own newsreader to full advantage should keep your phone bill manageable, without begging others to be more brief.

>The more lines of excessive quotes I am forced to download from Usenet
>newsgroups due to the thoughtlessness/laziness/discourtesy of others,
>the higher is my telephone bill at the end of the month.

In another American term, bull. Although I have unlimited service, I minimize my use of the phone line so others in my family can use it. On a bad day I use maybe 5 minutes downloading and uploading Usenet articles. You can download headers first and and mark what you want, avoiding large postings easily. Then reconnect for the download. In the early years when I was paying high prices for 5 net hours a month, I seldom exceeded 3 of those hours on Usenet. That's the beauty of this (mostly) text based system. (God help you if you spot one of our HTML or binary groups.)

>And yes, I *know* I can download headers only ... but there is no way
>I can download the bodies of messages I want to read and exclude the
>excessive quotes.

Ah yes, you want to have your cake and to eat it too. That is awfully American of you...

Hello Ray, I used to own a 2010. I think it has the hottest receiver of any radio I have ever heard. You can build a simple tuner and use the long wire. I do not think anything else is needed. I do know that any strong nearby signals will fry the front end of the 2010 instantly. There is a mod around to help prevent this from happening. If you are short on space and want to build something else, Ten-Tec has a neat little active antenna kit for $12.00. With this and a short wire you will probably hear anything that is out there! As for filters, most any of the outboard DSP units will work. I use the little Radio Shack DSP, which is out of production, but cheap when you can find one used. It does for me what the more expensive units did at a fraction of the cost. As you can tell, I miss my 2010. 73, Dave-KA4CNH

Yeah? So?

If you can't afford it, dear boy, perhaps you should find a cheaper
hobby/time waster/resource...maybe you could afford paper dolls?

If it's a work related expense, then either consider it the cost of
Doing Business or find a different way. I understand the Post Office
delivers letters and there are these nifty things called "papers"
wherein one can get the latest news.

ObPeeve: People who grouse about the cost of recreation. Either
enjoy it or don't, but shut up about the cost already.

: And yes, I *know* I can download headers only ... but there is no way
: I can download the bodies of messages I want to read and exclude the

Excuse my ignorance but I would prefer to determine if it was the radio
first by substitution, my first suspicion is a breakdown of mixer shielding
or component, and you can send it away to be fixed if another radio does not
produce the same symptoms. This would be a lot simpler than hunting down
exotic mixer connections on the outside and maybe more productive, or am I
missing something?

I had no idea how many folks would be on the bands and how many I could work. Thanks to all who suggested the calls I should listen for and I worked three HI stations yesterday. I don't think there were many more than that heard.

Thanks for the info!

After posting that, I found one more site I'd forgotten to check -- it
didn't have anything on PJ4B or 4M7X but did confirm that I had the
right info for 5R8GL.

Actually, I prefer the reply at the top - there is much less scrolling that way. For example, if I'm reading through the message thread, I have to constantly scroll down to get past the stuff I have already read and to read the reply. With the quoted materal at the bottom, I do not have to scroll to read each reply (unless I need to refer to something in the quoted message that was mentioned in the reply). And if I pop into a thread in the middle, I can always scroll down then to read the quote to see what is being discussed.

The only exception to this is if the quoted materal is very short, such as the quote above. This short quote and message will usually open in a window without scrolling.

I was not aware that this was a protocol that had to be complied with.
Everything that I have seen on this subject appears to be more of a
guideline than a rule. I have certainly never heard of anyone being
kicked out of a newsgroup for failure to comply with this rule (assuming
it is a rule), so it must not be that important.

Okay Peter, I took your suggestion to Charles and read the articles in Usenet's news.newusers newsgroup. And I was not able to find a single comment in the "Rules for posting to Usenet" article concerning where quoted text should be placed. And there is also absolutely nothing there about putting replies at either the top or bottom of a message.

Perhaps you saw something about this in one of the other articles (I didn't), but those articles are not the "Rules for posting to Usenet." The materal in those other articles are simple guidelines, not rules.

However, perhaps I'm wrong. Please look over the rules yourself and show me where it states that quotes and replies have to be put in a certain place in messages.

Macao's administration is about to be incorporated into the People's Republic of China.
This will happen by the end of this year. Macao's status within the PRC is that of a
special administrative district, similar to Hong Kong's relationship with the PRC.

Does this mean that we loose XX9 from DXCC status at the end of this year? If I
remember correctly, the only reason under the new rules that Hong Kong remained
a separate DXCC entity was that it had and would continue to have a separate IARU
society. Macao does not.

Should we expect XX9 to go the way of South Sudan...disappeared from the DXCC
list and our DXCC totals adjusted accordingly?

Say, what did you send as return postage to the Europeans? IRC or Green
Stamp?

If Green Stamp for the Europeans, return QSL via bureau should not come as
a surprise. Except for G, GI, GM, GD, GJ and PA, a dollar does not suffice
for even the postcard postage for Western Europe --> USA.

While exchange rates will vary, I would include these other Western European countries in the 1 green stamp category--CT, EA, EI, F, I. Others are 2 green stamps or 1 IRC. Germany, at 3 DM, pushes the 2 green stamp level.

Of course, when in doubt or when you really need the card, go with 2 green stamps. For DXpeditions I would go even higher, since they made such a extrodinary effort to give us a new one. Also, DXpeditions need every cent they get. Anything

above actual costs usually gets plowed into the next one.

It will be interesting to see the different postage rates when the EMU is the currency
of most of the continent.

Mark, W4GP

P.S. As far as the original posting...well, if an American wants to play in the DXCC,
then he must be a member of the ARRL.

Indeed there are no "rules", only guidelines as funnily explained in
news:FLwH07.JGG@tac.nyc.ny.us

Of course, following guidelines is boring, because you need not to follow
them, unless they are declared to be a rule. Oh well, questioning these
guidelines is just as stupid as the LID next door calling a DX-Station on
its own frequency instead of 3 up as announced. The results are pretty much
the same: You don't get a QSO with the DX-station, you annoy a lot of peple
and waste your time.

Have fun

The Emily Postnews article was quite funny; thanks for pointing us to it. I particularly liked the bit about (N.B., "scrollaphobics") how it takes an _entire_ keystroke to get to the beginning or end of an article. Hilarious! (By the way, I seldom scroll: I mostly use the Page Up and Page Down keys to navigate.)

Trimming quotes and replying underneath quotes (or, when really necessary, interspersing your replies underneath quoted sections) are standards -- and they are standards for good reasons.

In many ways, Usenet is like a real life conversation. When discussing a complex subject, no one minds if you _briefly_ summarize the other person's position before you reply, just to make sure you've got it right.

But it would be bizarre to repeat, word for word, the other person's entire previous statement, even including his summaries of others' positions when you did so!

And it would be doubly bizarre to do so _after_ making your reply. It's contrary to any sensible standard of written or spoken communication, and it would be -- and is -- nearly impossible to follow.

If you are violating the standard, think about that block of quotes, and quotes of quotes, below your writing. These days, some of it was probably written with replies below; some of it with replies above; and some may respond one way while quoting material that was written the other way. With the logical flow of ideas thus totally scrambled, it seems extremely unlikely that anyone is going to read the mess.

Just delete it all, or carefully select the quoted points you wish to address and reply beneath them.

With every good wish,

--

Kevin Alfred Strom.

Table manners are guidelines too. You probably won't get kicked out of
a restaurant for complaining about the way the menu is arranged. Here
in adfp, however, we reserve the right to refuse service to anyone who
can't grasp the value of standards.
Don't let the maitre d' hit you on your way out.

That's what's really discouraging with the way people's behaviour is going these days : unless something is imposed on people and enforced by a law for which non-observance is sanctionned with death, people will just take guidelines as some infringement on their "civil liberties" and pour scorn on it.

The "I'm alright Jack" and "Fuck you ! You can't make me do anything !" attitudes really make me want to murder people some times.

Peeve: fucking freeloaders.

Knackos
P.S. in case anyone's thinking I'm an old fart : I've barely cleared the 30 mark.

How does where one places their Usenet reply make them any kind of
freeloader? The first thing a Usenet reader should see when they open a
message is the most recent info..that being the latest reply. Scrolling
down through requotes is a real drag..even if some of you have now decided
that way is some kind of " standard. "

Usenet is an anarchy - no one has the authority to kick anyone out
for using bad posting style.

But it's also a community. If you want to write something and have other
people read it, you should write in a way that makes it as easy as possible
for the readers to figure out exactly what you're responding to, and
exactly what you yourself have to say on the subject.

The "netnews protocol" of starting with the message you're replying to,
REMOVING everything that you can from it and leaving only the points
you're responding to, then interleaving those points and your reply,
facilitates this. It creates a posting that looks rather like a
conversation: they say something, you reply to it, they say something
else, you reply to that.

On the other hand, just quoting the entire previous article, either at
the top or bottom, creates a large "blob" of text that's difficult to
root through to find just what points you are responding to. With
modern threaded newsreaders, the whole article that you are quoting
is available to the reader with (typically) one keystroke even if
you *don't* quote it at all, so there is no need to include the whole
thing. It's pointless, and shows you don't care enough about making
yourself understood to edit the original article.

As a result, I generally read articles that have quotes and new text
interleaved in the form of a dialog, and I generally skip any article
that has a bit of new text at the top (or bottom) but most of it is
just quoting a previous article.

I figure if it wasn't worth your time editing the quote when writing it,
it probably isn't worth my time reading it either.

Dave

> Your idea may prevent a short reply (such as this one), when a short
>reply may be adequate enough.

I agree that a strict new/old ratio test, without any threshold for very
short articles, is a bad idea.

The rule in the "junk checking" news posting software goes something
like this: If the amount of quoted text is greater than the amount of
new content *and* the amount of quoted text is greater than some
fixed threshold, then reject the message. I hope I explained this
in the article you were quoting.

If the threshold was 10 lines, it would allow through articles where
the quoted context is up to 10 lines, even if the new content is only
1 line. That seems fine. At the same time, it would reject most
articles where the whole previous article is quoted - which is the
desired effect.

Yes, you might occasionally miss an interesting article this way.
But by trashing all of the articles that are mostly quote, you get
rid of many articles that experience says aren't worth looking at.
Then you would have more time to read other articles in other threads,
or just finish reading news sooner and have time for a walk.

Dave

Hello,

I am hearing rumors that the licensing restructuring proposed by ARRL is about to be enacted on 1/1/2000. I don't want to debate the proposal, just find out if anyone knows about it. I have looked, but can only find info on the UK change. Any info would be appreciated!

No one *has* to do anything, but if you desire folks to read your
invaluable comments, it's probably best to comply with established
protocol. You do want your articles to be inviting to read, yes?

>it must not be that important.

It's interesting that you *did* adhere to the usual protocol, though.

Okay, I went to the article that you suggested above and it still
gives no clear guidelines about putting quotes and replies in a certain
place in a message.

Lets face it Peter, Usenet intentionally left the rules loose on
matters such as this to allow as much freedom as possible on Usenet -
they did not want to control Usenet to that degree.

Guidelines, taken as an obligation, are just as restrictive as rules,
and goes against the basic idea behind Usenet - the free exchange of
ideas and opinion. That freedom also includes how the person wants to
present his/her ideas and opinions.

That is your opinion, Dave. I don't agree that it is a "bad posting style."

> The "netnews protocol" of starting with the message you're replying to,
> REMOVING everything that you can from it and leaving only the points
> you're responding to, then interleaving those points and your reply,
> facilitates this. It creates a posting that looks rather like a
> conversation: they say something, you reply to it, they say something
> else, you reply to that.

But, if I'm following the conversation, than I don't want to read what was just said. I've already read it. For example, you quoted me at the top of your message. I already know what I said, so why do I want to read it again? Anybody that just read my previous message already knows what I said, so why would they want to read it again? All of us want to read what you said, not read over what was already said and already read.

So, my argument is that quoted material should be placed at the bottom of a message (unless you are commenting on pieces of a long message, such as this one). The only person this puts out is the person who joins a conversation in somewhere in the middle and perhaps did not read the previous message. However, in that case, he can just scroll down to read the quoted material.

> On the other hand, just quoting the entire previous article, either at
> the top or bottom, creates a large "blob" of text that's difficult to
> root through to find just what points you are responding to.

You're adresssing this to me like I have taken an opposing view on this. I have not said anything in defense of long quotes - my only dispute in this thread is the position of quotes and replies in a message (top or bottom).

In fact, I have said in previous messages that I agree that quotes should be short. Perhaps you would be better off complaining about large quotes to someone that disagrees with you.

Well, Ms Elizabeth, you don't have the power to "refuse service" to anyone in these newsgroups, and I think it is rather rude for you to even suggest that you do. You don't speak for anyone other than yourself, and you certainly don't speak for the others in any newsgroup, so please drop the pompus "we" when posting your opinions. Your opinions are yours alone, not the opinion of a group, so the use of "we" is entirely self-serving.

Hello,

I recently added a PREFIX look-up form on the QSL page. If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

You are invited to http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

73!

Doug,

Yes, I can confirm that mail service is back in operation between the USA and
Yugoslavia. After I heard that mail service had been restored, I mailed about
ten cards to Yugoslavia, both direct and via the bureau, including one for
YT1AD.

I already have received back the YT1AD card. Also, just last week I received
the HU4A QSL via YT1AD (came back via surface mail). My card for the this

operation was sent prior to the hostilities.

Depends entirely upon your definition of the term "service", now doesn't
it? Not to mention levels of rudeness. I was referring only to
alt dot peeves, m'boy, to which this thread has been cross posted. I
assure you, as far as newsgroup posting guidelines are concerned, that
group, at least, does indeed agree with me.
Tsk. Try to do a guy a favor and point out when he's got stray food on

I'm glad that you, of all stubborn fuckwits, have replied. I already had a good feeling about your what-the-fuck attitude and am glad to be able to address you directly.

OK : if you don't care about the re-quotes you're posting back and forth, don't care wheter anyone else reading your tripe should be interested in the re-quotes or not, could you then tell me why you include them in the first place ? You have a setting somewhere in your news/mail reader that says "Include original message in reply". Uncheck it. Would that be to much to ask ?

If you've got a problem with that because you've decided that to piss people off is one of your basic human rights, why don't you just attach a humongous picture of a close-up of your ringpiece chewing on a fresh turd to each and every mail you post on usenet ? It would definitely have the same effect and you'd be exercising your god-given right to be a fuckwit TO THE MAXIMUM.

The problem here is not even netiquette or bandwidth. It's a question of there being people who would really prefer if you at least pruned your replies. The real problem is that when someone says "hey, would you mind snipping a bit ?" your attitude is "why the fuck would I do that ?". And that is the attitude of a freeloader. A freeloader's satisfaction comes at the cost of the dissatisfaction of others. I spit on freeloaders.

It's easy to visually skip the careted quoted material, if you don't
want to read it; and many newsreaders, such as Netscape, even allow
you to make the quoted material show in a different color or type
size, which facilitates this.

> So, my argument is that quoted material should be placed at the bottom
> of a message (unless you are commenting on pieces of a long message,

[...]

Not only does the standard protocol help the person who begins
reading a thread in the middle, but it also helps the person who
rejoins reading the thread after a day or two -- and these two
groups added together may well be the vast majority of readers.

Further, and most important, quoting at the top and replying
underneath or interleaved allows those who _do_ need to refer to the
quotes, and quotes of quotes, to see an orderly, sensible
conversation -- instead of a muddle of quotes, some in reverse order
mixed with some in correct order.

Navigating past quotes you don't want to read takes only a single
tap on the "Page Down" or "Ctrl-End" keys -- figuring out a jumble
of forward/reverse mixed quotes is often difficult, and makes
quoting almost a pointless exercise, and waste of article storage
facilities.

With all good wishes,

--

Kevin Alfred Strom.

Not anymore....the politically correctd idiots in cnharge
now are much too aware of your "sensitivities" and wouldn't
do anything to annoy you...

> If so - and that's how it's beginning to seem - it's not a lot
> different from the "brainwashing" of which your government habitually

Wally, don't forget---on this side of the pond the
Government is us...

>

I still wonder if we didn't come teo your rescue too
quick..your 'good neighbors' who were trying to bomb you
back to the stone age would have done a REAL job on you if
we'd waited much longer. Wonder what your story would have
been then?

> which believes it has a God-given right to set itself up as the
> world's policeman.

Yeah, its a dirty, thankless job but your history has
proven that someone has to do it. I dont' like it, as you
fine folks should be able to hold your own as we have always
been able to, but.....

> In fact, this view has recently been expressed in
> several major European newspapers.

All of which would prefer the the OTHER superpower had been
the one that survived, right???

> I believe it was Senator Barry Goldwater who once opined that
> "Extremism in the defense of liberty is no vice". Hmmm ....

The hard decisions have to be made, don't they Mr.
Chamberlain?

You waste a whole post just for insults? Other of your posts seem to be the same, nothing but insults (>Deirdre What a dumb name! Bwaaaahahahaha!). Weren't you the one complaining of the big phone bill? Excessive quoting wasn't it? Doesn't excessive insulting bring up the phone bill also?

Well since you don't seem worried about bandwidth anymore, I thought I'd send you a little Basic program. Enjoy...

Take it easy Michael.....why all the use of the ' F ' word? Run out of meaningful vocabulary?

As they say - " Profanity is simply a weak mind trying desperately to express itself "

Take yourself and your weak mind someplace else........

> But, if I'm following the conversation, than I don't want to read what
>was just said. I've already read it. For example, you quoted me at the
>top of your message. I already know what I said, so why do I want to
>read it again?

I never quote *everything* that you said, I trim it to just enough to
provide the context for my comments.

And it isn't what you "just" said, it's what you said one or two days
ago, typically. You may well remember what you said in this thread
a few days ago, but it's not really there for your benefit. It's there
for the benefit of the third party who is reading this, and perhaps
vaguely remembers what you said two days ago, but who also read 10
other articles in the same thread, and needs a bit of help in determining
the context of my comments.

For this person, providing a *small* quote to give context makes it
much easier to read my article. Providing a *complete* quotation of
what you said does not, regardless of whether it's at the top or at the
bottom, because it's much more work to figure out what part is significant.
And completely leaving out what you said also makes it difficult, since
they actually have to switch to the previous message to read it.

Now, in case they're reading the whole thread at once, they don't need
this help. In that case, the quotes are clearly marked with >, and
can be skipped. If it's been a day or two since they read the previous
article, the quotes are helpful.

At least, they're helpful to me. They're helpful enough to enough other
people that they have become a convention - worth the extra effort of
the writers to put in.

> You're adresssing this to me like I have taken an opposing view on
>this. I have not said anything in defense of long quotes - my only
>dispute in this thread is the position of quotes and replies in a
>message (top or bottom).

And, in that respect, you do have an opposing view. I think that
quotes and replies should be interleaved.

Dave

I have a FT101ZD that I can not get more than 60 w. pep out on any band or signal type. I just bought it this past summer. I thought the tubes were weak so I ordered a brand new set of 6146W (matched pair) and a 12BY7A tube from RF parts in CA. After installing them I have made no forward progress. I am still getting 60 watts at the max out. I have tried tuning the final output stage until I am blue in the face. I am making an assumption but I would think I should be able to get 100w at least.
Any help or suggestions would be great.
Thanks,
Mark

Have you considered the calibration of the watt meter? How about the power supply bias? Just a couple thoughts.

That's the beauty of it -- killfiles allow you to censor whoever
you want without affecting anyone else.

It's interesting to note that after all the discussion
about the disrespect for the bandplan during CQWW SSB,
nothing has been said after CQWW CW last weekend.
Heaven forbid anyone wanted a nice Hellschreiber or PSK31
QSO last weekend, because there were CW ops well past 14.075!

Actually, Hellschreiber is CW, I wonder if it was allowed
in the competition? I put out a couple of CQs around 14.062
but got not replies, probably just confused a few Morse contesters :-)

Well at least you evidently aren't a SLick Willie
supporter, but before his watch there have been few times
when Uncle Sam has thrown his weight when it wasn't well
justified by the circumstances.

3528. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <822irp$4da$1@news.hawaii.edu>
Source record: 22976
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

I believe there is also a meter adjustment that adjusts the relative power reading. I helped an old ham who had a concern that his newer Yaesu had low power out. He had somehow turned the meter adj. on the back of the rig. I have the ZD mark III as my HF rig and all indications show 100 watts plus. I do not have a calibrated power meter but my antenna tuners both show relative readings over 100 watts. Sounds very much like the meter is lying to you.

I seemed to notice this is a Bible course I took, and we must have been
talking about something other than just the Bible at the time-- Americans
seem to have a far, far greater concern for and attachment to life, as we
know it, than most Europeans. I began scratching my head at this and
seeking a reason, but it does appear marked. Do we have LESS of a belief in
the Bible and in sacrificing our lives for liberty than on other continents?
Are we far, far, far too selfish? (Don't answer that?) Does this stem from
the American Dream??

>> All of which would prefer the the OTHER superpower had been
>>the one that survived, right???
>
>Many of us are reluctantly coming around to that view ... yes.

I am not one who is holds some overly popular opinions these days-- that
America and that Christianity are grossly superior ways of life, as many
staunch, fervent folk must believe. They are ideals, and these utopian
ideals are far from reality. I came to realize that any and all religions
and governments developed with an ideal of what was best for that particular

culture and population. For extreme example, I do believe that Communism developed due to the excessive amount of uneducated peasant citizens of Russia. Uneducated, less intelligent types can not adequately make decisions regarding religious beliefs and government, therefore those of superior intelligence, wisdom, and education, the Wise Men, so to speak, developed an appropriate culture. Sure, the religion and the government deteriorated, corrupted, or what have you. We are, after all, human beans, are we not??

If one looks at things in that light, it puts us, citizens of a country governed by a President having sex with trash (or perhaps by the Media exposing this, ooooh.....), and probably not in much better of a light in forcing countries of differing cultures to conform to our "superior" ways, and thusly throwing them into a cultural tailspin taking years to recover from.

And that is my verbal diarrheal discourse (or Dat Course) for today......

Many blessings all,

Sue

Squatter's Rights, actually. Or a better monikker might be Scorched Liberties, taking a few too many flames. This group was abandoned (as are many were I tend to discourse). If you really want, you can have my (and truly created for me, but by a Hell Flames Wars member) old group, which was abandoned as it's not on lotsa servers. That'd be alt.fan.sister-pooh, my former life. This group's dead and all are welcome here, long as they put up with my opinion and occasional whining (I'm a h....h.....HOUSEWIFE!!.......from an Upper-Middle Class upbringing, snotty High School, Class of '75, then 75% Jewish and I a minority, 99% of them ran from this state upon graduation).

The best humorous ng I've been in for quite some time is welcoming Odd Folks, alt.dont.get.even.get.odd.

It IS possible to create your own ng (but the need's not really there--there are many abandoned where you can squat). Don't forget how easy it is to create your own online discussion list via OneList and several of the other new servers, at the push of a virtual button. They're kinda nice.

Mark,
From memory, the FT101 has a series of trimmer capacitors for each band
and also a couple of slugged coils for each band on the tx side. These
are accessible on the underside of the rig. The slugged coils have a
considerable effect upon the drive level to the finals and are worth
adjusting, particularly if the set hasn't been aligned for some time.
AFAICR, they are under a metal screen with access holes for a trimming
tool. Each hole is marked with the band.
The trimmer caps adjust i/p and o/p tuning for the driver, a 12BY7A.
This is from memory some 25 years ago, check the manual, it shows all
this info.

gl Trev G3ZYY ...-.-

PS, The above applies to the FT101B, I believe the 101ZD is similar.

I don't remember who asked about it but here goes.....

I have one used/new HENRY 3K Classic X MKII amplifier. The RF deck is used and everything else (power supply, all outside metalwork) is new. Not a scratch on it! It even has a brand new Eimac 3CX1200A7 tube. In a swap with another Ham we ended up with a used RF deck and we made all else new to make this available for sale.
80-10M incl WARC, 4400 VDC heavy duty power supply, 100 watts = 2000 watts out.
1 year factory warranty.
$2495 + ship (all new is $3395 HENRY list) (shipping is only about $150)

Also suggest you check with the manual on ALC settings and bias. Could be that the ALC is just throttling everything back. Is it the same on all bands i.e 60Watts on 10 thru 75? Often a clue there. I would not expect much more than 60 - 70 w on 10, so it looks like it may be bias / ALC or screen voltage. As other respondants state, also check your wattmeter or other measuring device. .

Why would it go out of alignment with modern stable components?

How many Hams twiddle their factory built sets regularly?

Any particular order or can you twiddle at random?

Gary7SLL, makes you wonder why the manufacturers spend all that money on
test gear when you can just twiddle for maximum smoke.

There is an adjustment for the drive to the finals. Hopefully you have the manual and can look up the adjustment procedure. Insufficient drive is the only thing that will cause the radio to perform as you have described assuming you are using accurate metering equipment. You MUST neutralize the finals and then adjust the drive to obtain the proper output power. Do not overdrive the finals or you will materially reduce their life. You should be able to get 100+ watts out of the 101ZD on any band when coupled to a reasonable antenna system.

Only problem is that the cutoff date was 12/1/98, a year ago, not today!
We're still waiting. The last note that I read in the ARRL members-only
section a week or two ago was that there was optimism that the FCC would get
around to releasing a decision fairly soon (by year's end)?

ARRL ex-Pres W4OYI thinks announcement this month. Probably 2-class,
Technician and General - like W0HB proposed, not like ARRL proposal.

Still need CW to get on HF.

ARMS,

I assume you really meant K0HB (not W0HB).

My proposal did not call for Technician and General, but rather Basic and Advanced. In my proposal, the 'regular HF license' would be somewhat more difficult to qualify for than the current General class.

73, Hans, K0HB

II Proposal:

A. License Classes:

If the interest of the FCC is (as stated in the NPRM) streamlining of the licensing structure, then I propose that the license classes be reduced to two classes, namely "Basic" and "Advanced".

The "Basic" license would have an entry-level test (basic regulations, safety, operating procedures, basic DC and AC electronics). Without CW endorsement this class would have full frequency and mode priveleges above 30MHz, power limited to 50W output.

The "Standard" license test would be of a difficulty level similar to the current Advanced class test, and would have full privileges above 30MHz at power levels up to 1500W.

B. Morse required for operation below 30MHz

Either license class could gain access to all MF/HF amateur radio frequency allocations (at 50W and 1500W respectively) upon passing a Morse test of 5WPM and gaining a "CW endorsement" for their operator license.

The Morse test should be "fill in the blank" or "1 minute of solid copy". Multiple-choice test formats should not be allowed.

C. Status of current licensees.

Current licensees should be redistributed as follows:

Current class	Converts to
Novice:	Basic CW Endorsed
Technician:	Basic
Technician+:	Basic CW Endorsed (Note 1)
General:	Advanced CW Endorsed
Advanced:	Advanced CW Endorsed (Note 2)
Extra:	Advanced CW Endorsed (Note 2)

Notes:
1) "Old" Technicians (who took same written test as General and 5WPM) would be "Standard" CW endorsed.

2) Current Extra licensees would continue to have that class printed on their license in recognition of their previous status.

Go ahead and reply to posts in whatever way you feel is "easier for
you" and saves *you* time and effort. Of course this isn't an earth
shaking issue. But, people who simply refuse to see the logic and value
of basic guidelines in forms of communication are like those who jump
queues and interrupt while others are speaking.

The arguments for following the guidelines have been made excellently
elsewhere in this thread. The fact that that wasn't enough to cause you
even a smidgen of doubt on your position means any further discussion is
a waste of bandwidth. Your reset of the followup group must mean you
agree. My reset is: <plonk>.

If its still there, the club will forward all mail to the operators. If you cannot find his Address, try sending it to the Buro address. I did a stint there as KG4RS (80s) and they forwarded all my cards for the next year.

Absolutely correct, Art. The first principle of troubleshooting is to
ISOLATE or LOCALIZE the problem.

Personally, I do not think that the symptoms are suggesting any
phenomena outside of the radio.

I have an acquaintance, N2FVK, whose LSB transmissions are 50% or
less from his voice and 50% or more from the modulation of an AM BC
station near him. He thinks it's the BC station's fault, but in my
opininon, he has a defective transmitter audio input circuit or
balanced modulator. In his case the modulation from the BC station
seems to be offset from his own audio by about 100 - 300 Hz as you
tune through his signal.

I would be interested in hearing from anyone else who has observed
similar phenomena.

Gary, I usually find your comments interesting, but lately your useful output (which admittedly can be considerable) is being hidden by a smokescreen of rather snide comments such as that above. Indeed, the FT101 can be adjusted for max smoke with or without the aid of a power meter; taking care not to overdrive the finals and to check neutralisation (all in the manual).

You will note from my comments above that the FT101 series is over 25 years old. Modern it is not!

Unless the BC station has a spurious emission in the ham band (and is adjusting it to follow your friend's signals around the band!) the problem *cannot* be the BC station's fault.

You're right, there's something wrong with his audio input circuit. A small-value capacitor across the microphone (maybe 500pF or so) would be worth a try; also, some inductance (1mH or so) in series with the audio line. A toroid choke core (ala Radio Shack) in the mike cable may be necessary. He should also double-check the grounding of his station.

There will not be two classes of licenses. I would be willing to wager on
that. My thought is there will be at least 4 classes and the code speed
changes may not be as much as people think. I hope they reduce it, but I do
not hold out real hope. My hope was for 5 wpm and 12 wpm. the 12 would
only gain you the 25 of the CW band. The higher written would give you all
voice bands.

>
>Sue, dear, you're posting your comments to five NGs.

I posted to no ngs whatsoever. I replied to a bunch of posts posted here by some others. Period. I did not alter headers in any way, nor did I start any conversations.

It seems the question is whether I have a right to include myself in discourse which appears to be occurring in MY ng. I suppose I could ignore it, but why?? If the posts appear here, I assume that those posting desire those in this ng to read and join in. Would this not be an accurate assumption?

Looking up, you, and all others who began and since are conversing, all have 5 ngs listed at the top. Doesn't bother me. Does it bother you?? TELL THEM, NOT ME!!!

>>Perhaps those of you who are illegally crossposting had best stop such a
>>practice.
>
>Foot + mouth = sue.

sue= how stupid?

To reply and remove all but one ng, what kind of reply will I receive?? None whatsoever. And know what????? My reply will be received nowhere nor replied to BUT..... you can bet the post of those others will still show up in THIS ng!!

So

foot + Jeffrey Someone= one to stupid to recognize the truth.

Again I urge-- you are talking to the wrong person. Tell those posting in my ng to delete the name. I feel no need NOT to reply to posts posted here, INCLUDING YOURS WITH 5 LISTED NGS, doh.

K0HB wrote:

:My proposal did not call for Technician and General, but rather Basic
:and Advanced. In my proposal, the 'regular HF license' would be
:somewhat more difficult to qualify for than the current General class.

Hans...

The more I think about it, the more I like your proposal. Well, maybe just one or two reservations. ;-)

:A. License Classes:
:
: If the interest of the FCC is (as stated in the NPRM) streamlining of
:the licensing structure, then I propose that the license classes be
:reduced to two classes, namely "Basic" and "Advanced".
:
: The "Basic" license would have an entry-level test (basic
:regulations, safety, operating procedures, basic DC and AC
:electronics). Without CW endorsement this class would have full
:frequency and mode priveleges above 30MHz, power limited to 50W
:output.
:
: The "Standard" license test would be of a difficulty level similar to
:the current Advanced class test, and would have full privileges above
:30MHz at power levels up to 1500W.

Everythings fine, so far.

:B. Morse required for operation below 30MHz
:
: Either license class could gain access to all MF/HF amateur radio
:frequency allocations (at 50W and 1500W respectively) upon passing a
:Morse test of 5WPM and gaining a "CW endorsement" for their operator
:license.

I think the arbitrary 50 W limitation for Basic Operators on HF presents a problem because of all the HF rigs built for 100 W if the limit were placed at approximately 125 W then there would be much more 'legal' operation. This would also remove the additional burden from the 'newbies' of having to 'worry' about their power output in absolute terms all the time. Did you have some other reason for the 50 W figure?

There's a BIG difference between you telling me I'm not eligible to run a linear and you telling me I'm not eligible to run my rig. :-/

: The Morse test should be "fill in the blank" or "1 minute of solid
:copy". Multiple-choice test formats should not be allowed.
:
:C. Status of current licensees.
:
: Current licensees should be redistributed as follows:
:
: Current class Converts to
: ------------- -----------
: Novice: Basic CW Endorsed
: Technician: Basic
: Technician+: Basic CW Endorsed (Note 1)
: General: Advanced CW Endorsed
: Advanced: Advanced CW Endorsed (Note 2)
: Extra: Advanced CW Endorsed (Note 2)

Which test do I need to take to move up to Advanced?

: Notes:
: 1) "Old" Technicians (who took same written
: test as General and 5WPM) would be
: "Standard" CW endorsed.

What does "Standard" mean? I thought it was "Advanced"!

: 2) Current Extra licensees would
: continue to have that class printed on their
: license in recognition of their previous status.

Is the 'new' Advanced class eligible to be VE's?

I think the choice of keeping the name 'Advanced' is unfortunate it's too
ambiguous (new to old) .

All in all, its a good plan. I like it.

I don't know about other people on rrap but I'm sure if the FCC were to ask
for another go-round on the NPRM tomorrow, my new set of comments would be A
LOT different from the comments I submitted in 1998!!!

Could it be the reason I like this plan is that it aligns so well with CEPT!
:^

CEPT is the reason that I believe a proposal like this could "fly".

As G3NYY correctly points out, CW is , according to the IARU bandplan,
permitted in the whole 20 m band with the 2 kHz exeption mentioned
for the IBP frequencies.

This however, does not give the participants in the CQWW contest, the right
to expand their activities out of the frequencies set for the mode of
operation. The problem is again the same, The CQ Magazine, which is the
conductor of this contest, has obviously no respect for the fact that other
users also has a legitimate rigth to use the bands without the monstreous
interference caused by the CQWW. The CQWW contest committee has set no
band limits for this contest, and consequently some participants feel free
to operate all over the place.

Have they ever heard about the Amateur's Code ?
"The Amateur is Considerate. He never knowingly uses the air in such a way
as to lessen the pleassure of others".

CQ Magazine and ham spirit offending contesters: You are breaking the
Amateur's Code by using the air to lessen the pleassure of others.

alt.config is the configuration ng that is generally discussed in the US, and then many localities have their own, for example ny.config, courts.usa.config, nm.config, nj.config, nyc.config, japan.config, ethiopia.config, mensa.config, israel.config, etc., etc., etc. there are other ways to configure a newsgroup, yes, but this is the most commonly discussed here in the US.

Ed,
I have serious reservations about using 50W on 2M with a trunk mount antenna. Imagine the exposure a rear passenger is getting at 2' away. (My Wayne Overbeck program says it's way over the limit) I realize that duty cycle helps a lot, but I still believe that there is more to the problem than "average heating RF". I believe that peak RF also plays a (currently unsubstianted) role in human cell reaction. I suggest no to hams who ask, no more than 25 watts in a mobile environment, unless the antenna is on the (metal) roof.

My point was how many hams do you know who were killed by an amp?
Many more hams have been killed by falling off towers. Should we limit the
lower classes to towers of only 6'... :-)

Set the limits at the RF exposure limits chart for conducting an evaluation.
Then it is not arbitrary, unless those limits are arbitrary. That way you can
save the RF exposure limits theory for the "advanced" exam, other than some
simple RFE questions.

Well, our regulations here don't include any bandplan here, so I can
(as far as I'm aware) run USB on 14.000. It still wouldn't be in
very good taste, though. Our bandplan says I shouldn't, but that's
just a gentleman's agreement.

I agree re: 14099-101. I monitor the NCDXF beacons on occasion but
14.100 is full of packet rubbish.

There was no sarcasm intended I don't do sarcasm it is non productive.
I was try to be a little satirical about hams that twiddle for twiddling sake. It is a compulsive disease with some. I guess as a spotty youth I was tempted to think that I could improve upon the manufaturers alignment and no doubt had I a well equiped bench with all of the neccassary tools and instrumentation I could.
When I got demobed I did a session on final test for VHF sets as used by the home office. I and another of the guys decided to see how many we could do in a day and keep a high standard. I could do 17 transceivers a day including finding all of the production faults and miss wirings and a complete alignment to acheive the specification threshold etc. This was only possible by knowing the sets thoroughly and having the correct method On the IF we used a damp and tweal method which I doubt anyone just twiddling would know about and was certainly something that was not written down anywhere. This method for the IF section consisted of a capacitor and resistor on a pair of croc clips this was place accross the tuned section that was not being tuned so that the section being tuned was clearly visible. With IF

transformers designed to be critically coupled sharp sided and flat topped this was the only way to do it. I'm sure that anyone that has one of these sets to modify for 2m would not be aware of this method and would therefore only degrade the high performance of the set. When it came to the RF section knowing whioch coil to put where how to bend it how to find the correct tap for S/N and threshold plus adjacent channel rejection was also more or less a trade secret. anyone jumping in would only degrade the performance once the coils were adjusted they were glued to their formers. Any twiddler could only degrade performance. Tuning to favour a spot frequency could only produce an unstable set which would not perform well over the band.
These limitations are something which are generally applicable to any set and the adjustments for any particular design to make it perform to ALL of its spec are quite critical you will not come upon them by accident.

Now what happens to these perfectly good sets that someone with good intentions has been around with a twiddling stick. For instance how many hams have a little plastic tool with a bit of brass in one end and a ferrite in the other?
Who knows what it is used for?

>Indeed, the
> FT101 can be adjusted for max smoke with or without the aid of a power
> meter; taking care not to overdrive the finals and to check
> neutralisation (all in the manual).

And what garauntees do you have that once you are on air that there are no spurious emmissions or that the carrier is clean and that the modulation is clear and readable. plus 101 other problems. Some sets need to be flat tuned to keep them on the ground tuning for maximum smoke is not an ideal method for producing a stable well behaved set. The manufacturer faces all of these problems in the design stage and after extensive testing comes up with a spec for the production model and a method of ensuring that his product meets the published spec. Those specs are in competition with othe manufacturers and merely to attrct orders the manufacturer wants to claim the best possible spec for his product. However the wise manufacturer does not claim more than he can acheive. Tye methods that he uses are trade secrets you will not hit upon a better method by accident no matter how knowledgable you are.

> You will note from my comments above that the FT101 series is over 25
> years old. Modern it is not!

Any set designed and built in the 70s was using modern types of components Good commercial compomponents had started to evolve from the experience that manufacturers had gained from supplying the military market. They understodd the use of good practices in manufacture and there was little point in falling far below those profitable methods with the commercial product. Good methods mean optimised profits and sales they don't move away from them lightly. An FT101 is a modern set despite its 25 years.

I would be very cautious about buy a S/H set because of the eagerness of Hams to improve on what the manufacturer has worked hard and long into the

night upon.

Gary7SLL, Motto don't twiddle unless you have a properly equipped bench and you have the service manual for the kit. If you are pathologically inclined to twiddle then build a kit but don't spend a grand on a bit of kit and immediately turn it into something worth a tenner for scrap.

:
: The "Standard" license test would be of a difficulty level similar to
:the current Advanced class test, and would have full privileges above
:30MHz at power levels up to 1500W.

Hummmm, this sounds almost EXACTLY like the system used in Canada.

Go to the URL below and down load the "RIC-2" document.

http://strategis.ic.gc.ca/SSG/sf01372e.html#Booklets

You will want to read sections 10.1, 10.2 and the "Schedule 1" chart near
the
back of the document.

I think you will find that the proposal above is nearly the same as the
current
Canadian license system. If I remember correctly, you must have the Advanced
qualification in order to build and operate your own transmitter, amplifier
and to
be the control operator of a repeater.

Thank you for your response Gary. If I accused you incorrectly then I apologise. Your comments though (which I have snipped for brevity) do not leave the average amateur much if any room for adjustment of their equipment or modification of, for example, PMR kit for the amateur bands. Both of these activities are as much a part of the hobby as operating and the ability to be allowed to do this is one of the cornerstones of the amateur licence. It is no co-incidence that the amateur bands are harmonically related:)

A poorly adjusted pi tank output stage or overdriven PA can do as much damage from the interference viewpoint as misalignment in the earlier stages yet we still fit Load and Tune controls and Mic gain pots.

Regarding the specific case of the FT101, from what I recall, these adjustments solely alter the drive levels to the PA stage and have no significant effect upon spurious emmissions. I am one of the fortunates with a spectrum analyser which was in use at the time I owned my early FT101. The fault in question related to low output and was not 'twiddling for twiddlings sake', my response was one of several possible solutions that had been suggested and I think it quite reasonable that any amateur willing to take the covers off his kit (certainly most of my generation) should attempt this adjustment.

I would certainly agree that adjusting modern kit (my definition) should not be attempted without full knowledge of the consequences; for example the IC706 series and its ilk. It will be a sad day though when we have to turn to the manufacturer to carry out every adjustment and repair. That day is getting closer and when it does, I have no doubt that type approval will come with it. Moves towards painless access to the amateur bands are not helping.

The selection of 50W was not arbitrary; it was deliberate. Beginners would
be tested only on very basic safety and electronic concepts, and I consider
50W the upper limit of 'non-lethal RF'. Just as most HF rigs sold in Japan
are limited to 10W, and there were many 75W rigs on the market back when
Novice was limited to that power, there would soon be available a wide
variety of 50W rigs here.

I talked to Bill Moore at the DXCC desk. The above report is in error. He knows of no action at the league underway of this kind.

Considering the response of those receiving cards you might want to relook at your QSL and operating practices. One common solution to the very agressive statios that calls out of turn, talks over other QSO's and otherwise make a mess out of the pileup is to work them, but fail to log the contact. Too Bad...

Pretty neat. Some idiot on this NG deliberately crossposts
his drivel to several others for the express purpose of
spreading crap across Usenet, since he knows that most users
can't automatically see where all the crossposting is going,
and few people check every post to trimm all that sort of
nonsense... So then a couple participants proceed to stomp
on Sue for responding. That's nice and gentlemenly. NOT!

Message-ID: <944259013.188074@subsonic.fan.net.au>
Source record: 22613

Hi All,

I'm planning an extended South Pacific cruise starting early next year.

(See http://www.ozemail.com.au/~davidgem)

Here is a first cut of proposed locations to be visited.

Any other suggestions ?

DXCC
Rating Prefix Name Zone Lat Long
40 VK9M Mellish Reef. Z30 17.40s 155.80e
42 VK9Z Willis Is. Z30 16.30s 150.0e

Can you really differentiate much between that and our present No-Code Tech ticket? Many No-Coders simply memorized the answers long enough to pass the test and then have promptly forgotten them any how. Witness the many discussions on the local "CB" sounding repeaters on how to hook your rig, read handie-talkie, up to an outside antenna so that you can "get out better". Many of those folks don't have a clue and would burn their fingers if they ever decided to live dangerously and pick up a hot soldering iron.

Most of the rigs out there, if not all of them have a provision for
controlling the output power of the rig. If the new ham cannot follow the
rules and turn his rig down to meet the power limits he/she doesn't belong
operating. When I was a novice we were limited to 75 watts on CW only. It
posed no problem to us then as all you had to do was to use a reliable watt
meter and adjust your rig accordingly. I personally see no reason for
argument even as to the power limit as the rules now state that the maximum
legal power limit is to use "only the amount of power needed for good
communications". And there have been many made on 1 to 10 watts of power and
even less.

I'm sure the same can be said for many Novice and Tech Plus licensees.
The written test for no-code Tech and Tech Plus is exactly the same,
elements 2 and 3A. The Novice class doesn't even have to pass Element
3A, only Element 2. That 5 WPM code test for the Novice and Tech Plus
license does not guarantee any technical expertise whatsoever, unless
you consider knowing how to adjust the pitch control on a code
practice oscillator to be technical expertise.

On the other hand, there are no-code Techs like me who passed elements
2 and 3A without memorizing anything, in fact without having even seen
a license study guide book, passing the test solely on the basis of
knowledge gained through prior activities as an SWL and scanner
listener. I learned how to solder 28 years ago...but unlike some
people around here, I don't inhale the smoke.

Not me. I'd forgotten all about these useful little aids. Haven't seen
one since Grace Archer died.

<snip everything else. All agreed with>

Now my problem. I have a 101ZD MkIII, which suffers from intractable RF
feedback on all bands above 40 Mtrs.

I have removed all ancillary kit (Homebrew keyer, Datong FL1, Vogad
amplified Mic., etc.) I use a link-coupled ATU with current-sensing in
each leg of open-wire feeder, allowing precise balance of feeder
currents.
I have decoupled/ferrite-beaded/rf-choked everything in sight, but the
problem persists. Any ideas, is this a 'known' fault?

I've had two suggestions so far.
1. Phone patch socket.
2. 7Mc trap on trimmer board.

1. has been removed and decoupled.
2. not yet investigated.

All ideas, thoughts, definite whizz-bang 100% solutions welcome.

Ay thengyew.

Hans:

There are two levels of written exam in Canada: basic and advanced. While the Basic exam may not be terribly difficult, I believe it is similar to entry-level licences in many countries, including yours.

Whoever told you we have "an "appliance operator" class, without technical qualifications" misled you.

Look at the Radio Amateurs of Canada website www.rac.ca for more information.

Popular or not, CW is allowed and since it takes up a lot less
bandwidth than SSB, I don't see why people are getting their shorts in a
bunch. Face it. If you're scanning the frequency looking for somplace to
start calling CQ, is the fact that there's a CW QSO or a phone QSO in progress
on a certain frequency going to make THAT much difference? In other words, a
QSO in progress is a QSO in progress, you simply move on until you find a
clear spot.

Hello Hans...

Your choice of applying the 50 W to the MF/HF arena is purely arbitrary (it's NOT based in fact). 200 W has been an accepted limit for decades, my rig is an FT101 there're literally TONS of these rigs and others like them in use around the world without any detriment to health and safety.

Bottom line is, yes absolutely, set power limits for the Basic license...

BUT, do it in a way that will not be telling all 400,000 existing operators who are doing it safely on HF that they must take their 200 W limits and move them down to 50 W when the rule is being implemented because of an erroneous 'interpretation' of the exposure charts.

Fred wrote:

:Most of the rigs out there, if not all of them have a provision for
:controlling the output power of the rig.

That's true, Fred, I have no qualms about limiting power for various classes on prescribed bands (when it makes sense). As it is now, we're ALL limited to 200 W in many sub bands now. 30 meters for example is limited to 200 W which is international in scope. Also, 200 W is the limit for ALL operators in the "Novice" sub bands; this is national in scope.

: If the new ham cannot follow the
:rules and turn his rig down to meet the power limits he/she doesn't belong

:operating.

Goes without saying.

: When I was a novice we were limited to 75 watts on CW only. It
:posed no problem to us then as all you had to do was to use a reliable watt

No Fred, you forgot to mention there is an ABSOLUTE maximum of allowable
power for 'good communications'. Maybe that's why you see no reason for
argument. :^

If there must be an "appliance operator" class it should have NOTHING to do with the Amateur Radio Service.

I believe a service of the type we have with VHF FM marine radios for operation in our boats should exist for land/water mobile/base (recreational and commercial). I'm not suggesting this should be incorporated into the marine radio service; I just want another service simular to it.

Please, keep it FAR AWAY from the ARS.

My 1957 Novice rig used a 6146 in the final and a 5U4 rectifier in the power supply. I ungrounded the center tap of the secondary of the power transformer, grounded one of the end legs, and fed the other end leg to the rectifier plates in parallel. This doubled the AC voltage from about 600 volts to 1200 volts. I also added a few filter caps. I effectively went from a full wave to a half wave supply. With this kluge I was able to get about 125 watts of (input) power from the rig, and used it that way. (I realize now that the added power would not be very noticeable at the other end, but heck, I was a teenager, and thought that 75 watts was QRP...) What about breaking the law? Well that was minor compared to what I later did as a teenager with my 49 Chevy...

>I personally see no reason for
>argument even as to the power limit as the rules now state that the maximum
>legal power limit is to use "only the amount of power needed for good

The first large linear amp that I built >30 years ago was
operated the same way. It was a 4-1000A tube and the most
transformer I could come up with was a 2kv pole pig with no
centertap. I used it halfwave, with lots of filter capacity
which I happened to have available, and no one I talked to
using it ever knew the difference.

Leland is correct, it is the same as the Canadian system.
I am not sure what you mean by an "appliance operator" or "technical
requirements" but Industry Canada's Basic qualification (the lowest of the only
two classes Basic & Advanced) requires a 60% pass mark on an examination with
100 questions on :

BASIC ELECTRONICS

1 Understanding the basic relationships of conductors, inductors, insulators,
DC, AC,EMF, resistance, power, capacitance, inductance, reactance, impedance,
and resonance.

2 Be able to define Ohms Law and be able to do simple calculations using it.

3 Be able to describe the function of, a battery, a transformer, an AC power
supply, and the basic blocks of a simple transmitter, receiver, and transceiver.

4 Be able to describe diodes, transistors, integrated circuits, and vacuum
tubes, as well as the circuits for which they are used, and be able to describe
their basic purpose.

PROPAGATION AND ANTENNA SYSTEMS

Candidates must be able to describe

Sunspots, sunspot cycle, solar radiation, ionosphere, fading, absorption,
refraction,
radiation angle, multi-hop, mf/hf propagation, vhf/uhf propagation, transmission
lines,
antenna types, antenna impedance, standing wave ratio, and matching devices.

The final two categories of question are:

STATION ASSEMBLY,
OPERATIONS, PROCEDURES, AND REGULATIONS
but have too many requirements for this email. see RIC 24 at Industry Canada's
Web site
for more info http://strategis.ic.gc.ca/SSG/sf01862e.html

You say 'RF feedback'. How exactly do you mean? Live RF all over the
shack? Or is the PA taking off on its own? If the latter, pay attention
to the PA neutralisation.

The amateur accepts a certain amount of risk--it's public safety (RF exposure) that appears to be the FCC's primary concerns these days.

It may or may not be arbitrary (depends on who is defining
abitrary). But it's my opinion, and I have proposed it to
the FCC. There is no point in trying to argue the case here;
you should be presenting your case to the FCC, not to me.
They make the rules.

Well at least both stations in that case were amplitude
modulated. The case I worked on was where a newly installed
FM broadcast station located about a mile away, was
impressing program audio onto the FM signal of a public
safety dispatch station. I cured it by winding surplus
microphone cable over a ferrite rod.
I have never understood how that off-air FM signal was
being demodulated in the microphone circuit of a solid state
speech amplifier, and adding it to the station mic audio.
The speech amp used ICs and I expect that it was probably
occuring in one of them.

Barry In the old days of discrete component sets a dry joint would cause these sorts of problems. with PCB bad through plating or a section of track that has gone HR because the original stock board was not up to spec. Often it is a very small low resistance change in a common mode in the emitters of a transistor pair that are not in parts of the circuit which should be common mode.
Finding the problem could be a bugger. If you have the available boards then substitution of boards should get it down to which board the problem is on. It could be in supply lines a dud through capacitor in the supply lines can reek havoc.
Try reducing the supply voltage and see if the effect gets better or worse.
One method that I have used with success is a transistor radio and head phones. holding the trany over the various parts of the circuit the amount of interference on the tranny can be monitored. I've even used this method on digital circuits with good results. A bit of software not running at speed has a different sound to to the same software running on a good machine. By knowing what it should sound like and jiggling components on the faulty board even as little as bringing the extra capacity of the hands near to the faulty region is sufficient to say start looking for a mechanical fault around those few components.
The problem with any feed back problem is that the fault appears to be in every part of the circuit at once; it is necessary under such conditions to fault find dynamically, make small changes in various parts of the circuit by adding damping etc either with the little plastic tool mentioned above the capacitor and resistor plus crock clips. cold air, a hair dryer.
Definitely board swapping will bring you into the region of the fault the quickest. This is where the manufactures scores because he has spare boards and he has a good set to compare any unusual meter readings under various

operating conditions. The ham on the bench has difficulty competing with these facilities.

Good luck
Gary7SLL

Indeed, but this falls into the ground of experimental work with new designs being synthisised form building blocks of existing equipment. Under those circumstances the old blocks treated in the same old way as at manufacture may be quite inapproptiate. But under these circumstances you are taking the initiative to produce something new. I had in mind smething a little different where a ham acquires a new bit of kit and is unhappy until he's /she's had the top off and had a goog poke at everything with a Woolworths screwdriver. Then disenchanted they try to dump this bit of kit that they have s[poilt upon an unsuspecting twerp at a near new price. I would suggest that if you want to buy a bit of kit that you look very carefully at the trimmers and slugs to see if there is any eveidence of twiddling. Also just look at the screw heads of the securing screws of the case if they show the slightest sign of having been touch with a screw driver immediate knock the price down to under 10% of the as new price.

> A poorly adjusted pi tank output stage or overdriven PA can do as much

Too right , pity the self training element has to happen on air :)

> Regarding the specific case of the FT101, from what I recall, these
> adjustments solely alter the drive levels to the PA stage and have no
> significant effect upon spurious emmissions.

If you over drive any stage it will run into a non-linear region and spurious will be generated. Look for it with modulation applied.

>I am one of the fortunates
> with a spectrum analyser which was in use at the time I owned my early

It would help if the person doing so had a little more knowledge than that
required by the RAE. It would also help if the Ham had a few practical
lessons under supervison of some of the old hands.

> I would certainly agree that adjusting modern kit (my definition) should

Time will, tell.
If More hams would take further training as suggested above so that the
standard rises it would go some way to ameliorating the situation where type
approval was inevitable.

The introduction of only type approval would be a sad day IMHO, but there
could be a centre ground where extra qualification brings extra privileges.

<big snipperoo>

Thanks Gary.

Quite by chance, I have just been given another '101ZD, in excellent nick and known to be good on all bands but with burnt-out mains transformer, so I'm able to do some board swapping.
I must admit that I don't like the idea because when I finished my 5yr apprenticeship and could call myself a time-served, City & Guilds qualified Radio & TV serviceman, 'bottle-swappers' were very much second-class citizens. however that was in the days when TV's were full of EF80's etc. and I immediately left the trade to enter Drama school.

I suppose that board-swappers are today's bottle-swappers and probably call themselves 'electronic' engineers, (rather than 'electronics engineers) as though they need to switch themselves on in the morning. Ho hum. I suppose that the real engineers have become reconciled to referring to themselves as graduate engineers.

None of that has anything to do with solving the problem of course. Thanks again for your ideas and suggestions Gary, time to finish off one of the homebrew projects so that I can at least get on 80 Mtrs with the 101 on the bench.

Hi,

I'm going to the UK (Docklands region of London to be exact) for a few days for a work related meeting. I would like to take an H/T with me and operate on 2 meters.

I have both an advanced class US license which is now recognized as a CEPT class "A", and an Israeli license which is also recognized as CEPT class "A".

What repeaters are there in the area? Do they need a 1750Hz tone, or a PL tone? How should I id? When should I id?

TIA,

Geoff.

Indeed. Relatively modern equipment (that includes stuff built in the 70s)
does not go out of alignment on its own. It almost always has been helped
along by "screwdriver drift". Some amateurs seem to feel the need to
"realign" any piece of equipment that they get. That urge should be forcefully
resisted. They will almost always wind up with something which doesn't
work as well as if it were left with the factory alignment. (Very old radios
may have components which have shifted way out of tolerance. The preferred
approach here is to replace those out of tolerance components rather than
twiddling the alignment in an attempt to compensate for them.)

Note, a stage which has had components replaced may require a slight
realignment, but just that stage, not the entire radio. If extensive modifications
have been done to a radio, or it is being shifted far from its original design
frequencies, some greater amount of realignment may be necessary. Otherwise,
the factory alignment should be left alone. The designers generally knew what
they were doing when they specified how the radio was to be aligned at the
factory. You'll generally just screw things up if you try to twiddle it.

SB DX @ WW $OPDX.438
Ohio/Penn DX Bulletin No. 438

The Ohio/Penn DX PacketCluster
DX Bulletin No. 438
BID: $OPDX.438
December 6, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KF2TI, N2OO, W2FXA, WB2RAJ/ WB2YQH & The 59(9) DXReport, N5VT, AG8L, K8CX, K8YSE, NE8Z, K9NW, KE9KD & DX Central, DJ3IW, ER1DA, F6AJA & LNDX, G3NOM, G3SXW, IN3QBR, JF6OJX, OK1YM, OM3LZ, ON4LCE, PA3GIO, PY1KS, VE1ZL, VE2PJ, VE6VK, VK9NS, VR2XMT and Reinhart Pearson for the following DX information.

5T, MAURITANIA. The International Amateur Radio Volunteers (IARV) will be dispatching an eight member team here between December 13-20th, to build an emergency medical radio network in some remote cities. During their stay there, they will be authorized to operate as 5T5U. They will operate mainly on the WARC bands including 10 MHz, 28 MHz FM (29.260 MHZ) as well as 6 meters band (50.115 MHz - beacon). Please QSL via JA1UT. Your kind support will be much appreciated.

8P9, BARBADOS. Look for Dan, N8DCJ, to sign 8P9CW bewteen December 25th and January 9th. He is an excellent CW operator and this will probably be the main mode he will be using. QSL via homecall.

9G, GHANA. Zdeno, OK2ZW, is planning to stay the next 3 years in Ghana. He is using the callsign 9G5ZW. He was very active in both parts of the 1999 CQWW Contest (on 10 meters, making 4000 QSOs in both parts). His QSL Manager Miro, OM3LZ, informs OPDX that he has begun receiving the first QSLs, mostly from JA and USA. Every direct QSL will be answered, however, Milo will start answering the QSL beginning January 1st, 2000. He is currently waiting for new printed QSL cards.

FT/W, CROZET. Gilles, FT5WH, will leave Crozet on December 7th.

H4, TEMOTU. Bernhard, DL2GAC (alias VU2BMS, H44MS, H40MS) will going on a three month Pacific trip at the end of January 2000. In February 2000, he will stay and operate for about three weeks from Temotu. During this time and specifically for the CQ WPX RTTY Contest in February, he is looking for a RTTY operator to join him on Temotu. A beam and an amplifier

are already on Temotu. The only way to contact him is by his FAX work number: +49 741 15377.

HC, ECUADOR. Doctor Rick, NE8Z, had to change his flight plans to Ecuador due to the volcanic activity in Mt. Pichincha (HC1) and Mt. Tungurahua (HC6). Due to the falling ash in the mountains, the Quito International Airport had to be closed down. Rick arrived in Guayaquil (HC2) on the coast of Ecuador and took a 6 hour bus ride to Tumbaco (HC1, 66km from Mt. Pichincha). He is now active as HC1MD until December 10th. He was spotted on the air on 20/10 meters. Suggested frequencies are: CW - 5 and 24 kHz up, 10113, 18073 and 24903; SSB - mainly 28430 and 50110 kHz. Look for him to be active from the Amazon (signing HC1MD/HC7) between December 10-13th. Rick states daily updates and photographs of the volcanic activity can be seen at:
http://www.elcomercio.com/volcan/volcan.html
QSL direct via K8LJG: John Kroll, 3628 Craig Drive, Flint, MI 48506 USA (k8ljg@tir.com) or via the bureau.

HR, HONDURAS. Look for Gerard, F2JD/HK3JBR, to be active as HR5/F2JD from the middle of December until early January.

KP2, U.S. VIRGIN ISLANDS. Dave/AG8L and Mike/KC8NJA will be active from the Windwood contest station from December 9-15th. Dave will be a Single Op entry in the 10M contest. Mike, a new Tech-Plus, will be active on 10 meters SSB before and after the contest. Due to the recent hurricane, some of the activity may be limited before the contest due to antenna and station setup. QSL routes are: KP2/AG8L via NN6C, KP2/KC8NJA via NN6C, and WP2Z (contest callsign) via KU9C.

NJDXA'S "YEAR 2000" EXECUTIVE BOARD. The "North Jersey DX Aocciation" (NJDXA) has elected the following:
W2UDT - Bill Hudzik - President
NA2R - John Sawina - Vice President
N2BIM - Gene Ingraham - Treasurer
KF2TI - Steve Adell - Secretary
Additionally
K2CO - Ron Levy - W2 Incoming Buro Chief
NA2U - Fred Hoffert - Assistant Buro Chief
For more details, check NJDXA's Web site at: http://www.njdxa.org

OD, LEBANON. Pavel, OK1MU, is active as OD5/OK1MU from Beiruth. Activity is mainly CW but SSB too. Over the past weekend, he was heard on 30/17/12 meters (try between 1330 and 1430z and around 0145z). QSL via OK DX Foundation.
Also, look for Labib, OD5IU, on 10 meters SSB around 28545 kHz between 1400 and 1500z.

PIRATES.......
Activity by a P51BH was keeping many in practice recently. Hopefully, the many who took the time to practice their skills will not QSL.

Dick, K4UTE, states that he is being flooded with E-mail requests wanting to know if he is the QSL Manager for the station sign YA4A during the CQWW CW Contest. The answer is "NO", and he is sure that this station was pirate. However, if you worked him as YA4A in 1963-65, Dick still has the logs and QSLs.

PY, BRAZIL. Alex, PY1KS, and PY1NX, will be active in next week's ARRL 10m Contest as Multi-Operator/Single Tranmitter/Mixed Mode (CW/SSB) entry as PY1NX. QSL via PY1NX direct or bureau.

QSL INFO AND NEWS.....
NEED A QSL MANAGER. Doug, VE1ZL, who used to be a QSL Manager for C6ANU (now deceased), would like to offer his services again to manage one or two DX stations. Contact Doug via E-mail at: wipcitz@hotmail.com

NEW QSL BUREAU MANAGER. Delano Taylor, C6AFV, has assumed duties as Bureau Manager for the "Bahamas Amateur Radio Society. The address is P.O.B F-43563, Freeport, Grand Bahama, Bahamas. Delano currently has thousands of cards for radio amateurs that have operated from C6-land. He has provided the following list: C6AFE, C6AJA, C6AFP, C6AHN, C6AKP, C6AKQ, C6AJT, C6AJZ, C6APK, C6ADR, C6AGT, C6AXP, C6LE, C6ANF, C6LFN, C6MPN, C6AGH, C6AMI, C61D, C6AGH, C6AKA, C6AKW, C6AHR, C6AJU, KR8V/C6A, C6AVW, C6CR, C6AJQ, C6CDQ, C6AKL, C6AHG, C6AHE, C6AHY, C6AHK, C6AGN, C6AKT, C6AJJ, C6AFQ, C6AHX, C6AGP, C6AFZ, C6ASR and C6AER. These cards will be held for a period of 60 days as of December 1st. If there is no response from these stations, the cards will be "DISPOSED OF"....

THE 1999 HILLVIEW GARDENS BORNEO DXPEDITION IS QRT. Bob, N2OO, reports the preliminary QSO totals are as follows:
9M6OO/p Spratly: 21,000
V85OO (plus some QSO's using V85AA, V8USA and V8SEA): 6,000
9M6AAC: 7,000
9M6RIT: 1,000
Total QSOs for the DXpedition was: 35,000. Bob states that these numbers are a ballpark figure for now, as they have a mix of log formats to go through, including some paper... QSL information is as follows:
-- 9M6OO via N2OO -- V85OO via N2OO -- V8USA via N2OO -- V85AA via direct only to: WILLIAM MADDOX, PO Box 1711, Bandar Seri Begawan, Brunei -- V8SEA via JA0AD -- 9M6AAC via N2OO -- 9M6RIT via G4SHF

QSLs for FG5BG in CQWW CW Contest are direct via FG5BG. QSLs for FG/K9NW are via WW9DX: Western Wisconsin DX Association, PO Box 411, La Crosse, Wisconsin 54602

The 1999 9G5AA CQ WW CW Contest operation is QSL via GM4FDM only. There is some confusion. Do not QSL via Roger, G3SXW, who was QSL Manager for the 1994 operation.

VK9RS QSLS. Malcolm, VK6LC, reports that the special direct QSL cards for the Rowley Shoals DXpedition (OC-230) could start to flow around Christmas time, and bureau cards are scheduled for about May 2000. The VK9RS special stamps are not for sale because of limited quantities, and they have been sent to all VK9RS sponsors. The remaining are available

to those that have worked VK9RS and supported a reasonable donation with their direct QSL card to I1HYW. Currently, Mal is in the South China Sea near Vung Tau engaging in Offshore Oil Design Engineering. He does visit during his time off Con Son (Iles de Poulo Condore) and Cu Lao Thu Islands. He will be commuting between Australia and Vietnam over the next 4 months and may have time to operate from these places, but only in his days off. Also, this will not be DXpedition style operating, but more of a social 3W6 contacts only.

Youth Club Station UX2FXX, QSL via P.O. Box 14, Odessa 65076 UKRAINE
Youth Club Station UT9F, QSL via UX2FXX: P.O.Box 14, Odessa 65076 UKRAINE

SPECIAL EVENT STATIONS FOR THE YEAR 2000.....
To celebrate the coming of a New Millenium, look for special event ER2000A to be active starting from December 15th and lasting until January 20, 2000. QSL via ER1DA direct to: Valery Metaxa, P.O. Box 9537, Kishinev, MD-2071, Moldova, Europe (or via the Bureau).

Special event station "Millenium Plus" will use the special one-by-one callsign, N5T, between January 1-15th. Activity will be on on all bands (including the Novice portion, 6m/2m/432) on CW/SSB/RTTY/Packet/PK31. A special QSL card will be available (along with a SASE) from N5VT.

Phil, ON4LCE, will be on the air from Guadeloupe Island (NA-102) with the special callsign TO2OOO from Monday, December 20th, to Monday, January 3rd (2000). Activity will be on 80-10 meters including the WARC bands. His preferred modes are SSB/RTTY and a special effort on PSK31. His operating times will be limited because he is on a family holiday. He may make a trip to Les Saintes Island (NA-114) for a 1 or 2 day operation. QSL via home callsign (only for this operation). All requests are welcome by E-mail: on4lce@arrl.net
Or by packet BBS: on4lce@on0sat.lu.be.eu

Charlie, VR2XMT, informs OPDX that the "Hong Kong Amateur Radio DX Association" (HARDXA) will be active as VR2K for the celebration of the new year 2000. Activity will be on HF-430 MHz (including satellite) from now until January 31st. Activity is also planned for March 1st through March 31st, and from May 1st through July 31st. For the year 2000 QSL send to VR2XRW. Also, check out the Web page:
http://www.qsl.net/vr2dxa

VC2K UPDATE. Terry, VE2PJ, informed OPDX that the reason he is using this callsign (between December 31st and January 31st) is to celebrate the new Millenium. He had asked for the callsign XK2K but was told that XK is not for use in QUEBEC.....

SV, GREECE. Olda, OK1YM, is now active as SV/OK1YM from Athens on CW, SSB and RTTY. He will probably stay for more than 1 year there. QSL cards via OK DX Foundation: OK DX Foundation, P.O.Box 73, Bradlec, 293 06, CZECH REPUBLIC. For more info on the Web, visit:
http://www.qsl.net/ok1ym - or - http://www.okdxf.cz

TY, BENIN. Philippe, TU2FH/FK8VHU, will be here from December 6-28th. He hopes to get a licence, and he will take his TS-680S and vertical with him.

V26, ANTIGUA. Tom Roscoe, K8CX, reports that he will be active from Antigua as V26X from December 7th through December 13th. He will be active on all 9 HF bands. Tom will be an entry in the ARRL 10 Meter Contest on December 11th and 12th. A full color photo QSL card will be available for all completed contacts. QSL via K8CX.

V3, BELIZE (IOTA DXpeditions). Bert, PA3GIO, will be active as V31GI on SouthwestCaye, Glovers Reef (NA-180), from March 19-24th (2000). Also, from March 26-29th he will be on Little Water Caye (NA-180). Activity will be on 80/40/20/17/15/12/10 meters SSB only using 100 watts into a Doublet open feeder line. QSL "PREFERABLE" by the Bureau to PA3GIO. QSL direct to PA3GIO: Bert v.d. Berg, Parklaan 38, NL-3931 KK Woudenberg, The Netherlands, Europe. Visit Bert's Web site with pictures of his 1999 activation at: http://www.xs4all.nl/~pa3gio

VK0, MACQUARIE ISLAND. (Excerpts from a Jim Smith, VK9NS, press release. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.) Alan Cheshire, VK0LD, is now active and is employed as a Senior Communications Engineer for the current Australian Antarctic Research Expedition (ANARE) Base on Macquarie Island until late 2000. He and other members of the ANARE team on the island have extended work loads and operating times will depend on this factor. Alan is primarily a CW operator and it is in this mode that he hopes to make a dent into the pile ups of the needy. He will concentrate mainly on 20 meters or perhaps 15 meters to maximise the chance of the DXers working a new country. He seems to be uninterested in chasing around the bands towards the multi-band QSO routine. His rig is an ICOM 706 MKII. As of this past weekend, Alan's current operating schedule is as follows:
1000-1100z CW - JA/HL/BV/UA0 "ONLY" - North Vee Beam.
1100-1200z CW - Europe "ONLY" - NW Vee Beam Short Path
(includes TF, OX, JW etc. and UA9)
1200-1300z CW - USA/ VE/ S.America/ Africa "ONLY" - Vertical.
There will not be a QSL Manager, so all QSLing will be done after Alan's tour of duty. Alan has a super Web site available for updates, schedule, Web Cam and pictures at: http://www.geocities.com/vk0ld/1.html

VP9, BERMUDA. Gene, W2FXA, will be active as W2FXA/VP from Devonshire Parish, Bermuda, from now through January 4th (2000). Activity will be on 40-10 meters CW and SSB. QSL to home callsign.
Also, "The 59(9) DXReport" is reporting that Mark, AA1AC, will be active from Paget Parish December 16-20th as AA1AC/VP9. He will be active on 40-10 meters CW/SSB. QSL via homecall.

VQ9, CHAGOS. "The 59(9) DXReport" is reporting that Paul, W2JDK, is now active as VQ9PH from Diego Garcia until December 15th. Reportedly. he prefers CW. However, OPDX QSNs show that Paul was active this past weekend on 15 meters SSB (on 21333 kHz between 1545 and 1615z) and on CW, 14004 kHz around 1430z. This is his third trip here. QSL via W2JDK.

XU, CAMBODIA. Mauro, IN3QBR, informs OPDX that he and Fabri/IN3ZNR will operate from here between December 24th and January 3rd (2000). Their callsigns are: XU7AAY (Fabri) and XU7AAZ (Mauro). They plan to operate on CW/SSB and during the ARRL Round-up Contest on RTTY. They will be active on all bands including the WARC bands and hope to do good work on the low bands. QSL cards are via IN3ZNR: Fabrizio Vedovelli, Via Gramsci, 38100 TRENTO Italy.

Hi Gary, long time no hear(see!)
Lets not get carried away with this business over a couple of very minor
adjustments to the tuned circuits in the latter stages of the tx drive
chain in an FT101. Adjustment of this very simple PA system is well
within most amateurs capabilities AND IS DETAILED IN THE OWNERS
MANUAL!!. As I stated earlier in the thread, I do not advocate
twiddling for its own sake.
For Gary 7SSL, are you saying you have never delved into any of your new
kit! Are all your cover screws virgin? (never been unscrewed!) :))

I am well aware of the snobbery attached to bottle and board swappers.
It is more than a little vane to object to a proceedure that produces
results. Your objective no doubt is to have a working set. The fact that you
have some boards left over doesn't mean that they have to be relegated to
the scrap bin. You can havce several known good boardfs as spares or
sufficient to build the second set. If you get one good sert then with part
objective complete you are in a better frame of mind to aproach the next
stage of the project.
I spent quite a bit of time developing ATE (Automatic Test Equipment) for
use by anyone that felt able to use it as a tool. (board kockeys or no).
When one considers the commercial aspects and scientifically analysis the
objectives and the situation that exists constrained by the technical
possibilties the resources and the personelle available one comes to certain
conclusions about the cost of manufacture, the cost of repair and the
feasibilty of both. A repair will always cost several time a replacement
because all of those proceedures employed in manufacture have to be used
additionally fault find diagnostiocs dismantaling correct identification of
any failed component the removal and replacement reassembly testing and
final xcosmetics are just numerically more operations requiring a higher
level of skill so become non competative. If you then design sets to be
thrown away upon failure the design may be greatly simplified and cheapened
you don't need to provide screws for access components may be permanently
solder welded in place as they are not intended to be removed this can be
considerrably cheaper that a design that permits servicing. As a
manufactuirer faced with competition which would you chose to maintain your
market share and keep your customers happy. A customer that gets a faulty
item replaced immediately without question is a much happier chappy than the
pone that takes his kit back to face reppairs of unknown cost and of
duration unspecified and when he gets his kit back there is a high

probability that the fault is not cured or the fault returns shortly after for some unspecified reason. The complexity and package density of modern kit has long since made the repair route if not unattractive but often completely impossible.
Old kit will soon be unable to meet the increaingly tighter specifications and operational requirements. Certainl the dedicated amatuer building from scratch will note aproach any commercial set either on price or technical performance or finish. certainly size and weight will not be approachable by the amature.
Specialist and cutting edge ciruitry is really the areana for the hobbiest of the future.

1) I have the experience to know when to leave well alone, that is the stock in trade of a professional.
2) I have the correct tools such that you would never know that I had been there.
3) I have the knowledge training and experience to know what not to touch and how to test the alignment without actually adjusting anything, (remember that little plastic tool with the bit of brass and the bit of ferrite?)
4) before actually parting with my hard earned dough I make sure that whatever it is that I'm buying is in good nick.
On;ly a twerp would spend good money and then throw it away by ruining the new toy.

If I get something for a fiver at a junk sale that's a different matter.

Where I might be tempted to tamper is with very early kit of unknown history which I want to restore to the condition in which it might have been found shortly after manufacture. A project which I would love to get involved in would be to have examples of every possible old set restore it to it's original condition and then with modern test equipment measure its performance and record the specifications to be published in book form with pictures and as much history as possible. I would like to trace out the history of Radio without the bias of particular companies that exists in most of the stuff which I have so far.
What for instance was the bandwidth and threshold of a coherer or a magnetic band detector. To get an AR88 or HRO back to spec and make some noise figure measurements and check the thing out over the design frequency range.
Just how lucky where the people involved in the first transatlantic communications, what differnce did the Armstrong set make what was its performance like when measured with modern test equipement? was the performance really superior or did those usingit have a better antenna and some good luck. Where their operating methods better? al of these questions have not been answered or documented in a coherent way. soon it will be too late and too distant from the events to be realistic or to be written up with a sense of the acheivement. Who familiar with a mobile phone would see and appreciate the wonder of communication over a few hundred yards by Electromagnetic Radiation.

Gary7SLL, I'd love to make the first voice communication by X-Ray

I am looking for a program called ISO.COM

It is a DOS based controller program for an AEA IsoLoop IT1 Tuner. I picked the antenna up at an estate sale but the program was not with it. If anybody could help, I would appreciate it. Thanx.

Board swapping is a powerful troubleshooting technique. It allows you
to quickly localize the trouble. Then you can proceed to component level
troubleshooting and repair (if that makes economic sense). Whether
component level repair makes economic sense depends on the particular
piece of equipment. For most consumer electronics, it probably no longer
makes sense. But for more specialized equipment, and for out of production
equipment, it makes very good sense indeed.

In the broadcast business, we like to buy equipment in pairs, partially because
it gives us a ready testbed for board swapping to localize faults. Downtime is
at a premium, but spare boards are so expensive that keeping a stock of them
on hand is prohibitively expensive. With duplicate machines, we have the spares
at hand for testing, but get everyday use out of them as well. We tend to keep
equipment for a very long time (because broadcast equipment is low production
volume and hence extremely expensive). Often we keep it in service past the
date when the manufacturer is no longer in business, so it is important that we
can fix it ourselves.

At least in my industry, and to a large extent in amateur radio too, this
is not true. Because of the specialized nature of the equipment, and the
short production runs, replacement boards are very high cost, and have
poor availability. That makes component level repair more economical,
even though it requires people having a higher degree of technical skill.

Equipment with self-diagnostic features is welcome, of course. Anything
that helps us pinpoint a problem quicker and easier is to our benefit. But
board level replacement as a repair technique is still too expensive for
us.

> If you then design sets to be
>thrown away upon failure the design may be greatly simplified and cheapened

That's all very well for a device that costs $19.95, but you don't save much making
an $1800 radio into a throwaway item. The cost of screws and connectors and the
like aren't a significant fraction of the cost of the equipment.

>As a
>manufactuirer faced with competition which would you chose to maintain your

>for some unspecified reason.

But if it costs $1800 a pop to do that, either the customer or the manufacturer
is going to be very unhappy because one of them is going to have to eat that
cost. There's an economic point where throwaway equipment doesn't make
sense. Automakers could just weld the hood (bonnet) shut and give you a
new car (or force you to buy a new one) when yours needs a repair. But they
don't. It isn't a cost effective strategy. For a $12 toaster it may be an economic
strategy.

>The complexity and package density of modern
>kit has long since made the repair route if not unattractive but often
>completely impossible.

I haven't found that to be the case. Certainly VLSI and surface mount technologies have changed the way we work on equipment, but they haven't made it impossible to do so. In fact I prefer to work on SMD rather than thru-hole equipment. It is easier once you learn the proper techniques.

>Old kit will soon be unable to meet the increaingly tighter specifications
>and operational requirements. Certainl the dedicated amatuer building from
>scratch will note aproach any commercial set either on price or technical
>performance or finish. certainly size and weight will not be approachable by
>the amature.

That's largely true, especially in regard to packaging. Amateurs don't have access to the injection molding equipment which allows the manufacturers to produce compact, lightweight, and attractive equipment. But amateurs can still produce equipment with better performance, at least in particular areas. If we want a +40 dBm 3rd order intercept, we can build a front end to do it. The mass market might not do it for a number of reasons, not the least of which would be the size of the heatsink required, but we can.

>Specialist and cutting edge ciruitry is really the areana for the hobbiest
>of the future.

Certainly, as it has been in the past. One-off construction doesn't lend itself to mass market manufacturing methods. It is, and always has been, the province of the technician or hobbyist working at the prototype bench.

: Time will, tell.
: If More hams would take further training as suggested above so that the
: standard rises it would go some way to ameliorating the situation where type
: approval was inevitable.

: The introduction of only type approval would be a sad day IMHO, but there
: could be a centre ground where extra qualification brings extra privileges.

Perhaps this could be a way towards a progressive class structure for
licencing - much better than a once tested morse capability IMO - how it
would be tested and administered would be interesting though.

Being an amateur with some technical ability, it alarms me to see the way
that some folk "dive in" with little knowledge. Yes, I have had somebody
bring a (domestic) radio in saying "I tightened all the loose screws" :-)

BTW Gary, two things, I think that you have a lot more faith with the
designers than I do and what do you use your little brass & ferrite ended
gizmo for - other than to find out which way to turn the core? I found it a
lot easier to look at the display from a wobbulator to tell me which way to
go.

Are you saying that those of us who are full techs are incapable of operating safely on HF with more than 50 watts ? I have been a full tech since 1991, operating 100 watts safely, as do nearly all others. I have never had a single incident were my safety was in jeopardy. Why would you propose to restrict my priviledges on the basis of safety. Where is your evidence that novices & full techs are operating irresponsibly ?

Dear Newsgroup,

I would like to make recordings from a Sony SW-40 radio onto cassette tape using my Sony portable cassette recorder. Problem is, the only audio output from the radio is a 16 ohm stereo headphone jack and the recorder only has a standard microphone input jack (I'm guessing I'm meant to use a 500ohm microphone). Is there a simple yet effective way to match these two impedances? Is it just a matter of using the right transformer? Any help will be much appreciated.

Cheers,

J.Roberts

Hi there !

Is there a "blacklist" server somewhere on the internet
where we can add the dummy-op's on ?

On the weekend are always so many POOR operators
on the air. I wonder where they got their license.

I sugest a scoring system.

ï¿½1 1 point for not getting that dx runs split
ï¿½2 10 points for repeat calling on the TX of DX (see ï¿½1)
$3 5 points tuning on DX spot
$4 20 points not listening to instructions of the DX
$5 20 points for "59 59 what is your call ???"

... add your ideas .....

We could anounce the dumb op of the week ....

The full call requirement is easy to conform with . When you are calling out your "last two" to the net control op, on the first call, give your full call, and on subsequent calls to the control op (within the 10 minute limit) you can use the last two letters. That way, you have fully identified once and are covered for the next ten minutes.

Am I missing something here?

You don't have to match the impedances. Just put a 100 Ohm resistor between the
two
and experiment with the volume setting on the radio. It will work fine and
dandy.

Matching is not required in this application. The only thing that
matters is the voltage level of the audio.

The 16 ohm output probably has much more voltage available than your
microphone input needs or wants to see. A simple variable resistor, pot or
"volume control", will be all you need. Wire the control to allow reducing the
output voltage.

May I direct your attention to the fact that the physical size and the cost
of purchase are at the opposite ends of the spectrum for the tuning wand and
the wobbulator. How many hams have a wobulator? How many hams could carry
one in their top pocket? How many hams have a scope? Of course a wobbulator
alone is insufficient for good results; a good calibration oscilator is also
required.

However for an If amp where a whole series of tuned transformers are used
the wobulator will not tell you which transformer to tune the tuning wand in
conjunction with the wobbulator will make the job very much easier.

If anyone is paying for the wrecked gear then they are of course entitled to
use absolutely any method that they choose.

Hi,

Interesting ideas.... I always thought '59 59 but what is your call'
was pretty dumb, but a couple of points....

a) If it's the DX op saying it remember he has loadsa qrm and in the
clear maybe you are 59 but not with 100s of other calls on top of
you....
b) If its YOU calling the DX - wellll maybe, but sometimes the DX waits
1/2 hour before saying his call again (ie 59 to A1BCD QRZ?? and so on)-
and just as he says his call, someone tunes right on him and you miss
it....

Not all one sided, like most things....

You misunderstand; British Telescum aren't in the business of offering
decent telephone service. They make that _perfectly_ clear at every
opportunity. They're in the business of gouging great big quivering
gobbets of raw money out of the backs of hapless consumers, while
protesting about how put-upon they are by the telecoms regulator demanding
that they provide services like ADSL that might eat into their lucrative
leased line business.

"We're the phone company. You're a customer. Fuck off."

No, the blue smoke and strange smell arrived after I gave him the bill!

: > BTW Gary, two things, I think that you have a lot more faith with the
: > designers than I do and what do you use your little brass & ferrite ended
: > gizmo for - other than to find out which way to turn the core? I found it
: a
: > lot easier to look at the display from a wobbulator to tell me which way
: to
: > go.

: May I direct your attention to the fact that the physical size and the cost
: of purchase are at the opposite ends of the spectrum for the tuning wand and
: the wobbulator. How many hams have a wobulator? How many hams could carry
: one in their top pocket? How many hams have a scope? Of course a wobbulator
: alone is insufficient for good results; a good calibration oscilator is also
: required.

I suppose that I have had the luxury of calibrated test equipment since leaving school. I believe that I may have a Cossor wobbulator from my TV repair days still up in the loft. It had a tuneable and a swept (tuneable) oscillator as well as a twin crystal (1/10MHz) marker generator.

Since leaving school in the early '60's, I have worked in the TV (domestic), motor (electronic instrumentation) and communications (PMR) industries before joining the test equipment business, firstly with a well known Munich based German Company, then a large company in Chelmsford before setting up my own Company.

: However for an If amp where a whole series of tuned transformers are used
: the wobulator will not tell you which transformer to tune the tuning wand in
: conjunction with the wobbulator will make the job very much easier.

Yes, quite true. However, given the choice, I would still prefer my wobbulator. Probably a Rohde & Schwarz Polyskop IV without which I would think it "fun" to align a reference TV transmitter (R&S SBTF).

: If anyone is paying for the wrecked gear then they are of course entitled to
: use absolutely any method that they choose.

Yes, but it is a bit like watching one who puts a soda into a single malt!

: Gary7SLL, always one hand in pocket.

Good sense, and before one of the lesser minded think of an inappropriate comment, it is especially good sense with a rubber mat when working with higher voltage equipment.

Geoff

Now that is exciting news.

I have a fairly complete collection up till shortly after Jim Fisk died but then it shifted a bit, I shifted a bit, and for much of the last decade it wasn't readily available here. I've been tempted by the microfiche version, to fill in the missing issues and get things nice and neat. Other magazines, one could take out the "good" articles and discard the rest, but there never seemed to be much filler in Ham Radio. But the microfiche does require that you buy it all at one time, and I've never felt like spending that much for the whole set.

When Ham Radio shut down, and CQ bought the remains, they made a big deal of selling off the back issues. But I also remember that they carried a steep cover price, which is okay to fill in an occasional issue but not conducive to filling in complete years at one time. A while later, I contacted CQ to see if back issues were still available, and I was told that much of what was left had been discarded.
Judging from the price of QST on CD-ROM, I assume Ham Radio on CDROM will be more affordable, if for no other reason than one could buy it in stages.

Oh, they'll want to buy GTE then.

We have eight 56k analog leased lines. There's some kind of 99% guaranteed uptime (which is pathetic). Every one of them crossed from PacBell (which is OK) to GTE (which sucks donkey dick). Because their accountants don't all belong in prison, the actual accounts are all with PacBell. We had a line go out on the GTE side. GTE wouldn't even talk to us, because the account wasn't with them direct. Fine by me. They were morons anyway. Every time I talked to PacBell, they had elevated it to a higher "Escalation Level." From what I understand, they had to escalate it up to a regional VP to get someone at GTE to actually answer the telephone.

Total downtime: 3 days. Just shy of 1%. Bastards.

3684. Suggestions for casual DXpedition operation

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-07 00:00:00 UTC
From: Leland Van Koten <vankoten@home.com>
Message-ID: <384C8BE6.1312FACA@home.com>
Source record: 22780

My XYL and I will be spending a couple of weeks in Peru in late February-early March, including a week cruising on the upper Amazon in a small river boat (16 passengers and 11 crew), and I thought it might be fun to do some casual operating as OA/KE3FB. (Unfortunately, although we will be in Peru during the ARRL International DX Contest, we'll be in transit most of the time, so I don't think I'll be able to operate the contest.)

I have heard from the tour company that it should be OK to operate from the river boat, but doubt that I will get definite word on the operating conditions (where an antenna can be mounted, grounding arrangements, etc.) until we get to Peru.

The focus of the trip will be sightseeing and nature study, and I don't know how much time I'll have for operating, so I don't want to be too elaborate on what I take, and the emphasis needs to be on compactness and ease of setup.

I wondered if anyone who might have operated under similar conditions had any suggestions about what I should take (portable antenna, etc.) to provide maximum flexibility and ease of transport, while not sacrificing so much performance that it might as well be left at home.

Lee, KE3FB

> SSTV is, effectively, an SSB transmission. For band planning, I
> don't see why it needs to be treated any differently than SSB.

My point is that 14.230 or so is an established SSTV area. It would be legal but rude (IMHO) to contest on CW there. The same applies to 14.070 or so, which is an established area for PSK, PACTOR, etc.

Cheers

Source record: 22782
Cross-posted to: aus.electronics,aus.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.shortwave,sci.electronics.design

Impedance matching is not really a major issue in this case. The real issue is how to convert the voltage level from the output of the headphone jack to a voltage level that a typical microphone input expects. Thus you need an attenuator. An attenuator for this sort of level conversion would typically result from some resistors, arranged in a circuit, to give an acceptable amount of reduction of signal so the microphone input is not overdriven into distortion. A potentiometer can do this for you, but any suitable adjustment of the level would only be at one extreme end of the pot, unless you have a dropping resistor on the high level arm of the potentiometer.

Since the headphone output is typically measured in volts and the microphone input is in millivolts, you have at least a 1000:1 voltage drop requirement.

For a start try a voltage divider that has say, 100K and 100R resistors in it. Place the circuit such that the input from the headphone socket is feeding one leg of the 100K resistor, and the other leg has the 100R resistor attached to it going to ground. The microphone input can be across the 100R resistor.

By the way, you have not said whether the microphone has a balanced or unbalanced input. I'm assuming unbalanced for the purpose of the discussion.

That's OK. I had many pileups where I am the DX and a few stations are calling back, so I pick up ABC and I say "ABC you're 59" If he doesn't repeat his call while giving me report I never let him go before asking for his full callsign.

> b) If its YOU calling the DX - wellll maybe, but sometimes the DX waits
> 1/2 hour before saying his call again (ie 59 to A1BCD QRZ?? and so on)-
> and just as he says his call, someone tunes right on him and you miss
> it....

If there's a pileup on some freq. I NEVER call the station unless I know his/her callsign. NEVER EVER ! It's quite frustrating to spend 30 minutes calling someone just to realize you worked the station last week on same band/mode. Or even finding out it's another pirate like 1X or X5 or even Seborga turist.

Regarding DF7ZS's paragraph with tuning on the frequency it's really unlikely that someone will tune his radio and than say: This is A1BCD, thanks for listening my peeeeeep :-)

I'd say the whole idea is kind of nice but I guess just a small number of us (hams) has an internet access. And how many of us are really competent to judge others actions ? I think there's one think we can do about it. To forget it . :-)

I can make no bones with that, I know exactly what you mean, however to a general news group such as this where many contributors coming fresh to this arcane art it may be a more practical solution for them to get on the air to use the simpler more effective methods until such time that they are old hands and have the freedom of options.

> Thanks for the good wishes.

UR WELL COME

> Oh. By the way, I have got a (homebrew) wobbulator.

With varactor diodes so readily available I expect that there are many more wobulators about than formerly.
Of course many of the microwave enthusiasts will remember using the reflector voltage of a reflex klystron to make a wobbulator for uWave.
The RF board of some TV sets is very easily converted into a spectrum analyser. connecting it to the TV AE can reveal a lot too. :)

Agreed
I think that perhaps we have both been spoilt having such fine test gear around, but considering others in this ng that do not have such resources was to the fore of my mind.

I think from your comments that the group , (which has a number of innovators in it), might consider the design, construction, testing, and a book on how to use it to best effect, A Wobbulator and Calibrator.
Twould be nice if the instrument would also act as a spectrum analyser, not such a big step once you have the swept oscillator to act as LO for the instrument.

Gary7SLL, The co-ordination could happen on Glenn's Mailing list :)

Walt --

Thanks for the recommendations. I was thinking of one of the compact loops (such as the MFJ 1786), which offer 10-30 meters, albeit with a need to retune every several Khz on the lower bands. Have you had any experience with them. And I was thinking this might be a good excuse to purchase hte current version of the IC-706!

I'm going to try to operate some CW, but I've got to confess that my CW skills have gotten very rusty (at least at any reasonable speed).

Oooppps, fogot to mention. Most of these guys couldn't hold
a candle to the guys that work and run a Net or List operation.
It all about ego and not a thing to do with operating practice.
Watch out for these guys. Most of them sit around pulling the
wings off flys and such when they can't find someone to harass.
They buy a dog cause they don't have friends and they put milk
out for cats just so they can tie a bag to their tail. Heard them
talking about it on 27 Mhz. What a bunch of Maroons! To be honest
about it they don't know Jack Schitt.

But all these modes are so highly effective and signals down below the
noise can still be read and are so superior to CW. They shouldn't have a
problem with a little CW contesting, should they?

You know, I seemed to vaguely recall a biblical statement about "...let he who has never sinned cast the first stone..." I doubt very much if there is any ham operator who hasn't screwed up, used a list, or otherwise comitted some cardinal ham-radio sin sometime in their life.

While I fully sympathize with the frustrations caused by poor operators and deliberate jammers, I'm not so sure that the rest of you/us are qualified to judge others - at least not until we can walk on water. Sorry, but IMHO I don't think blacklists are a good idea.

73, Darrell

QST recently ran construction articles on scalar network analyzers and
tracking generators to be used in conjunction with them. With modern
chips, they aren't that difficult to build if your requirements aren't too
extreme (ie you'll tolerate an 80 dB dynamic range). That's sufficient
for most any alignment task.

The 5 in 59 is supposed to mean *perfect copy*. If you don't have
perfect copy, you can't give the 5. The 9 means oppressively strong
signal, that might legitimately be true even though you can't give a
5. So a 29 might be a more appropriate report to a Dx station whose
call sign you haven't copied correctly. The mark of a good operator
is one who can consistently and honestly give 51 reports.

I was a big fan of hr and was even published twice in it. Some months ago,
someone at CQ put out a request for a few back issues that they were missing. I
had them and offered them up, but they found them elsewhere.

I assumed at that time that they were going to do a CDROM. However, I was in
Newington in September and talked with one of the editors that was working on a

piece I did for the latest Antenna Compendium and he mentioned that they were doing the CD. That's all I know it, but I too look forward to having everything in one place. I can use the room!

me.

I've suggested that you do something that would not cost you a slight bit of effort (apart from the effort required to uncheck a setting somewhere in your mail program) and that would make a lot of people *very* happy. You decline to adress my suggestion, denying the fact that I have a valid point.

Obviously, your emotional setup is so primal that having something pointed out to you throws you into denial and antagonises you. Your only claim to relevance is to stand in the doorway, so to speak. You're the guy who just gets in the way and holds things up on the pavement, in the line at the counter, etc.

You're going to continue the same shoddy practices and keep on being a pain in the arse just because to change anything in your ways would be too much to take. The irritation of the rest of USENET is totally irrelevant to you because it's far more important to not admit that you *could* change your mail settings.

Either you're the moron I've just described or you're a troll.

Either way, you only deserve contempt.

You're a sad dead weight.

Get in the way of a truck or a bullet.

Formerly SINPO. Or:
S--Signal
I--Interference
N--Noise
P--Propagation
O--Overall

But many people didn't understand the subtle differences between interference, noise and propagation. Hence, the simpler SIO code. I'm not sure I did, myself. A brief explanation of what the three are, and why the change was made, can be found at:

http://www.rnw.nl/realradio/practical/html/reportingcode.html

> Can anyone tell me more about the SIO notation

The SIO code is a short usage of the SINPO-code.
S= Signal strength 1 to 5 . 1= You can't hear the station....
I= Interferences, from other stations and other man made interf. 1 - 5.
1= You can't hear the station you try to hear because of very strong
interferences.
N= Noise from phenomenas around or earth.1-5. 5= No such interferences.
P= Variations in the strength of the signal from the station. 1-5. 5=No
variations.
O= Overall merits.1 - 5. 1 = It's not possible to hear what comes out
from the station. 5 = The reception is excellent.

My point has *never* been about writing your reply at the beginning or the end of the post, it was about unchecking the "Include original message in reply" setting. You don't need the original message, we don;t need it so don't include it. Cheers,

I always have trouble with my Callsign especially on the air.
Saying Golf Seven siera Lema Lema on 2m sounds daft but I can garauntee thgat 80% of hams put me down as G7SSL instead of G7SLL.
It is one of those mental block things which I'm quite sure that it passes subliminally and can't be helped in normal peiople.
However when I use the phonetic alphabet on Two I collect some scornful comments.

Which ever way I play it I can't win. :(

Here quite unitnetionally I'm sure we have an example of it happening in TEXT.
This confirms my beleif that it is deep rooted.

What I need is a humourous bon mot that is suitable for broadcast on the air.
Any suggestions for a legal one?
Of course humourous suggestions would be nice to read at this time of good will; but please do not be offended if they don't get selected for the short list. :)

Message-ID: <3851031F.4270DE64@mesquiteisd.org>
Source record: 22727

VK0LD was on the other morning, working North America on ssb. I could hear him working east coast stations but I never heard him well enough here in Texas. Cluster reported him 59 in 2 land. Just wondering if any 5 land stations were able to work him that morning or if it is just my ears and antenna?

Passport to World Band Radio - 1990

Contains detailed listing of frequencies and broadcast times of international shortwave broadcasters. Also contains equipment reviews for many shortwave receivers. This book is in near new condition, but there are some markings in the broadcast time and frequency listing section. Equipment reviews include the Icom R9000, NRD-93, Kenwood R-5000, NRD-525, Icom R-71, Lowe HF-225, Yaesu FRG-8800, Kenwood R-2000, and many portable radios.

We also called it SINFO ,and it makes it easier;

S = SIGNAL
I = INTERFERENCE
N = NOISE
F = FADING
O = OVERALL

$6 10 points for DX stations who work more than two QSOs without IDing.
(in which case $5 doesn't apply to those who work him)

I have used a magnetic loop. I would say the results were comparable to what I'd expect from a loaded whip (mobile antenna) at the same power level. On the plus side for this application, no ground is necessary (though that may not be a problem depending on the construction of the ship); on the minus side, they're pretty expensive.

Also, the bandwidth is considerably *narrower* than that of a mobile whip. For example, my 20m whip tuned to 14030KHz is usable with a 2:1 or better SWR throughout the CW segment. The mag loop, on the other hand, was only good for *maybe* 10KHz bandwidth at 2:1 SWR. (on the upside, you didn't have to worry about front-end overload from someone 50KHz up the band<G>!)

SB DX @ WW $OPDX.439
Ohio/Penn DX Bulletin No. 439

The Ohio/Penn DX PacketCluster
DX Bulletin No. 439
BID: $OPDX.439
December 13, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2WE, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, W4VHF, KH6BZF, N6RT, W7TSQ, K8WK, K8YSE, N0JK, DJ5AV & DX News Letter, ES2NA, I2YSB, LU3FP, LU4FPZ, OH1EH, OH2BR, OH4MFA, ON4ATW, ON4UN and SM0BFJ for the following DX information.

IT IS WITH GREAT SORROW TO REPORT..... The DX Community learned this week that Charles J. Harris, WB2CHO/VP2ML, (known by many as Chod) became a "Silent Key" (SK) on December 8th. In Santa Rosa, California, the 50 year old Chod died of complications from a severe heart attack he had suffered in early November. Many will remember Chod for his active roles in the DX Communty as DX columnist for "CQ Magazine", the orginal editor of the "DX Magazine" and "The DX Bulletin" and an ARRL HQ staffer. He was also an active DXer from exotic places. Mostly, the DX Community will miss Chod's presence at the "Dayton HamVentions" DX social gatherings. OPDX and its readers would like to send out our deepest sympathy to Chod's family. Chod Harris, a DX icon, will be surely missed..... OPDX InterNet Subscribers will receive the special ARRL bulletin about Chod Harris as an additional bulletin.....

OPDX has also learned that Tiit, ES7RE, President of ERAU, became a "Silent Key" (SK) on December 7th in a car accident in Finland. We extend Tiit's wife and the children our deepest sympathy and strength needed to get through the coming days and weeks. Members of ERAU and the Board of Directors state that "Tiit will always stay in our memories as a true gentleman and a great friend!"

PROPAGATION GURU KH6BZF STATES "The ARRL 10-MTR Contest should be better than last year." Lee, KH6BZF, reports that the solar flux index (SFI) should climb to near 200. Expect High Normal (HN) to Above Normal (AN) conditions to exist the 11th and 12th. On Sunday, the band is expected to be better than the day before.

3W, VIETNAM. Steve, K2WE (aka 3W6WE & XU2WE), reports that he will return here in Febuary or March, and he has permission from Hau, 3W6LI, to operate from his farm in Vung Tau, about 55 miles from Saigon right on the South China sea. He will make every attempt to operate on 40, 80 and even 160 meters if he can get the license.

7S, SWEDEN. Rune, SM6COP, has obtained the Swedish contest callsign 7S5Q and Tord, SM3EVR, has received 7S3E (which will probably be used in the ARRL 10 Meter Contest. As reported earlier, the prefixes 8S, SM, SK and SL are being issued with one letter suffixes for the SM operators for contest activity.

8P, BARBADOS. Jon/N0JK and his father (William/W0FN) will be here until December 14th from the 8P9Z station. There will be a special emphasis on 6 meters using 100 watts into a 3 element yagi. They also plan to operate in the ARRL 10 Meter Contest. Callsigns are pending as this bulletin was being written.

9N, NEPAL (Possibly, XW - LAOS). By the time you read this, Charlie, K4VUD, should be in Kathmandu and will be active as 9N7DU for 30 days. He stated this week that he was going to try to be active in the ARRL 10 Meter Contest. The "DX News Letter" reports that Charlie may also make a one week trip to Laos.

9N7, NEPAL. "The 59(9) DXReport" reports that Lawrence, W8NRB, has been active as 9N7RB since mid-September, mainly on 20-10 meters SSB. He will be there for some time. QSL via W8NRB at the W8 Bureau.

9U, BURUNDI. QSL Manager Leif, SM0BFJ, informs OPDX that Gus, 9U5D, will go QRT in the morning of December 11th. He will be on vacation at home in Sweden for a month (signing SM5DIC). He will return to Burundi on the 10th of January for another 3 months assignment.

HI, DOMINICAN REPUBLIC. Steve, K8WK, reports that he will be here from around December 23rd through January 2nd. He plans to operate as HI8/K8WK. Steve was assured a license by the communications authorities and that the license would be in the mail and a copy will be kept there "just in case." He states that it has taken him since June (1999) to obtain this license! Steve will operate mostly CW and mostly on the WARC bands, conditions permitting. He adds, "Please be patient with my poor CW and it will be the first time I've ever been on the other side of a pile....." His equipment will be an ICOM 706MKIIG (running 100 watts) and a Gap Titan all band vertical. Steve will bring enough wire for 160 meters but doesn't know if he will have the support to allow use of the wire. He will try and operate as much as he can outside of his family responsibilities as he is on a vacation. Steve will be staying at a resort in Samana Pens (NE part of DR). He is willing to make skeds for the needy. His E-mail address is: litwins@badsector.com QSL to his home callsign at:
Steve Litwins, 2398 Woodbine Dr., Crestview, FL 32536 USA (USA needs return postage and all others need 1 IRC or Green Stamp.

LT5, ARGENTINA. Look for LT5F to be active in the ARRL 10 Meter Contest as a mix mode (CW/SSB) on High Power. Operators will be Seba/LU4FPZ,

Ariel/LU6FUQ and Bob/LU2FA. QSL contacts for the CQWW CW and the ARRL 10 meters Contests via LU4FPZ, 1 de Mayo 2128, CP 2000, ROSARIO-ARGENTINA.

Look for Tony/LU2FFD and Hernan/LU3FP to be active from LU4FM (Radio Club Rosario) during the ARRL 10 Meter Contest on both modes SSB/CW. QSL LU4FM to: BOX 263, (2000) Rosario Argentina.

MORE YEAR 2000 SPECIAL EVENTS STATIONS......
Members of the Carolina DX and Roswell [NC] DX Associations will be on the air during the month of January using the callsign WY2OOO. This operation will begin at 0000z, January 1st (2000). All bands will be activated from 160-2 meters. QSL Manager for the WY2OOO operation is via K4MQG. SASEs are requested; all cards received through the Bureau will answered.

The Old Barney Amateur Radio Club will be operating special event station W1K from December 19th through January 2nd (2000) to celebrate the "END OF THE MILLENIUM!" Activity will be on all bands CW/SSB. A special QSL will be available via (SASE appreciated): Bob Schenck, N2OO, P.O. Box 345, Tuckerton, NJ 08087, USA. For a special certificate in addition to a QSL card, include a 9x12 SAE with appropriate return postage or IRCs.

OH0, ALAND ISLAND. Ari, OH1EH, reports to look for OH0Z to be on the air during the ARRL 10m Contest as a Multi/Single, CW/SSB. There will also be some activity on 160 meters CW around 1832-1835 kHz between 0400-0700z both on Saturday and Sunday. QSLs via OH1EH: Ari Korhonen, Kreetalank. 9 as 1, FIN29200 Harjavalta, FINLAND.

PACIFIC TOUR (A3, FO, FW, KH6, ZK1). OPDX has been informed that Adriano, IK2GNW, will be leaving for a six week trip in the Pacific in the new year. He will start his operations on January 20, 2000, from French Polynesia. The first week he will be in French Polynesia signing FO0PRE (still unconfirmed). The second week he will be active from Austral Islands signing FO0PRE (also unconfirmed). Adriano will travel to the North Cook Islands during his third week and use the callsign ZK1NW. Look for Adriano to sign A35NW from the Tonga Islands during the fouth week. During the fifth week he will operate from Wallis & Futuna Islands signing FW/IK2GNW. To end his Pacific tour, he will sign KH6/IK2GNW from Hawaii during his last week. The exact dates will depend on the local flights. He will be active on all bands CW/SSB/RTTY. QSL via I2YSB by the bureau or direct to: Silvano Borsa, viale Capettini 1, 27036 MORTARA(PV), ITALY. For more complete details, check out the Web site at: http://digilander.iol.it/i2ysb

PY0, FERNANDO DE NORONHA. Iwao/PY7FT will visit the island again with his friend Nori/JA1WSK beginning December 21st and operate until December 28th as PY0FT. Nori is an expert RTTY operator and he will concentrate his activity on that mode (this includes PSK31). Look for him on 14084, 21084 and 28084 kHz. Iwao will operate SSB as well as SSTV. Look for Iwao on the higher frequencies, but he will try the low frequencies. QSL via JA1ELY.

QSL INFO AND NEWS.......
Jukka, OH4MFA, was operating from Thailand (HS) with the callsign HS0/OH4MFA for several days during his holiday between November 10-26th. He logged 571 QSOs on 40, 20, 15 and 10 meters, mostly on CW. QSL info for this operation is via OH4MFA and bureau cards are preferred. Jukka will be going back home to Finland, he states, probably in January 2000. So QSL cards will not be answered before that time. Jukka states, "Many thanks to R.A.S.T. and especially HS0AC station managers Ray, HS0/G3NOM and Winit/HS1CKC for the possibility to operate from HS0AC clubstation. It was also pleasure to operate in the CQWW CW contest from the HS0AC M/S team!"

Bob, W7TSQ, QSL Manager for Wis, YB0AZ, reports/advises that the best way to get a QSL is via W7TSQ. Bureau cards are all answered by Bob and cards to Wis via the YB bureau just do not make to him, so PLEASE, send any requests for QSLs to W7TSQ. Bob states that he does answer bureau cards, though the quickest way is SAE plus postage! Repeating, Wis requests NO BUREAU cards to YB bureau.

Doug, N6RT, reports that the following new/updated logs are now available at: http://dx.qsl.net/logs
DS5DNO (thru 11/14/99) NH0E (thru 11/28/99)
DU1ODX (thru 11/29/99) T32PO (thru 11/30/99)
GD4UOL (thru 11/30/99) VQ9CV (thru 11/26/99)
HL5FUA (thru 12/5/99) WL7M (thru 12/04/99)
ID8/IK8VRH (IOTA EU-144, 08/99) XX9TDX (thru 12/01/99)
KP4AH (thru 11/28/99) YC0LOW (thru 11/27/99)

JD1BIC and JD1BKR are now members of JARL and QSL is OK via bureau but direct QSL routes are listed below:
JD1BIC - Shiro Hazama, 3-7 Taura, Yokosuka, 237-0075 JAPAN
JD1BKR - Katuya Sawada, 43-1 No.2 UsogIgawamura, Ominato, 035-0096 JAPAN

SPECIAL "OT" PREFIX. The Minister of Telecommunications has allowed the Belgian radio amateurs to replace their normal "ON" prefix with "OT" prefix from 2300z December 3, 1999, until 2300z January 5, 2000. This is to celebrate the wedding of HRH Prince Philip and HRH Princess Matilde. QSL cards can be sent to the only IARU affiliated QSL bureau in Belgium at: UBA QSL Bureau, P.O.Box 900, 9000 Ghent Belgium.
Look for Theo, ON4ATW, to be active in the ARRL 10 Meter Contest as OT4ATW. Theo states that all QSOs will be confirmed via the bureau with a special QSL card.

VP6BR PITCAIRN WEB PAGE ACTIVE. Lech/LA7MFA and Jukka/OH2BR have announced that the VP6BR site is now operating at: http://www.qsl.net/oh2br/
The Web has updates/information on the upcoming Janaury 2000 operation. Jukka will be active as VP6BR to celebrate his 40 year long Amateur Radio career. Activity will be on 160-6 meters CW/SSB/RTTY. QSL via OH2BR.

XX9, MACAO. Moto, JK2PNY, will visit here again from December 15-26th. Moto has the license XX9TSS, but this time he will be using XX9SAR instead of his own callsign. Activity will be on 40-6 meters, SSB/CW. The special

callsign XX9SAR will be used by all Macau stations to celebrate the restoration of Macau. For this reason, it is important to copy who is the operator or QSL manager. Moto will send all QSLs automatically to the bureau until August 2000, but if you need a QSL quickly try direct: Motoi Kawatsu, 17-15-205 Nishisugamo 3, Tokyo, 170-0001 JAPAN

YS, EL SALVADOR. The "DX News Letter" reports that Markus, HB9KNA, plans to be active now through January 12th. His callsign is not certain yet. He will only be active on SSB and on 80-6 meters (also the WARC bands). He will use a 2 element quad for 20-10m and verticals for 80/40m. QSL via HB9KNA.

My VK3SB (spelt out) often gets interpreted as VK3KB. I'm not sure
how sierra -> kilo[watt], but it happens quite a lot.

None that I am aware of.... But you can download a program called Atom Time
from www.download.com and/or www.shareware.com that will keep your PC clock
accurate with the US Time Center in Denver, CO.

3749. Best way to QSL?

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-12 00:00:00 UTC
From: Darren Ream <reamesq@swbell.net>
Message-ID: <38548355.18F186F0@swbell.net>
Source record: 22658

Last month I finally passed my code test. Now I am in the process of learning how to DX and QSL. I have cards and am experienced with the particulars of domestic QSLing, but how do I QSL internationally? After some independent research on the subject, it appears there are several methods of QSLing:
1) Using the ARRL outgoing QSL service. I know this is slow, which is OK, but I'm concerned that without a stamp or return postage many DX stations won't QSL. If I use the QSL service, should I be concerned about a large percentage of stations not QSLing because they didn't receive return postage?
2) QSLing directly using a callbook address, if found.
What is the custom with regard to return postage when QSLing foreign stations? How do you include return postage since other countries mail service won't accept a foreign (i.e. U.S.) stamp? with an "IRC"? what is an "IRC"? Do most countries accept IRC's?
What general advice does anybody have on how to best QSL DX stations? I'm in need of some "Elmer-ing" here.
Thanks,
Darren, W5DKE

I'm not surprised if people get confused if you say 'lema'. I thought
that the correct phonetic was 'lima' (as in Lima, capital of Peru). As
they say in the NE of England, "Yuh hev tuh laarn hoo tuh taak propper"!

yus, now I feel a pratt, (for an old man that's rare), Ta.

Perhaps I should have used the double 'e' < Lee'ma >

The phonetic spelling in the Dictionary is actually Le'ma
(the 'e' has a bar over the top, as in bar BQ)

3757. Marconi Anniversary

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-13 00:00:00 UTC
From: Leland Van Koten <vankoten@home.com>
Message-ID: <38545F22.E8FB7615@home.com>
Source record: 22659

I hadn't realized until a little bit ago that 12/12/99 was the 98th anniversary of Marconi's sending the first transatlantic message (such as it was -- the letter "s"). I hadn't realized it in part because I was too busy working stations in this weekend's 10 meter contest, in which with only casual effort, 100 watts, and a low wire antenna, I worked stations on every continent and in every part of the world except South Asia.

Sometimes, it's nice to sit back and think about just how amazing a hobby this is, and how incredible the things that we take for granted really are. No matter how often I do it, I STILL have trouble believing that with no more power than it takes to light a decent sized light bulb, I can produce a signal that enables somebody half way around the world to hear my voice. Most of the most forward-thinking people in human history could have scarcely imagined such a thing.

And what an amazing century this one has been! Within the first 5 years of the century, not only did Marconi send his famous message, but the Wright Brothers had their first flight. It's hard to believe the 21st century will begin with anything nearly so dramatic.

>
> 'Barbecue', surely?

Actually "Barbecue" doesn't have a bar over the top,
but every Ham Shack should.

The convention of putting a Bar over the BQ is an evolution of the practice
of branding irons used on the cattle ranches of America.

Snippet from Bookshelf (c) MS
1853, Texas cattleman Samuel A. Maverick, 50, receives an anonymous note
telling him to look after his strays on the Matagorda Peninsula or risk
losing them. Maverick accepted 400 head of cattle in payment of a debt in
1845 and has never bothered to brand the animals on his 385,000-acre ranch,
but he sends down a party of cowhands who round up about the same number
that were turned loose on the peninsula 6 years ago, sells the cattle to
Toutant Beauregard of New Orleans, and retires from ranching. The word
"maverick" will become a generic name for unbranded cattle and for political
or intellectual independents who do not go along with their associates.

Hello Tom, I think the other guy that replied to your question thinks
you are someone other than you are. Thought it was funny myself. But
on to your question.

Anyway, Tom old boy, looks like you might be out of luck or
have to wait on him a bit. Some of the guys on the DX-LIST
at egroups (my self included) gave him a hard time about his
pileup skills and attitude toward the DXers trying work him.
So he got P.O.ed about it (not to be confused with Post Office)
and pulled the switch. I got the last one on SSB so big whoop tee doo.
But let me be honest about my situation. Even if I need one for
a new one on something I'm not going to work someone that has
a problem. I'll try and work a newbee or a "not so fine"
Op and such like that, but not anyone with an attitude problem
sending "LID UP UP" and other such crap. I'll pass on those types
and wait till the next one. And if there isn't a next one, then
fine with me. I have 319 confirmed and never sent in to the DXCC.
I don't need their certificate to tell me what I have worked.
But I digress.

The guy let a few people rattle his cage and has decided to take
it out on everyone. Says enough for me. But check out the following.
I highly recommend you visit the following two web sites to get a
handle on what happened.

First check out VK0LD's web page at:
http://www.geocities.com/vk0ld

After that, go get a good laugh on the situation from
one of KH2D's pages on the subject. (make sure and check
the links at the bottom for the picture, I almost feel out of
the chair laughing)

http://www.guam.net/home/kh2d/vk0lid.html

3761. Re: Best way to QSL?

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-13 00:00:00 UTC
From: Leland Van Koten <vankoten@home.com>
Message-ID: <3854E9F7.94341169@home.com>
Source record: 22663

Darren --

Welcome to the hobby, and congratulations.

With respect to QSLing direct, probably the most common way is to send a self-addressed envelope and $1 with your QSL. (This is what some DX stations mean when they refer to a "green stamp.") Do NOT put callsigns on the envelope, since that's a tip-off to postal workers in the recipient country that there might be money inside.

I've never had a problem getting one back using that method from Europe or other reasonably developed countries. (In fact, I've occasionally gotten the QSL back with my $1.) Unfortunately, some parts of the world have postal services that don't always deliver mail without opening it, and a few (but amazingly few) hams will gladly pocket your dollar and not return a QSL. At least in my experience, this is a particular problem with some of the countries of the former Soviet Union.

The IRC is honored in essentially ALL countries, but in many of them, it's not enough to pay for return airmail -- only surface mail, which is SLOW internationally. If you want return airmail, it's best to include a couple of them. I discovered this when I got an airmail QSL back from a ham in a developing country with a very nice note explaining the facts of life to me. At least the IRC is tougher to turn into cash, though, and it seems there are less problems with some of the postal services in the developing countries.

There are also some outfits that sell foreign postage stamps. I've never used them, and wonder how they keep up with the price of postage in countries experiencing double or triple digit yearly inflation, but I've heard they are a possibility as a last chance.

Finally, many DX stations (especially in countries where they get lots of cards) have QSL managers in the US, Europe, or Japan. There are several sources for these listings, including a couple of them on the Internet.

Source record: 22664

Hi Darren -- everything you want and need to know about QSLing is at URL:
http://www.ac6v.com/pageff.html#PRIMER
It is a collection of advice from DX Managers, DXers, DX Stations and the DX Reflector and should answer your questions.

I use the ARRL Outgoing QSL Service for the more common countries -- most of Europe, SA, VK, JA etc. No postage required for returns as the DX station submits their cards to their bureau. This is slow but if you work several from each country -- almost certain to get at least a couple back. With current postage rates and return postage -- you can easily spend $200 for DXCC or $600 for Honor Roll going direct -- thus the Burro is a real money saver.
See URL:
http://www.ac6v.com/page2.html#ARRL

For rare DX or the one ya gotta have -- QSL direct via callbook address or their manager. For Manager lookups -- see URL:
http://www.ac6v.com/page2.html#DXM

A single IRC will suffice in most countries -- a few require more -- again see URL:
http://www.ac6v.com/pageaqsl.html

For info on IRC's -- see URL:
http://www.autographcentral.com/faqs/irc_faq.html

Also a Green Stamp will suffice in most countries, however some countries get upset with US currency coming into their country -- gets the Amateur there in trouble. Again see URL:
http://www.ac6v.com/pageaqsl.html

Hope this helps

Thanks to everyone for the numerous informative replies. After the ARRL
10-meter contest this past weekend, I have many stations with whom I'd like
to QSL and I wanted to make sure I did it right. No sense in spending
hours and hours not knowing what I was doing (I do enough of that already
:-)).
I am very happy to be joining the ranks of such genuinely helpful folks.
See y'all on the bands.

Cor! that'd make you spit.

Most men think a device for roasting meat is an XYL

Should that be "a XYL" OR "an XYL"?

Hello,

I recently added a PREFIX look-up form on the QSL page. If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

You are invited to http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

73!

3771. Re: THE FCC SAYS NO MORE LAST TWO

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-14 00:00:00 UTC
From: Michael Taylor <nf4w@mciworld.com>
Message-ID: <54t54.671$sg.110029@pm02news>
Source record: 22673

Quoted from The ARRL Newsletter Vol. 18, No. 46 Dated 11/19/99

Hollingsworth : "All we said was that if only the last two letters are
given,
it doesn't meet Part 97," he said. He pointed out that if a calling station
using an abbreviated ID is never acknowledged and given a chance to
give a complete call sign, a legal ID would be lacking for that
communication.
To be strictly legal, stations using a suffix-letter ID always must identify
within the first 10 minutes of the communication (and each 10 minutes
thereafter) with a complete call sign."

"Hollingsworth this week also reminded net control stations not to encourage
rule violations by requiring check-ins to use two-letter IDs without
allowing a legal ID at some point within the time limits of the rules."

If you read what is stated (and between the lines), as long as the stations
are
allowed to identify themselves within 10 minutes it meets the requirements
as
set forth in the law...

One of the things that ham radio teaches is patience. Some cards via the bureau will literally take years.......but the price is right. For some of the rarer countries keep an eye out in the various mags and on the web for qsl managers. When going thru a manager it is usual to include an SASE or a green stamp with SAE, otherwise the manager will send the card back thru the bureau. IRC's are a pain in the rear. Not all post offices sell them, some that do don't know where to rubber stamp them and they provide only for ground mail. If the country worked is a DXpedition to the really rare ones, always send a green stamp to help defray their expenses which can be considerable.

I have found that the best thing is to work as much DX as you can and send the QSL via the bureau. Review the status of the returns after a few months and resend your card via a different route for the non-returns that you really need. No use sending $$ to the garden variety DX stations....just be a little patient.

> CU in XXI Cent. (after 1.1.2000. at 0:00)

You still have to wait 383 days for that. As no Year 0 (zero) existed,
the 20th Century only will be completed on 31 Dec 2000, 24.00 hours.
01 Jan 2001, 00.00 hours will mark the beginning of the 21st century.

01 Jan 2000 marks the beginning of the last year of the 20th Century, and
of the last year in the second millenium.

It is just like taking a loan of 2000 dollars. This loan will be deemed to
be repaid only after you paid the last cent of the 2000th dollars, not
after the 1999th dollar....

Nonsense, like coming New Year's Eve marking the start of the 21th century
does not get any truer by everyone brainlessly repeating that nonsense.

> But, if I'm following the conversation, than I don't want to read what
>was just said. I've already read it.

Assuming that previous article you read is the article responded to.
What if the situation is that an article, let's call it A, has two
responses, A1 and A2. A1 have further given rise to a 30 article
subthread. In a threaded newsreader you will read A, then A1, then
the 30 article subthread, which may drift into something completely
different, and first then do you get back to A2. What are the odds
that you remember exactly what A was about? You need some qoutes
to return you to the context.

In any newsgroup with a bit of discussion, the above is quite
common.

> So, my argument is that quoted material should be placed at the bottom
>of a message (unless you are commenting on pieces of a long message,
>such as this one).

It seems odd to have to different qouting styles, depending on the
length of the article. Why not have one, consistent style?

And if you're only responding to one part of the posting, but not
the whole, then you have to either write a summary of what you're
responding, or put your response beneath the qouted material.

> The only person this puts out is the person who
>joins a conversation in somewhere in the middle and perhaps did not read
>the previous message. However, in that case, he can just scroll down to
>read the quoted material.

And read the qouted material - backwards.

When I look at an article, I start from the top, as I do with any
written material. My first action isn't to scroll down to see if
there's anything down there that I should read. It would be like
having a serial in a magazine, where the "the story so far" bit is
placed at the end of chapter.

> In fact, I have said in previous messages that I agree that quotes
>should be short. Perhaps you would be better off complaining about
>large quotes to someone that disagrees with you.

I can't remember any cases where a end-of-article qouter have
bothered to edit his qoutes. I'm sure that they're out there,

they are just very very rare. The standard is to just include
everything, eventually leading to enormous blocks of material,
that nobody reads.

Going back to the subject line, I offer the following Outlook
setup screen (8940 bytes) http://home1.stofanet.dk/rorschak/outloot.gif
Notice the small icons on the right, describing how the
choosen style looks (the blue text is original material, the
grey qouted). It's quite clear what style they expect you to
use.

When closing that window, I got the following warning (3971 bytes):
http://home1.stofanet.dk/rorschak/outloot2.gif
How is a newbie supposed to get a proper start on Usenet,
when Microsoft, the market leader, tries its best to point
him in the wrong direction?

Of course, my dear friend!
If you`ve read my message carefully, you could see what am I talking about.
Unfortunetly, on the end of the message, I put WRONG date :((((((((((
I allways telling to my neighbours, friends and others that new century
began
just after midnight of 31.12.2000.
By mistake I wrote 2,0,0 and than zero :(((((((How stupid of me
((:))))

I have a big argue :) with a few friends of mine, just about it.

I also think that 1.1.2000 - new millenium - is nonsense!

We call it here in YU: "lapsus tastaturis", something like "keyboard
mishmash" :)) :((

I am HAM and proud of it! And not "some" HAM - I adore CW and SHORT waves!!

I think you`ve got it.

Anyway...

Best regards from yugoslavia, Merry Christmas, Happy New year, Have a long,
peacefull,
worth life, and of course.... BEST DX!!

See you around after New Year, on SW...

Loves you everyone

Hi Lee -- try URL:
http://www.ac6v.com/pagev.html#PR

One is a type in, the other is a mega list -- just use ur browser "Find" command
and type in the prefix. Control F works on my browser for quick find also.

Several others there as well.

3784. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <83a45f$74k$1@news.hawaii.edu>
Source record: 22686
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the

group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Hmmmm!?!? You don't suppose they started counting the days, then when they got around 30 they said "awful big number, let's group them by months" and so it went until they had 12. Then they said "let's group them by years". It went this way until they got to 100 where they said "let's group these by centuries".

Most people don't say they have been alive 50 years when they have only been on the earth for 49......

It would be better for most of us were your conclusion correct since out of work programmers and their Y2K diversion have required most of us to be scheduled to work over the December/January transition to observe this non event........

Take a look at his webpage, it has been updated today.

BTW, one of his comments on the page: "SSB sched went fine, apart from the odd S. American & Italian. CW sched was a circus.. Only the Nordic countries, Switzerland & Scotland seem to know their own prefixes. There are more stns in Kevin's list than in the log."

Well, there are 16 stations listed in "Kevin", aka killfile. This means he worked less than 16 stations then, doesn't it? Congratulations, Alan!

Yes, It is called a killfile. You can
mark a user or subject to be auto killed on
most news readers.

It simply makes them invisible to you.

The details of how depend on your reader.

With some of the flak he's had on the Internet, I'm not surprised he's
fed up. Frankly I don't think any public criticism is justified.
Think it if you want, but I see no need to publish it. He's there to work,
not to DX. This is just a hobby, for him and for the rest of us.

>01 Jan 2001, 00.00 hours will mark the beginning of the 21st century.

It's said that Christ was born 1 BCE (not 1 AD). The *beginning* of 1 AD marked one year after His birth. The beginning of 100 AD was 100 years after His birth. The *beginning* of 2000 AD will be two thousand years after His was birth. The year 1 BCE is taking the place of the absent Year Zero:

```
//-----+------+------+------+------+----//
1BCE 1AD 2AD 3AD 4AD
```

>01 Jan 2000 marks the beginning of the last year of the 20th Century, and
>of the last year in the second millenium.

Only if Christ was born at the beginning of 1 AD, but it's claimed He was born a year prior to that, which means at the beginning of 1 AD, He was already one year old. At the *beginning* of 2000 AD, He will be 2000 years old: 1 BCE to 1 AD is one year, 1 BCE to 2 AD is two years, 1 BCE to 3 AD is three years, ..., 1 BCE to 2000 AD is 2000 years.

>It is just like taking a loan of 2000 dollars. This loan will be deemed to
>be repaid only after you paid the last cent of the 2000th dollars, not
>after the 1999th dollar....

And if you continue paying, the first penny you pay after that, $2000.01, will be equivalent to the first day of the Year 2000, i.e., 2000/1/1.

Again, for counting purposes, 1 BCE is playing the role of the non-existant Year Zero, from where our count would have begun.

Emotions aside, study the above number line.

Merry Christ-Mass,
Jeff KH6O

Rough, agreed. (but justified - maybe if the DX said exactly what they feel about out-of-sequence callers more often, we wouldn't have as many out-of-sequence callers!) Arrogant, no, I don't know about that. Unusual procedure, definitely! Maybe that's good, if it keeps us on our toes.

I suppose if you never spent much time working DX, and then suddenly found yourself in an incredibly rare place, you might actually believe "last two" is the right thing to do. It's unfortunate that the procedure has become that far entrenched.

I really liked 9X5HG's approach to mega pileups for those who don't want to fight them. Find CQers & answer them. On an open band, you'll find plenty of QSOs - and you don't have to deal with pileups.

Hamish,

First--my post is not criticism, rather a comment....I realize he's working out there. (otherwise I'd complain about the 1000-1100z operating schedule for North America--the sun's not even up until 1330!)

Personally, I like the way he controls pile-ups. However, he's brought much of this on himself through his webpage. While I had to laugh at the "peguinator", I'm sure it irritated a bunch of people that figure the time spent making that page could have been spent on-the-air.

I've not bothered to try to work him as I thought he'd be operating until the end of 2000. I figured I'd let the mayhem subside and work him later. I guess I made a mistake!

I realize he's a casual operation rather than a DXPedition. My comment remains that perhaps it's time for the ZL8/ZL9 guys to go out there and knock out 60-80 thousand QSOs.

Happy Holidays!

73 de Tom, K4NR/5

THE DIEHARD DXER

5:00am - Fellow DXers arrive. Crawl out of nice warm bed.
5:30am - Toss all gear into truck
5:45am - Get gear out of neighbor's truck, and put it in yours.
6:00am - Get speeding ticket while hurrying to get to the mountain.
7:15am - Get to "the site," near top of mountain.
7:16am - Start unloading gear.
7:20am - Get poked in eye with 20M vertical by fellow DXer.
7:50am - Arrive at hospital to get eye patched up.
8:30am - Get another speeding ticket while heading up to site.
8:45am - Arrive back at site. Unload antennas yourself this time.
9:45am - Hike up to mountaintop. Pass out from exhaustion.
9:50am - Wake up to smelling salt, and laughter from fellow DXers.
10:00am - Put up antennas, and set up rigs.
10:15am - Fire up rig, call CQ for half an hour; no replies.
10:46am - Hook up coax to rig...
10:48am - Realize that finals are wasted in main rig.
10:50am - Hook up back up rig, this time with coax.
11:00am - Yell CQ, rare VP8 comes back; antenna falls down...
11:15am - Wake up to smelling salt, fellow DXers shaking heads.
11:30am - Guy Antennas.
12:05pm - See long list of QSOs made by fellow DXers.
12:06pm - Notice rare VP8 in fellow DXers logbook.
12:07pm - Beat fellow DXer over head with logbook.
12:09pm - Restrained by rest of DXpedition team...
12:30pm - Back to rig for another attempt.
12:35pm - Nearby lightining strike kills receiver. Notice wet pants...
12:36pm - Look for shelter
12:38pm - Find Cave!
12:41pm - Watch antenna get struck by lightning while hiding in cave.
12;42pm - Wish it was fellow DXer's antenna, or him that was struck...
12:45pm - Realize you're not alone in cave...
12:46pm - Pick up rally big rock...
12:47pm - Mauled by large angry bear.
12:50pm - Get pulled out of cave by fellow DXers.
1:05pm - Finally get talked into receiving medical treatment.
1:30pm - Arrive back at hospital.
1:55pm - Receive series of painful rabies shots, and multiple stitches.
2:30pm - Get out of hospital and return home.
2:35pm - "Explain" stitches and eyepatch to wife.
3:00pm - Realize gear is still up on mountain, with bear.
3:01pm - Wish fellow DXers were still up on mountain, with bear...

3:03pm - Consider taking up drinking.
7:00pm - Get phone call from DXer buddies.
7:05pm - Agree to go on DXpedition again tomorrow...

This is not my original. I saw it in a Feb '98 issue of World Radio and thought it would be neat for it to be sent around again.

Have you seen VK0LD's web site at http://www.geocities.com/vk0ld/3.html ?
I may be wrong, but don't you think that is a little bit too rough aproach
to the DX community if not even arogant ? And "two letters" rule, hmmmmmmm
....
The fact he's going to QRT at the end of the year doesn't make me feel sad
at all ...
Better so!

Someone sugested ZL8/9 team should go there, instead - I find it nice idea.

Opinions ?

3813. Help with Italian 2M Repeaters

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-19 00:00:00 UTC
From: ac6v <ac6v@ix.netcom.com>
Message-ID: <385D6AAA.DE9A042@ix.netcom.com>
Source record: 22565

My family and I will be visiting Florence, Venice, Sorrento, and Rome
next year. I have the list of Italian repeaters at URL:
http://www.qsl.net/pd2mey/

But would appreciate any recommendations as which repeaters to program
into my Alinco DJ-S11 along with any PL and Tone Bursts required -- for
the areas I will be visiting.

I have all the papers for operating under the CEPT agreement, see URL:
http://www.arrl.org/field/regulations/io/

I assume that when transmitting in Italy, I identify as I/AC6V
Hope that is correct.

Thanks for any help

I do think the blackbanned list on the web page was a bit much,
just as I find "VK0LID" pages a bit much. Your comments above are very
fair.

Cheers

>S9+30dB. BTW, did you work 3C0R? I did. :-)))

Never assume that since you haven't worked the DX, the DX can't hear.
Sometimes it's safe to assume that you could be QPW - piss weak.
Don't tell me you are one of these guys who measures his manhood by what
he's 'worked' with his radio ? Wow. I'm impressed.

>ROTFL!!! I hope you noted *my* copyright notice at the bottom of the
>VK0LiD picture which you took the liberty of using on your 'hate'
>site!

Deja Vu. I should have known that if there was a picture of a guy on
3,000 web sites with his head up his ass, it had to be you !!

That's not a hate site, Walter, that's an educational site. But then I guess
you have proven many times over with your postings here that you are
well past the point where it would be possible to educate you, right ?

Anyway, keep up the good work, what would life be without your daily
wit in this newsgroup. I enjoy reading it even though I don't comment
on most of it, your stunning wit just leaves me speechless most times.

Keep up the good work with that QRP stuff too.....

Happy Holidays,
73, Jim KH2D

What you think of idea of realization of radioexpedition on Southern Altai?

Southern Altai - highland is on the board of Kazakhstan, Russia, China and Mongoly.
Land of lakes and waterfalls, mountain taiga and stormy rivers, deserts and snowy peaks...
In time of Soviet Union this territory had been absolutelly inaccessible for foreign tourists (and furthermore for radioexpedition) - in locale
It is not enough of ham stations.

The base camp of expedition is planned to place in region by highest Fastigiums of Siberia and Altai of a mountain Belooha, lake Markakol and Zaisan.

If you were interested by our proposal, we can be found on ranges 21Mhz, 28Mhz call sign UN8JZZ (collective radio station)

Hi,

I have a TA-53M since 1994. I'm very happy with it's performance. Not
being able to put up full size beams for all bands and without hope of
getting my antennas up to a 'reasonable level' it was the best I coul
do.
Putting the antenna together was no big deal. all is predrilled and
colorcoded so after sorting everything and putting elements together
in the attic It was just climbing the tower (@7m above ground) and
someone inside handing me the parts. 2 hours later after raising the
tower (@12m) I was on air..
SWR is as advertised except on 20m where SWR is higher at the upper
part of the band. This probably has to do with the fact that the
antenna is fairly close to the roof. I can see SWR vary on 20m when it
has rained when I turn towards/away from the roof. Hight of the
antenna is just 1m above the roof.

Just one thing to consider is that Mosley seems (sometimes) to have
trouble with deliverytimes. I was promised a deliverydate twice and
twice they said they were 'waiting for parts'. In all the antenna was
delivered 3 weeks late (Not too bad, but they should not make promises
when they know they can't keep them).

mail me if you need more info.

bye Maurice

I know there are several DX nets on HF. I am most familiar with a couple that are on 20 meter SSB.

I am interested in finding others. Is there a URL/website that has a list of DX nets that operate on SSB?

Thank you......Lee KA0FPJ

Hi Lee -- see URL:
http://www.ac6v.com/pagep.html
Has about 20 Hf DX Nets that I know of -- if you find more or outdated ones -- let me know -- will post.

During the past two or three WW SSB contests, I have had QSOs
with TM prefix stations. The various servers I've tried indicate that
these are French stations, but not even the French amateur radio
society has a listing for them. Can anyone clue me in?

TIA,

Pete.

Good morning,

Yes, TM is the generic special call french prefix. Just for 2 weeks
maxi. Short suffix are often used during contests but not always. And
we have to pay for special calls!

No, there is no list. Even the minitel server of the administration
gives only some calls if you can provide the dates of operation.

No the REF has no database :-(

Operators generally give informations to QSL manager lists. If you need
information on one or two TM calls, i can search for you .... :-)

73,

Happy Xmas and N.Y. for everybody,

See you in June, 6th with TM6J ...

(sorry for english mistakes!)

Maybe this is why it seems so hard to get a card back from some of the TM
contest
stations, especially via the buro. I have been thinking of skipping
working some of
these stations in contests because of the lack of return cards.

However, I will make a point to work TM6J!

73,

Mark W4GP

Yes as far as I know, but they are used for french departments and
territories overseas like TO for Guadelupe (i dont' remember the others but
hope Francis will keep you update on this). BTW, a TO2000 (FG - NA102)
station will be on the air from december 18th to january 4th. I hope the
operators will put their special calls on web sites or usual QSL routes.
TO2000 via ON4LCE for this one :-)

Mark,

I found to have qsl card back from contest stations in general is difficult. May be because they are often multi-multi stations and receive a lot of qsl cards proportonnaly to the number of contacts they made ? I don't have any answer... but I will tell french contest stations using special calls I know !

Bye,
Philippe

I think French administration is using prefix in order. Actually, TM is in use and only when all will be attributed, another prefix will take place.

TM is for France/Europe, TO is for DOM (Departements d'outre-mer), TX is for TOM (Territoires d'outre-mer), (TK is not a special prefix, it's the corsica!)

We had special event prefix in the past as FV (and perhaps HW also some twenty years ago, but not sure), and it was for long periods (months).

IMHO, we have too much special calls in France, and sometimes it's for just one or two hundred QSO in a local fest without interest for world people :-)

73,

Thanks for your very best web site :-)

Francis

Very good idea !
If one cannot handle huge pile-ups he should either learn how
to or let someone else do the job !

A LID with a very limited vocabulary...I just added you to my "ignore" list.

SSTV ops do not have exclusive rights to 14233. I can't tell you the number of times that a phone QSO starts on 14235 and only then does the SSTV start on 14233, so I have to wonder who's QRMing who.

Happy Holidays

Be careful what you ask for; I doubt the SSTVers 'army' is large enough
to beat 10,000 no-receiver clusterites yelling at DX0DX<grin>!

Actually, with the past behavior of some SSTVers when I've dared try to
run voice on 14.233, I'm not sure they have much to complain about.

Actually, we do it both ways depending on which segment of the band is in use. Usually, if the output is below 147MHz then the input is 600KHz lower; if the output is above 147MHz, the input is 600KHz higher. Sometimes, repeaters on 15KHz channels (146.025, 146.055, etc.) use the opposite offset though I think that's been mostly phased out. And finally, in some states 20KHz channels are used instead of 15KHz. (unfortunately, my mobile rig was designed in/for 20KHz states only, but I live in a 15KHz state. Which means I scan in 5KHz steps & listen to a lot of dead channels<g>)

Dear nohambull

I can tell by the way you signed your message, no name, that you are not a gentleman and the content of our message proves it.
Did you ever think of asking for people to QSY or consider that NO ONE OWNS a frequency or perhaps you should think about how many hams RESPECT the SSTV operations on 14.233 and politely stay clear of it. Before you indite the entire DX community you should STOP & THINK.

Harv,

I worked P51BH on 15 meter CW. While looking for the split (read: listening to the pile), I heard JA1BK calling as well! My guess is he just pulls a callsign from the pile and uses it. I've marked the QSO as "not valid for DXCC"--but the first rule is work them first, then figure out if it's real.

When Marti was in P5, I heard him on 20 meters--I had to laugh and did not even bother trying to call.

I give it a 99.9 percent chance the guy is a pirate.

Hello All

In the light of the recent VK0 ruckus,
do you have any suggestions / comments on a list of best
practises for operating from a rare DX location ?

Is there already an FAQ list for this somewhere ?

Merry Xmas to all

The book "Where do we go next", by Marti, OH2BH seems a good start. Not
a faq but you could learn a lot from the different stories told by Marti.

OK, David and Jan,

I must admit that your both comments about "us", not being constructive, raise a mixed feelings. The problem that I am seeing could be divided on several levels. Intellectual, personal, professional and amateur.
1.Intellectual, being capable to design and host such a good web page, Alan proves that hi is able to perform formidably as long as the subject interest him.
2.Yes, he is on the island to make a living out of it.Again it proves being serious at his prime task.
3.Amateur, if you carefully study the above points, with regret I have to state that nothing positive has been applied to his amateur operation.
4.No, I do not have Macquarie confirmed, and I doubt I will, with such "weird" approach.
5.There are bunch of good books about dx expeditions and way how he should handle the pileups.
6.for begging I suggest him to order, or should we collect money for Christmas gifts, by Martti Laine" where do we go next?", and Bob Locher (my favorite " The complete dx'r".
7.You are asking "us" impossible things as we do not know what is the level of Alan's amateur knowledge of propagation, technical knowledge (antennas), operating practices and finally level of devotion to his and ours hobby.
8.It looks to me that you are blaming"us" for his lack of management practices in pile up's?
9.How about splitting and spreading the pileup between 5-10 kHz up and never staying on the freq.. of the last worked sation, gradually, yes gradually going up and down between determined borders of pileup bandwidth!
10.What? Last two letters on cw? Jesus......

11.It is Christmas time, therefore om's, Healthy and prosperous Xmas, happy Y2K and see you on the bands.

No, Robert. It's entirely up to you to decide where you go and how you operate. *I* would go (and I did) on an expedition to have fun running a pile up. If you cannot handle a pile up there are many ways to avoid running one. 9X5HG for example never called CQ, just answered others and left the frequency after a QSO.

However, Alan's approach of blaming others for his ineptitude of handling a pile-up is a slap in the face of every serious DXer. On the one hand he is inviting everybody to work him, but pissed off royally after one minute of operating. Well, it's up to him to handle the mess and he ist most certainly welcome to work the way he does. But he cannot expect others to be happy about it. And claiming he is an experienced DX-operator is downright hilarious.

If he were smart, he would *not* give out an operating schedule but just appear on the band at his whim. His publishing of a schedule is an open invitation to the LIDs and, frankly, he deserves the mess he creates by himself. He only gets what he asked for.

> manage the pileup problem if you were in his
> snow-shoes ?

(I have no idea whether VK0LD is or is not following any of these; I don't get up early enough to have tried for this one) Hints for the casual rare DX:

1. Mean what you say! If you come back with "WB9??E 5NN" and W1AW calls, ignore the W1. Keep asking for the WB9 until either you get it all, or it becomes obvious you won't; in the latter case, do another QRZ? instead of returning to one of the out-of-turn callers. (similarly, if you decide to work by districts or geographic areas, you MUST NOT answer anybody in the wrong area.)

If you answer people who are calling contrary to your instructions, 90% of the pileup will immediately begin ignoring your instructions. You will have a huge bunch of continuous callers, and your chances of hearing anything are badly diminished. If the pileup does get out of control, and simply *will not* follow instructions, either switch to a different band, or shut off the radio and do something else for awhile.

2. Keep people informed. Give your callsign after EVERY QSO. (especially if you're working simplex and there's a good chance the pileup is masking some of your transmissions) If you're working split or by districts, say so EVERY time you finish a QSO. You shouldn't have to give your QSL information that often, but if you don't do so every minute or two you'll probably have a bunch of stations with the rather strange call "QSLINFO?" calling<grin>.

3. Work split. (but be reasonable about how much of the band you use for receive spectrum. "Reasonable" depends on how rare you are, but I would think for even the rarest expeditions 10KHz should be enough on CW, 20KHz on phone.) It's probably best to give one specific receive frequency, and then tune up (or down, if you prefer) from there until you find a copyable station or you hit the edge of the "reasonable" chunk of spectrum. Check your receive zone for existing QSOs before you start - really that should be the callers' responsibility (since they can interfere with stations you can't hear) but you can bet most won't bother.

It might be worthwhile to try listening *down*, below your transmit frequency. Especially on CW. It's almost never done - for no good reason - and if you do it, it'll take longer for the folks who try to

work DX they can't hear to figure out where to call.

By working split, most of the pileup can hear you reliably and copy your instructions. (whether they'll actually obey is another question!)

4. Work by districts. (but remember rule #1!) About 90% of operators (at least in North America) will obey your instructions, which will thin out the pileup considerably. It's probably best to work in numerical order, as many people will be listening, waiting for their district's turn. If you skip around, the less-well-behaved ones will start asking "what about sixes?"..

5. Do NOT ask to be spotted on packet. (it might even be best to specifically request that people not spot you) An unfortunate proportion of users will see a spot and begin calling on the specified transmit frequency. (or your transmit frequency, if the fact you're running split didn't get spotted) This, even if they can't hear you. (how they think they're going to make a QSO is beyond me) Even if everybody calling *can* copy you reliably, packet still causes the pileup to explode instantly. Let people find you the old-fashioned way, by tuning around...

6. Try not to sound like rare DX. On CW, most DXpeditions operate around 20-25KHz up from the bottom of the band, and at about 30wpm. If you operate considerably lower or higher, and/or at a much lower or higher CW speed, a lot of people will pass you by. On phone, make the QSOs a bit longer. Send the whole name, QTH, rig, weather routine - more, if you and the guy you're working feel like it. Few people will believe a rare DXpedition will say anything besides "59", so you can thin things substantially this way.

7. Have fun! The pileup isn't your job. (if it is, it isn't *amateur* radio!) If you're tired of working North American stations, ask for South Americans only, or "Any African stations on frequency?", etc.. Some operators have been known to simply answer other people's CQs, have a nice leisurely chat, and then ignore the inevitable pileup that ensues at the end of the QSO, and go find another CQ to answer. If you speak multiple languages, it might be worthwhile to try something other than English for awhile - the native speakers will probably be very happy, and it will definitely thin the pile!

Martti's book is certainly interesting reading, but the operating hints
are pretty well buried among the stories in there.

Actually, that's an area in which the USA licensing examination (and I
strongly suspect the examinations in just about every other country)
fall way short. You learn what the law is and enough technical
information to obey it, but you're usually never taught what you should
actually be doing with your license once you get it!

Yeah really! - but... since it isn't on the licensing exam (at least not in the USA), it's probably reasonable to assume a lot of "casual DXers" don't know why "last two" is evil. And since new DXers come through this newsgroup pretty regularly, it may be worthwhile to state what's wrong with "last two":

Quite simply, it's actually *less* efficient than using complete callsigns. If you're working a pileup "last two", the greatest number of letters you can possibly get out of any caller is two. Your chances of getting a complete callsign on the first try are ZERO, and the chances that the letters you did get will match more than one station (or will come close enough to matching that more than one station will call again) are very good. At the very best, EVERY station you work will have to give the last two letters of their callsign twice. If there's QRM or QRN at the wrong instant, you may have to ask them to send their whole call again - filling in letters you might have copied the first time around if they'd called with their whole call.

By working with full calls, there is a chance you'll get someone's complete callsign on the first try. Even if you don't, the chances that you'll copy more than two letters are very good.

Personally, I ignore last-two callers if at all possible. (so now the last-two caller in Europe who was calling me for about 20 minutes on 10m SSB late Monday afternoon knows why he never got through!) One should NEVER use last-two unless the DX station specifically requests it - and if you're a DX station, you shouldn't request it!

Doug,

>Martti's book is certainly interesting reading, but the operating hints
>are pretty well buried among the stories in there.

You are right, but I 'm not aware of any other book close enough to Dxpedition stories. One thing I remember in Marti's book is the use of "big amps" to master the pileup :-) Something like :"If you want to master the pileup, you have to be heard !"

>Actually, that's an area in which the USA licensing examination (and I
>strongly suspect the examinations in just about every other country)
>fall way short. You learn what the law is and enough technical
>information to obey it, but you're usually never taught what you should
>actually be doing with your license once you get it!

Same here, but you cannot ask the administration to tell you how to handle a pileup ;-) I mean, it is something you can learn only with experience, by running little pileups first (e.g a special operation for a national award...hum, from a european point of view :-). More you feel confident and more you can enlarge the audience. If one can learn with experienced Dxpeditionners, it will be better to learn tricks, propagation, antennas...

Even for standard QSO's, you have to learn by listening to others and if you have a question, the fellow experienced amateur can and must help you. I mean, lets the administration do their job and we, radioamateur, help each other to be better...

IMHO, of course :-)

Hello Doug!

You`re my man! :))))

>(I have no idea whether VK0LD is or is not following any of these; I
>don't get up early enough to have tried for this one) Hints for the
>casual rare DX:
1. Mean what you say! If you come back with "WB9??E 5NN" and W1AW
>calls, ignore the W1. Keep asking for the WB9 until either you get it
>all, or it becomes obvious you won't; in the latter case, do another
>QRZ? instead of returning to one of the out-of-turn callers.
>(similarly, if you decide to work by districts or geographic areas, you
>MUST NOT answer anybody in the wrong area.)

Yes! That`s it! Be persistent! If you say "Africa, please!" don`t let any
other call to interrupt!
Even if it`s your great wish!

>2. Keep people informed. Give your callsign after EVERY QSO.

Got a point! Lot of hams are in confusion when dx station tell its
call every ask-me-when. Sometimes, in my beginnings (abt 10-15y ago) it
could take almost half an hour! DX stn called me, we made a very good QSO,
actually, but, I missed one letter :((
Is it VQ9LX, i.e., or VQ9DX?

>3. Work split. (but be reasonable about how much of the band you use
>for receive spectrum. "Reasonable" depends on how rare you are, but I
>would think for even the rarest expeditions 10KHz should be enough on
>CW, 20KHz on phone.) It's probably best to give one specific receive
>frequency, and then tune up (or down, if you prefer) from there until
>you find a copyable station or you hit the edge of the "reasonable"
>chunk of spectrum. Check your receive zone for existing QSOs before you
>start - really that should be the callers' responsibility (since they
>can interfere with stations you can't hear) but you can bet most won't
>bother.

And You should also tell your rx freq, but no so often as your call sign.
I have a few DXs that they are on nn.nnnfreq and rx freq is at
"My-God-where-are-you"
Just "CQ from..." and just few stations answering at the SAME freq, but no
answers.
And no instructions from DX stn.

4. Work by districts. (but remember rule #1!) About 90% of operators
>(at least in North America) will obey your instructions, which will thin
>out the pileup considerably. It's probably best to work in numerical

>order, as many people will be listening, waiting for their district's
>turn. If you skip around, the less-well-behaved ones will start asking
>"what about sixes?"..

For me, the best way to work!
Especially if dx caller is real amateur, good man etc.
He want to work as many stations as he can. If you miss "your" part
(number), simply QRX and your number will be actual again. DX station made
its list, i.e. 10 stn with number 0, 12 stn with nr 1, 21 stn with nr 2.
etc. Then, it starts.. All other listen and they can get her/his name, qth
qsl info etc. Also, there`s no need to repeat DX call every now and then :)

But, as you say, DX caller has to be fair, not to give up any call.
On the other side, "WE", as luckey winners, have to be "full" of ham-spirit.
Nice work, indeed.

>6. Try not to sound like rare DX. On CW, most DXpeditions operate
>around 20-25KHz up from the bottom of the band, and at about 30wpm. If
>you operate considerably lower or higher, and/or at a much lower or
>higher CW speed, a lot of people will pass you by. On phone, make the
>QSOs a bit longer. Send the whole name, QTH, rig, weather routine -
>more, if you and the guy you're working feel like it. Few people will
>believe a rare DXpedition will say anything besides "59", so you can
>thin things substantially this way.

Yes, previous text were about ssb qsos. CW qsos are different stories.
Sometimes, let`s say "qrq" call is good solution, if DX stn has strong
signal (uotput power)
sometimes not. It depends (I THINK!) of situation, number of other stn that
they are waiting etc.
I suppose that long and slow DX call that never ends is not to interesting
for any other stn, but....

>7. Have fun! The pileup isn't your job. (if it is, it isn't *amateur*
>radio!) If you're tired of working North American stations, ask for
>South Americans only, or "Any African stations on frequency?", etc..
>Some operators have been known to simply answer other people's CQs, have
>a nice leisurely chat, and then ignore the inevitable pileup that ensues
>at the end of the QSO, and go find another CQ to answer. If you speak
>multiple languages, it might be worthwhile to try something other than
>English for awhile - the native speakers will probably be very happy,
>and it will definitely thin the pile!

Heh, Douh... Just what I want to say - you`re write! :)) Interesting!

The final conclusion is that pile-up, DX calling and other things had to
be - hobby!
Fun, good pastime, making friendship over the globe. I never knew other
languages, except, english, but, during my ham-life I start to speak Polish,
French, Romanian, German and little bit Japanesse!! Of course, in the
beginning just a little, and than little by little it was a nice
conversation! Especially if the other side talks - my, Serbian! :)))

Here`s situation: Russian sattions here. You can`t imagine how much `em you can hear!!
But, EVERY station that call me, or answer on my call is - wellcome!! It will get my name, qth, rpt and of course - QSL (Although I find a box with old, unsent cards :(((((((((few days ago)

So... My dear friends... Enjoy your radio and be human and real hams!

Have fun! Give a help to anyone who`s looking for....

And - most important: Send me 1200$. My address is.... :))))))))))))
Just kidding, of course!

Best regards from Yugoslavia, hope to meet you!

yu7uf, known as

UF

3883. Merry Christmas

Newsgroup: rec.radio.amateur.dx

Yes.

But I wonder the intelligence of those A-1 Op DXers who are so attuned to foreign cultures that they wish Merry Christmas to a station in Israel. Or perhaps the neutered "Happy Holidays" three weeks after the "Festival of Lights."

How many Chinese are Christian ? The chances of finding a ham who is is zero.

My favorite- last year a parade of goofs wished 9K2MU "Merry Christmas". At most Happy Ramadan... but do you consider a month of fasting "happy" ?

Then why are there DX Cluster Christmas greetings to stations in Taiwan floating acrosss my screen, wasting space ?

Better yet, why is that it's always some American making the mistake ?

Maybe the same reason why I have no problem copying all the idiots who send CW at 35 wpm, but then when I reply at 20 wpm I have to repeat my call at least two or three times.

No, it's not my antenna, I have no problem working DX at will.

Many, many U.S. "A-1" operators are just plain bad. Their bad operating often equates with an Anglo-American centered world-view that makes the enlightened laugh.

And to all a good night.

Part of the fun of dx pileups is trying to figure out how the dx op functions, even if he is a lid or a jerk. Wouldn't it be nice if we had an orderly organized pileup everytime a rare one comes on the air...but get real guys. We're just humans. Some of us are more experienced than others. Some of us are more patient than others. Some of us care about working as many rare ones as possible (I'm in this group), and others couldn't care less. I suggest that you view the operator's idiosyncracies as part of the challenging package and try to figure that part of the game. 'cause he isn't going to change if he doesn't want to. 73s and Happy Holidays to all fellow hams, experienced or not. John, K7JY, (dx hunter for over 35 years).

The two major religions of Taiwan are Christianity and Buddhism. Wish
a Buddhist a Merry Christmas and they'll smile and warmly say "thank-you."
If you knew anything about their religion, you'd realize they're not
insulted by such a greeting. I have many Buddhist friends in Hawaii.

>How many Chinese are Christian ? The chances of finding a ham who is is
>zero.

There have been hundreds of thousands of Bibles smuggled into China.
Christianity in China is practiced as an underground religion.

>My favorite- last year a parade of goofs wished 9K2MU "Merry Christmas".
>At most Happy Ramadan...

And suppose he wished you a "Happy Ramadan" in return -- would you
be insulted or thank him?

>Better yet, why is that it's always some American making the mistake ?

Why is it a mistake to wish someone a nice greeting? When a Buddhist
greets me with a bow with his hands together in a prayer-like fashion,
I return the gesture. Then I will reach out and greet him in the Western
manner by shaking his hand. This is sharing of each other's culture.
How you can find fault with that is beyond me.

>Maybe the same reason why I have no problem copying all the idiots who
>send CW at 35 wpm, but then when I reply at 20 wpm I have to repeat my

From: Green Chicken <grnchik1@juno.com>
To: dx-list@egroups.com
Date: Thu, 23 Dec 1999 16:49:32 -0500
Subject: [dx-list] Reflector News

Hello Dxers everywhere. This is your fine feathered friend Green Chicken
with hot news directly from the DX reflectors.

Alan, VK0LiD has been up to his neck in frozen penguin poop and creating
quite a stir on the DX-list reflector with his obnoxious messages and
operating practice. Says he is going QRT for good at the end of the
month. (Promises Promises) He requests that everyone call with their last
two, yet he calls certain parts of the world and specific call areas.
After the mess that this creates, he wonders why he can't control a pile
up. Reminds me of another Alan in Miami. Those two bozos need to team up.

Bernie, W3UR is upset over messages sent to DX reflectors by those who
choose to remain anonymous. He complained about this using grammar that
would get a third grader chastised. (Guess he didn't have his
proofreaders around) He got all bent out of shape when someone tried to
be helpful and point out his errors. He demanded that Jim, KH2D have
everyone give their name and call sign to subscribe. Oh well, the spoiled
brat didn't get his way, because Jim told him to "Hit The Bricks." He
pouted and said he was taking his ball and going home. Tried to take the
other kids with him to the other DX reflectors, where there are NO
anonymous messages.

Anyway, he's still there on the DX-list. Says he has found a way for
Netscape to filter out unwanted messages from the reflectors. He
especially didn't like Jack Schitt. I believe anyone who can read between
the lines knows that Jack was only helping Bernie, by drawing attention
to his article in Oct 99 QST pg 75. I'm sure many read his article, who
otherwise wouldn't have known about it, hadn't it been for Jack Schitt. I
must give credit where it is due, because it was a very good article,

which all who work the bands should read, because it points out how silly the practice of calling with the last two really is.

There are two sites on the web that also give good information about this matter.
www.qsl.net/kh2d/lizard/lizard1.html www.nolizards.org

Did you know that calling with your last two can get you ignored? Did you know that some will log you by your last two if you call that way? Good way to get a "Not In The Log."

Bubba, NA1I has found an excellent source for general amateur radio information. He discovered it while listening to Dr DX on 14.247. He learned of a way to find the source of the popping sound in receivers caused by utility lines. Read all about it at www.nolizards.org Go to The Inbox and scroll all the way down.

Until next time, this is Green Chicken signing off.

I know about it Cliff.

Of course, we'd be happy too at the end of a fast.

I was simply saying it's very stupid to wish a greeting that refers to a
Christian event to a Muslim.

That's not to say they'd be insulted nor return it.

It's just dumb.

Learn the right greetings and use them... sparingly.

An original poem.

Credit mf_luder.

==========

Twas the day after Christams and all through the shack, not a signal was stirring so I thought that I'd hack.

The bands were all dead and so were the hams, the younger folks couldn't give a damn.

About the "last two" phenomenon that Bernie's obsessed with or the top band reflector owner you just do not mess with.

These people began to think they could control the net, with moans about bandwidth, don't they get it yet ?

You're not on the air, you're not at the rig, on the net with millions, you're nobody "big". Your towers don't matter your power is less, no one cares if your signal sounds "best".

When out in the shack there arose such a clatter, I sprang from my shack to see what was the matter. I turned on the rig, to 3950, it being Saturday, the chatter was nifty.

There was a fed, working overtime, trying to sell the Clinton line. No disputes, Prozac rules, free breakfasts and vouchers for magnet schools.

We fixed Y2K, we think it might be, just in case, say 73. Riley has ordered this frequency clear, picking the libertarian one from considerable fear.

That the lights will go off and 1AW will be left, in the midst of staight key night, keyer batteries bereft. A-1 ops will be confused, unable to send, their QSO's 599 CT again and again.

They claim to be technologically ahead, but how can that be, when CW ops want PSK31 strung from a tree. So they will continue from Newington, that night, to use CW despite what is right.

Ten years it's been, when renovations did end and I know that I heard it again and again. Donations, donations, we need your reserves, now a decade hence I see they had nerve.

Who uses ASCII, RTTY is old, why can't these old farts break out of the mold ? "The station will incorporate new digital modes for HF " 'twas said, but judging by Baudot I think the idea is dead.

So shall we see come six nights hence, for if they are needed, slow speed t'will make us wince.

Mike,

Are Nohambull and ND8VMike the same person? It's odd how both of them are in Kalamazoo, MI; both use my-deja-com to post; both loath DXers; and both like to post in all capital letters.

Since Nohambull (you?) refused to post any facts (he did post a nice 4 letter word though--not overly intelligent, but a least a complete thought) I did some research of my own. It appears the 7P station was on 14235 running simplex. I can imagine what the pileup sounded like. Having run SSTV, I know the mode is not very forgiving when it comes to QRM (seems like a mode better suited to 2 meter FM or the perhaps the 17 meter phone band). With today's crowded band conditions it's difficult to find 6 kHz of free space on 20 meters. Can you imagine what will happen if (when?) the FCC allows slow-code (no-code?) HF?

Were you on 14233 before the 7P started or did you decide you needed 14233 after the 7P started? Again, why not post the facts so we can decide.

Maybe this will make him happy:

Please accept with no obligation, implied or implicit, our best wishes
for an environmentally conscious, socially responsible, low stress,
non-addictive, gender neutral, celebration of the winter holidays,
practiced within the most enjoyable traditions of the religious or
secular persuasion of your choice, with respect for the
religious/secular
persuasions and/or traditions of others, or their choice not to practice
religious or secular traditions at all . . . . .

and a fiscally successful, personally fulfilling, and medically
uncomplicated recognition of the onset of the generally accepted
calendar
year 2000, but not without due respect for the calendars of choice of
other cultures whose contributions to society have helped make America
great (not to imply that America is necessarily greater than any other
country or is the only "AMERICA" in the western hemisphere), and without
regard to the race, creed, color, age, physical ability, religious
faith,
choice of computer platform, or sexual preference of the wishee.

(By accepting this greeting, you are accepting these terms. This
greeting
is subject to clarification or withdrawal. It is freely transferable
with
no alteration to the original greeting. It implies no promise by the
wisher to actually implement any of the wishes for her/himself or
others,
and is void where prohibited by law, and is revocable at the sole
discretion of the wisher. This wish is warranted to perform as expected
within the usual application of good tidings for a period of one year,
or
until the
issuance of a subsequent holiday greeting, whichever comes first, and
warranty is limited to replacement of this wish or issuance of a new
wish
at the sole discretion of the wisher.)

I would buy an upgrade if...

1. Support was added for marking multiple records for deletion according to criteria.
2. A method was provided for exporting partial sections of the log. (maybe the contents of the browser window?)
3. Country/W was corrected to make it possible to change the prefix of a country. (when I try to do this, it adds a second record for the country with the new prefix - if I then try to delete the original country, it says there's nothing to delete...)

(forgive me if these have been addressed since version 3.0!)

I have walked away from it! I agree that he's not on a dxpedition. But, the tone of his pages is unnecessarily rude. In a perfect world, it would be great if there were no pile-ups and we could all have pleasant, extended conversations with Kevin or anyone else in an exotic location. Indeed, as a meteorologist also, I'd love to talk to him about what he's doing on the island and what, scientifically, he's learned.

But, this is the real world and for better or worse the existence of DXCC makes Macquarie a very desirable contact. Kevin certainly appreciates this, but has bizarre operating procedures and a "nasty" streak as evidenced by his childish "penguinator" pages. While I don't agree always with KH2D, I believe that his earlier web pages on the VK0LD operation were right on target. Kevin's kind of behavior doesn't belong in amateur radio. He's creating a lot of bad feeling among, what I consider, responsible level-headed operators by his behavior. I agree that there are a lot of people who make DX pile-ups a mess and don't listen to instructions. But, reasonable operators can control these situations and still make contacts and even have extended non-DX QSOs if they desire, without the necessity to publish vindicative black-list web pages.

I see things a little different. The way he speaks on his website makes him look like the perfect operator (I have worked from numerous DX locations, QSK etc.). From what I heard, his way of working is inept up to the point of making no QSOs at all.

And that makes his way of speaking out on his webpages unnecessarily rude. If he wanted to look like a pro, he should act like one.

Hi Doug,

The plan is to fix all the LogWindows outstanding bugs, while adding enhancements to the program at the same time. This will include many of the suggestions that you and other hams have given over the years, as well as some ideas from SCO and Timewave.

We're also planning to move the program to Windows 32 bit code.

We'll be making upgrade pricing annoucements next week, I think you'll be pleased with our pricing and upgrade policy for LogWindows 3.06.50 as well as the future 32 bit version.

Thanks to all for the responses to my earlier post. I guess my problem is even more basic than I knew. On my YB400PE, I have a selector switch for SSB On or OFF, I have the digital tuning buttons and I have a tuning knob for fine tuning (+ or -). But I don't find any BFO or LSB/USB selector switch anywhere. Any YB400 owners out there that can lend some insight?

Thanks again.
Steve

For Sale JPS NIR-12 Noise and Interference Reducer, serial number 012561.

Dual 40mhz TMS320C26 DSP chips. Connect between speaker out and speaker/headphones.

Has SDK-12 serial port option with EPROM to provide computer control and display of audio spectrum. Includes SDK-12 software.

Have Instruction Manual for SDK-12, you can get a NIR-12 manual if you want one from JPS for $5.

$200 in the Washington DC area. Shipping and COD extra. Email khufford@erols.com or 703-494-3063.

I think Alan is a guy trying to do his job and help a few Deserving DXers
in the process.

His "nasty" behavior reflects that he has been rare DX before and he knows
what can happen.

He's the one in charge here. If you don't like what he does, you can always
turn off your rigs. I appreciate his web page telling us how to work him.
That's new, as far as I know.

This is a hobby, after all!

I'm happy that most hams are more tolerant and less thin-skinned than this implies. I worked a number of stations on Christmas Day, and was wished a "Merry Christmas" by a ham in a predominantly Islamic country, who from his name I would assume was Muslim. I thanked him and wished him a "Blessed Ramadan," but I certainly didn't get the impression he would have been insulted by "Merry Christmas," any more than I would be insulted if a Muslim ham wished me a "Blessed Ramadan."

What's more, I heard a Jewish ham from the U.S. respond to a greeting of "Merry Christmas" by explaining that while he was Jewish and didn't personally celebrate Christmas, he really enjoyed it because there was so much emphasis on families being together.

All day, I didn't hear anything other than good will and tolerance. Even 14,313 seemed civil when I tuned past it a couple of times.

Very good.

> We're also planning to move the program to Windows 32 bit code.

That could be a problem, as I'm using a 486/Win 3.11 right now...
Actually, I already have plans to upgrade that machine to P-166 and
Win98. I wonder, however, if it might be a bad idea to make it an
exclusively 32-bit program? Hams are somewhat more likely than the
average user to be using older hardware - heck, I know several folks
using DOS-based programs.

>web pages.

Man did you ever say a mouth full there Rick. Might make for a good topic on "What Not To Do From A Rare DX QTH" in QST. Seems like it would fit right in on Bernie's subject of "Cleaning Up The Bands".
But alas, we can't tick off the DX now can we? Sorta like that old phrase of "The customer is ALWAYS right". But I went to different school. They always taught you to "Tell the customer to go to blazes and then make him happy and looking forward to taking the trip".

On Thu, 30 Dec 1999 aa5f@scott.net writes:

>
>I think Alan is a guy trying to do his job and help a few Deserving
>DXers in the process.

Tell me and the others here Jim just exactly "who" is this group
that is so deserving? Ain't no "deserving" to it man, wake up and
smell the coffee for goodness sakes. You are either lucky enough,
skillful enough, or equipped well enough to work the DX. Period.
Nothing else to it. I can name you many a DXer that has worked
gobs of DX yet you would be the first one to say that they are not
part of this so called "deserving" group.

What you seemed to have done is take the idea that one author had
about a perfect world where DX is always there for the "Deserving"
and "Lids & irate QRP DXers" always get their just rewards, and
then believe that it is actually part of this whole "real world"
idea about working DX. That's like living in LahLah Land with rose
colored glasses on Jim. Ain't no such thing or animal.

[then aa5f@scott.net writes]:
>He's the one in charge here. If you don't like what he does, you can
>always turn off your rigs.

Now you did it again. About the only thing Alan is in charge of is
fixing the radio equipement down there and collecting penguin poop.
When it comes to the "game" of DX, the only thing that is in charge
of anything is the Propagation Umpire. I can get my Cracker Jack
Box Sticker (as KH2D calls them) with a QSL from WA4JTK's DX net
as long as the Umpire calls the propagation in my favor. Deserving
DXer my granny's GI boots.

Now let us put this VK0 stuff into perspective. Lots of guys out
there that want (not need) to work VK0 for their DXCC award. I can
go along with that and more power to them if that is what they like
to do. More power to them if they would rather work them on WA4JTK's
net too. Hey, do what you like the way you like it as long as its
not QRMing or any of that CBing on 10 meters stuff.

But if Alan is any sort of DXer in the first place, then he most
certainly has *heard* how its done by the real Pros. And being the
great Penguinator Pooper Scooper, he most certainly has seen
enough web pages by many fine DXers to know what not to put
on one. He most certainly should know what a real DXer should
do and not do when it comes to getting the "Masses" angry at you.

Because once its done, to late then because "that's all she wrote"
when it comes to openning up a can of worms.

But there is hope for even someone of Alan's habits. Being as how he
is down there where so many want a QSL card from, he can still go from
Zero to Hero (as KH2D put it so well). For starters, can the web pages,
black list and any other such workings that are usually associated with
the word similar to my family's last name, Schitt. Next, get someone to
post (which he already has) operating times & frequencies for him
and just do it like its supposed to be done. Forget this idea he seems
to have about "you operate the way I want you to or no QSO". Just
get in there and work them. No if's, and's, or maybe's about it.

When its no longer any fun running away from the guys trying to track
your listening habits, turn off the rig and come back when it is. Turn
the rig off a whole week and then get on Saturday vowing to work
as many as possible as fast as possible. Then next day just answer
CQ's and have nice enjoyable chats. The only way he will control
the masses is to feed them the meat. If he doesn't feel like feeding
the dogs then don't. But when he does decide to feed them, then
don't think you are going to get in that pen and say, "this piece
is for you Rover, and this piece is for you Ol Blue." Once you feed
the "Alfalfa using tall tower" Males, then you can feed the other
less dominate dogs in the pack with no problem.

Guarenteed he will go from Zero to Hero in the DX circles if he does.
The Legion of Hand Wringlers is always willing to forgive & forget
unless you pull a Romeo. Son of Gun! Why didn't he think of that!

But this crapola about it being ONLY "the guys on the other side of the
pileup's fault" is just that, Crapola.

Source record: 22474

I have a used Cushcraft R7 laying on my roof. I also have a BRAND NEW GAP Challenger DXVII that I never sold. I am thinking of sticking one of them on my 60 foot tower. Any comments as to which is a better antenna? I know the GAP has the advantage of 80 meters (I like that idea), but is it worth installing a NEW GAP antenna. I was thinking of using the tower for the GAP counterpoise if I went that way. I'd prefer to stick with the Cushcraft, as I could then sell the GAP since it is unused (NOS).

Any advice is welcome.

From: http://www.activewindows.com

We have recently discovered that Tony Blair (the Prime Minister of Britan) and the British Government are developing a new initiative to establish a universal time standard for global e-commerce, Greenwich Electronic Time (GeT).

Obviously, this will simplify Internet communications and commerce by putting Internet activities on the same time clock. British government hopes that GeT will be the virtual equivalent of Greenwich Mean Time (GMT), which was established in 1884.

Hi Joe:

I'd suggest you use your tower for VHF/UHF applications where height above ground matters. Or consider a HF beam.

A few years ago there was extensive testing of the R3/R5 vertical antennas and it was found that height above ground made essentially no difference at all.

What did make a difference was power. Putting about 300 to 500 watts into these antennas made a big difference is how long a QSO was apt to last. I interpreted it as being that for receiving, they worked quite well but for transmitting, the traps are lossy. So overcoming the loss with a power level of about 400 watts made it balanced for very reliable communications.

I run a R5 and its on a ground mounted mast where the base is about 3 feet up in the air. With a TL922A, I can keep the traps warm and it gets out very well.

"Jack",

Your posts would be a lot more effective if you'd use your real name and callsign. Why are you hiding behind a silly pseudonym? Your recent posts have actually been generally more coherent than many others who don't post anonymously. Join the real world and participate in these debates, rather than lurk like the many others who have grudges on the other amateur radio newsgroups.
I'm reminded of something that my fiancee tells me: if I can get steamed up about something going on in a hobby (i.e., amateur radio), then I have way too little real stuff to worry about! Like many, I guess that I take DXing a bit too seriously at times.

Happy new year!

3929. grid dip meter useage question.....

Newsgroup: rec.radio.amateur.dx
Date: 1999-12-31 00:00:00 UTC
From: sjcduke@aol.com
Message-ID: <19991231095340.22391.00000208@ng-fu1.aol.com>
Source record: 22481

I have a military grid dipper..the AN/PRM-10

I have a bit of experience with it.

However.....using it for one wave-length wire loops has me puzzled.

I want to use it to help me cut a bare, solid copper 12 gauge wire to the correct length. I want to make a loop of wire....one wavelength long.......a continuous, unbroken loop.......at 146 Mhz. Lets say that I start with my wire loop obviously too long, so I have the ability to trim the circumference of my loop. Lets say I start with a loop of 86 inch circumference.

For 146 Mhz....one wavelength loop...at what freq on the dipper should I look for a dip? Is it possible to get a dip, at the fundamental one wavelength freq...., in a continuous loop? Or should the loop be broken....to dip?

I have tried to dip both a continuous, unbroken 86 inch loop, and a "broken" 86 inch loop. I ** DO NOT** get a dip anywhere near 146 Mhz........ What do I need to know here? I think maybe it has to do with 1/4....3/4....etc.......wavelengths? Or harmonics.......?? Broken loop versus unbroken loop?? How....PRECISELY......do I use a dipper to get a one wavelength unbroken loop of wire at 146 Mhz? An unbroken loop of wire, resonant at 146 Mhz, is what I seek.

Thank you.....

I've managed to answer my own question, thanks to an article on zdnet.com. The official GeT web site is www.get-time.org. From what I can tell, GeT=GMT. This seems like a pretty obvious concept. We hams have been using GMT for years. I'm not sure I understand all of the hype about GeT.
